There will also have to be changes in the banking laws governing private banks if the U.S. is to compete. Many of the restrictions placed on banks—stopping branch banking, separating commercial and investment banking, limiting S&Ls to home mortgages, preventing lenders from placing representatives on boards of directors of the firms to which they lend—will have to be removed. Whatever the relevance of these laws in the past—most of them were passed in the 1930s—they are simply irrelevant and harmful in the international competition of the 1980s. All of them lead to a reluctance to provide debt capital for the expansion of industrial investment.

Many observers have criticized the idea of a national corporate investment committee on the grounds that it would be used to prop up old sunset industries that are better left to die rather than to help new sunrise industries. No doubt there is a real danger. Yet if this criticism is taken seriously, the conclusion is incredible pessimism about the ability of Americans to compete and adjust to new economic facts of life. The critic is saying that the country cannot compete in international markets as they are now organized, and that America is so incompetent that it cannot reorganize itself to compete. Maybe this is a correct diagnosis, but it would be a shame to accept such a diagnosis without trying to overcome the real difficulties in the way of an efficient industrial policy.

The problem is also not as difficult as it is made out to be. Obviously no one can pick the industries that will be America's sunrise industries 15 or 25 years from now. But, fortunately, that isn't the problem. The problem is to aid today's sunrise industries so that they remain sunrise industries for as long as possible. One does not have to have perfect foresight to know that semiconductors are a sunrise industry. The problem is to keep it a sunrise industry. And if you really think that Americans are so incompetent that they cannot pick sunrise industries, then you can of course simply use the Japanese list.

The problem is also not a government problem. The trick is to use the knowledge of private economy, labor and management, plus the knowledge of government to determine where America is going and how it could get there more efficiently. I suspect that if you asked those three groups to list the country's growth industries, you would have remarkably similar lists.

An industrial policy also isn't one of likes and dislikes. You may prefer a free-market economy where government is not involved in "planning" the directions of the economy. You may wish that the rest of the world were willing to play that economic game. But it isn't. As the semiconductor industry indicates, we may have no winners if we aren't willing to change our methods of playing the economic game. The market will kill our losers, the Japanese and Germans will kiss our winners, and we will gradually settle into a second-rate economy. We may fail in spite of our attempts to build an industrial policy, but we will certainly fail without an industrial policy.

Within that category of options called industrial policies there are two broad choices. Policies can be built to help losers or winners. The correct solution is to have a social safety net for helping the individuals who are hurt when losers fail and an industrial policy for insuring that America has sunrise industries into which individuals can move when their old jobs disappear.

An industrial policy designed to prop up dying industries is a route to disaster. We need only look at the countries that have tried—Britain and Italy. No one can make it work. There are usually good reasons why an industry is a loser. Its market is shrinking or the industry has lost its comparative advantage to some other nation or region of the world. But the British at least adopted a policy of propping up losers when no one had failed in the attempt. We do not have that excuse. We have only to look around us to see that it does not work.

Additional problems of a bail-out strategy are clearly seen in the case of Chrysler. Automobile manufacturing is not a sunset industry. The industry is simply facing a difficult shift from large to small cars. But, in such a shift, marginal, poorly-managed firms will be the first to fall. And Chrysler is such a firm. By propping it up, the government prevents other American firms, such as Ford, from buying its viable small-car facilities. This gives America one very sick and one slightly sick car company rather than one healthy car company. And it does nothing to help those people who work in the old, unviable Chrysler plants. Those plants will be shut down regardless of whether Chrysler does or does not survive as a company.

What is more, we won't have a really effective bailout strategy. One can argue that zero is the right Chrysler loan guarantee or that $5 billion is the right loan guarantee, but $1½ billion is clearly wrong. It is enough to prolong the agony, but not enough to cure the problem. Chrysler will have to come back for more. It may get more, but getting $5 billion in small lumps, with great uncertainty, is not the same as being able to plan on $5 billion in additional resources.

If we are talking about real losers, such as textiles, the difference in the strategies is clear. Productivity and real standards of living rise by getting into new high-productivity industries and getting out of old low-productivity industries. If the latter are protected, this stops labor and capital from leaving these industries and flowing into new industries. In addition, the bailout funds must come from somewhere—and they usually come out of funds that otherwise would be available for new industries. This leads to a slower growth for the sunrise industries and a lower real standard of living.

In general, the shift from sunset to sunrise industries does not mean the complete elimination of any industry. The American steel industry may stop being a large supplier of millions of tons of raw pig iron, but it becomes a supplier of high-technology specialty steels. In the process it may become much smaller in terms of employment, but it does not go out of existence.

Nor need the shift result in permanently-depressed regions of the country. The two industrial states with the lowest unemployment rates in the fall of 1980 were Texas and Massachusetts. New England is a prosperous region because it got out of its old, dying industries and into new growth industries. If Washington had protected New England's old, dying industries, New England would still be depressed. It is correct to point out that New England went through 40 years of economic pain before it made that transition. But the correct answer to this is a national policy for aiding individuals and speeding up the transition. To prop up dying industries will only prolong the pain. Whatever government does, they will in the end die.

When a firm moves from Ohio to Texas, the nation does not suffer an economic disaster. Texas, which is after all part of the same country, grows; the new workers get new higher paid jobs, and those remaining in Ohio do not in the long run lose. This is clearly seen if you look at per capita income growth from 1977 to 1979. If you look at the 10 states with the worst performance, the bottom five (Alaska, Maryland, Hawaii, Utah, and Idaho) are in what is usually called the sunbelt. Mississippi, Alabama, and Kentucky also turned in below-average per-

formances. Similarly the top ten performers contain 4 frostbelt states (North and South Dakota, Iowa, and Indiana). And only one state in the Southeast (Florida) is even in the top ten. The economic recovery of Massachusetts is the rule and not the exception.

Real factors, mostly energy costs, are dictating a shift in the location of manufacturing activity. This is a shift that we stop at our own peril. If we stop it, we simply won't have a prosperous country. Ohio will be slightly larger and Texas slightly smaller in terms of population, but both regions will have lower real standards of living.

Given the demonstrated failure of an industrial policy designed to aid losers, the only question is: Can you design an efficient industrial policy to aid winners? This policy would have to be modified as experience teaches us what will and will not work in the United States, but it should start with a small group of people who have the right to extend government loan guarantees to firms in industries such as the semiconductor industry.

This national "corporate investment committee" should be made up of recently retired businessmen, labor leaders, and government officials from the congressional and administrative branches of government. Recently retired officials should still be young enough to be vigorous yet have the necessary information upon which to act while at the same time not having direct self-interests.

Their task should not be to tell sunrise industries what to do, but to ask sunrise industries what they need to be more successful than they are. The answer may be capital, and in this case the committee would have the power to offer debt capital at market rates of interest. This would protect the taxpayer—since he/she would own the corporation's assets if the firm went broke—and would not let firms acquire capital at less than market rates of interest. These firms are, after all, supposed to be some of the most profitable firms in the economy—but firms that cannot grow as fast as their foreign competitors because of their ability to acquire debt capital, because debt-to-equity ratios that are considered normal in Japan or Germany are considered abnormally risky in the U.S.

The firms might say that they need something else—changes in anti-trust regulations or environmental regulations—to be successful. In thise case, the committee's job would be to evaluate the costs and benefits of that request and, if convinced that the costs exceeded the benefits, to recommend the changes to the larger society and political process. To some extent, committee members would be a lobbying group for the sunrise industries of the economy. In this they would be a counterweight to the large lobbies that always support the sunset industries. Sunrise industries do not have large vested interests behind them until they are already large.

Perhaps it will prove impossible to make a "winners" industrial policy work in the United States. If so, the United States' day in the economic sun simply will have come to an end. But not to try will guarantee that the economic sun has set. The sun is now setting—the economy is not performing as well as that of our neighbors, allies, and competitors. It is our task to reverse this process.

RESEARCH AND DEVELOPMENT

While it is not possible to trace much of the decline in productivity to declines in research and development—the productivity decline began well before the cut-back in research expenditures in the early 1970s. The time lags between research and productivity are so long that the cut-backs of the early 1970s probably have not yet had a chance to affect the system—our economic competitors do not spend as much or more on civilian research and development than we. Previously we were far out front.

While foreign analogies should be treated with caution, it is instructive to think about Japan's success with process innovations. Japan has not been a leader in new products, but it has been a leader in better processes for producing old products. This springs from the absence of a sharp dividing line between public and private—the public is willing to finance process R&D within a firm even though that will help the profits of a particular firm—and a willingness to engage in process R&D. But, to do this, the Japanese must take revenue away from the Japanese taxpayer and give it to Japanese firms. We are reluctant to invest in process R&D because the beneficiaries are too obvious.[12]

Some way must be found within the American context to subsidize process R&D rather than concentrating expenditures in basic research or new products. Perhaps a system of compulsory cross-licensing of the benefits is one of the answers.

HUMAN CAPITAL INVESTMENTS

Interestingly, human capital investments have almost slipped out of the discussion when it comes to stimulating productivity. President Reagan is even cutting back on many of the training programs that would formerly have been considered part and parcel of any program to raise productivity.

This occurs for two reasons. First, with very slow economic growth the economy seems to have surpluses of all types of labor. While the surpluses do exist they would disappear quickly if rapid growth were to start. Two, there is general surplus of college educated labor. Everyone is familiar with the newspaper story of college graduates without jobs. Here, again, while there is a general surplus there is a shortage of engineers.

While salaries and job opportunities will eventually cure the engineering shortage by persuading students that they should shift their majors to engineering, there is a role for government in preserving the educational base of science. Because of job opportunities and low salaries, high schools are losing their ability to teach mathematics and science at an alarming rate. There is also some current evidence that the situation is now spreading to colleges and universities. Better job opportunities and salaries persuade actual or potential faculty members to leave for industrial jobs. But this leaves colleges and universities without the ability to expand their teaching of scientific subjects.

The solution is generalized support for scientific education such as that we had after the Sputnik success in the late 1950s, but have since dismantled. When it comes to investments in humans, supply-side economics has meant actions to cut back supplies of trained labor.

But the real skill shortages come not in those areas where skills are acquired in formal education, but in the high-skilled blue collar jobs, such as tool and die makers or machinists. These skills are in short supply because of the on-the-job training process that produces them and the recent history of slow growth. On-the-job training slots only open up when new jobs are being created. If there is a period of slow growth, training automatically slows down. But since these skills take several years to learn, the supply of skills cannot expand as fast as the economy when economic growth finally starts. No firm trains workers in anticipation of future growth because the training is expensive, because workers may leave for other employers, and because every firm thinks that it can get the skills it needs by pirating workers from other firms. But this latter option obviously cannot work for everyone in the aggregate. Stop-go economic policies produce much slower rates of growth in these skills and the resulting shortages reinforce the stop-go economic policies since, with an inadequate supply of skilled blue collar workers, the economy quickly runs up against inflation producing supply bottlenecks.

To eliminate this problem the government is going to have to achieve some smooth sustainable growth path or institute some program of training subsidies to keep training going during economic slowdowns. Since the first is unlikely, the latter is almost a necessity.

ADMINISTRATION ATTACKS JAPANESE PROTECTIONISM

● Mr. HEINZ. Mr. President, at a recent hearing of the Trade Subcommittee of the Finance Committee, Under Secretary of Commerce Lionel Olmer made an excellent statement summarizing with extraordinary clarity the sustained effort by the Japanese Government and private sector to close their markets to U.S. exports.

A number of us in the Senate have been speaking out on this problem for some time and have been growing increasingly impatient with the lack of progress in opening up Japanese markets despite sustained talks over two administrations.

This year's U.S. trade deficit with Japan threatens to grow to $15 billion, and I am pleased to note that Under Secretary Olmer, like myself, appears to be running out of patience with the un-

willingness of the Japanese to take any meaningful actions to reduce this deficit through increasing U.S. imports. Mr. Olmer indicates, quite properly, that our preferred policy is to increase U.S. exports to Japan rather than to restrict their access to our markets. If there is no progress soon, however, I believe many of us in the Congress are going to start considering appropriate means of retaliation and market limitation. Talk seems to have gotten us very little in terms of reciprocal market access. The time for action is fast approaching.

Mr. President, I ask that Under Secretary Olmer's statement be printed at this point in the RECORD.

The statement follows:

STATEMENT OF LIONEL H. OLMER

Originally, I had prepared a short oral statement which covered essentially the same ground as the statements offered today by Ambassador Macdonald, Mr. Dederick and Mr. Hormats. Let me, Mr. Chairman, spare you and the Committee, this redundancy and tell you what is foremost on my mind as we discuss the auto issue.

The trade situation in autos and auto parts between Japan and the U.S. is symptomatic of the larger problem in our trade relationship with Japan—that is, the enormous U.S. trade imbalance with Japan, which this year will exceed $15 billion, and unless present trends are changed could reach as high as $50 billion by 1990. In autos and auto parts alone the U.S. trade deficit with Japan in 1981 will exceed $10 billion.

Before identifying the root cause of the Japanese surplus, some explanations must be eliminated.

These staggering trade deficits with Japan are not in general the result of lack of competitiveness of U.S. products. Even highly competitive U.S. industries are denied access to the Japanese market.

It is not caused by the strong U.S. dollar or high U.S. interest rates. The growth of the U.S. deficit predates the strong dollar, and Japan is simultaneously running a proportionally larger surplus with the EC, where currencies have been weak.

It is not caused by U.S. apathy in developing the Japanese market. The U.S. has a substantial 34 percent of the Japanese market for manufactured imports. The problem is that Japan does not import much in the way of manufactures. We have a large share of a small pie.

No. These are not the reasons. The fundamental reason for Japan's surplus is a profound inequality in our access to the Japanese economy. This inequality is caused by long-standing Japanese policies and practices which encourage exports and discriminate aganst imports. It is caused by a pervasive bias against imports at virtually every level of private government decision-making. It can only be solved by timely, effective and fundamental change in these policies by the Japanese Government.

This is the basic message Secretary Baldridge and I conveyed to Prime Minister Suzuki and other Japanese leaders on our recent trip to Japan. We made four key points:

The imbalance is becoming a political issue which threatens to affect our total relationship.

We do not seek to redress the imbalance through restrictions on Japanese imports, but rather through an expansion of U.S. exports to Japan.

The Administration and the Congress are equally concerned and united in their insistence on effective Japanese measures. The letter we delivered to Prime Minister Suzuki from 31 members of the House Export Task Force was an effective expression of the depth of Congressional concern. I would like to introduce this letter for the record.

Finally and most importantly, the time for talk is over. The time for action on the part of the Japanese is now.

We are running out of time to postpone the hard choices. We cannot accept emergency or limited piecemeal concessions. We need:

A measurable and sustained increase in Japanese imports of U.S. manufactured goods including autos and auto parts. Although Japan is the second largest economy in the free world, its imports of manufactures are about equivalent to those of Switzerland. Japan's imports of manufactures on a per-capita basis are the lowest in the industrial world.

A dismantling of the web of blatantly protective devices around Japan's agriculture.

A reduction in some of Japan's remaining high duties on manufactured goods.

Elimination of the permissive treatment of business cartels in Japan and the informal industry clubs which restrict imports and sustain uncompetitive Japanese industries. These devices keep out competitive U.S. exports, even though the U.S. export prices are substantially lower than domestic prices in Japan.

Opening up Japanese high technology development programs to genuine market competition, including the participation of foreign firms.

The U.S.-Japan economic relationship—the single most important economic relationship in the free world—is clearly in serious trouble. The problem has been developing for well over a decade. With a $20 billion deficit looming for next year, we are running out of time for discussion.

Our economic relationship has not been conducted on a fully reciprocal basis. It should be. Our trading relationship must afford us substantially equivalent competitive opportunity.

The time for a genuine and effective Japanese response is now.●

REAGAN URBANOMICS

● Mr. TSONGAS. Mr. President, the Reagan administration is preparing a grim Christmas package for urban America.

For the past 3 years, our older distressed cities have undergone major reductions in Federal aid. They are still reeling from their disproportionate share of the recent budget cuts. They are trying to survive despite massive layoffs, tax increases, service cuts, and abandonment of major capital investment and repair projects.

The latest budget proposals call for the elimination of Federal housing production programs for low income elderly and families and for the elimination of two highly successful and important community and economic development programs for distressed cities—CDBG and UDAG.

In short, this is the first administration since the Depression to attempt to overthrow, by budget fiat, our national laws, programs and policies calling for decent housing and viable communities for every American. If these proposals are enacted, they will end the Federal role in urban America, and threaten the survival of every major city in this country.

Perhaps the importance of this "urban policy"—which one official has aptly termed our "domestic Bay of Pigs"—is best seen through a comparison with the frightening picture of our economic ills.

The latest unemployment figures were released just today. The administration that promised economic growth, reindustrialization and jobs has the following record of accomplishment after a year in office. The national unemployment rate is 8.4 percent—the highest since the 1974 recession.

Unemployment in this country has risen by 1.5 million since July. Unemployment has risen by one-half million in the last 30 days.

Three-quarters of the 4-month increase is due to job layoffs.

There are now 9 million Americans out of work.

The male jobless rate is 7.2 percent. The all-time post-World War II high is 7.3 percent.

Teenage unemployment is 21.8 percent.

Black unemployment is at a record high of 15.5 percent.

Given an 18.2 unemployment rate in construction industry, the administration is considering elimination of Federal programs which assist in the new construction, rehabilitation or modernization of housing for the elderly and for poor families.

Given the worst national unemployment rates since the last recession, the administration is going to eliminate the action grant program which creates 155,000 new jobs a year at a one-time cost of $6,838—far less than the cost of supporting the unemployed through welfare rolls. Three-fourths of the unemployment since July is due to job layoffs, but the administration wants to abolish UDAG, which has retained 109,000 jobs in 3 years.

These proposals are more than misjudgments. They are economic nonsense.

Let us look at the blueprint for the destruction of our older, poorer cities which is reportedly being drafted by the executive branch:

HOUSING

Public Housing development, public housing modernization, section 8 new construction and substantial rehabilitation would receive zero funding in fiscal year 1983. In addition, all 1982 funds for these programs would be rescinded. Prior year funding awards would be recaptured from the housing production pipeline, and 50 percent of these funds would be rescinded.

Operating subsidies for public housing would be reduced to about one-third of actual need.

Finally, the section 8 existing housing program would be replaced by a different voucher system, with great reductions in the number of clients served and the amount of housing subsidy provided.

The fundamental basis for our national housing laws, programs and policies is set forth in the U.S. Housing Act of 1937, as amended:

It is the policy of the United States to promote the general welfare of the nation by employing its funds and credit . . . to remedy the unsafe and unsanitary housing conditions and the acute shortage of decent, safe and sanitary dwellings for families of low income.

If the administration succeeds, this will be called into question for the first time since its enactment during the Depression.

By calling for a halt in the expansion of our low-income housing stock, the administration is ignoring a number of realities:

First, the lack of affordable and available housing for the poor. Three percent or lower vacancy rates are common in our largest cities with many of our larger cities reporting 1- and 2-percent rates. In Boston the vacancy rate for private rental housing is 2 percent, and the price of family units is over $500 a month. Only 14 percent of all units have 3 bedrooms or more. Family unit production is critical in order to alleviate these severe shortages for the poor.

Second, in many of our older cities, housing stock needs constant upgrading, repair and replacement. In Massachusetts, over 60 percent of our stock is over 40 years old, and rehabilitation and new production are critical to keep pace with new household formations.

Third, if the country is going through a recession, the housing industry is going through a depression. The jobless rate in the construction industry is over 18 percent, and the housing industry has had the worst year since World War II, with starts at an all time low. In the best times, the Government has assumed the lion's share of the rental housing production burden.

With the industry pleading for its life, the notion that we can turn our backs on production of housing for elderly and low-income families on the theory that the private sector will fill the need is nothing short of criminal.

The housing programs which are now slated for abolition have already suffered a 30-percent reduction this year. In a recent 100-city survey conducted by the U.S. Conference of Mayors, the impact of these cuts was plain; 57 percent characterized the cuts as having a disastrous or substantial effect, and 70 percent said that an additional 12-percent reduction would have a similar impact.

So while the proposal to eliminate housing production and rehabilitation for the poor is by far the harshest punishment which has yet been devised, it is by no means the first.

COMMUNITY AND ECONOMIC DEVELOPMENT

The second major feature of the administration's plan is to eliminate the CDBG and UDAG programs—two classic Republican concepts which represent the major source of physical development for our older distressed communities.

CDBG

The CDBG program, which provides highly targetted funding for neighborhood development, infrastructure, capital investment, housing rehabilitation and related services for low- and moderate-income persons, has already been the victim of a triple whammy in this year's budget.

First the funds for the program were cut. Then, scores of additional programs were "folded into" the CDBG program, which has forced already shrinking dollars to be stretched even thinner.

Finally, legislative changes which were enacted as part of the budget yielded an effective 10-percent reduction for the larger, entitlement cities. In a recent U.S. Conference of Mayors survey 72 percent of cities reported that an additional 12-percent cut would have a disastrous or substantial effect on their ability to continue urban revitalization programs.

Despite the importance of the CDBG program to our cities, the administration is planning to reduce the budget from $3.6 to $2.2 billion in fiscal year 1982. In fiscal year 1983, the program will be reduced to $1.1 billion, and in 1984, the program will receive no funds.

ACTION GRANTS (UDAG)

It is fashionable in this administration to talk nostalgically about a return to the Constitution, and a time when the Federal Government has no role in our economic growth, outside of providing guns and postage stamps. This implies that Federal intervention in the economic growth of our country was invented by the Johnson administration about 20 years ago. Of course, the westward expansion, the reconstruction of the South, and the development of our railroads are only a few obvious examples of the long history of a Federal role in the economic well-being of our country.

The UDAG concept is classic—put in the least amount of Federal money need to stimulate the greatest private investment. The results of this simple concept have been phenomenal. The accomplishments of the UDAG program during its 3-year history have been cited with great frequency but since the administration chooses to be deaf, dumb, and blind to the program's success, the accomplishments are worth citing again.

Every action grant dollar has resulted in $6 in private investment, for a total of $13 billion in new private investments.

Every action grant dollar has generated 17 cents in new annual tax revenues for local governments, over $363 million every year.

The 1201 Action Grants projects have created: 307,000 new jobs—over half of them for low- and moderate-income workers. In addition, over 109,000 jobs have been retained by the projects. Most important, the average job creation cost is $6,838—far less than the burden to the taxpayer of supporting unemployment through the welfare rolls.

In conclusion let me add a word of caution:

These trial balloons from the administration, calling for the elimination of housing and community development programs, have been accompanied by reassuring reports of new programs for cities.

The Wall Street Journal carried a story on Thursday which said the administration is planning to increase revenue sharing, and to return a portion of tobacco and gasoline excise tax revenues to State and local governments.

Read the fine print:

Revenue sharing might be increased, but education and transportation grants will be abolished and "folded in." Our experience with CDBG should teach us that when this administration folds in, the cities come up short on ingredients.

The other word of caution is: With this administration, today's commitment is tomorrow's betrayal. Since January the President has abolished and restored UDAG twice. Since he took office, he has shown through deed how his promise to the elderly on social security was worth.

In short, urban America is fighting for its life this time around, and it is time for everyone who has a commitment to cities, and understands what they represent to his Nation's economic, social, political fabric to stand up and speak out and fight back.●

TIME TO DECONTROL NATURAL GAS?

● Mr. SYMMS. Mr. President, one of the first actions taken by President Reagan after assuming office was the decontrol of domestic oil prices. This action was merely an acceleration of the decision already taken by President Carter, but it was nonetheless an act of the kind of courage we have come to expect from this President. He was soundly criticized for decontrolling oil prices, but the action turns out to have been exactly correct.

There was an immediate jump in retail gasoline and heating oil prices, of course, though I should point out that those prices were already moving up, and it is not at all clear that decontrol caused them. Since then, however, all the news has been good.

Retail prices have fallen; supplies have increased; imports are down; the domestic exploration and production picture has stabilized, and the future is far more certain than it has been for years. Best of all, OPEC has been virtually emasculated.

The details of how our "energy crisis" came about, and how it was solved through decontrol are contained in a very readable account by William Tucker in the November issue of Harper's magazine. All Senators should take the opportunity to consider these issues, and to make it easier for them, I ask that it appear at the end of this statement.

But before we consider the article, let us consider a piece of unfinished business: natural gas. Exactly the same nonsense that produced our "crisis" in gasoline continues to operate with respect to natural gas. Controls on natural gas continue to encourage consumption among homeowners, at least; industrial use is officially discouraged; discourage exploration and production; and distort the capital markets and exploration plans surrounding the natural gas industry.

Even worse, the present pattern of regulation has developed its defenders among the regulated. Some aspects of the industry, such as pipelines and those already producing very deep gas, oppose regulation because it would mean more competition.

Mr. President, this situation is intolerable. I well understand that deregulation of the natural gas industry is complex and politically touchy. Still, it should be done. We know it should be

done as a matter of principle. Our experience with oil decontrol tells us that it should be done as a benefit to consumers. Let us get on with it.

The article follows:

THE ENERGY CRISIS IS OVER!

(By William Tucker)

HOW WE BEAT OPEC

On January 28, 1981, after less than a week in office, President Ronald Reagan announced that he was bringing an immediate end to the price controls that had governed American oil for almost ten years, speeding up a process already set in motion by President Carter. With that simple act, the energy crisis of the 1970s ended.

You would have hardly known it from reading the newspapers. Reporters, making their rounds of the usual reliable sources, asked only one constituency—consumer groups—what they thought of the decision. The consumer groups put up their usual howl, complaining that it would only mean higher prices.

Thus the Associated Press report of the story, the next day, began like this:

WASHINGTON.—American motorists can expect to pay even more at the gasoline pumps in the next few days as a result of President Reagan's first major economic decision.

Reagan is making good on a campaign promise to remove immediately the remaining price and allocation controls on petroleum.

Angry consumer groups charged that gasoline and heating-oil prices could rise by 8 to 12 cents per gallon over the next few weeks as a result of the decision.

There was not the slightest suggestion of what the long-term effects of the decision might be. Nor has there been since—except for a few scattered editorials in the Wall Street Journal and The New York Times.

So the news is told. When President Reagan asked for a review of the situation this summer, his advisers told him that the decision to scrap price controls had effectively ended the energy traumas of the 1970s. Consumption was declining, domestic drilling was skyrocketing, imports were down, and OPEC was starting to fall apart. His response was reported to be: "Why doesn't anybody tell me these things?"

It was a legitimate question. Apart from a few economists, probably no more than a handful of people have yet realized that the current collapse of world oil prices is the direct result of the American people's decision finally to face reality. We have already swallowed the bitter medicine, and the cure is working. Remarkably, nobody has even realized it yet.

Let us take a look at what has happened since President Reagan decided last January to accelerate President Carter's 1979 decision to remove oil price by fall 1981, and thus to end, with one stroke, the long-drawn-out attempt to protect consumers from reality.

For a few weeks, oil prices did rise, just as consumer groups had predicted. Within a month, gas prices at the pump had climbed by about ten cents a gallon. Heating oil also went up by about the same amount. Domestic oil prices, freed from constraints that had kept them at about twenty-nine dollars a barrel, quickly jumped to around thirty-six dollars a barrel—a change that should have reflected a rise of about fourteen cents at the pump. It looked as if consumers might be in for a rough time.

But then strange things started to happen. As late as December 1980, the Department of Energy had been predicting that world oil supplies would remain tight "indefinitely," and that world oil prices might soon be moving up through the range of $45–$50 per barrel.

But by March the major oil companies suddenly found themselves with growing inventories on their hands. By May, refineries had a 20-percent oversupply of oil products, and were starting to worry about storage problems. They did the only sensible thing. They started to cut prices.

By the end of May, heating-oil prices were down throughout the country by four or five cents. Gas prices at the pump fell below their January levels. The national average of gasoline prices across the country fell to its lowest level in two years. Sporadic price wars broke out in various areas. By midsummer, competition between two service stations in Cincinnati had lowered the price of gasoline to seventy-three cents per gallon at one point, and cars were once again lining up outside filling stations—this time to buy the new cheap gas.

Before very long, these events began to have repercussions on the world market. By early summer, every major OPEC nation found itself with growing stockpiles. Libya, always the most militant of OPEC members, lost 60 percent of its customers between April and August because it refused to lower prices. Nigeria also had large surpluses. OPEC production as a whole has now fallen 30 percent since 1979.

What happened in Mexico was tragicomic. In June, the nation found itself unable to sell its oil at the premium price of forty dollars a barrel anymore. The minister for oil, Jorge Díaz Serrano, faced with a collapsing market, lowered the price of Mexican oil by four dollars. Mexican public opinion, however, accustomed to high prices, was outraged at the decision and demanded that the old price be restored. Jorge Díaz Serrano, till then considered the favorite to succeed Lopez Portillo to the presidency next year, was forced to resign from office, his political career ruined. But the oil still could not be sold at $40 a barrel, and subsequent oil ministers have now lowered the price by $3.90—holding back the last ten cents apparently in an effort to avoid Jorge Díaz Serrano's fate.

The story being told is that Saudi Arabia has deliberately created the oil glut by pumping 10 million barrels of oil a day instead of its previous 8 million, in order to "discipline" other OPEC members and end up with a uniform price of around thirty-four dollars a barrel. Yet many observers are skeptical of this interpretation. They point out that Saudi Arabia has already committed most of its oil revenues, and with prices falling, will not find it easy to cut back to production of 8 million barrels a day again.

In any case, OPEC's attempts at an emergency August meeting to reach agreement on a price, and regain "control" of the market, were a failure. Not only were the members unable to compromise on a unified price of $34–36 a barrel, but their subsequent actions showed that the OPEC countries themselves are now at the mercy of the market. Two days after the meeting fell apart, Nigeria voluntarily lowered its oil price from $40 to $36 per barrel. It was the largest price reduction an OPEC nation has ever imposed on itself. There is no indication that prices have hit bottom yet. The golden age of OPEC is over.

How did this sudden reversal occur? There are many reasons, but the crucial one—both for its timing and its effect—is the Reagan administration's decision last January to end price control.

It is now possible to examine the related upheavals of the 1970s and put them in perspective. The oil crisis was nothing more than a self-inflicted wound. With the exception of five months in 1973–74 when the Arab states stopped sending oil to the West in retaliation for U.S. support of Israel, no event of the 1970s that we labeled under the rubric of "the oil crisis" was anything more than America's refusal to pay the proper price for its own oil. It was certainly not an oil-company plot or a sign that we were "running out of resources." Oil was the only commodity in the entire economy that was never freed from President Nixon's temporary wage and price controls imposed in 1971. This created an inevitable gap between supply and demand for domestically produced oil. We bridged it by importing more oil, leaving us vulnerable to all the foreign shocks and international intrigues that followed.

Here is the way it happened.

DEPENDENCE ON FOREIGN OIL

The beginning of the oil crisis of the 1970s can be traced to 1968 and the first stirrings of the environmental movement. At the time, though few people remember it, the country was operating under the Oil Import Quota system set up by President Eisenhower in 1959. The policy limited the country's imports to no more than 12 percent of its total consumption. It was honored more in the breach than the observance, however, and imports actually hovered around 19 percent throughout the 1960s.

The original rationale for the quota system was national security. It was argued that if we became too dependent on foreign sources for such an important commodity as oil, we might become vulnerable to cutoffs in time of war or national emergency. The effect of the program, on the other hand, was to give some protection to the small domestic oil companies centered around Texas, Oklahoma, and Louisiana. These are not the oil giants like Exxon, Gulf, Texaco, and the rest of the Seven Sisters. They are the hundreds and hundreds of entrepreneurs who live off small and medium-sized oil holdings—and produce about 60 percent of our own oil. A great deal of the confusion that existed in the early years of the 1970s arose from the failure to distinguish between these small companies and the giants.

The import quotas protected the small companies from the dirt-cheap competition in the Middle East, where oil could be pumped out of the ground for less than ten cents a barrel. Domestic oil was selling at about $1.90 a barrel in 1969. But even with the import quotas, the price to consumers had been steadily falling over the previous twenty years. The oil giants, on the other hand, were slightly hampered by the import quotas, although they never made too much fuss about it. They were prevented from importing great quantities from the Middle East, but, on the other hand, were afforded some protection for their American holdings. They made money by selling Middle Eastern oil to Europe, and did not press much for abolition of the U.S. import restrictions.

The trouble began when environmental groups decided that newly discovered low-sulfur oils in North Africa and Indonesia were just what was needed to clean up air pollution. Before Lyndon Johnson left office, environmental groups in California and New York had wrung concessions out of Interior Secretary Stewart Udall (who administered the quota program) to allow more cheap, low-sulfur crudes to be imported from Libya and Southeast Asia as a substitute for coal in utility boilers. A number of incentives were introduced, and imports began to rise.

Then an odd thing happened. Consumer groups, suddenly aware of all the cheap oil being pumped around the world, began to argue that scrapping the import quotas would produce a consumer bonanza as well. In 1970, Ralph Nader's task force on air pollution (one of the first incarnations of "Nader's Raiders") published a book called Vanishing Air, which questioned the "national-security" argument and argued strenuously that ending the oil import-quota program would solve both environmental and consumer problems. They suggested that the quotas were a "protectionist wall" that "creates a domestic price for petroleum substantially in excess of the world price." It was "estimated to cost American consumers five to eight billion dollars a year."

After the Santa Barbara oil spill of 1969 created new concerns about offshore drilling, the environmentalists' urgings to lift the import quotas became much louder. In 1972 the Sierra Club published a book on coal strip-mining called Stripping, which concluded that scrapping the import quotas would cut down on strip-mining, reduce offshore drilling, clean the air, and solve just about every other environmental difficulty. Criticizing a decision of the Nixon administration not to give up the quotas, the author, John F. Stacks, wrote:

"The scrapping of the import quota task force recommendation to abolish that system will pile more costs onto the consumer, who has already paid more than $30 billion to subsidize the oil industry through quotas and tax giveaways."

Soon the case for importing more oil was common currency in consumer and environmental circles.

Unnoticed, however, was that the real turning point in America's energy situation had already passed. In 1970, our domestic oil production peaked at 9.6 million barrels a day, after a century of steady increases. We had run out of "easy oil." Older wells were playing out, and all the new oil lay in environmentally troublesome areas—offshore, in Alaska, and in deeper, unexplored regions of the earth's crust. Americans faced a difficult choice. Either we had to accept a steep rise in American oil prices, to pay for the higher costs of drilling and encourage wiser use, or we had to open our doors to more imported oil.

For a long while the Nixon administration resisted making a decision. Task forces were assigned to the problem, and most of them came back with the recommendation that we might as well import more oil. Nixon personally resisted the idea, however. He was still impressed with the national-security argument, and leery of making the country dependent on foreign imports.

Unfortunately, the courage of this position was obviated by a decision in August 1971 to impose an across-the-board temporary wage and price freeze. The controls had an enormous impact on the oil market. Prices should have been climbing rapidly. Production from old wells was leveling off and the development of new sources was proving expensive. A clear signal was needed to tell consumers that the time had come to start conserving.

Instead, the price controls seriously distorted the situation. The artificially low price of domestic oil discouraged expensive new exploration. But it also allowed consumers to go on guzzling oil as if nothing had happened. Consumption rose in 1971–73 at 4 percent per year—a straight-line projection from the old days of falling prices in the 1960s. Nobody noticed that domestic oil was harder to find.

And so, in order to make up for this growing gap between domestic supply and demand, we turned to the solution that was to become the characteristic pattern of the entire decade. We imported more oil. The holes that the environmental movement had already punched in the import-quota program made it easy. All sorts of incentives had been set up allowing refiners bonus quantities of imported crude if they cleaned it of sulfur. The program was easily manipulated so that imported crudes became the stock for other uses as well. By 1973 we were importing close to 30 percent of our oil, an unprecedented foreign dependence. By the time the quotas were scrapped, they were useless anyway. Without even noticing it, we were at the mercy of world events.

THE REASON FOR SHORTAGES

The inevitability of price controls for the benefit of consumers creating shortages of goods is a cardinal point understood by nearly all economists and only a handful of members of the public. I have searched for a metaphor for this phenomenon, and finally found one in an experience a friend of mine had in the Peace Corps. He and his colleagues were trying to teach Indian village women the rhythm method of birth control by giving them a string of thirty beads that represented the days of their menstrual cycle. The eight days representing their fertile period were marked by red beads in the middle of the month. Each day they were to move one bead, refraining from intercourse on the red days. After a while, however, they found the system didn't work. When the dangerous days of the month arrived, the women would simply move all the red beads across the string at once. They assumed that this act of magic would prevent them from getting pregnant.

We do the same thing with prices. The market price of a commodity is nothing more than a reflection of its scarcity relative to its demand. When goods become harder to obtain, the price goes up. But we assume that by artificially lowering the price—asking the government to intervene with price controls, that is—we can make a good less scarce. Instead, the opposite results. With prices artificially low, consumers try to buy more of the commodity, while suppliers reduce production because they cannot recover their costs. The result is an artificial shortage, where goods are scarcer than at the beginning. Our confusion of reality and its symbols only makes things worse and precipitates what we hoped to avoid.

As President Nixon's 1971 price freeze remained in place, the American economy became increasingly characterized by a series of surpluses and shortages. With prices held at rigid, artificial levels, the gaps between supply and demand became unavoidable. By 1973, steel, concrete, aluminum, and dozens of other basic commodities were becoming unobtainable on the market.

The situation coincided with the Club of Rome's jeremiads and the popular conception that we were quickly hitting the bottom of the barrel on resources. Newsweek ran a cover story showing Uncle Sam holding up an empty horn of plenty under the caption Running Out of Everything?

Apparently, nobody at Newsweek realized that we were only experiencing the inevitable results of price controls (no one, that is, except Milton Friedman, who continually pointed it out in his columns). But by the middle of 1973 the price controls had been phased out, and these shortages quickly solved themselves.

Oil, however, was an exception. So much pressure had already built up behind the price of oil that Congress became afraid to let the market go where it would. It was obvious that the days of twenty-five cents a gallon for gasoline were over. Yet Congress shunned the cure for America's falling domestic production. Oil became the only exception to the general abandonment of price controls; protection was extended through 1975.

Meanwhile, barely noticed events in the Middle East were beginning to indicate that "cheap foreign oil" wasn't going to remain cheap for very long. In 1969, a colonel's revolt in Libya overthrew the pro-Western monarchy. The new military regime, under Colonel Muammer Qaddafi, soon realized it was supplying both Europe and America with low-sulfur oil that could hardly be matched anywhere else in the world.

In 1970, the new government imposed a twenty-cent price increase on its concessionaires. The oil companies fussed and fumed, but soon realized that there were no American Marines or strategists for the Central Intelligence Agency waiting in the wings to correct the problem. (In the last such incident, which neither the oil companies nor the producing nations had ever forgotten, the attempt by Mohammed Mossadegh to nationalize Iran's oil concessions and impose a price increase on Western consumers had resulted in a coup masterminded by the CIA, and the installation of the shah. On the eve of the Arab oil boycott, President Nixon was still publicly reminding the Middle Eastern states to beware the "lesson of Mossadegh.") Finally, the oil companies accepted the price increase; they had no choice.

Soon a moribund debating society, the Organization of Petroleum Exporting Countries, founded in 1960 at the instigation of Venezuelan oil minister Juan Pablo Pérez Alfonso, was meeting in earnest in Vienna. By September 1973, OPEC members were presenting a solid front to the oil companies and negotiating for an across-the-board price increase of fifty-three cents to match Libya's efforts. The oil companies protested and said it was impossible. In truth, though, they weren't sure. When the negotiations finally broke down, Sheikh Yamani, the Saudi Arabian OPEC minister, said that the producing nations might just go ahead and do it anyway.

Yet all the while American consumers remained oblivious. Blinded by the continuing price controls, we went on guzzling gas in ever greater amounts as if nothing had happened. Few people were aware that we were importing any of our oil, let alone 30 percent. British journalist Anthony Sampson, whose book The Seven Sisters describes the events leading up to the boycott, says that an "air of unreality" began to enshroud those American businessmen and politicians who could actually see what was happening. In 1972 we set an all-time record for oil consumption, and were headed for another in 1973. When several oil companies formed a delegation to try to warn Nixon administration officials of the growing restiveness in the producing countries, they were politely ignored. On the day Shiekh Yamani and the OPEC ministers broke off negotiations with American oil firms in October 1973, no American newspaper carried the story.

What happened next, of course, is history. The Arabs realized their growing market leverage and exercised it in the oil boycott during the 1973–74 Arab-Israeli War. The result of this deliberate supply interruption was the first of the "gas shortages."

But the boycott was over by March, and gas lines ended well before that. Far more important was that the producing nations—to their surprise—found they had a stranglehold on the Western oil market. They quickly raised prices to seven times their 1970 levels, setting in motion what was later called "the greatest and swiftest transfer of wealth in history." Over the next year, some $112 billion flowed out of consumers' pockets and into the coffers of the oil-producing nations.

What should we have done? Obviously, we should have increased domestic production and cut consumption. The formula for this was not really very difficult. Domestic oil price controls were already artificially discouraging production and stimulating consumption. Getting rid of them would have been the easiest step of all. Then, had we been really serious, we could have done what the Europeans and Japanese have done for decades and taxed consumption, particularly consumption of foreign oil. This was exactly what President Ford tried to do in January 1975, when he began his state-of-the-union address by asking Congress to abolish price controls and impose a two-dollar-a-barrel tax on foreign oil. He promised that reducing imports would be the first priority of the administration. Had the nation been willing to give President Ford a hearing, we might have avoided some of the turmoil that followed. Congress, however, had its own ideas.

The battleground became the 1975 Energy Policy and Conservation Act (a political euphemism if ever there was one). At first,

Congress seemed willing to go along with President Ford's assessment: foreign dependence was a problem, and price controls were only making things worse. But then a suburban rebellion began in the House of Representatives. Congressmen Andrew Maguire (N.J.), Richard Ottinger (N.Y.), and Toby Moffett (Conn.)—all liberal Democrats representing the three wealthiest suburban counties in the New York area—began a campaign to extend oil price controls. Joined by figures such as Edward Kennedy (Dem.-Mass.), Howard Metzenbaum (Dem.-Ohio), James Abdnor (Dem.-S.D.), and Henry Jackson (Dem.-Wash.) in the Senate, these legislators eventually succeeded in getting through a decision to extend price controls all the way through 1979 and possibly beyond. Not only that, the Energy Research and Development Administration was instructed to lower the price of domestic oil in February 1976 in order to punish the oil companies. It was Congress's election-year present to the nation for 1976.

It worked well. Large Democratic majorities were returned to Congress at the end of the year, with a new Democratic president to lead them. Consumers were already celebrating by surging back to big cars, and guzzling gas again as if the boycott had never happened. Everything seemed fine. Yet the oil price controls remained a time bomb ticking away in the American economy. It finally exploded in 1979, and perhaps helped to carry away the Democratic administration with it.

OPEC'S SHORT, HAPPY LIFE

Few people seem to realize that OPEC's monopoly of the market lasted only about three years. Like any monopoly, it quickly attracted new competition into the field. From 1974 to 1977, the relatively few oil-producing countries probably could have charged any price they wanted to Western consumers. Europe, in particular, had long been accustomed to easy access to Middle Eastern oil, and had few alternatives.

But, as always, the success of a monopoly was also its undoing. The new high price of oil sent geologists scurrying out all over the world looking for new reserves. Britain and Norway developed the fields under the North Sea, the American oil companies were allowed to finish the Alaskan pipeline, and dozens of other small countries began to find and develop deposits. Mexico, it turned out, had had oil all along, but hadn't wanted to reveal its resources for fear of being exploited, as the Arabs had been for decades. In addition, the old patterns of ever increasing consumption were quickly reversed. Yale economist Paul MacAvoy has calculated that OPEC's price distortions only lasted from 1974 to 1977. By that time, the market forces had caught up and supply and demand were back in balance, promoting the wise and efficient use of resources everywhere.

Everywhere, that is, except the United States. Here, unfortunately, events had taken a different turn. Almost from the day in February 1976 when Congress had instructed that the price of domestic oil be lowered, Americans had once again rushed back to their old pre-embargo habits. Over the next twelve months, big-car divisions of the three major auto companies broke sales records in every month of the year. Small cars were left sitting in the lots, and even huge rebate programs failed to win back the public to conservation.

Gasoline consumption also resumed its pre-embargo climb, surpassing the 1973 record in 1977, and breaking it again in 1978. We were headed for even higher consumption in 1979, until events in Iran put a stop to it. Domestic producers, on the other hand, could not begin to hope to make back their money from drilling for new oil. They sat on their hands or put their money into real estate. Once again there was a shortage of domestic oil. And yet there was no time between 1976 and 1979 that motorists couldn't get gas. How did we do it? The answer is the same. We made up for our self-inflicted domestic shortages by importing still more oil. From the crack of the gun in February 1976, our imports once again took off, climbing from 33 percent to almost 50 percent by mid-1979. In fact, it's a good thing the Iranian revolution happened when it did. Had things gone on any longer, the eventual crash, whatever form it took, would have been far worse.

Just about everything Congress did to solve the energy crisis in the 1970s was aimed at one thing—keeping cheap gas flowing to the consumers. Washington was filled with liberal congressman singing the joys of conservation and wringing their hands about foreign dependence. Yet not one of them was ever willing to accept the simple formula that would have ended the whole dilemma—paying a market price for our own oil.

It is commonly assumed that the events in Iran and the second "gas shortages" in 1979 finally curbed the nation's appetite for foreign oil. That is not quite correct. Redoubled international oil prices and the resulting rise in the cost of gasoline certainly reminded people of the realities of the world oil situation. But the effect would probably have been temporary once again, had not the second gas shortage finally convinced President Carter that domestic price controls were a self-defeating policy and should be abandoned. Carter bravely announced in late 1979 that he would phase out price controls by the fall of 1981.

Incredibly, even at this late date, congressmen howled, and consumer groups moaned, that the president was abandoning his apparent constitutional responsibility to provide Americans with cheap energy. Yet the payoff came almost immediately. Within one year, U.S. oil imports fell by 25 percent, back to their 1975 level.

Oil drilling increased as never before (although oil is still getting harder to find), and consumers finally began demonstrating hitherto unsuspected capabilities for conserving energy. President Reagan's January decision, which accelerated Carter's schedule by nine months, only completed the process. Drilling for new oil has increased by 50 percent in the last six months. Consumption has dropped another 20 percent. Domestic oil production is holding steady, and consumers—finally deprived of the "protection" of Congress—seem permanently set on a conservation course.

The unanticipated—though predictable—result of this new realism has been that energy prices are now falling on the world market. Throughout the 1970s, our energy policy was to prop up world oil prices by creating a domestic shortage and then making up for it by buying in the world market. Without our support, OPEC would have been defunct by 1977. Now it is falling apart anyway. Americans are buying 2.2 million barrels a day less than we were before President Carter launched the repeal of the price controls in 1979. This is the exact amount of the current world glut. Left to the mercies of supply and demand, OPEC is finding it can do nothing more than set its prices where the market tells it to.

THE SEVEN (WEAK) SISTERS

Are we really out of the woods? Perhaps not entirely. We still import just over 30 percent of our oil, which is about where we were in 1973 just before the embargo. What we could do now is to put a modest tax on imported oil—perhaps two dollars a barrel—in order to pay the costs of building a strategic petroleum reserve; this would be a fair measure of the risks we incur by importing some of our oil. Both Europe and Japan have long used high government taxes to discourage consumption, which is why they were much less affected by the Iranian events than we were, even though they import nearly all their oil.

Yet all these wise and conscientious measures would still have to run the gauntlet of short-sighted "consumer protectors." There are still enough Toby Moffetts and Edward Kennedys in Washington to put on a magic show of preaching conservation with one hand while subsidizing consumption with the other.

Where do the oil companies fit into all this? Those Enemies of the People, of course, were the favorite whipping boys of the mid-1970s. By 1975 it probably didn't seem a bad guess to predict that they would have been nationalized within a few years. It is easy enough now to see what happened to the oil companies in the 1970s, and why we hated them so much. The problem was that the oil companies were getting weaker. During the 1950s and '60s, they had bullied their way through the producing countries, robbing them for the benefit of Europeans and Americans and bringing home the goods at ridiculously low prices. When things got difficult, there were always the Marines and the CIA to hold up our interests.

But in the 1970s all that changed. The oil companies found themselves up against a more firmly knit cartel with better control over the resources than they had. What could we do but hate them? They had failed us miserably. As Eric Hoffer said of revolutions, it is usually when the public feels the government weakening that it expresses all its hidden resentments.

The oil companies have now lost their preeminence in world trade. In 1970 they handled over 90 percent of the transactions between the producing and consuming countries. Now they handle only about 40 percent. More and more, the consuming countries are dealing directly with the producers. In addition, the OPEC nations are building their own refining operations, buying tankers, and moving "downstream" in the oil business.

The future for the oil companies, of course, is not bleak. The value of their remaining oil resources has increased enormously. Their profits have risen by 20 percent per year since 1973. They are still the world's specialists in exploration and drilling technology. In addition, they are diversifying into other fields and energy technologies. They will probably do as they have always done—quite well.

Is the energy crisis over, then? Not quite. Unfortunately, we still have a forty-year-old hangover to deal with—the chaotic state of resources, created by government intervention in the natural-gas industry.

The havoc is almost too complicated to delineate. (For an excellent account, read Tom Bethell's article "The Gas Price Fixers," Harper's, June 1979.) Price controls were originally imposed in 1938 because of a supposed "monopoly." Actually, there was no monopoly at all. Consumers had a choice of several other fuels, and gas drilling is one of the most decentralized industries in the country. One out of every two hundred Americans owns interest in a natural-gas well.

In 1954, one producer tried to raise the price of gas from three to four cents a thousand cubic feet. This ridiculously low price had originally been granted only as an open invitation for the pipeline companies to build their connections into the oil fields. Before that, the producers had flared off their gas as a waste product of oil drilling. But a Wisconsin state consumer authority, reacting to this insignificant price increase, forced the Federal Power Commission to extend its control back to the wellhead price as well. The decision was upheld in the courts, and Congress has never mustered the will to change it.

The results have been utterly perverse. The natural-gas industry became a kind of national utility company. No one was ever encouraged to go out and find more. The only gas we have used is the "waste product" now associated with oil deposits. Yet all indications now are that there are staggering amounts of natural gas—perhaps as much as 200 years' supply at current prices—in different kinds of formations in the earth.

The situation finally reached a crisis with the "natural-gas shortages" of the winter of 1977. These "shortages," again, were nothing but the result of price controls. The law had never extended federal control over pricing within the producing states themselves. By 1977, gas prices in the intrastate market were four times the price in the interstate market. Most producing states, like Texas, Louisiana, and Oklahoma, which collect large royalties, simply refused to send any more gas north, where consumers were still paying 1960s prices; hence the shortages.

The hopelessness of government efforts to anticipate market prices can be seen in the 1978 Natural Gas Policy Act, which at the time was perceived as a victory over the consumer advocates. Toby Moffett and the gas-guzzling suburbanites once again tried to ensure their constituents cheap energy at other people's expense. They failed, in that the Carter administration finally decided on a phased program ending in complete decontrol in 1985. It is said that when the vote against continuing price controls was finally taken, Representative Moffett left the House, fell against a tree, and wept.

He could have saved his tears. Congress, in its wisdom, decided to anticipate the future by allowing natural-gas prices to rise to the 1978 level of oil prices—equivalent to $15 a barrel—by 1985. Then they could go where they would. Yet in less than a year that price was already hopelessly out of date. Taking inflation into account, natural-gas consumers are once again paying 1960s prices for energy. (Because of the resulting shortage, industry and utilities are rapidly being squeezed out of the market, and consumption of natural gas is now concentrated almost entirely in home heating.)

The results have been chaos. Congress allowed that all gas found below 15,000 feet could be free from price controls. Previously, most gas had been found at 5,000 feet. This spurred new exploration, which started turning up gas reserves no one had ever dreamed possible. It is now clear that there are probably huge reserves between 5,000 and 15,000 feet as well.

But the owners of gas deposits below 15,000 feet have now become opponents of decontrol. They fear that they will be undersold by all the gas that obviously exists between 5,000 and 15,000 feet. This doesn't promise a very orderly development of resources. In a final irony, the pipeline owners themselves have become a principal opponent of deregulation. They are paid according to the amount of gas that flows through their pipelines. They fear, quite reasonably, that if prices are decontrolled, people will start conserving gas. That will cut down on their pipeline transmission, and lose them money. Thus, as always, the regulated have ended up falling in love with their regulations.

There are already fears that when 1985 arrives Congress will find decontrolling the price of natural gas intolerable. Yet there is hardly any choice. In fact, removing price controls right now—as the Reagan administration is beginning to propose—would be even easier. There is no time like the present for getting rid of price controls. The medicine would be only slightly harder to swallow than our current decontrol of oil prices, which people have hardly noticed at all.

The only alternative is that natural gas will be a resource that we simply don't use. Once again one may ask: if we are creating artificial shortages by controlling the price of natural gas, where are we making them up? And once again, the answer is the same. We are importing more oil. It is estimated that between one and two million barrels per day of our current oil imports are the result of our failure to use our own natural gas. The subsidy of natural-gas consumers is also delaying the introduction of rooftop solar energy. Decontrol would unquestionably mean higher natural-gas prices, but this would quickly be neutralized by a further drop in the price of oil and the introduction of new technologies. People are never going to conserve, or use solar energy in home heating, as long as they are paying fifteen-year-old prices for natural gas.

But without the foreign oil needed to make up for the natural-gas shortage, OPEC would be about as important to the American economy as a Turkish bazaar.

The energy crisis, then, is half won. We have ended OPEC's dominance of the market within a few short months by swallowing what turned out to be a relatively mild pill and accepting a market price for our own oil. All we have to do now is decontrol our natural-gas prices, and we will be home free. There will be another mild period of adjustment, and soon we will be on a firm, stable, and innovative energy course.

Are we up to it? Can Americans tackle the energy problems of the 1980s?

Stay tuned.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

The administration has agreed that since the Christmas recess is approaching, they will take the appropriate steps to assure that Congress has the full 30 calendar days while Congress is in session to review this sale.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room 4229 of the Dirksen Building.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., December 4, 1981.

In reply refer to: I-03060/81ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-12 and under separate cover the classified annex thereto.

This Transmittal concerns the Department of Air Force's proposed Letter of Offer to Venezuela for defense articles and services estimated to cost $615 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Director.

TRANSMITTAL NO. 82-12

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective purchaser: Venezuela.

(ii) Total estimated value:

	Millions
Major defense equipment*	$319
Other	296
Total	615

*As included in the U.S. Munitions Lists, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of articles or services offered: Eighteen F-16A and 6 F-16B tactical fighter aircraft with related spare parts, training, technical assistance, and support items.

(iv) Military department: Air Force (SGA).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending 30 September 1981.

(viii) Date report delivered to Congress: December 4, 1981.

POLICY JUSTIFICATION

VENEZUELA—F-16 AIRCRAFT

The Government of Venezuela has requested the purchase of 18 F-16A and 6 F-16B tactical fighter aircraft with related spare parts, training, technical assistance, and support items at an estimated cost of $615 million.

This sale will contribute to the foreign policy objectives of the United States by improving the defense capabilities of a friendly democratic country which is a continuing force for stability in Latin America.

Venezuela requires replacements for its aging CF-5A and Mirage aircraft. This sale should significantly enhance the Venezuelan Air Force's (VAF) capabilities and should aid in modernizing existing VAF facilities and the logistical infrastructure.

The sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Fort Worth, Texas.

Implementation of this sale may require the assignment of additional U.S. Government or contractor personnel to Venezuela for short term training purposes. Also, contractor assistance may be required for maintenance support during the first 1½ years of operation.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

RECIPROCITY AS A TOOL IN REDUCING TRADE OBSTACLES TO SERVICES

● Mr. INOUYE. Mr. President, within the last 2 years, during which time I have become increasingly interested in the international trade in services and committed to reducing hidden barriers to our service exports, I have noted with pleasure that not only are these issues being given more attention within Government trade policy discussions, but also the

American press is paying greater attention to this matter.

Public discussion of this issue is important because a general consensus on negotiating objectives will be necessary before we embark on a wide-scale multilateral trade discussion. The service sector, which may be the major area of the next significant round of trade negotiations, consists of many different industries with different problems, objectives, and interests.

I would like to draw particular attention to the statement of Mr. Geza Feketekuty, Assistant U.S. Trade Representative, who, in the ensuing article, calls for—

A look at the various laws pertaining to reciprocity in the international service area. . . . We want to find out what is the power of the President and other U.S. authorities to deny access to countries that don't give us access.

I applaud this fresh and open-minded approach to American trade policy in the 1980's. Free trade must be fair, and without leverage to deal with foreign trade barriers, all the good intentions in the world are worthless. The time for strengthening the U.S. arsenal against foreign protectionism has arrived. I know that my sentiments are shared by many of my colleagues in the Senate.

I ask that a copy of this article on services, which appeared in the Christian Science Monitor of July 22, 1981, be reprinted in the RECORD.

The article follows:

U.S. EXPORTERS OF SERVICES PROTEST UNFAIR FOREIGN BARRIERS

(By Thomas Watterson)

Now that the seven-nation economic summit meeting is over, executives of hundreds of American companies would like to suggest a lively topic for next year's meeting: a $60 billion U.S. export business that is facing a rising wall of protectionism around the world.

The products from these companies are not goods wrapped in cartons and strapped to pallets, but are services such as advertising, insurance, film processing, shipping, banking, and data processing.

In places like Mexico, Venezuela, Argentina, West Germany, Sweden, Japan, and even Canada—the site of this year's summit. US service companies are dealing with an increasing variety of nontariff barriers.

In Canada, no commercials produced outside the country may be aired on television or radio.

In Mexico, all ocean cargo going to or from that country must carry insurance from Mexican underwriters.

In West Germany, all companies that use computers, including foreign firms that may only gather a small amount of information there, must do at least some data processing in that country.

In Japan, cargo carried on foreign airlines must be checked through three warehouses, a process that can take several days, while cargo carried on Japan Air Lines gets overnight service in one warehouse.

In Brazil, prints and copies of color feature films to be shown there must be processed there.

While protectionism in services was part of the preparatory discussions that led to the summit, it is considered unlikely that the topic was given much specific attention by the leaders themselves. And even if it does come up next year, US executives are not sure how much effect it would have in changing the policies of foreign governments.

"I don't know if we can change their minds, but I hope we can enact something in this country to change their minds," said Donald Miller, executive vice-president of American Marine Underwriters, a Miami firm that insures ocean cargo, except cargo going to Mexico and other countries with similar protections.

"It is a situation where we deal in an almost totally free environment, but the other side doesn't," he continued.

A number of companies and US agencies, led by the Office of the US Trade Representative, are making an effort to change that environment.

"What we have here is a complete absence of the kind of international trade rules you have in goods," said Geza Feketekuty, assistant US trade representative, who is coordinating the effort to institute some rules.

This effort includes a program to identify all the specific industries, firms, and countries involved; preparations for multilateral talks among the members of the Organization for Economic Cooperation and Development; making sure that all future trade talks include discussions of protectionism in services; and a "major overhaul" of trade data. "The data we have is way out of date," Mr. Feketekuty said.

But a more aggressive solution would call for "a look at the various US laws pertaining to reciprocity in the international service area.... We want to find out what is the power of the president and other US authorities to deny access to countries that don't give us access."

The question of protectionism in services was considered for inclusion in the "Tokyo round" of trade negotiations, which ended in 1979. Because there had not been enough work done on the problem, "it was premature to bring it up then," Feketekuty said. "But we've been getting more and more into the details in the last year or so."

An example of the lack of access for US companies involves something called "transborder data flows." Basically, these are any movements of information across international borders. But in a computer age, where intricate communication networks cover many countries but feed data to a central computer in one country, this process bumps up against a variety of laws concerning privacy, citizen access to information, and work for data-processing employees.

"The links between computers and telecommunication have become asbsolutely essential to international firms," said Joan Spiro, a vice-president at American Express and a former ambassador to the United Nations for economic and cultural affairs. But these links are being weakened by laws in countries like West Germany, Canada, and Japan requiring that some computing be done in host countries, restricting the type of information that can leave the country, or limiting the number of special communication lines that may be leased for data processing.

The restrictions mean that a company like American Express, which is involved in a variety of worldwide financial services, cannot completely centralize all its processing of credit card charges, traveler's checks, and other services, Ms. Spiro said.

For Flying Tiger, the Los Angeles-based air cargo carrier, the problems of sending freight to Japan represent another problem. In Tokyo, says Charles Malone, director of market development, Japan-bound cargo has to be processed through the New Tokyo Air Service Terminal, the International Air Cargo Terminal, and the Tokyo Air Cargo Terminal while goods in Japanese carriers only go through one terminal. "In our business, the quality of ground service is the key difference to competition," Mr. Malone said.

"I could give you a litany of the problems we've had," said Ronald K. Shelp, vice-president for international relations at the American International Group, one of the largest insurance companies selling policies abroad. Several countries, he said, do not allow any foreign insurers to write policies. Some two dozen others, including Sweden and Kuwait, will permit only foreign firms to sell domestically types of insurance not sold by native companies.

Ms. Spiro sees some hope in the news that a few foreign companies and nations, including Hoechst, Air Force, and Singapore, are calling for freer trade in services.●

THE DEATH OF ROBERT VERKUILEN

● Mr. LEVIN. Mr. President, Michigan was stunned earlier this week at the news of the death of Macomb County Board of Commissioners Chairman Robert VerKuilen.

Bob VerKuilen had provided extraordinary service as the seven-term chairman of the board of commissioners of Michigan's third largest county, and one of its fastest growing counties.

He worked so well with his colleagues that he was overwhelmingly selected to be the new county administrator.

Bob VerKuilen was only 54 years old and his vitality was that of an even younger person. When the news struck of his passing, his legions of friends were so utterly shocked they were hardly able to respond. Such was the vigor of the man whose medical history was such that perhaps we should have been more prepared for the blow. We seek in vain for ways to express our grief and the depth of our loss.

His wife, Mary Lou, is such a strong and wise woman that I know she will carry on in her own work, she also being a dedicated county commissioner. She will be sustained by the memory of what Bob VerKuilen did for his community. That community will find it difficult to replace Bob VerKuilen and that difficulty will be eloquent testimony of his lasting place in the history of his county and of the State of Michigan.●

THE ANTINUCLEAR MOOD OF THE AMERICAN PEOPLE

● Mr. PELL. Mr. President, the Providence Sunday Journal recently featured a very perceptive article by its editorial page editor, Brian Dickinson, on the antinuclear sentiment of the American people. Mr. Dickinson suggests that this sentiment is growing because the American people are becoming more knowledgeable about nuclear weapons and more skeptical of the proposition that American security will be enhanced through the deployment of more nuclear weapons. The administration's ambiguous and sometimes contradictory statements on nuclear issues and its reluctance to embark upon arms control negotiations have also, in his view, contributed to the development of this antinuclear mood.

As legislators and representatives of the American people, we need to pay close attention to the growth of the antinuclear movement in the United States and to understand its roots. I believe that Mr. Dickinson's article helps us to do this, and I recommend it highly to my colleagues. Mr. President, I ask that the

full text of this article be printed in the RECORD at this point.

The article follows:

HONESTY, FEAR AND THE ATOMIC BOMB

(By Brian Dickinson)

The Bomb is back.

During years of civil rights marches and Vietnam anguish, realities about atomic weapons—the very fact that they existed, in the hundreds and thousands—remained largely blurred in the public's mind.

But the subject has surged forward again to claim public attention. Unless my readings are way off base, there is today more widespread concern about the risk of a nuclear war than there has been in years. It is growing. It isn't confined to the liberal left or to those disparagingly referred to as "peaceniks." Even among people who don't usually bring up the subject of nuclear war, there now can be heard concerned talk that "it" might really happen.

A thoughtful East Greenwich man stopped in at the office last week to discuss an anxious letter he had written President Reagan, criticizing plans to build more nuclear weapons. A lawyer friend of moderate-to-conservative persuasion, not known for excessive brooding about such grim questions, confided his worries about the implications of the huge Reagan weapons build-up. And next Wednesday, Veterans Day, the Union of Concerned Socientists is to sponsor anti-nuclear "teach-ins"—remember those?—on more than 100 American college campuses.

What is behind this newly sensitized anti-nuclear mood, gaining momentum only months after Reagan's election on a promise to build up U.S. military weapons? I see at least three causes.

First, I think there is a growing understanding of the basic facts about nuclear weapons: how big they are, how many there are, how they are deployed and their almost incredible capacity for devastation. I think this awareness has been heightened by debate over the proposed MX missile and the revived plan for a B–1 strategic bomber.

More public knowledge about such weapons, in turn, has begun to pull away the mystique that has hindered attempts by laymen to discuss them knowledgeably. I find this one of the few encouraging signs in the whole nuclear-arms issue. Without access to top-secret materials, citizens now are asking, for example, why an MX missile buried in an underground silo is any more secure than an existing Minuteman missile in a similar silo. It is a modern-day variant of the boy who saw that the emperor had no clothes, and it could mark a healthy coming-of-age in our national discussions of security policy.

Second, in addition to being more informed about nuclear weaponry, more people are coming to understand the numbers behind the huge nuclear arsenals of both United States and the Soviet Union. There is a continuing consensus on the need for this country to remain militarily strong and alert, yes; but I find growing skepticism that more nuclear weapons can have any conceivable value.

A third cause of the new anti-nuclear mood, perhaps more influential than all the rest, lies with the Reagan administration's inept handling of the issues involved. This administration, in stark contrast to every other American administration of the nuclear age, has all but ignored the purposes and strategies of arms control. It asks for more atomic weapons while refusing even to entertain the idea that fewer might keep us just as safe (for safer).

This hard-line policy might be palatable if the administration had shown any sign that it had a coherent strategy, or that it regarded the topic of nuclear warfare with appropriate seriousness; but in this administration I see neither.

This President is given to making offhand remarks about nuclear weapons and then having to "clarify" them; while last week, in a flurry of embarrassment, the Secretaries of State and Defense got tangled in a public dispute over whether NATO ever had considered firing a nuclear "warning shot" in event of a major European ground war. Public confidence in the administration's handling of nuclear issues, it is fair to guess, has not been enhanced.

A hidden danger of the resulting anti-nuclear mood is that it may polarize Americans on national security issues, and spawn a neo-pacifist mentality against all measures to upgrade U.S. readiness. This might almost be worse than a nation blindly endorsing an unending arms race; for some U.S. military needs are real and must be met for the simple purpose of shoring up the nation's security.

But there is no conceivable military purpose for a nuclear weapon. Because this is so, and because of the perils in loose talk about "using" them in a conflict (as if they were so many crossbows), any bandying of nuclear threats is enormously risky. Unless the Reagan administration forthrightly addresses the problems raised by its own clumsy handling of nuclear-weapons issues, these risks are all too likely to grow.●

COSPONSORSHIP OF COLLECTIBLES BILL

● Mr. DURENBERGER. Mr. President, I am pleased to join my colleagues in sponsoring S. 1645.

The need for S. 1645 has arisen because of a little noticed provision of the Economic Recovery Act of 1981 which provides that any investment in collectibles by an IRA or self-directed Keogh after December 1981 will be considered a distribution subject to current taxation. This provision, section 314(b) of the Economic Recovery Tax Act, results from the House-passed version of that bill. I believe most Members of Congress were not even aware of the provision. No hearings were ever held on this matter in either the Senate or the House, and we in the Senate included no such provision in our version of the tax bill.

I simply do not believe that it is the proper role of the Federal Government to tell Americans what assets they may or may not invest in to help provide for their retirement. This is especially true in the absence of any strong and compelling evidence warranting such provisions.

The Ways and Means Committee's report on the tax bill, in referring to this provision, stated:

The Committee is concerned that collectibles divert retirement savings from thrift institutions and other traditional investment media and that investments in collectibles do not contribute to productive capital formation.

While it is true that investment in collectibles does not directly contribute to productive capital formation, the same can be said of most stocks, bonds, Government securities, et cetera. In most instances, money spent on stocks and bonds is not channeled directly to the purchase of productive assets, that is, plant or equipment. Unless the stock or bond is a new issue, the money does not even go to the company selling the stock or bond—it goes to another investor. The same is true of money placed in savings accounts, and, of course, of money used to purchase collectibles.

No one has suggested that Congress limit IRA investments to original issues of stocks and bonds, investments which can be said to stimulate directly the creation of productive assets. It makes little difference whether funds in an IRA are used to purchase stocks and bonds, open a savings account, or purchase collectibles. In each case, the funds set aside for retirement are available to be invested.

Congress created IRA's in order to encourage employees not covered by retirement plans at their place of business to save for retirement. With the changes in the Economic Recovery Act, every wage earner will now be able to use IRA's to save for their future.

However, by barring investment in collectibles, Congress has acted to reduce saving for retirement, especially among those who have decided that investing in collectibles is the best way to protect their retirement fund from today's high inflation rate. Over the past few years, moreover, collectibles have often outperformed the more traditional investments.

The bottom line, Mr. President, is that Congress goofed in passing section 314 (b). Congress needs to do everything within its power to encourage American workers to save for their retirements by investing in whatever assets they choose. Congress should not restrict the freedom of the American people to invest their own money for their own retirements in the manner they determine is in their own best interests.●

SUPPLY-SIDE ECONOMICS

● Mr. HART. Mr. President, whether we like it or not, America today has become the test sight for a radical experiment on the theory of supply-side economics. Whatever the theoretical benefits, we are beginning to see the real costs of this theory—at least as it is applied by the Reagan administration. These costs are radical indeed: Moribund automobile sales, record low housing starts, and more people out of work today than at any time since the Great Depression.

Administration economists refer to such developments as the "natural short-term consequences" of the administration's anti-inflation policy. But this hardly sounds like the "rosy scenario" these same economists were painting when they were trying to sell this program a few months ago.

Worse, there is no recognition in the administration's economic program of the crucial need to prepare for America's future. The administration's corporate tax cuts, for example, are biased against the most rapidly growing sectors of the economy—services and high-technology industries. Spending cuts in health services, education, and training diminish our ability to improve the quality of our workers and to enable them to keep pace with changes in technology and international competition.

As we attempt once again to forge a consensus on the budget, we must all

keep in mind how our decisions are affecting Americans jobs today and their prospects for steady, rewarding work in the future. To this end, I commend to my colleagues the article "A Threat to Jobs," by Emma Rothschild.

I ask that this article be included in the RECORD.

The article follows:

A THREAT TO JOBS

(By Emma Rothschild)

CAMBRIDGE, MASS.—President Reagan greeted the autumn increase in unemployment with grim resolve—"I will not be deterred by temporary economic changes or short-term political expediency"—and with an affirmation of historic mission.

The forces of inflation and unemployment, in the Reagan view, confront each other at last. Eight percent unemployment, says his Council of Economic Advisers, "reflects the unfortunate but natural short-term consequences of unwinding the deeply rooted inflation that is embedded in the American economy." Once the unwinding is concluded, it suggests, a weaker but purer America will move forward again into the medium-term sunlight of "economic recovery."

This "Pilgrim's Progress" vision is familiar. But it is also deceptive. It obscures the real transformation of the work Americans do, the real dangers ahead, and the ways in which the Reagan policies could bring a far greater collapse in employment, above all in industries where jobs grew fastest in the 1970's.

Since 1973, employment in America has increased rapidly—more rapidly than in other large industrial countries. But three-quarters of the new jobs created—10 million positions—were in services, retail trade, and state and local government. New private-sector employment was further concentrated in health services, business services, and eating and drinking places (including fast-food restaurants). These "big three" labor-intensive industries generated almost five million new jobs between 1973 and 1980: more than the total employment in the automobile, steel, computer, electronic-components, aircraft, and petroleum industries combined. It is this structure of employment, these sources of new work, that Reagan policies may jeopardize. For three trends, each ominous for employment, are likely to coincide in the years ahead.

The first is the recession itself, and the effects of restrictive monetary policies. Inflation is likely to remain high next year, particularly given the effects of tax cuts and increased military spending. It is hard to believe that the Republicans, faced with inflation plus unprecedented Federal-budget deficits, will soon abandon their hope of redemption through hard times. They are far more likely to maintain existing monetary policies, and even to tighten fiscal policies.

The second trend has to do with long-term developments in the new boom industries. Employment in the "big three" has been growing much slower in 1981 than it did from 1973 to 1980—in eating and drinking places, the rate of growth this year has been a little more than 2 percent per year, compared to 8 percent per year between 1973 and 1980. The growth of demand for services and meals may be slowing down; the boom industries may be investing in processes that are less labor-intensive. A deep recession, moreover, might devastate small, recently established service businesses. Employment in trade and services increased rapidly in the 1920's but was far from immune to the recession of 1929 to 1932.

The third trend is the Administration's assault on nonmilitary public spending. This will have direct consequences for employment. State and local government is no longer a source of new work: From April to October, this sector actually lost 350,000 jobs, on a seasonally adjusted basis.

The effects of spending cuts are also unlikely to be counteracted by eventual defense-related employment. Even at the time of the Vietnamese War, military spending created less employment than other public spending. The new boom—buying research, accurate missiles, a communications system that would survive a nuclear war—would provide still fewer jobs, above all for unskilled and unemployed workers.

The indirect consequences of the Reagan cuts may be even more ominous. For the private health services, on which so much new employment depends, grew up in the interstices of public-health spending. Like certain business services that supply government, they will be hurt by cuts in public expenditure. Recent suggestions by Richard S. Schweiker, Secretary of Health and Human Services—to cut reimbursement of "ancillary hospital services," and to limit Medicaid payments for long-term care—could end the growth of jobs in the private hospitals and nursing homes so important in the 1970's boom.

The transformation of employment in the United States makes it essential to find ways of creating new jobs in industries where productivity is high; of creating jobs with possibilities for advancement and creativity; of increasing quality and efficiency in private and public services. These needs are obscured by an economic vision that looks only at the behemoths of overall inflation and overall unemployment. The chance of long-term growth in productive work may be lost for many more years to come—if the Reagan policies bring a collapse in employment in services, in government, and throughout the economy.●

ORDER FOR RECESS UNTIL MONDAY, DECEMBER 7, 1981

Mr. BAKER. Madam President, I ask unanimous consent that the previous order for the Senate to convene on tomorrow be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 12 noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS ON MONDAY

Mr. BAKER. Madam President, I ask unanimous consent that following the recognition of the two leaders under the standing order on Monday, there be a period for the transaction of routine morning business, not to exceed 1 hour, in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Madam President, it is the intention of the leadership on Monday to ask the Senate to proceed to the consideration of S. 10, the Hoover Commission bill; S. 881, the Small Business Innovation Research Act; and possibly other matters, in the course of the day.

There is another matter which may be disposed of on Monday, and which I hope we will be able to clear—and I believe we will—and that is Calendar No. 394, Senate Resolution 328, a resolution by the Senator from Texas (Mr. BENTSEN) dealing with deductibility from personal taxes of interest paid on residential mortgages.

It is possible that, during the day, other matters may be dealt with.

Next week will be a busy week. It is the hope of the leadership that we will be able to dispose of other appropriations bills. There are now only three yet to be dealt with in the Senate, and I should like to do all of them, but we will certainly do some of them in the course of the week.

In addition, I expect the Senate to proceed to the further consideration of the Department of Justice authorization bill in the course of next week.

It is my hope, Madam President, that the other body will act on a continuing resolution and transmit it to the Senate in time for action before the weekend. There is a strong possibility of a Saturday session next week, on the 12th of December. That is especially likely in light of the probable action of the House of Representatives on a continuing resolution on the 11th.

Other matters will come before the Senate, including the possibility of a second concurrent resolution, which may be presented on Tuesday or Wednesday of next week; a regulatory reform bill, S. 1080, perhaps; and other matters.

I urge all Senators to plan to be here during the entire week and on Saturday. We are very close to the time when the Senate and the House of Representatives can adjourn sine die.

I hope that we will exert our best efforts then in the 6 days of next week to move us closer to that objective.

ORDER OF BUSINESS

Mr. BAKER. Madam President, the request that I am about to make at this time has been cleared by the distinguished minority leader.

OLDER AMERICANS ACT AMENDMENTS OF 1981

Mr. BAKER. Madam President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1086.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 1086) entitled "An Act to extend and revise the Older Americans Act of 1965, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Perkins, Mr. Biaggi, Mr. Andrews, Mr. Corrada, Mr. Williams of Montana, Mr. Ratchford, Mr. Ashbrook, Mr. Coleman, and Mr. Petri be the managers of the conference on the part of the House.

● Mr. HATCH. Madam President, as we approach the culmination of the national meeting of the 1981 White House Conference on Aging, I would like to renew my pledge to improve the lives of our 36 million senior citizens by requesting a conference with the House on S. 1086 and

expedite reauthorization of the Older Americans Act.

As chairman of the Senate Labor and Human Resources Committee, I would request that the following be appointed as conferees: Messrs. HATCH, DENTON, HUMPHREY, QUAYLE, EAGLETON, METZENBAUM, and KENNEDY.●

Mr. BAKER. Madam President, I move that the Senate disagree with the House amendments and agree with the request of the House of Representatives for a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer (Mrs. KASSEBAUM) appointed Mr. HATCH, Mr. DENTON, Mr. HUMPHREY, Mr. QUAYLE, Mr. EAGLETON, Mr. METZENBAUM, and Mr. KENNEDY conferees on the part of the Senate.

ORDER OF BUSINESS

Mr. BAKER. Madam President, this request has been cleared as well by the distinguished minority leader.

SEQUENTIAL REFERRAL

Madam President, I ask unanimous consent that a bill introduced by Senator STAFFORD today, dealing with cooperative agreements to construct and operate facilities for processing solid waste, be sequentially referred, and that when the bill is reported by the Judiciary Committee it be referred to the Committee on Environment and Public Works for a period not to exceed 30 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR PRINTING "ENACTMENT OF A LAW AND OTHER ASPECTS OF THE LEGISLATIVE BRANCH OF GOVERNMENT"

Mr. BAKER. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 254) authorizing the printing of "Enactment of a Law and Other Aspects of the Legislative Branch of Government as a Senate document.

The PRESIDING OFFICER. Is there objection to its immediate consideration?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 254) was agreed to, as follows:

S. RES. 254

Resolved, That a document entitled "Enactment of a Law and Other Aspects of the Legislative Branch of Government", relative to the procedural steps in the legislative process, prepared by the Parliamentarian of the Senate, under the direction of the Secretary of the Senate, be printed as a Senate document.

SEC. 2. There shall be printed eleven thousand additional copies for the use of the Committee on Rules and Administration.

NATIONAL CONSTRUCTION INDUSTRY WEEK

Mr. BAKER. Madam President, this has been cleared by the minority leader as well. I ask that the Chair lay before the Senate Senate Joint Resolution 122, Calendar No. 396, a joint resolution.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk reads as follows:

A joint resolution (S.J. Res. 122) to authorize and request the President to designate the week of February 28, 1982, through March 6, 1982, as "National Construction Industry Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Without objection, the joint resolution will be considered to have been read the second time at length.

The joint resolution (S.J. Res. 122) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 122

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of February 28, 1982, through March 6, 1982, as "National Construction Industry Week," and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.

RECESS UNTIL MONDAY, DECEMBER 7, 1981

Mr. BAKER. Madam President, I know of no other business to come before the Senate and I see no Senator seeking recognition. I move now, in accordance with the order previously entered, that the Senate stand in recess until the hour of 12 noon on Monday.

The motion was agreed to; and at 5:21 p.m., the Senate recessed until Monday, December 7, 1981, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate December 4, 1981:

DEPARTMENT OF STATE

Walter Leon Cutler, of Maryland, a Career Member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Tunisia.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Maurice H. Stans, of California, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term of 3 years expiring December 17, 1984, vice William M. Landau, term expiring.

THE JUDICIARY

Michael S. Kanne, of Indiana, to be U.S. district judge for the northern district of Indiana vice Phil M. McNagny, Jr., deceased.

James T. Moody, of Indiana, to be U.S. district judge for the northern district of Indiana vice Jesse E. Eschbach, elevated.

David L. Russell, of Oklahoma, to be U.S. district judge for the northern, eastern, and western districts of Oklahoma vice Frederick A. Daugherty, retired.

DEPARTMENT OF JUSTICE

Lamond Robert Mills, of Nevada, to be United States attorney for the district of Nevada for the term of 4 years vice B. Mahlon Brown III.

Thomas A. O'Hara, Jr., of Nebraska, to be United States Marshal for the district of Nebraska for the term of 4 years vice Mack A. Backhaus.

Bruce R. Montgomery, of Tennessee, to be United States Marshal for the eastern district of Tennessee for the term of 4 years vice Harry D. Mansfield.

Robert T. Keating, of Wisconsin, to be United States Marshal for the eastern district of Wisconsin for the term of 4 years vice William L. Brown, term expired.

Col. Bertram W. Sealy, Jr., [redacted] Air National Guard of the United States.

Col. John J. Zito, [redacted], Air National Guard of the United States.

HOUSE OF REPRESENTATIVES—*Monday, December 7, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious Lord, we are thankful that we can do our work this day in peace and security, and we are grateful for those who demonstrate their commitment and use their abilities in the defense of our Nation. We remember with appreciation all those, who, in other days, have given their lives to protect the freedoms we enjoy. Continue to grant us the privilege of a free society where people may know fulfillment of their divine nature and may realize the satisfaction of a full and free life. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4241. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4241) entitled "An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LAXALT, Mr. GARN, Mr. MATTINGLY, Mr. HATFIELD, Mr. SASSER, Mr. INOUYE, and Mr. PROXMIRE to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1086) entitled "An act to extend and revise the Older Americans Act of 1965, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HATCH, Mr. DENTON, Mr. HUMPHREY, Mr. QUAYLE, Mr. EAGLETON, Mr. METZENBAUM, and Mr. KENNEDY to be the conferees on the part of the Senate.

The message also announced that the Senate has passed a bill and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 657. An act to designate the Department of Commerce Building in Washington, the District of Columbia, as the "Herbert Clark Hoover Department of Commerce Building"; and

S.J. Res. 122. Joint resolution to authorize and request the President to designate the week of February 28, 1982, through March 6, 1982, as "National Construction Industry Week."

APPOINTMENT AS MEMBERS OF U.S. DELEGATION OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP FOR 2D SESSION OF 97TH CONGRESS

The SPEAKER. Pursuant to the provisions of Public Law 86-42, as amended, the Chair appoints as members of the U.S. delegation of the Canada-United States Interparliamentary group for the 2d session of the 97th Congress, to be held March 4-8, 1982, in Key Largo, Fla., the following Members on the part of the House:

Mr. FASCELL of Florida, chairman; Mr. BOLAND of Massachusetts, vice chairman; Mr. GIBBONS of Florida; Mr. HAMILTON of Indiana; Mr. OBERSTAR of Minnesota; Mr. BARNES of Maryland; Mr. ECKART of Ohio; Mr. HORTON of New York; Mr. WINN of Kansas; Mr. STANGELAND of Minnesota; Mrs. SNOWE of Maine; and Mr. MARTIN of New York.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
December 7, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 3:00 p.m. on Friday, December 4, 1981 and said to contain a message from the President wherein he transmits the 16th Annual Report of the Department of Housing and Urban Development.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

SIXTEENTH ANNUAL REPORT OF DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

I hereby transmit for the information of the Congress the Sixteenth Annual Report of the Department of Housing and Urban Development covering the calendar year 1980.

RONALD REAGAN.

THE WHITE HOUSE, *December 4, 1981.*

CONFERENCE REPORT ON H.R. 3455, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. BRINKLEY submitted the following conference report and statement on the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-362)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Military Construction Authorization Act, 1982".

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION PROJECTS

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing per-

manent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

Inside the United States

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, $1,600,000.
Fort Campbell, Kentucky, $1,500,000.
Fort Carson, Colorado, $29,690,000.
Fort Drum, New York, $14,480,000.
Fort Greely, Alaska, $1,150,000.
Fort Hood, Texas, $28,710,000.
Fort Irwin, California, $43,350,000.
Fort Lewis, Washington, $6,700,000.
Fort George G. Meade, Maryland, $3,350,000.
Fort Polk, Louisiana, $630,000.
Fort Riley, Kansas, $4,640,000.
Fort Stewart/Hunter Army Air Field, Georgia, $28,500,000.
Fort J. M. Wainwright, Alaska, $1,200,000.
Presidio of San Francisco, California, $520,000.

UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Carlisle Barracks, Pennsylvania, $620,000.
Fort Belvoir, Virginia, $3,600,000.
Fort Benjamin Harrison, Indiana, $5,120,000.

UNITED STATES ARMY INTELLIGENCE AND SECURITY COMMAND

Korea, $1,550,000.
Turkey, $2,550,000.

EMERGENCY CONSTRUCTION

Sec. 102. The Secretary of the Army may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

Sec. 103. The Secretary of the Army is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $34,150,000.

DEFICIENCY AUTHORIZATIONS FOR PRIOR YEAR PROJECTS

Sec. 104. (a) Section 602(1) of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 941), is amended to read as follows:

"(1) for title I: inside the United States $591,785,000; outside the United States $162,950,000; minor construction $52,270,000; for a total of $807,005,000.".

(b) Section 602(1) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), is amended to read as follows:

"(1) for title I: inside the United States $590,440,000; outside the United States $248,140,000; minor construction $44,560,000; for a total of $883,140,000.".

TITLE II—NAVY

AUTHORIZED NAVY CONSTRUCTION PROJECTS

Sec. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

Inside the United States

UNITED STATES MARINE CORPS

Marine Corps Logistics Base, Barstow, California, $4,700,000.
Marine Corps Base, Camp Lejeune, North Carolina, $26,250,000.
Marine Corps Base, Camp Pendleton, California, $18,550,000.
Marine Corps Air Station, Cherry Point, North Carolina, $3,700,000.
Marine Corps Air Station, El Toro, California, $12,400,000.
Marine Corps Air Station, Kaneohe Bay, Hawaii, $2,650,000.
Marine Corps Air Station, New River, North Carolina, $5,060,000.
Marine Corps Bases Pacific, Camp H. M. Smith, Oahu, Hawaii, $2,900,000.
Marine Corps Recruit Depot, Parris Island, South Carolina, $13,400,000.
Marine Corps Development and Education Command, Quantico, Virginia, $13,560,000.
Marine Corps Recruit Depot, San Diego, California, $1,300,000.
Marine Corps Air Station (Helicopter), Tustin, California, $7,600,000.
Marine Corps Air-Ground Combat Center, Twentynine Palms, California, $5,450,000.
Marine Corps Air Station, Yuma, Arizona, $3,450,000.

OFFICE OF NAVAL RESEARCH

Naval Ocean Research and Development Activity, Bay Saint Louis, Mississippi, $5,900,000.
Naval Research Laboratory, Washington, District of Columbia, $6,800,000.

CHIEF OF NAVAL OPERATIONS

Naval Submarine Base, Bangor, Bremerton, Washington, $19,150,000.
Naval Submarine Support Base, Kings Bay, Kingsland, Georgia, $65,060,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Air Station, Brunswick, Maine, $12,800,000.
Naval Air Station, Cecil Field, Florida, $21,700,000.

Naval Station, Charleston, South Carolina, $21,660,000.
Naval Submarine Base, New London, Groton, Connecticut, $15,650,000.
Naval Submarine Support Facility, New London, Groton, Connecticut, $3,300,000.
Naval Air Station, Jacksonville, Florida, $6,380,000.
Naval Amphibious Base, Little Creek, Virginia, $27,950,000.
Naval Station, Mayport, Florida, $2,000,000.
Naval Station, Norfolk, Virginia, $46,100,000.
Naval Air Station, Oceana, Virginia, $18,760,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Station, Adak, Alaska, $1,550,000.
Naval Air Station, Barbers Point, Hawaii, $9,650,000.
Naval Air Station, Fallon, Nevada, $18,300,000.
Naval Air Station, Lemoore, California, $2,200,000.
Naval Station, Long Beach, California, $22,000,000.
Naval Air Station, Moffett Field, California, $2,000,000.
Naval Air Station, North Island, California, $13,240,000.
Naval Station, Pearl Harbor, Hawaii, $9,920,000.
Naval Submarine Base, Pearl Harbor, Hawaii, $13,350,000.

NAVAL EDUCATION AND TRAINING COMMAND

Naval Air Station, Chase Field, Texas, $3,230,000.
Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, $4,600,000.
Naval Training Center, Great Lakes, Illinois, $11,800,000.
Naval Explosive Ordnance Disposal School, Indian Head, Maryland, $3,300,000.
Naval Air Station, Memphis, Millington, Tennessee, $11,000,000.
Naval Air Station, Meridian, Mississippi, $2,600,000.
Naval Education and Training Center, Newport, Rhode Island, $1,900,000.
Naval Justice School, Newport, Rhode Island, $1,500,000.
Naval Training Center, Orlando, Florida, $6,880,000.
Naval Air Station, Pensacola, Florida, $14,100,000.
Fleet Combat Training Center, Pacific, San Diego, California, $6,800,000.
Naval Training Center, San Diego, California, $1,150,000.

BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Clinic, Annapolis, Maryland, $3,560,000.
National Naval Medical Center, Bethesda, Maryland, $1,100,000.

NAVAL MATERIAL COMMAND

Pacific Missile Range Facility, Barking Sands, Hawaii, $8,100,000.
David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland, $5,050,000.
Puget Sound Naval Shipyard, Bremerton, Washington, $164,600,000.
Charleston Naval Shipyard, Charleston, South Carolina, $20,650,000.
Naval Supply Center, Charleston, South Carolina, $4,200,000.
Naval Weapons Station, Charleston, South Carolina, $1,390,000.
Naval Air Rework Facility, Cherry Point, North Carolina, $2,800,000.
Naval Weapons Center, China Lake, California, $4,400,000.
Naval Weapons Station, Concord, California, $1,280,000.
Naval Weapons Support Center, Crane, Indiana, $3,500,000.
Naval Surface Weapons Center, Dahlgren, Virginia, $4,900,000.
Naval Construction Battalion Center, Gulfport, Mississippi, $680,000.
Naval Ordnance Station, Indian Head, Maryland, $26,100,000.
Naval Air Rework Facility, Jacksonville, Florida, $25,620,000.

Naval Security Group Activity, Edzell, Scotland, United Kingdom, $3,515,000.

EMERGENCY CONSTRUCTION

Sec. 202. The Secretary of the Navy may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

Sec. 203. The Secretary of the Navy is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $33,320,000.

NAVAL AIR STATION, KEY WEST, FLORIDA

Sec. 204. The Secretary of the Navy may acquire lands or interests in lands necessary to ensure unhampered air operations at the Naval Air Station, Key West, Florida, by exchange of Government-owned land of equal value to the lands or interests in lands acquired.

STEAM SUPPLY, NAVAL STATION, CHARLESTON, SOUTH CAROLINA

Sec. 205. (a) The Secretary of the Navy may, in order to supply needed steam or needed steam and electricity to the Naval Station, Charleston, South Carolina—

(1) construct steam lines and all other needed facilities to tie into the waste heat

recovery boilers of the Macalloy Corporation (a corporation incorporated under the laws of the State of Delaware), and

(2) contract with such corporation to supply steam or both steam and electricity to such naval station,

if the Secretary determines that such construction and contract would be cost effective using accepted life-cycle costing procedures.

(b) Before entering into a contract with the Macalloy Corporation for the supply of steam or both steam and electricity, the Secretary of the Navy shall submit a report on the costs associated with such contract (including the life-cycle cost analyses to support his proposal) to the Committees on Armed Services of the Senate and House of Representatives. The Secretary may then enter into such contract with the Macalloy Corporation after thirty days have elapsed from the date of receipt by such committees of such report or after both committees have indicated approval of such report.

(c) The authority of the Secretary to enter into a contract under this section is subject to the availability of appropriations for that purpose.

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

Sec. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

Inside the United States

AIR FORCE LOGISTICS COMMAND

Kelly Air Force Base, Texas, $3,550,000.
McClellan Air Force Base, California, $18,830,000.
Robins Air Force Base, Georgia, $6,890,000.
Tinker Air Force Base, Oklahoma, $31,520,000.
Wright-Patterson Air Force Base, Ohio, $120,150,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, $1,690,000.
Brooks Air Force Base, Texas, $3,110,000.
Buckley Air National Guard Base, Colorado, $14,000,000.
Cape Canaveral Air Force Station, Florida, $1,810,000.
Eglin Air Force Base, Florida, $4,100,000.
Los Angeles Air Force Station, California, $2,370,000.
Patrick Air Force Base, Florida, $2,950,000.
Sunnyvale Air Force Station, California, $7,250,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, $4,120,000.
Columbus Air Force Base, Mississippi, $510,000.
Keesler Air Force Base, Mississippi, $8,480,000.
Laughlin Air Force Base, Texas, $1,090,000.
Lowry Air Force Base, Colorado, $2,840,000.
Mather Air Force Base, California, $1,520,000.
Randolph Air Force Base, Texas, $3,360,000.
Reese Air Force Base, Texas, $1,140,000.
Sheppard Air Force Base, Texas, $10,745,000.
Vance Air Force Base, Oklahoma, $2,840,000.
Williams Air Force Base, Arizona, $2,600,000.

ALASKAN AIR COMMAND

Eielson Air Force Base, Alaska, $1,700,000.
Elmendorf Air Force Base, Alaska, $7,240,000.
King Salmon Airport, Alaska, $8,050,000.
Various Locations, Alaska, $42,750,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, $6,650,000.
Andrews Air Force Base, Maryland, $4,940,000.
Charleston Air Force Base, South Carolina, $630,000.
Kirtland Air Force Base, New Mexico, $7,510,000.
Little Rock Air Force Base, Arkansas, $790,000.
McChord Air Force Base, Washington, $1,180,000.
McGuire Air Force Base, New Jersey, $2,680,000.
Norton Air Force Base, California, $20,000,000.
Pope Air Force Base, North Carolina, $5,510,000.
Scott Air Force Base, Illinois, $5,450,000.
Travis Air Force Base, California, $3,790,000.

NORTH AMERICAN AIR DEFENSE COMMAND

NORAD Cheyenne Mountain Complex, Colorado, $11,000,000.

PACIFIC AIR COMMAND

Hickam Air Force Base, Hawaii, $1,090,000.

STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, $3,000,000.
Blytheville Air Force Base, Arkansas, $20,440,000.
Carswell Air Force Base, Texas, $39,810,000.
Castle Air Force Base, California, $2,000,000.
Dyess Air Force Base, Texas, $1,420,000.
Ellsworth Air Force Base, South Dakota, $36,880,000.
Francis E. Warren Air Force Base, Wyoming, $720,000.
Fairchild Air Force Base, Washington, $25,800,000.
Grand Forks Air Force Base, North Dakota, $1,420,000.
Griffiss Air Force Base, New York, $8,390,000.
Grissom Air Force Base, Indiana, $4,070,000.
K. I. Sawyer Air Force Base, Michigan, $4,370,000.
Loring Air Force Base, Maine, $12,340,000.
March Air Force Base, California, $1,705,000.
McConnell Air Force Base, Kansas, $1,090,000.
Minot Air Force Base, North Dakota, $7,406,000.
Offutt Air Force Base, Nebraska, $4,060,000.
Pease Air Force Base, New Hampshire, $6,840,000.
Peterson Air Force Base, Colorado, $4,260,000.
Plattsburgh Air Force Base, New York, $890,000.
Rickenbacker Air Force Base, Indiana, $540,000.
Vandenberg Air Force Base, California, $9,000,000.
Whiteman Air Force Base, Missouri, $1,090,000.
Wurtsmith Air Force Base, Michigan, $2,270,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, $2,580,000.
Cannon Air Force Base, New Mexico, $2,700,000.
Davis-Monthan Air Force Base, Arizona, $12,460,000.
England Air Force Base, Louisiana, $2,170,000.
George Air Force Base, California, $2,460,000.
Holloman Air Force Base, New Mexico, $7,480,000.
Homestead Air Force Base, Florida, $2,480,000.
Hurlburt Field, Florida, $510,000.
Langley Air Force Base, Virginia, $10,220,000.
Luke Air Force Base, Arizona, $520,000.
MacDill Air Force Base, Florida, $16,960,000.
Moody Air Force Base, Georgia, $650,000.
Mountain Home Air Force Base, Idaho, $3,410,000.
Myrtle Beach Air Force Base, South Carolina, $7,130,000.
Nellis Air Force Base, Nevada, $6,870,000.
Seymour-Johnson Air Force Base, North Carolina, $1,420,000.
Tyndall Air Force Base, Florida, $510,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, $510,000.

Outside the United States

MILITARY AIRLIFT COMMAND

Lajes Field, Portugal, $46,570,000.
Rhein-Main Air Base, Germany, $1,200,000.

PACIFIC AIR FORCES

Clark Air Base, Republic of the Philippines, $9,330,000.
Diego Garcia Air Base, Indian Ocean, $114,990,000.
Hampyong Communication Station, Korea, $1,540,000.
Hunghae Communication Station, Korea, $1,500,000.
Kadena Air Base, Japan, $17,490,000.
Kunsan Air Base, Korea, $12,380,000.
Kwang-Ju Air Base, Korea, $6,650,000.
Osan Air Base, Korea, $26,720,000.
Various Locations, $1,250,000.

STRATEGIC AIR COMMAND

Thule Air Base, Greenland, $1,600,000.

UNITED STATES AIR FORCES IN EUROPE

Egypt, Various Locations, $70,400,000.
Germany, Various Locations, $13,424,000.
San Vito Air Station, Italy, $1,540,000.
Camp New Amsterdam, Netherlands, $4,860,000.
Hellenikon, Greece, $800,000.
Oman, Various Locations, $78,480,000.
Spain, Various Locations, $5,390,000.
Incirlik Air Base, Turkey, $1,160,000.
Turkey, Various Locations, $4,000,000.
United Kingdom, Various Locations, $26,190,000.
Various Locations, $113,086,000.

EMERGENCY CONSTRUCTION

Sec. 302. The Secretary of the Air Force may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production sched-

ules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act of fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

Sec. 303. The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $28,680,000.

DEFICIENCY AUTHORIZATION FOR PRIOR YEAR PROJECT

Sec. 304. Section 602(3) of the Military Construction Authorization Act, 1977 (Public Law 94-431; 90 Stat. 1361) is amended to read as follows:

"(3) for title III: inside the United States $759,759,000; outside the United States $56,650,000; for a total of $816,409,000.".

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

Sec. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies for the following acquisition and construction:

Inside the United States

DEFENSE INTELLIGENCE AGENCY

Bolling Air Force Base, District of Columbia, $72,500,000.

DEFENSE LOGISTIC AGENCY

Defense Construction Supply Center, Columbus, Ohio, $680,000.

Defense Depot, Tracy, California, $554,000.

Defense Depot, Mechanicsburg, Pennsylvania, $2,050,000.

Defense Depot, Memphis, Tennessee, $5,220,000.

Defense Depot, Ogden, Utah, $2,670,000.

Defense Fuel Support Point, Grand Forks, North Dakota, $1,690,000.

Defense Fuel Support Point, Pearl City, Hawaii, $3,600,000.

Defense General Supply Center, Richmond, Virginia, $5,600,000.

Defense Property Disposal Office, Fort Bragg, North Carolina, $2,800,000.

DEFENSE MAPPING AGENCY

Aerospace Center, Saint Louis, Missouri, $10,750,000.

DEFENSE PUBLIC AFFAIRS

American Forces Radio and Television Service, Los Angeles, California, $6,125,000.

NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, $57,596,000.

office of the secretary of defense

Classified Activity, Classified Location, $10,000,000.

Classified Activity, Fort Belvoir, Virginia, $2,100,000.

Outside the United States

DEFENSE COMMUNICATIONS AGENCY

Patch Barracks, Vaihingen, Germany, $900,000.

DEFENSE LOGISTICS AGENCY

Defense Fuel Support Point, Wake Island, $14,500,000.

Defense Property Disposal Office, Kaiserslautern, Germany, $1,210,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Classified Location, $2,000,000.

DEPARTMENT OF DEFENSE DEPENDENTS SCHOOLS

Croughton Royal Air Force Station, United Kingdom, $13,700,000.

Dexheim, Germany, $800,000.

Fulda, Germany, $8,590,000.

Landstuhl Air Base, Germany, $5,030,000.

Misawa Air Base, Japan, $6,180,000.

Naval Station, Guantanamo Bay, Cuba, $5,900,000.

Pusan, Korea, $2,460,000.

Schwaebisch Hall, Germany, $640,000.

Seoul, Korea, $4,350,000.

Vilseck, Germany, $8,120,000.

Yokota Air Base, Japan, $3,290,000.

EMERGENCY CONSTRUCTION

Sec. 402. The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $15,000,000. The Secretary of Defense, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

MINOR CONSTRUCTION

Sec. 403. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $6,210,000.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

AUTHORIZED CONTRIBUTION

Sec. 501. (a) The Secretary of Defense is authorized to incur obligations in amounts not to exceed $345,000,000 for the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area.

(b) Within thirty days after the end of each calendar-year quarter, the Secretary of Defense shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred by the United States during the preceding quarter for the United States share of the cost of such multilateral programs.

TITLE VI—MILITARY FAMILY HOUSING AND HOMEOWNERS ASSISTANCE PROGRAM

AUTHORIZATION TO CONSTRUCT OR ACQUIRE HOUSING

Sec. 601. (a) The Secretary of Defense, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of Defense is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units:

Marine Corps Air Station, El Toro, California, two hundred and twelve units, $15,540,000.

Fort Irwin, California, four hundred and fifty-four units, $32,055,000.

Naval Complex, San Diego, California, two hundred and ninety units, $25,350,000.

Naval Submarine Support Base, Kings Bay, Georgia, one hundred and sixty-five units, $12,740,000.

Picatinny Arsenal, New Jersey, twenty-six units, $2,141,000.

Fort Drum, New York, two hundred and thirty-two units, $15,865,000.

Naval Air Station, Chase Field, Texas, eighty-eight units, $6,360,000.

Incirlik Air Base, Turkey, four hundred units, $29,000,000.

Greenham-Common, United Kingdom, two hundred and seventy units, $27,200,000.

Classified Location Overseas, six units, $765,000.

(d) The amounts specified in this section may, at the discretion of the Secretary of Defense, or the Secretary's designee, be increased by 10 percent, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

IMPROVEMENT OF EXISTING QUARTERS

Sec. 602. (a) The Secretary of Defense, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed $109,819,000 of which $44,878,000 shall be available only for energy conservation projects.

(b) The Secretary of Defense, or the Secretary's designee, within the amount specified in subsection (a), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (42 U.S.C. 1594h-2), as follows:

Marine Corps Air Ground Combat Center, Twentynine Palms, California, one hundred and thirty-five units, $2,897,300.

Navy Public Works Center, Honolulu, Hawaii, one hundred units, $3,190,000.

Chanute Air Force Base, Illinois, two hundred and twenty-two units, $4,662,000.

Fort Knox, Kentucky, one hundred units, $2,851,000.

Nellis Air Force Base, Nevada, two hundred thirty-six units, $4,956,000.

Kirtland Air Force Base, New Mexico, one hundred and fifty-five units, $3,875,000.

Offutt Air Force Base, Texas, eighty units, $1,599,000.

Randolph Air Force Base, Texas, one hundred and sixty-seven units, $3,839,000.

Fort Lewis, Washington, fifty-eight units, $1,378,000.

Mildenhall, United Kingdom, thirty units, $1,511,600.

Upper Heyford, United Kingdom, twelve units, $648,400.

ADVANCE PLANNING AND DESIGN

Sec. 603. The Secretary of Defense may carry out advance planning and construction design and may obtain architectural and engineering services in connection with any family housing construction, including improvements, authorized or not otherwise authorized by law at a total cost of not to exceed $9,100,000.

LEASING OF FAMILY HOUSING

Sec. 604. Section 2675(d) of title 10, United States Code, is amended—

(1) by striking out "150" in paragraph (1) and inserting in lieu thereof "250"; and

(2) by striking out "17,000" in paragraph (2) and inserting in lieu thereof "22,000".

AUTHORIZATION OF APPROPRIATIONS

Sec. 605. (a) There is authorized to be appropriated for fiscal year 1982 for use by the Secretary of Defense, or the Secretary's designee, for military family housing as authorized by law for the following purposes:

(1) For construction or acquisition of family housing, including minor construction, improvements to public quarters, relocation of family housing, and planning, an amount not to exceed $285,935,000.

(2) For support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act (12 U.S.C. 1715m), an amount not to exceed $2,047,801,000, of which not more than $12,000,000 may be obligated or expended for the leasing of military family housing in the United States, the Commonwealth of Puerto Rico, and Guam, and of which not more than $113,717,000 may be obligated or expended for the leasing of military family housing in foreign countries.

(3) For homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374), including acquisition of properties, an amount not to exceed $2,000,000.

(b) The amounts authorized to be appropriated in subsection (a)(2) for salary, pay, retirement, or other benefits for Federal employees may be increased by such amounts as may be necessary for increases in such benefits authorized by law.

TITLE VII—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

WAIVER OF RESTRICTIONS

Sec. 701. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or lands includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

AUTHORIZATION OF APPROPRIATIONS

Sec. 702. There are authorized to be appropriated for fiscal years beginning after September 30, 1981, such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: inside the United States $389,036,000; outside the United States $381,534,000; minor construction $34,150,000; for a total of $804,720,000;

(2) for title II: inside the United States $970,268,000; outside the United States $236,445,000; minor construction $33,320,000; for a total of $1,240,033,000;

(3) for title III: inside the United States $669,276,000; outside the United States $560,550,000; minor construction $28,680,000; for a total of $1,258,506,000;

(4) for title IV: a total of $282,815,000, including $6,210,000 for minor construction; and

(5) for title V: a total of $345,000,000.

COST VARIATIONS

Sec. 703. (a) Overall Title Total Limitation.—Notwithstanding the provisions of subsections (b), (c), (e), and (h), the total cost of all construction and acquisition in each of titles I, II, III, and IV may not exceed the total amount authorized to be appropriated in that title.

(b) Variations in Installation Totals—Unusual Variations in Cost.—Except as provided in subsections (c) and (e), any of the amounts specified in titles I, II, III, and IV (other than in sections 103, 203, 303, and 403) may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 percent when inside the United States (other than Alaska or Hawaii), and by 10 percent when outside the United States or in Alaska or Hawaii, if the Secretary of the military department or Director of the defense agency concerned determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(c) Variations in Installation Totals—Only One Project at an Installation.—When the amount named for any construction or acquisition in title I, II, III, or IV involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (b), the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 percent the amount named for such project by the Congress.

(d) Variations in North Atlantic Treaty Organization Total.—When the Secretary of Defense determines that the amount set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 percent the amount set forth in such title.

(e) Variations in Installation Totals—Reports by the Secretary of Defense.—When the Secretary of Defense determines that any amount specified in title I, II, III, IV, or V must be exceeded by more than the percentages permitted in subsections (b), (c), and (d) to accomplish authorized construction or acquisition or for contribution by the United States as its share of the cost of the North Atlantic Treaty Organization infrastructure program, the Secretary of Defense or the Secretary of the military department or Director of the defense agency concerned may proceed with such construction, acquisition, or contribution after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either (1) thirty days have elapsed from the date of submission of such report, or (2) both committees have indicated approval of such construction, acquisition, or contribution. Notwithstanding the provisions in prior Military Construction Authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(f) Cost and Scope Variations of Individual Projects: Reports to Congress.—No individual project authorized under title I, II, III, or IV for any specifically listed military installations for which the current working estimate is greater than the statutory upper limit for minor construction projects may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 percent; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 percent the amount authorized for such project by the Congress;

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either thirty days have elapsed from the date of submission of such report or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(g) Annual Reports to Congress.—The Secretary of Defense, or the Secretary's designee, shall submit an annual report to the Congress identifying each individual project (other than a project authorized under section 103, 203, 303, or 403) which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense, based upon bids received, for such project exceeded the amount authorized by the Congress for that project by more than 25 percent. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 percent in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such proj- ect by the Congress.

(h) Cost and Floor Area Variations—Solar Energy.—The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In order to equip any project authorized by this Act with solar heating equipment, solar cooling equipment, or both solar heating and solar cooling equipment, the Secretary of Defense may authorize increases in the cost limitations or floor area limitations for such project by such amounts as may be necessary for such purpose. Any increase under this subsection in the cost or floor area of a project authorized by this Act shall be in addition to any other increase in such cost or variation in floor area limitations authorized by this or any other Act.

CONSTRUCTION SUPERVISION

Sec. 704. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army, the Naval Facilities Engineering Command, Department of the Navy, or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practices) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business, the names of such firms, the total number of separate contracts awarded each firm, and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

REPEAL OF PRIOR YEAR AUTHORIZATIONS: EXCEPTIONS

Sec. 705. (a) As of October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), and all such authorizations contained in Acts approved before October 10, 1980, and not superseded or otherwise modified by a later authorization are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorizations for the following items authorized in section 101 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 928) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Boiler Plant Emission Control System construction in the amount of $1,900,000 at Anniston Army Depot, Alabama.

(2) Boiler Plant Emission Control System construction in the amount of $3,000,000 at Tobyhanna Army Depot, Pennsylvania.

(3) Boiler Plant Emission Control System construction in the amount of $2,800,000 at Fort Benjamin Harrison, Indiana.

(4) Industrial Waste Treatment Plant construction in the amount of $1,100,000 at Riverbank Army Ammunition Plant, California.

(5) Advanced Power Train Test Facility construction in the amount of $1,560,000 at Corpus Christi Army Depot, Texas.

(6) Ammunition Inspection and Test Facility construction in the amount of $1,200,000 at Letterkenny Army Depot, Pennsylvania.

(7) Replace Boilers construction in the amount of $8,600,000 at Red River Army Depot, Texas.

(8) Dental Clinic construction in the amount of $2,750,000 at Schofield Barracks, Hawaii.

(9) Centralized Container Ammunition Facility construction in the amount of $920,000 at Lone Star Army Ammunition Plant, Texas.

(10) Indoor Athletic Facilities construction in the amount of $12,200,000 at the United States Military Academy, West Point, New York.

(11) Temperature-Altitude Test Facility construction in the amount of $2,000,000 at the White Sands Missile Range, New Mexico.

(12) Water Monitor Station construction in the amount of $220,000 at Riverbank Army Ammunition Plant, California.

(c) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorization for the construction of the Reception Station at Fort Benning, Georgia, in the amount of $5,886,000 authorized in section 101 of the Military Construction Authorization Act, 1978 (Public Law 95-82; 91 Stat. 358), as such authorization was extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 945), shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later.

(d) Notwithstanding the provisions of subsection (a) of this section and of section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770) authorizations for the following items authorized in section 201 or such authorizations as were extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Municipal Sewer Connection construction in the amount of $2,200,000 at the Naval Submarine Base, New London, Connecticut.

(2) Insulation and Storm Windows construction in the amount of $2,350,000 at the Naval Weapons Station, Charleston, South Carolina.

(3) Applied Instruction (Morse Training) Building construction in the amount of $2,400,000 at the Naval Technical Training Center, Pensacola, Florida.

(4) Engine Test Cell Modernization in the amount of $3,500,000 at the Naval Air Rework Facility, Alameda, California.

(5) Municipal Sewer Connection construction in the amount of $2,100,000 at the Naval Shipyard, Long Beach, California.

(6) Industrial Waste Collection and Treatment construction in the amount of $6,500,000 at the Naval Shipyard, Long Beach, California.

(7) Engine Test Cell Modernization in the amount of $3,200,000 at the Naval Air Rework Facility, North Island, California.

(8) Aircraft Maintenance Hangar in the amount of $1,500,000 at the Naval Air Facility, Sigonella, Italy.

(e) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1770), authorizations for the following items authorized in section 301 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 934) shall remain in effect until October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Connect to Regional Sewage System in the amount of $1,100,000 at Richards-Gebaur Air Force Base, Missouri.

(2) Pave roads in the amount of $690,000 at Davis-Monthan Air Force Base, Arizona.

(3) Aircraft Maintenance Control Facility in the amount of $850,000 at England Air Force Base, Louisiana.

(4) Composite Medical Facility in the amount of $16,500,000 at George Air Force Base, California.

(5) Air Installation Compatible Use Zone in the amount of $1,950,000 at Buckley Air National Guard Base, Colorado.

(6) Various Operational Facilities in the amount of $4,950,000 at Roberts International Airport, Liberia.

(7) Unaccompanied Officer Personnel Housing in the amount of $510,000 at Taegu Air Force Base, Korea.

(8) Security Facilities in the amount of $3,485,000 at Howard Air Base, Canal Zone.

(9) Special Operations Facilities in the amount of $2,800,000 at Various Locations Overseas.

(10) Unaccompanied Enlisted Personnel Housing in the amount of $2,300,000 at Wright-Patterson Air Force Base, Ohio.

UNIT COST LIMITATIONS

Sec. 706. None of the authority contained in titles I, II, III, and IV shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) $53 per square foot for permanent barracks; or

(2) $57 per square foot for unaccompanied officer quarters;

unless the Secretary of Defense, or the Secretary's designee, determines that, because of special circumstances, application to such project of the limitation on unit cost contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

TITLE VIII—GUARD AND RESERVE FORCES FACILITIES

AUTHORIZATION FOR FACILITIES

Sec. 801. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, $60,000,000; and

(B) for the Army Reserve, $50,000,000.

(2) For the Department of the Navy: for the Naval and Marine Corps Reserves, $35,000,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, $100,000,000; and

(B) for the Air Force Reserve, $35,000,000.

WAIVER OF CERTAIN RESTRICTIONS

Sec. 802. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255) and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

EXPANSION OF FEDERAL FACILITIES BY THE NATIONAL GUARD

Sec. 803. Section 2233 of title 10, United States Code, is amended—

(1) by inserting "or by the United States" after "or convert facilities owned by it" in subsection (a)(2); and

(2) by adding at the end of subsection (b) the following new sentence: "Such property may be transferred to any State or Territory, Puerto Rico, or the District of Columbia incident to the expansion, rehabilitation, or conversion of such property under subsection (a)(2) so long as the transfer of such property does not result in the creation of an enclave owned by a State or Territory, Puerto Rico, or the District of Columbia within a Federal installation.".

FEDERAL CONTRIBUTIONS FOR CONSTRUCTION TO UPGRADE WEAPONS STORAGE FACILITIES

Sec. 804. Section 2233(a) of title 10, United States Code, is amended—

(1) by striking out "and" after clause (4);

(2) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new clause:

"(6) contribute to any State or Territory, Puerto Rico, or the District of Columbia such amounts for the construction, alteration, or rehabilitation of arms storage rooms as the Secretary determines to be required to meet a change in Department of Defense standards related to the safekeeping of arms.".

TITLE IX—GENERAL PROVISIONS

USE OF SOLAR ENERGY SYSTEMS IN NEW CONSTRUCTION

Sec. 901. Subsection (b) of section 2688 of title 10, United States Code, is amended to read as follows:

"(b) For the purposes of this section, a solar energy system shall be considered to be cost effective if the original investment cost differential can be recovered over the expected life of the facility using accepted life-cycle costing procedures. Such accepted life-cycle costing procedures shall include the use of the sum of all capital, operating, and maintenance expenses associated with the energy system of the building involved over the expected life of such system or during a period of twenty-five years, whichever is shorter, and using marginal fuel cost as determined by the Secretary of Defense and at a discount rate of 7 percent per year. For the purposes of a life-cycle cost analysis under this subsection, the original investment cost of a solar energy system shall be reduced 10 percent as an investment cost credit.".

CONSTRUCTION FUNDED BY FOREIGN GOVERNMENTS

Sec. 902. Section 504 of the Act of September 28, 1951 (31 U.S.C. 723), is amended—

(1) by inserting "(1)" after "in connection with"; and

(2) by striking out the period at the end and inserting in lieu thereof ", and (2) construction management of those projects funded by foreign governments directly or through international organizations for which United States forces are the sole or primary user.".

CONSTRUCTION AUTHORITY UNDER A DECLARATION OF WAR OR NATIONAL EMERGENCY

Sec. 903. (a) In the event of a declaration of war or the declaration by the President of a national emergency in accordance with the National Emergencies Act (50 U.S.C. 1601 et seq.) requiring use of the Armed Forces, the Secretary of Defense may, without regard to any other provision of law, undertake military construction necessary to support such use within the total amount of funds that have been appropriated for military construction, including funds appropriated for family housing, that have not been obligated.

(b) Authority under subsection (a) includes authority for (1) acquisition of real estate and interests in land (including temporary interests) by lease, purchase, gift, exchange of Government-owned land, or otherwise, (2) surveys and site preparation, (3) acquisition, lease, conversion, and rehabilitation of permanent or temporary facilities, (4) appurtenances, supporting facilities, and utilities incident to such construction, (5) acquisition of and installation of equipment integral to the construction, and (6) planning, supervision, administration, and overhead incident to such construction.

(c) The authority described in subsection (a) shall terminate at the end of the war or the end of the national emergency, as the case may be.

(d) Whenever a decision to undertake military construction authorized by this section is made, the Secretary of Defense shall notify the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the decision and the estimated cost of such construction, including the cost of real estate actions pertaining to the construction.

IMPACT PLANNING ASSISTANCE FOR AREAS AFFECTED BY THE MX WEAPON SYSTEM AND THE EAST COAST TRIDENT BASE

Sec. 904. (a) Section 801 of the Military Construction Authorization Act, 1981 (94 Stat. 1775), is amended by striking out "During fiscal year 1981" and all that follows through the colon and inserting in lieu

thereof the following: "The Secretary of Defense may use funds appropriated for fiscal year 1981 for planning and design purposes to provide community planning assistance, by grant or otherwise, as follows:".

(b) Section 802 of such Act is amended to read as follows:

"IMPACT ASSISTANCE FOR AREAS AFFECTED BY THE EAST COAST TRIDENT PROGRAM

"Sec. 802. (a) The Secretary of Defense (hereinafter in this section referred to as the 'Secretary') may assist communities located near the East Coast Trident Base, and the States in which such communities are located, in meeting the costs of providing increased municipal services and facilities to the residents of such communities, if the Secretary determines that there is an immediate and substantial increase in the need for such services and facilities in such communities as a direct result of work being carried out in connection with the construction, installation, or operation of the East Coast Trident Base and that an unfair and excessive financial burden will be incurred by such communities, or the States in which such communities are located, as a result of such increased need for such services and facilities.

"(b)(1) Whenever possible, the Secretary shall carry out the program of assistance authorized under this section through existing Federal programs. In carrying out such program of assistance, the Secretary may—

"(A) supplement funds made available under existing Federal programs through a direct transfer of funds from the Secretary to the department or agency concerned in such amounts as the Secretary considers necessary;

"(B) provide financial assistance to communities described in subsection (a) to help such communities pay their share of the costs under such programs;

"(C) guarantee State or municipal indebtedness, and make interest payments, in whole or in part, for State or municipal indebtedness, for improved public facilities related to the East Coast Trident Base; and

"(D) make direct grants to or on behalf of communities described in subsection (a) in cases in which Federal programs (or funds for such programs) do not exist or are not sufficient to meet the costs of providing increased municipal services and facilities to the residents of such communities.

"(2) The head of each department and agency shall cooperate fully with the Secretary in carrying out the provisions of this section on a priority basis.

"(3) Notwithstanding any other provision of law, the Secretary, in cooperation with the heads of other departments and agencies of the Federal Government, may provide assistance under this section in anticipation of the work to be carried out in connection with the East Coast Trident Base.

"(c) In determining the amount of financial assistance to be made available under this section to any local community for any community service or facility, the Secretary shall consult with the head of the department or agency concerned with the type of service or facility for which financial assistance is being made available and shall take into consideration—

"(1) the time lag between the initial impact of increased population in any such community and any increase in the local tax base which will result from such increased population;

"(2) the possible temporary nature of the increased population and the long-range cost impact on the permanent residents of any such community;

"(3) the initial capitalization required for municipal sewer and water systems;

"(4) the initial operating cost for upgrading municipal services; and

"(5) such other pertinent factors as the Secretary considers appropriate.

"(d) Funds appropriated to the Department of Defense for carrying out the East Coast Trident Base program may, to the extent specifically authorized in Military Construction Authorization Acts, be used by the Secretary to provide assistance under this section.

"(e) The Secretary shall transmit to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, not later than sixty days after the end of each fiscal year, a written report indicating the total amount transferred to and the amount obligated and expended by each local community or State which has been provided assistance under the authority of this section during the preceding fiscal year, the specific projects for which assistance was provided during such year, and the total amount for each such project during such year.".

DISTRICT OFFICES OF ARMY CORPS OF ENGINEERS

Sec. 905. (a) During fiscal year 1982, the Secretary of the Army shall maintain a District Office of the United States Army Corps of Engineers at each site within twenty-five miles of each major defense port within the continental United States at which there was such an office on June 4, 1981.

(b) For the purposes of this section, the term "major defense port" means any of the following:

(1) A major United States Navy shipyard.

(2) A home port for major naval forces.

(3) A major supply and embarkation port for elements of the Armed Forces.

RESTRICTIONS ON CONSTRUCTIONS OF SPECIAL CONTINGENCY FACILITIES IN CERTAIN COUNTRIES

Sec. 906. (a) Subject to subsections (b) and (c), none of the funds appropriated pursuant to this Act for the construction of contingency facilities to support the national security interests of the United States in Egypt, Kenya, Oman, Somalia, the island of Diego Garcia, or at Lajes Field (Portugal) may be obligated or expended for the construction of a facility in any such country, island, or air field unless each contract entered into for the construction of such facility requires that all construction materials (other than cement, cement products, aggregates, and concrete components other than steel) to be used in carrying out the contract will be materials produced, manufactured, or refined in the United States.

(b) The provisions of subsection (a) shall not apply (1) if the application of such provisions would violate a formal agreement between the United States and the country that exercises sovereignty over the land on which a facility referred to in such subsection is to be constructed, or (2) in the case of a contract for $5,000,000 or less.

(c) The project manager of a facility referred to in subsection (a) may authorize, in the construction of such facility, a limited use of materials not produced, manufactured, or refined in the United States if the manager determines that the use of such materials is necessary for the orderly and timely construction of such facility. However, the total amount expended for materials not produced, manufactured, or refined in the United States under a contract for the construction of a facility referred to in subsection (a) may not exceed the applicable limit specified in the following table:

If the contract amount is—		The percent of the contract amount that may be used to procure materials not produced, manufactured, or refined in the United States may not exceed—
More than—	But not more than—	
$5,000,000	$25,000,000	5
$25,000,000	$50,000,000	3
$50,000,000	$100,000,000	2
$100,000,000		1

MINOR CONSTRUCTION AUTHORITY

Sec. 907. (a) Subsection (b) of section 2674 of title 10, United States Code, is amended to read as follows:

"(b)(1) Except as provided in paragraph (2), a project costing more than $1,000,000 may not be carried out under the authority of this section.

"(2) The cost of a project may be increased above $1,000,000—

"(A) to not more than $1,100,000 if the Secretary of Defense determines that such an increase is required for the sole purpose of meeting unusual variations in cost and that such variations in cost could not have been reasonably anticipated at the time the project was originally approved by Congress; and

"(B) to more than $1,100,000 but not more than $1,250,000 if (i) the Secretary of Defense determines that such an increase is required for the sole purpose of meeting unusual variations in cost and that such variations in cost could not have been reasonably anticipated at the time the project was originally approved by Congress, (ii) the Secretary of Defense has notified the Committees on Armed Services of the Senate and House of Representatives in writing that he has made those determinations with respect to the project, and (iii) a 15-day period has elapsed after the date the notification is received by the committees, or both committees approve such increase before the expiration of the 15-day period.".

"(3)(A) Except as provided in subparagraph (B), a project costing more than $750,000 may not be carried out under this section unless approved in advance by the Secretary of Defense, and a project costing more than $500,000 but less than $750,000 may not be carried out under this section unless approved in advance by the Secretary of the military department or the Director of the defense agency concerned.

"(B) Approval under this paragraph is not required if the project has been authorized in an annual Military Construction Authorization Act.".

(b) Subsection (f) of such section is amended—

(1) by striking out "30 days" and "$300,000" in the second sentence and inserting in lieu thereof "fifteen days" and "$500,000", respectively; and

(2) striking out the last sentence and inserting in lieu thereof the following: "Such notice is not required in the case of a project that has been authorized in an annual Military Construction Authorization Act.".

(c) The amendments made by subsections (a) and (b) shall take effect on October 1, 1982.

GEOTHERMAL ENERGY RESOURCE DEVELOPMENT

Sec. 908. Subsection (a) of section 803 of the Military Construction Authorization Act, 1979 (Public Law 95-356; 92 Stat. 585), is amended to read as follows:

"(a) The Secretary of each military department may develop, for the use or benefit of the Department of Defense, any geothermal energy resource within lands under his jurisdiction, including public lands, if such development is in the public interest, as determined by the Secretary of the military department concerned, and will not deter commercial development and use of other portions of such resource if offered for leasing.".

AEROSPACE CORPORATION

Sec. 909. Section 609 of the Military Construction Authorization Act, 1966 (Public Law 89-188; 79 Stat. 818), is repealed.

sale of timber and timber products

Sec. 910. (a) Section 2665 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(e)(1) Each State in which is located a military installation or facility from which timber and timber products are sold in a fiscal year is entitled at the end of such year to an amount equal to 25 percent of (A) the amount received by the United States during such year as proceeds from the sale of timber and timber products produced on such installation or facility, less (B) the amount of reimbursement of appropriations of the Department of Defense under subsection (d) for all expenses of production of timber and timber products during such year attributable to such installation or facility.

"(2) The amount paid to a State pursuant to paragraph (1) shall be expended as the State legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the military installation or facility is situated.

"(3) In a case in which a military installation or facility is located in more than one State or county, the amount paid pursuant to paragraph (1) shall be distributed in a manner proportional to the area of such installation or facility in each State or county.".

(b) Subsection (e) of section 2665 of title 10, United States Code, as added by subsection (a), shall apply with respect to timber and timber products sold after September 30, 1981.

CONTINUED USE OF CERTAIN FORMER PUBLIC HEALTH SERVICE FACILITIES

Sec. 911. (a) Any Public Health Service hospital or other station which was transferred to a public or nonprofit private entity pursuant to the provisions of section 987 of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35; 95 Stat. 603) shall be deemed to be a facility of the uniformed services for the purposes of chapter 55 of title 10, United States Code, if such hospital or other station was, on the day before the date of the transfer, a facility approved under such chapter to provide medical and dental care to members and former members of the uniformed services and their dependents.

(b) The Secretary of Defense and the Secretary of Health and Human Services may terminate, for purposes of chapter 55 of title 10, United States Code, the approved status, of any facility described in subsection (a) to furnish medical or dental care to members and former members of the uniformed services and their dependents at any time after the expiration of three years after the date of the transfer of such facility under section 987 of the Omnibus Budget Reconciliation Act of 1981. The termination of such status in the case of any such facility may be effected only by an order jointly issued by the Secretary of Defense and the Secretary of Health and Human Services which identifies the facility whose approved status is being terminated and specifies the date on which such status is being terminated.

(c) The Secretary of Defense and the Secretary of Health and Human Services shall reimburse any facility described in subsection (a) for medical and dental care provided by such facility to members and former members of the uniformed services and their dependents who receive such care under chapter 55 of title 10, United States Code. The rates of reimbursement shall be negotiated and agreed upon by the Secretary of Defense, the Secretary of Health and Human Services, and the appropriate officials representing the facility concerned. The rates of reimbursement shall be based upon medical and dental care costs in the area in which the facility concerned is located.

special provisions relating to the expansion of fort carson military installation, colorado

Sec. 912. (a) Section 6(a) of the Act entitled "An Act to provide for certain payments to be made to local governments by the Secretary of the Interior based upon the amount of certain public lands within the boundaries of such locality", approved October 20, 1976 (90 Stat. 2665; 31 U.S.C. 1606), is amended—

(1) by striking out "or" at the end of clause (4);

(2) by adding "or" at the end of clause (5); and

(3) by adding at the end thereof the following new clause:

"(6) located in the vicinity of Purgatory River Canyon and Pinon Canyon, Colorado, and acquired after the date of the enactment of this clause by the United States for the purpose of expanding the Fort Carson military installation;".

(b) The Secretary of the Army shall adhere to all commitments made by the Secretary of the Army concerning environmental mitigation measures (including those regarding salinity) that are contained in the final environmental impact statement on the proposed Fort Carson military installation land acquisition.

LAND CONVEYANCE, CECIL COUNTY, MARYLAND

Sec. 913. (a) The Federal property constituting the former Naval Training Center, Bainbridge, Cecil County, Maryland, is hereby declared to be surplus property within the meaning of section 3(g) of the Federal Property and Administrative Services Act of 1949, and the Administrator of General Services is authorized to dispose of that property under such Act.

(b)(1) Proceeds from the disposition of property under this section shall be used by the Administrator to discharge any lien, encumbrance, contract claim, or other charge on or related to the property.

(2) The Secretary of the Navy, after consultation with the Administrator, shall determine the form and amount of any compromise or settlement of any claim against the United States with respect to the water agreement dated March 24, 1943, between the United States and the town of Port Deposit, Maryland.

(c) The exact acreages and legal descriptions of the property declared to be excess property by subsection (a) shall be determined by surveys that are satisfactory to the Secretary of the Navy.

LAND CONVEYANCE, LONG BEACH, CALIFORNIA

Sec. 914. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the City of Long Beach, California (hereinafter in this section referred to as the "City"), all right, title, and interest of the United States in and to a tract of land of varying width consisting of 0.7176 acre and extending from the south boundary of the Long Beach Army Reserve Training Center, Long Beach, California, north along the west boundary of such training center to Willow Street.

(b) In consideration for the conveyance under subsection (a), the City shall convey to the United States all right, title, and interest of the City in and to a tract of land of varying width consisting of 0.7176 acre and coextensive with and immediately adjoining the south boundary of the Long Beach Army Reserve Training Center, as established after the conveyance authorized in subsection (a).

(c) The City shall pay to the United States an amount equal to the amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the City under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the City to the United States under subsection (b).

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the City.

(2) The Secretary may require such additional terms and conditions with respect to the acquisition and conveyance authorized by this section as he considers appropriate to protect the interests of the United States.

LAND CONVEYANCE, SOUTH CHARLESTON, WEST VIRGINIA

Sec. 915. (a) Subject to subsection (b), the Secretary of Defense (hereinafter in this section referred to as the "Secretary") is authorized to convey or cause to be conveyed to the City of South Charleston, West Virginia (hereinafter in this section referred to as the "City"), all right, title, and interest of the United States in and to land, aggregating approximately eight acres, together with the improvements thereon, that is presently the location of the Reserve Centers of the Army, Navy, and Marine Corps and that previously was part of the Navy Ordnance Depot in South Charleston, West Virginia.

(b)(1) The conveyance authorized by subsection (a) shall be subject to the conditions—

(A) that the City, pursuant to an agreement to be entered into between the City and the Secretary, convey to the United States a tract of land consisting of approximately ten acres on completed Corridor "G" at Lillian Roads, South Charleston, West Virginia;

(B) that such tract of land be served with access roads and utilities extended to the property line;

(C) that the City construct facilities on such land suitable for use as a United States Armed Forces Reserve Center; and

(D) that such facilities be designed and constructed in accordance with the requirements of, and subject to the approval of, the Secretary and be limited to those facilities required to complete the project within the boundaries of the rough graded site to be conveyed by the City.

(2) The cost of the facilities to be constructed by the City (including the cost of architectural engineering design and inspection fees) shall be paid as follows:

(A) The City shall pay the amount by which the appraised fair market value of the land and improvements conveyed by the Secretary under subsection (a) exceeds the fair market value of the land (in rough graded state) to be conveyed by the City to the United States.

(B) The United States shall pay any remaining amount (after payment by the City as provided in subparagraph (A)) out of funds appropriated for the Reserve Forces for fiscal years after fiscal year 1981.

(c) The legal description of properties to be conveyed under subsections (a) and (b) shall be determined by surveys performed by the City and agreed to by the Secretary.

(d) The use of funds for payment by the United States under subsection (b) shall be considered as use for the purchase of facilities authorized by chapter 133 of title 10, United States Code.

(e) The Secretary may require such additional terms and conditions as the Secretary considers appropriate to carry out the provisions of this section and to protect the interests of the United States.

(f) Before the conveyance authorized in subsection (a) is executed, the Secretary shall report to the appropriate committees of the Congress on the terms relating to such conveyance agreed upon by the Secretary and the City.

(g) Section 609 of the Military Construction Authorization Act, 1977 (Public Law 94-431; 90 Stat. 1365), and section 813 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1780), are repealed.

LAND CONVEYANCE, SAN ANTONIO, TEXAS

Sec. 916. (a) The Secretary of the Navy (hereinafter in this section referred to as the "Secretary") is authorized to convey to the City of San Antonio, Texas (hereinafter in this section referred to as the "City"), all right, title, and interest of the United States in and to the land and improvements comprising the United States Naval and Marine Corps Reserve Center, San Antonio, Texas. Such conveyance shall be made subject to such terms and conditions as the Secretary considers appropriate, but may not be made until a replacement facility for such Reserve Center has been made available to the United States in accordance with subsection (b).

(b)(1) In consideration for the conveyance authorized under subsection (a), the City shall make available to the Secretary funds in an amount equal to the fair market value, as determined by the Secretary, of the land and improvements to be conveyed by the Secretary under subsection (a).

(2) As a further condition to the conveyance authorized under subsection (a), the City shall pay the cost of relocating all goods and equipment of the Reserve Center from the site of the Reserve Center referred to in subsection (a) to the site of the replacement facility.

(c) Funds made available to the Secretary under subsection (b)(1) shall be used by the Secretary for the purchase of land for use as a site for the location of a replacement facility for the Reserve Center to be conveyed under subsection (a) or for the construction, renovation, repair, or improvement of a replacement facility for such Reserve Center, or for both the purchase of land and the construction, renovation, repair, or improvement of a replacement facility.

(d)(1) If the cost of a replacement facility is more than the fair market value of the existing Reserve Center facility referred to in subsection (a), the Secretary may pay the amount of the difference out of any funds appropriated for the acquisition of facilities for the Reserve Forces for fiscal years after fiscal year 1981.

(2) If the cost of the replacement facility is less than the fair market value of the existing facility, the City shall pay the amount of the difference between such costs to the United States, and such amount shall be deposited in the Treasury as miscellaneous receipts.

(e) The exact acreage and legal description of any land conveyed under this section shall be determined by surveys which are satisfactory to the Secretary.

(f)(1) The Secretary is authorized to accept any land conveyed or any funds made available to the United States under subsection (b). Any such land shall be administered, and any such funds may be obligated and disbursed, by the Secretary for the purpose of providing a replacement Reserve Center facility for the facility referred to in subsection (a).

(2) The authority under this section to place improvements on land (including site preparation) may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255).

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

COMPARISON OF HOUSE AND SENATE BILLS

As passed by the House, H.R. 3455, provided $6,987,497,000 in new authorization.

The bill as amended by the Senate provided $6,489,403,000 in new authorization.

SUMMARY OF RESOLUTION OF DIFFERENCES

As a result of the conference between the House and Senate on the differences in H.R. 3455, the conferees agreed to a new adjusted authorization for military construction for fiscal year 1982 in the amount of $6,546,810,000.

Initially, the Department of Defense and the respective military departments submitted a request in the amount of $6,660,536,000 for new construction authorization for fiscal year 1982. Subsequently, the Department of Defense submitted an amended fiscal year 1982 request for $7,028,842,000 which was later revised by the department to $6,546,810,000. The conferees agreed to authorize appropriations for new construction in the amount of $6,546,810,000.

TOTAL AUTHORIZATION GRANTED, FISCAL YEAR 1982

Title I (Army):	
Inside the United States	$389,036,000
Outside the United States	381,534,000
Minor construction	34,150,000
Subtotal	804,720,000
Title II (Navy):	
Inside the United States	970,268,000
Outside the United States	236,445,000
Minor construction	33,320,000
Subtotal	1,240,033,000
Title III (Air Force):	
Inside the United States	669,276,000
Outside the United States	560,550,000
Minor construction	28,680,000
Subtotal	1,258,506,000
Title IV (Defense Agencies)	276,605,000
Minor construction	6,210,000
Subtotal	282,815,000
Title V (North Atlantic Treaty Organization Infrastructure)	345,000,000
Title VI (Military Family Housing)	2,335,736,000
Title VIII (Guard and Reserve Forces Facilities):	
Army National Guard	60,000,000
Army Reserve	50,000,000
Naval and Marine Corps Reserve	35,000,000
Air National Guard	100,000,000
Air Force Reserve	35,000,000
Subtotal	280,000,000
Total granted by titles I, II, III, IV, V, VI, and VIII	6,546,810,000

GENERAL TOPICS

Conference guidelines

The conferees were faced with many good military construction projects that were the subject of conference action. In general, all

of the projects subject to conference action represented valid service requirements that were of high priority and warranted immediate authorization and funding. However, the conferees were constrained to produce a bill within the limits of the scope of the conference and within the Administration's revised budget request, and therefore several good projects were not authorized. The conferees expect to see these projects revalidated and given top priority in the the fiscal year 1983 military construction budget request.

The conferees also recognize that some of the projects that were authorized by the conference may, for numerous reasons, not be funded in the fiscal year 1982 military construction appropriations bill. Such projects should be given first priority for funding in the fiscal year 1983 military construction appropriations request.

Miscellaneous report requirements

In their respective reports on the bill, both the Senate and the House Armed Services Committees included items of "Special Emphasis". The conferees hereby endorse the language on items of "Special Emphasis" found in both reports and, unless some modification to that language is contained in this joint statement of the committee of conference the positions and requirements contained under items of "Special Emphasis" in both Senate and House reports on the fiscal year 1982 military construction authorization bills are concurred in by the conferees.

TITLE I

The House approved new construction authorization in the amount of $878,606,000 for the Department of the Army. The Senate approved new construction for the Army in the amount of $753,556,000. The conferees agreed to a new total for Title I in the amount of $804,720,000, which is $73,886,000 below the House figure and $51,164,000 above the Senate figure. Among the major items considered in conference and acted upon by the conferees were the following:

EUROPEAN CONSTRUCTION

The Army faces a major construction backlog in Europe. Many of its facilities are outmoded and beyond economic repair. As a result, many U.S. military personnel work and live in deplorable conditions. The conferees, therefore, included $39,900,000 for five new maintenance facilities and two barracks projects that had been included in the Senate amendment. These initiatives were possible because of the deletion of several construction projects associated with the reduction in the Roland missile program.

MASTER RESTATIONING PLAN

Part of the overall upgrade program will be accomplished under the proposed Master Restationing Plan (MRP). The MRP is designed to enhance readiness by moving U.S. units in Germany closer to the eastern border to respond to an improved Warsaw Pact offensive capability. As presently envisioned, the first phase of the MRP would be carried out in concert with the Army's current force modernization program to replace older weapon systems. The German government has been asked to fund the MRP.

To begin implementation of MRP, the Army requested $18 million for new facilities at Vilseck in its fiscal year 1982 program. The House approved the request on the basis that while U.S. funding may have to be used in the intitial stages of MRP, the lack of a negotiated position with the German government on funding responsibility should not deprive U.S. soldiers of basic facility needs.

The Senate amendment did not provide for the $18 million authorization for the two projects at Vilseck. The Senate felt that unilateral U.S. funding was inconsistent with the formal position of the U.S. government that the German government should fund MRP.

After full deliberation, the conferees agreed to provide contingent authorization in the amount of $14.5 million (the reduction from $18 million reflects current exchange rates) for the two projects at Vilseck. The authorization is contingent upon agreement by the German government to designate a responsible negotiator and start negotiations in good faith toward Federal Republic of Germany (FRG) funding participation. Funds authorized for the Vilseck projects may not be obligated until the Committees on Armed Services have been advised in writing that such conditions have been met. The committees expect to be kept fully and currently informed as to the progress of the negotiations on the MRP.

The Vilseck site and the projects in question were justified as the start of the MRP. However, they are also compatible with other U.S. force modernization initiatives for which preparations must begin in fiscal year 1982 in order to meet scheduled force structure changes and delivery dates for new weapon systems. The conferees wish to emphasize that if Vilseck were suitable only for MRP, the request would not have been approved in the absence of any agreement with the FRG that they would fund the MRP.

The position taken by the conferees on this issue is consistent with the position of Congress on the general issue of defense burden sharing. At a time when the United States is shouldering the total cost of the Rapid Deployment Force effort that is of vital interest to the Western alliance and Far East industrial nations, the issue of burden sharing is of increasing concern to the conferees. The conferees cannot overstate the importance of the North Atlantic Treaty Organization (NATO) allies providing financial support to programs, such as MRP, in the immediate future. Otherwise, the American people may force the Congress to consider reductions in U.S. defense commitments and such reductions could begin with a reduction in the number of U.S. military personnel deployed in Europe.

The Senate recedes with an amendment.

TITLE II—NAVY

The House approved $1,217,363,000 in new construction authorization for the Department of the Navy. The Senate approved new construction authorization for the Navy in the amount of $1,240,033,000. The conferees agreed to an authorization of appropriations in the amount of $1,240,033,000 for the Navy, which is $22,670,000 above the House figure and identical to the Senate figure.

Among the major items considered in the conference were:

FAMILY SERVICE CENTERS

The Navy requested $1,860,000 for five family service centers. The fiscal 1982 request represents the initial segment of a total program for 33 new centers costing an estimated $25 million. The House bill included the requested $1.86 million authorization. The Senate amendment did not authorize the projects.

The conferees support the concept of the family service center and have agreed to authorize the five centers. This action on the part of the conference does not represent a blanket endorsement of the total new construction program associated with the family service centers. Each future project will be examined on a case by case basis.

The Navy is expected to avoid unnecessary new construction by utilizing existing facilities whenever possible. In those cases where new construction is requested, the Navy must provide to the committees detailed explanations covering the reasons existing facilities are not available. The conferees urge the use of existing facilities wherever possible because this will permit the earliest possible opening of family service centers.

The Senate recedes.

COMMISSARY—NAVAL SUBMARINE BASE, BANGOR, WASH.

The Navy requested $3,950,000 for a commissary at the new West Coast Trident Base at Bangor, Washington. The House approved the request. The Senate amendment deleted the project.

In its justification of the request, the Navy indicated that Department of Defense policy authorized the use of military construction funds for commissaries at new bases and the use of non-appropriated funds for the Bangor commissary would delay future commissary projects at other installations. However, the conferees feel that improved Navy commissary operations, reducing inefficiencies and unnecessary overhead expenses, would generate additional surcharge funds that could be used for other commissary projects.

Since current law permits the construction of the Bangor commissary with surcharge funds, the conferees agreed that funding with appropriated funds should not be authorized.

The House recedes.

LAND ACQUISITION, NAVAL AIR STATION, BRUNSWICK, MAINE

Section 201 of the Fiscal Year 1981 Military Construction Authorization Act (Public Law 96-418) authorized $2,200,000 for the acquisition of interest in 75 acres of land for the air safety program at the Brunswick Naval Air Station.

The Senate amendment (section 205) repealed that prior authorization. The House bill contained no similar repeal provision.

In view of the fact that the Secretary of the Navy has placed a moratorium on commencing any condemnation suits on land parcels where negotiations have not lead to an agreement, the conferees agreed that project authorization should stand and property owners who choose to negotiate a settlement should be permitted and encouraged to do so.

The Senate recedes.

TITLE III—AIR FORCE

The Senate approved $1,258,371,000 in new construction authorization for the Department of Air Force while the House approved $1,512,893,000. The conferees agreed to a new total in the amount of $1,258,506 which is $135,000 above the Senate figure and $254,387,000 below the House figure.

Major issues resolved in conference included:

MX MISSILE BASING

The Air Force request, as originally submitted, contained $366,000,000 for the start of construction of a multiple protective structure (MPS) basing plan for deployment of the MX missile system. The House approved $356,500,000 of the request.

Subsequently, the Administration reviewed a number of alternative basing plans, and in October the President announced his decision to recommend canceling the MPS plan as originally submitted by the Air Force. The Senate bill that passed on November 5, 1981, deleted all authorization for MX missile basing construction.

In view of the President's decision, conferees agreed to delete all of the MPS construction authorization, but retained $11,000,000 in authority to acquire the San Bernadino County office complex adjacent to Norton AFB, California. The administrative space is required by the Air Force to accommodate a projected buildup of personnel over the next two years to support the current MX missile development, production and deployment programs in consonance with the President's program.

The House recedes with an amendment.

RAPID DEPLOYMENT FORCE FACILITIES

For the Rapid Deployment Force (RDF) the Senate bill included the Air Force's requests for $49,570,000 in authorization for projects at Lajes Air Force Base, Portugal, and $70,400,000 in authorization for facilities at Ras Banas, Egypt.

The House deferred the Lajes projects because negotiations have not been concluded with Portugal regarding deployment of RDF forces from Lajes. The House also had reduced the Air Force's request for construction at Ras Banas to $44,400,000 because of Air Force uncertainty over its mission requirements in Egypt.

In reconciling these differences, the House receded to the Senate figure for Ras Banas after conferees were satisfied that the Air Force had defined its total RDF mission at the Egyptian air base.

Regarding Lajes, conferees agreed to authorize $46,570,000 in RDF projects. However, such authorization is contingent upon the successful negotiation of a U.S.-Portuguese agreement which guarantees access to and use of such facilities at Lajes by the United States. If the President decides that it is in the national security interest of the United States to proceed with the construction of these facilities in the absence of such a bilateral agreement, he may so certify to the Congress and construction may proceed when such certification is provided to the Congress.

ROADS AND UTILITY SUPPORT, BOLLING AIR FORCE BASE

The Air Force requested authority for a project at Bolling Air Force Base to modify certain roads and utilities as a result of the changes required by the construction of the DIA Building. The conferees feel that this project is required by the construction of the DIA building and should, therefore be funded from appropriations made available for the DIA Building.

The House recedes.

HARDENED FACILITIES IN EUROPE

The House bill included the Air Force's request for $6,370,000 to harden logistics facilities in support of U.S. tactical aircraft assigned to NATO. The Senate denied the request.

In receding to the Senate position, House conferees agreed that this program, if applied Air Force-wide in Europe, would be extremely costly to the United States. Therefore, conferees recommend that the United States seek to have NATO designate the program as eligible for funding through NATO Infrastructure.

The House recedes.

AEROPROPULSION SYSTEM TEST FACILITY

It is the intent of the conference that the $80,000,000 increase in Title III, Air Force, PL 94-431 (FY 1977 military construction program) be applied to the Aeropropulsion Systems Test Facility project at Arnold Engineering Development Center, Tullahoma, Tennessee.

The House recedes to the Senate figure.

TITLE IV—DEFENSE AGENCIES

The House approved $282,100,000 in new construction authorization for the Defense agencies while the Senate appoved $311,815,000. The conferees agreed to a new total of $282,815,000 which is $715,000 above the House figure and $29,000,000 below the Senate total.

FUEL STORAGE, KOREA

The major issue resolved in conference was a request for $29,000,000 to provide increased fuel storage in Korea. While the Senate approved the request, the House deferred the project because design had not been started. The Senate recedes to the House position with the understanding that the project will be resubmitted in the FY 1983 budget request, since there is a major requirement for additional fuel storage in Korea.

The Senate recedes.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

The House approved the Department of Defense request for $425,000,000 to meet the estimated United States' share of the North Atlantic Treaty Organization Infrastructure Program. The Senate approved $345,000,000.

Nations participating in the NATO Infrastructure Program, contribute their share according to a NATO accounting system that uses the NATO Infrastructure Accounting Unit (IAU) as the basic monetary unit. Subsequent to the House action and prior to Senate action on the bill, a recalculation of the exchange rate between the U.S. dollar and the IAU revealed that U.S. commitments could be met at the reduced Senate figure.

The House recedes.

TITLE VI—MILITARY FAMILY HOUSING

The House approved $2,379,833,000 for construction, operation, maintenance, leasing, and debt payment for military family housing. The Senate approved $2,300,628,000.

The conferees agreed to a new total of $2,335,736,000 which is $44,097,000 below the House figure and $35,108,000 above the Senate figure.

Included in this figure is $167,016,000 for construction of 2,143 new units of family housing which are primarily in support of junior enlisted families.

SAN DIEGO HOUSING COMPLEX

The Senate disapproved the Navy's request for authorization of $25,350,000 for construction of 290 units of family housing in the San Diego area because of a disagreement between the City of San Diego and the Navy as to the specific siting of the project. The House approved the Navy request.

Subsequent to the Senate action, the Navy and the City of San Diego reached an agreement on new sites for the 290 units requested in fiscal year 1982. The agreement was based upon an understanding that it would allow time for further joint study of other dispersed sites that could accommodate the Navy's long-term requirements while mitigating the City's concern about the impact of concentrating large military family housing projects in a single area of a host community. In view of the accord reached by the Navy and the City of San Diego, the Senate recedes.

FORT IRWIN FAMILY HOUSING DEMONSTRATION PROJECT

Both the Senate and the House added 200 units of manufactured housing at Fort Irwin, California to permit a test of factory-built versus conventionally-built housing. The House authorized $8.8 million for this addition. The Senate, allowing for solar energy and other site costs, authorized $11 million. The House recedes to the Senate on the funding authorization.

The conferees support the use of factory-built housing which should result in lower cost to the taxpayer while providing a durable housing unit commensurate with prevailing contemporary housing standards. The conferees direct that the 200 additional units be factory-built.

Construction standards and criteria with regard to essential requirements for space, structural durability, energy efficiency, material quality and life safety will be set by the Secretary of Defense. In setting such standards and criteria, the Secretary shall insure that such standards and criteria are capable of being met by any of the generic types of factory-built housing, including manufactured housing. Such standards and criteria will be compatible with, and complementary to, Federal Manufactured Housing Construction and Safety Standards (FMHCSS) established by legislation in 1974. Such standards and criteria will be furnished to the Committees on Armed Services of the Senate and the House of Representatives 30 days before any contract is awarded for the construction of this demonstration project.

DOMESTIC LEASING

The Senate eliminated the statutory funding limitations for family housing domestic and foreign leasing. The House retained the limitations at $8,600,000 for domestic leases and $113,717,000 for foreign leases.

The conferees agreed to increase the funding limitation on domestic leases to $12,000,000 to assure an orderly phaseout of domestic leases during fiscal year 1982 with the understanding that this increase will only be used to support personnel presently occupying government leased housing and that no new leases will be executed in fiscal year 1982.

The Senate recedes with an amendment.

TITLE VIII—GUARD AND RESERVE FACILITIES

In its bill, the House provided a lump sum authorization of $291,702,000 for the Guard and Reserve construction program. The Senate approved $280,000,000. Conferees agreed to the Senate figure which is $77,000,000 higher than the Administration's amended request. The conferees expect that any projects specifically mentioned in the Reserve Forces Title discussion of either committee report would be accommodated under the lump sum increase authorized in the conference report.

DINING FACILITY, DALLAS NAVAL AIR STATION

The conferees were advised of a high priority requirement to replace the dining facility at the Naval Air Station, Dallas, Texas, which was destroyed by fire. The conferees feel that this facility should be re-

placed as soon as possible using the authority of 10 USC 2673.

EXPANSION OF FEDERAL FACILITIES BY NATIONAL GUARD

In this title, the House approved and the Senate deleted a requested provision (Section 803) to allow for the transfer of federally owned Reserve Centers to states when they are expanded for joint use with the National Guard.

Currently, most state laws preclude funding of any portion of the expansion of a federal facility where the Federal Government retains ownership. Section 803 would provide grants to the states for the assumption of ownership and expansion of federal facilities for joint use by the National Guard, enabling states to consider a less expensive alternative to new construction.

Senate conferees agreed to accept the provision after being advised that Section 803 is permissive in nature and will not force the states to accept joint construction if it is not considered practicable by the state, territory, Puerto Rico, or the District of Columbia. In addition, the Federal Government will be responsible for financing all structural deficiencies before transferring any such facility.

TITLE IX—GENERAL PROVISIONS

Among the major items relating to the general provisions that were subject to conference action were the following:

SOLAR ENERGY

The House bill (section 901) revised the existing formula contained in 10 United States Code 2688 for determining the cost effectiveness of solar energy systems. The revision eliminated a conflict in law between the design criteria and the construction criteria used to evaluate the cost effectiveness of such systems. The Senate amendment contained no similar provision.

The conferees agreed to modify the House provision so that, consistent with existing Federal regulations, an investment cost credit of 10 percent would be deducted from the actual solar system cost for determining life cycle costs.

The Senate recedes with an amendment.

SPECIAL IMPACT ASSISTANCE

The House bill (section 905) extended community planning assistance funding in the special impact program available for MX Weapon system and East Coast Trident impact areas. The Senate amendment contained no similar provision.

The conferees agreed to extend community planning assistance funding and to reduce the scope of the special impact provisions to apply only to the East Coast Trident program.

The Senate recedes with an amendment.

MINOR CONSTRUCTION AUTHORITY

The Senate amendment (section 904) modified the minor construction authority by increasing the project ceiling from $500,000 to $1,000,000, revising the project level approval process, and reducing the congressional review period following notification to 15 days from 30 days. The House bill contained no similar provision.

The conferees agreed to revise the minor construction authority, effective at the start of fiscal year 1983, as follows:

(a) increase the project ceiling from $500,000 to $1,000,000;

(b) revise the project level approval process: $0–$500,000 project cost requires local command approval; $500,000–$750,000 project cost requires military service secretary approval; $750,000–$1,000,000 project cost requires Secretary of Defense approval; and

(c) require exigent projects costing $500,000–$1,000,000 to be submitted to the Committees on Armed Services 15 days before obligation of funds.

The House recedes with an amendment.

BUY AMERICAN

The Senate amendment (Section 905) broadened the "Buy-American" concept which was included in the Fiscal Year 1981 Military Construction Authorization Act for the construction of contingency facilities in support of the Rapid Deployment Force, to apply to all overseas locations where not precluded by existing Status of Forces agreements. The House bill contained no similar provision.

The conferees agreed to limit the application of the Buy-American provision to the construction of facilities in support of the Rapid Deployment Force, including Diego Garcia. Recognizing that certain flexibility is necessary, the conferees agreed to exempt coverage of certain building materials, contracts in the amount of $5 million or less and a prescribed percentage of each construction contract costing over $5 million. These exemptions should provide contracting authorities with sufficient latitude for avoiding excessive costs and delays.

The House recedes with an amendment.

LAND ACQUISITION, FORT CARSON, COLO.

The Senate amendment contained a provision (sec. 906) that would (a) permit certain land conveyances to the United States for expansion of the Fort Carson military installation to be treated as involuntary conversions under the Internal Revenue Code of 1954 and (b) authorize local governments whose jurisdictions encompass the Fort Carson expansion area to receive certain payments as partial compensation for the loss of tax revenues.

The conferees agree on the importance of the expansion of Fort Carson military installation. The conferees also agree that the involuntary conversion provisions of the Internal Revenue Code clearly should be applicable in the case of this expansion, for which funds were authorized by both the House and Senate. However, the conferees recognized that the provision on involuntary conversions could be subject to a point of order under the House rules, and it was deleted. But the conferees agreed that separate legislation embodying section 906(a) of the Senate amendment should be promptly introduced in each House so that it might be expeditiously considered.

The Senate recedes on Section 906(a) of the Senate amendment; the House recedes on Section 906(b).

STANDARDIZATION OF MILITARY TIMBER HARVESTING RECEIPTS

The Senate amendment (section 913) amended 10 United States Code 2665 for the purpose of standardizing the use of timber harvest receipts from Federal military lands with that existing for such receipts from national forest lands. It would entitle State and local governments to receive 25 percent of net receipts from timber harvesting on military installations located within their boundaries for public school and public road purposes. This distribution formula would permit military services to apply timber proceeds against their related operation and maintenance costs before any receipts are distributed to State and local governments.

The House bill contained no similar provision. However, on November 4, 1981, the House had passed unanimously an identical measure, H.R. 4543, under suspension of the rules.

The House recedes.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO FILE CERTAIN REPORTS

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight tonight to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

NATURAL GAS CONSUMERS THREATENED BY PROPOSED ALASKAN PIPELINE WAIVERS

(Mr. FLORIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLORIO. Mr. Speaker, I rise in opposition to the proposed resolution to waive certain requirements under the Alaska Natural Gas Transportation Act. The waiver package represents an unconscionable shift of the burden of the pipeline's cost onto the American consumer. If Congress goes along with the administration's plan, residential gas consumers in New Jersey would be forced to pay an extra $15 to $29 annually for 20 years. Even with this forced multimillion-dollar investment, New Jersey's consumers might never even get the first cubic foot of Alaskan gas when—or if—this project is ever finished. This waiver package directly violates assurances given the Congress when the pipeline construction plan was approved in 1977. Now, almost 4 years later, this project has been unable to secure financing, despite the 30-percent rate of return it is supposed to realize during its first year. If the major banks do not want to risk their money on this pipeline, it makes no sense for Congress to invest the public's money. Bringing natural gas from Alaska to the lower 48 States is both vital and

worthwhile. But the risk should be assumed by the corporations who would profit from it, not by the consuming public. As it stands right now, this plan is nothing less than a ripoff of the consumer and a $50 billion safety net for the oil companies who are afraid to invest their own money because of the shaky nature of this project.

There is absolutely nothing in the waiver package to guarantee: First, that the Federal Energy Regulatory Commission (FERC) will approve the sponsor's financing proposals; second, that financing institutions will agree to lend funds upon the FERC's certification; or third, that the Congress will not hear once again from the pipeline's sponsors to tell us that they must have additional Federal assurances before the project can be completed.

Unless the deficiencies which currently exist in the project are corrected, we cannot be absolutely certain that the necessary loan capital to complete this project will be forthcoming.

Throughout the testimony before the Energy and Commerce Committee, it was made clear that even with the participation of the oil companies and the transfer of some risk to the ratepayers, financing for the current sponsors remains elusive. Those involved in the project have refused to state that this waiver package will guarantee the actual construction of the project, or that they will not return to the Congress either for more waivers or for Federal financial support.

Furthermore, natural gas prices will in all likelihood be decontrolled by the time the pipeline is supposed to be completed. Therefore, it is uncertain whether the Alaska gas will be economically competitive with other forms of energy.

I concur with my colleagues that the timely completion of the Alaska natural gas transportation system remains an essential part of securing this Nation's energy future. However, let us not be deluded into believing that a vote against these waivers is a vote against the pipeline. It is not. While the completion of the project may very well be in the national interest, I fail to be convinced that transferring the risk to the ratepayers of the participating pipelines is in the national interest.

It seems that the proponents of the waiver package are forgetting that their proposal represents a direct violation of the understanding which existed with the oil companies when we approved the pipeline construction in 1977. At that time, we stipulated specific conditions in the legislation: First, that the entire pipeline be completed and gas flowing before consumers are billed for any of the pipeline's costs; second, that Exxon, Sohio, and Arco be barred from any ownership in the pipeline; and third, that the oil companies bear the responsibility for constructing the $6 billion conditioning plant at the pipeline's northern end.

I urge my colleagues to reject this unwise waiver package. We must not allow it to go forward.

HOUSE PASSAGE OF ALASKAN PIPELINE WAIVERS WOULD MEAN INCREASED NATURAL GAS PRICES TO OUR CONSTITUENTS FOR NATURAL GAS THEY MAY NEVER RECEIVE

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, the House is scheduled to consider House Joint Resolution 341, an approval resolution which would grant waivers to the Alaskan Natural Gas Transportation Act of 1976. I strongly oppose House Joint Resolution 341, and would like to suggest to my colleagues that this is a watch-out piece of legislation. Although there has been relatively little congressional interest in this matter until recently, I urge my colleagues to very carefully consider the issues involved here in view of the significant potential increased costs to gas ratepayers around the country.

Gas bills would go up as much as $72 a year for the average American residential gas user in about 1987 and over $150 in some parts of the country, according to congressional computer estimates. If the project is completed but is not used, $37 billion could, nonetheless, be paid by ratepayers toward it.

It is curious that support by consumers has so far been lacking on this. For those who own the gas and investors, this seems quite a deal—a deal granted with congressional blessing. However, from the standpoint of the consumer, it would be potentially the greatest consumer ripoff in the history of the United States. For instance, the average Illinoisan using gas would pay up to $101 more in the first year that consumers could be billed for the massive project's cost.

Rejected in the marketplace, potential project financiers now want Congress to grant them the unprecedented privilege to bill consumers for as much as 20 years whether or not they will ever be consumers in the sense that they ever get Alaskan gas. They want over 60 percent of our gas-consuming citizens to bear the risks they see as too great to gamble on themselves.

Pipelines sponsoring the 4,800-mile project and other equity participants would receive a 25-percent annual rate of return on their investment, according to a study by an Energy and Commerce Committee staff report. Oil companies which own Prudhoe Bay gas will have a total yearly return "in excess of 50 percent on their investment," the report notes.

Mr. Speaker, I urge our colleagues to defeat House Joint Resolution 341 when it reaches the floor this week.

WATT OWES APOLOGY TO AMERICAN PEOPLE

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, it was with surprise and dismay that I read of Secretary Watt's assertion that the environmental debate pits liberals against Americans. We are all Americans, whether we are Republicans or Democrats, conservatives or moderates or liberals. The views Secretary Watt projects on wilderness and oil-leasing policies are controversial. I happen to disagree with his perspective, but I can respect it. What I cannot respect is the way the Secretary is reflecting the views he holds.

America is a melting pot of ideas as well as peoples. Nothing could be more dangerous than to ascribe the views of the Government as American and the views of dissenting Americans as un-American. Tolerance, after all, is the heart of our system. In fact, there are very few things that are more American than to disagree with our political leaders. For a Cabinet member to label dissenters as un-American does a disservice to our Constitution and to our heritage. The right to dissent is what led to the American Revolution, what galvanized patriots on this Pearl Harbor Day 40 years ago, and what distinguishes America today from countries like Iran and the Soviet Union. Secretary Watt owes an apology to the American people.

IMPROVED PROSPECTS FOR PEACE IN THE MIDDLE EAST

(Mr. ERDAHL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERDAHL. Mr. Speaker, as a member of the Foreign Affairs Committee which recently visited the Middle East, I have returned encouraged and cautiously hopeful of the prospects for peace in that part of the world.

My colleagues and I engaged in frank discussions with national leaders covering a wide range of issues.

I was impressed to see that an orderly and peaceful transition of power has taken place in Egypt since the tragic death of former President Sadat. Israeli officials told me of their determination to meet the conditions of the Camp David accords. Since leaving there, I am pleased to learn that

the Israelis agreed to European participation in returning the Sinai Peninsula next April. Saudi and Egyptian officials expressed to us their countries' vital interest in creating a workable peace plan that will include their Arab neighbors.

In the best interest of peace, I believe that we must reaffirm our commitment to the Camp David accords while, at the same time, seek new approaches to the remaining problems in the Middle East. In so doing, we will reinforce what I see as the three principles of American foreign policy: First, maintaining a strong American presence in the area; second, enhancing the stability of the nations desirous of peace; and third, retaining the flexibility necessary in finding modifications acceptable to all parties.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT ON H.R. 3455, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982, ON TOMORROW OR ANY DAY THEREAFTER

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that it may be in order to consider the conference report on the bill (H.R. 3455) to authorize certain construction and military installations for fiscal year 1982, and for other purposes, on tomorrow, Tuesday, December 8, 1981, or any day thereafter.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. WALKER. Mr. Speaker, reserving the right to object, I reserve the right to object simply to ask the gentleman a couple of questions.

As I understand it, the gentleman has not been able, because of technical problems, to reach the ranking member of the subcommittee and clear this matter with him. Would the gentleman be agreeable to accept an agreement that would say that if the gentleman from Virginia (Mr. TRIBLE) were not in favor of the gentleman's request, the conference report would not be brought up on December 8?

Mr. BRINKLEY. Mr. Speaker, if the gentleman will yield, I will give the gentleman from Pennsylvania (Mr. WALKER) my assurance that notwithstanding the granting of this unanimous-consent request, I would not call the conference report up for consideration in the House until the expiration of the necessary 3 days unless the consent of the gentleman from Virginia (Mr. TRIBLE) were first gained.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Georgia (Mr. BRINKLEY), and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

SELL PUBLIC LANDS TO REDUCE THE NATIONAL DEBT

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the national debt is now over the staggering amount of $1 trillion. Bringing the national debt down below $1 trillion is absolutely essential. Reducing the national debt should reduce inflation and this in turn should help improve the economy.

One way to reduce the national debt that should be considered is by selling public lands. In the 1830's Andrew Jackson sold Government lands to reduce the national debt. Through sale of public lands and other means, the national debt was reduced from $48.6 million in 1829 to $37,500 in 1835. Unfortunately, since 1835, the national debt has increased to over $1 trillion today.

In 1980 alone, the Government paid out $52.5 billion in net interest on the national debt. This represents an increase of 265 percent over the interest of $14.4 billion paid out in 1970. In the past 2 years the interest on the national debt has cost the American taxpayers $239 billion.

Paying off the national debt will result in an immediate and direct savings to the taxpayers. For example, for every $1 billion that the national debt is reduced there is a $115 million savings to taxpayers. For every $10 billion of reduction there is a savings of $1.15 billion. These savings are based on an average interest rate of 11.5 percent.

Although selling public lands would reduce the national debt, it must be done only with the proper protections for the public welfare. For instance, anyone buying such land would have to agree to a land use policy approved by the Department of the Interior.

The possibility of selling Government-owned buildings might also be considered. The Government could sell this property, reduce the national debt with the proceeds and then lease back the buildings on a long-term basis.

These are only two ideas that supplement my earlier commitment to offer a national debt reduction amendment to every bill before the House that would provide income to the U.S. Government.

The national debt is not going to be reduced by magic, but by sacrifice and hard work and innovative approaches to this national problem. We must dedicate ourselves to the important goal of reducing the national debt and we must begin this task immediately.●

AMERICA'S WORKING PEOPLE PAYING FOR PRESIDENT'S PROGRAM

The SPEAKER. Under a previous order of the House, the gentleman from Louisiana (Mr. LONG) is recognized for 5 minutes.

● Mr. LONG of Louisiana. Mr. Speaker, last summer, many of us expressed real concerns about the President's so-called economic recovery program.

We warned that the President's program would lead to enormous Federal budget deficits. We warned that his Kemp-Roth tax cut plan benefited the very rich at the expense of the working people of our country.

Unfortunately, our warnings went unheeded, and the President won his program, lock, stock, and barrel.

America's working people are now paying for the President's program. More than 1 million of them have lost their jobs since the Republican program was enacted. The economy is now in recession and falling. Inflation and interest rates, though dampened by the recession, are still so high that they choke off economic expansion. That is quite a price—just to give a big tax cut to the wealthiest among us.

But apparently, the President and the Republicans in the Senate believe working Americans still have not paid enough. His administration and Senate Republicans have been floating what they call revenue enhancement measures. We used to call them tax increases.

What taxes have the Republican administration and Republican Senators been talking about raising? Taxes the working people pay, of course. They want to double the excise taxes on tobacco and alcoholic beverages. They have reassured the country club crowd that it will not cut into their Kemp-Roth bonanza by reviving the luxury taxes on mink coats and diamond rings. But, for working people, the administration and the Republican Senators have a different message: If you want to enjoy a cigarette or a can of beer after a hard day's labor, your taxes on those items will be doubled.

Mr. Speaker, I hope my colleagues on the other side of the aisle will join me in opposing any such efforts of the administration to increase taxes that fall most heavily on working people. It may be difficult for some of my Republican friends to understand, but a cigarette or a beer after work is, as the distinguished Senator from South Carolina, Senator HOLLINGS, has said, the workingman's country club.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. APPLEGATE (at the request of Mr. WRIGHT), for December 7, 8, and 9 on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

The following Members (at the request of Mr. LUNGREN) to revise and extend their remarks and include extraneous material:

Mr. CONABLE, for 60 minutes, December 9.

(The following Members (at the request of Mr. MOAKLEY) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LONG of Louisiana, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. GEPHARDT, for 60 minutes, on January 28, 1982.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LUNGREN) and to include extraneous matter:)

Mr. CARMAN.

Mr. WOLF.

Mr. PORTER in two instances.

Mr. LEBOUTILLIER.

Mr. KEMP in five instances.

Mr. GREEN.

Mr. KRAMER.

(The following Members (at the request of Mr. MOAKLEY) and to include extraneous matter:)

Mr. RODINO.

Mr. STOKES.

Mr. MATSUI in two instances.

Mr. BAILEY.

Mr. AUCOIN.

Mr. MATTOX.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. BOLAND.

Mr. BEILENSON.

Mr. HOYER.

Mr. WEAVER.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 657. An act to designate the Department of Commerce Building in Washington, the District of Columbia, as the "Herbert Clark Hoover Department of Commerce Building"; to the Committee on Public Works and Transportation.

S.J. Res. 122. Joint resolution to authorize and request the President to designate the week of February 28, 1982, through March 6, 1982, as "National Construction Industry Week"; to the Committee on Post Office and Civil Service.

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4591. An act to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

ADJOURNMENT

Mr. MOAKLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 17 minutes p.m.) the House adjourned until tomorrow, Tuesday, December 8, 1981, at 12 o'clock noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Report of House committee concerning the foreign currencies and U.S. dollars utilized by them during the third quarter of calendar year 1981 in connection with foreign travel pursuant to Public Law 95-384 is as follows:

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON THE JUDICIARY, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN JULY 1 AND SEPT. 30, 1981

Name of Member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total

PETER W. RODINO, JR., Chairman.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2628. A letter from the Assistant Secretary of the Army (Research, Development and Acquisition), transmitting a report on Army research and development contracts of $50,000 or more which were awarded during fiscal year 1981, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

2629. A letter from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting notice of the Army's intention to study the conversion from in-house operation to commercial contract of various functions at sundry locations, pursuant to section 502(a) of Public Law 96-342; to the Committee on Armed Services.

2630. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the graphic arts function at Lowry Air Force Base, Colo., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2631. A letter from the Director, Federal Emergency Management Agency, transmitting the semiannual stockpile report for the period October 1980 to March 1981, pursuant to section 11 of the Strategic and Critical Materials Stock Piling Act, as amended, and Executive Order 12155; to the Committee on Armed Services.

2632. A communication from the President of the United States, transmitting a report on progress toward conclusion of a negotiated solution of the Cyprus problem, pursuant to section 620C(c) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

2633. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Australia for permission to transfer certain U.S.-origin defense equipment to Singapore, pursuant to section 3(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2634. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Belgium for permission to transfer certain U.S.-origin defense equipment to Turkey, pursuant to section 3(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2635. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Israel for permission to transfer certain U.S.-origin defense equipment to Brazil, pursuant to section 3(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2636. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the withdrawal of the report on the issuance of an export license for certain defense equipment and services sold commercially to France (Transmittal No. MC-27-81; Executive Communication No. 2464), previously submitted pursuant to section 26(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2637. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense equipment and services sold commercially to Tunisia (Transmittal No. MC-1-82), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2638. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense equipment sold commercially to Sweden (Transmittal No. MC-2-82), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2639. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Venezuela (Transmittal No. 82-12), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2640. A letter from the Secretary of Commerce, transmitting the semiannual report of the Inspector General of the Department of Commerce, covering the period ended September 30, 1981, pursuant to section 5(b)

of Public Law 95-452; to the Committee on Government Operations.

2641. A letter from the Secretary of Housing and Urban Development, transmitting the semiannual report of the Inspector General of the Department of Housing and Urban Development, covering the period ended September 30, 1981, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

2642. A letter from the Clerk, U.S. Court of Claims, transmitting a copy of the court's opinion in Docket No. 235, *The American Indians Residing on the Maricopa-Ak Chin Reservation* v. *The United States*; to the Committee on Interior and Insular Affairs.

2643. A letter from the Chief Justice of the United States, transmitting the proceedings of the Judicial Conference of the United States held in Washington on September 24 and 25, 1981, pursuant to 28 U.S.C. 331 (H. Doc. No. 97-117); to the Committee on the Judiciary and ordered to be printed.

2644. A letter from the Associate Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in the cases of certain aliens found admissible to the United States, pursuant to section 212(a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

2645. A letter from the Associate Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

2646. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

2647. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(2) of the Immigration and Nationality Act, together with the list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

2648. A letter from the Administrator of Veterans' Affairs, transmitting a report on the Exchange of Medical Information program for fiscal year 1981, pursuant to 38 U.S.C. 5057; to the Committee on Veterans' Affairs.

2649. A letter from the Chairman, Joint Subcommittee on Aquaculture, Departments of Agriculture, Commerce, and the Interior, transmitting the first progress report of the subcommittee, covering the period September 26, 1980, through September 30, 1981, together with reports on studies of capital requirements of the aquaculture industry and regulatory constraints, pursuant to section 5(d), 8(a), and 9(a), respectively, of Public Law 96-362; jointly to the Committees on Merchant Marine and Fisheries and Agriculture.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to the order of the House on December 3, 1981, the following reports were filed on December 4, 1981*]

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1281. A bill to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A-056802 without regard to the 80-rod limitation provided by existing law; with amendments (Rept. No. 97-557). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2475. A bill to withdraw certain lands in Mono County, Calif., from settlement, sale, location, or entry for the purpose of protecting the watershed supplying water to the city of Los Angeles, and to rescind such withdrawal for certain other lands in Mono County, Calif.; with amendments (Rept. No. 97-358). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2863. A bill to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blythe Arena; with amendments (Rept. No. 97-359). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3433. A bill to modify the boundaries of the San Juan and San Isabel National Forests in the State of Colorado, and for other purposes; with an amendment (Rept. No. 97-360). Referred to the Committee of the Whole House on the State of the Union.

Mr. DELLUMS: Committee on the District of Columbia. H.R. 4910. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; with amendments (Rept. No. 97-361). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted December 7, 1981*]

Mr. BRINKLEY: Committee of Conference. Conference report on H.R. 3455 (Rept. No. 97-362). And ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4700. A bill to amend the Energy Policy and Conservation Act to authorize the President to control oil supplies and prices in the event of a severe petroleum supply interruption, and for other purposes; with an amendment (Rept. No. 97-363). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 3782. A bill to revitalize the pleasure cruise industry by clarifying and waiving certain restrictions in the Merchant Marine Act, 1936, and the Merchant Marine Act, 1920, to permit the entry of the steamship vessel *Oceanic Constitution* into the trade; with an amendment (Rept. No. 97-364). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEILENSON:

H.R. 5119. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to require manufacturers of passenger cars to furnish information relating the crashworthiness of the cars to prospective car buyers; to the Committee on Energy and Commerce.

By Mr. HANCE:

H.R. 5120. A bill to amend the Internal Revenue Code of 1954 to increase the deduction for net capital gains from 60 percent to 70 percent and to reduce to 6 months the holding period required for long-term capital gain treatment; to the Committee on Ways and Means.

By Mr. MARKEY (for himself and Mr. SANTINI):

H.R. 5121. A bill to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. NAPIER:

H.R. 5122. A bill to exclude certain backpay awards from Federal income taxation, and for other purposes; to the Committee on Ways and Means.

By Mr. NEAL:

H.R. 5123. A bill to amend the Internal Revenue Code of 1954 to repeal the special leasing provisions enacted by the Economic Recovery Tax Act of 1981; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII,

230. The SPEAKER presented a memorial of the Legislature of the State of Michigan, relative to the Federal Crop Insurance Act of 1980; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. BONKER introduced a bill (H.R. 5124) for the relief of Chitra Schlotterbeck; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 116: Mr. NICHOLS, Mr. BONIOR of Michigan, Mr. WOLF, Mr. BARNES, Mr. MCDADE, and Mr. TAUKE.

H.R. 117: Mr. WOLPE.

H.R. 1141: Mr. DORNAN of California.

H.R. 1147: Mr. DORNAN of California.

H.R. 1982: Mr. FAZIO.

H.R. 2102: Mr. DAUB and Mr. ZABLOCKI.

H.R. 2451: Mr. DORGAN of North Dakota and Mr. WORTLEY.

H.R. 2490: Mr. RATCHFORD, Mr. PEASE, and Mr. CROCKETT.

H.R. 3416: Mr. GREGG and Mr. DAUB.

H.R. 3678: Mr. CARMAN.

H.R. 4009: Mr. ANTHONY and Mr. AKAKA.

H.R. 4835: Mr. GARCIA, Mr. EDWARDS of California, Mr. FOGLIETTA, Mr. PASHAYAN, Mr. MINETA, Mr. GEJDENSON, Mr. ECKART, Ms. MIKULSKI, Mr. HUGHES, Mr. WILLIAMS of Montana, Mr. LUNDINE, Mr. SHELBY, Mr. SIMON, and Mr. BEREUTER.

H.R. 4860: Mr. WEAVER, Mr. BONKER, and Mr. MORRISON.

H.R. 4977: Mr. CARMAN, Mrs. COLLINS of Illinois, Mr. WILLIAM J. COYNE, Mr. DAUB, Mr. FISH, Mr. GOLDWATER, Mr. HUGHES, Mr. LANTOS, Mr. LEWIS, Mr. MICA, Mr. ROBINSON, and Mr. STENHOLM.

H.J. Res. 319: Mr. WEAVER.

H. Con. Res. 215: Mr. DONNELLY, Mr. PORTER, Mr. WORTLEY, Mr. YATES, Mr. DOWNEY, Mr. SOLARZ, Mr. HORTON, Mr. LANTOS, Mr. DWYER, Mr. BRODHEAD, Mr. KRAMER, Mr. OBERSTAR, Mr. WAXMAN, Mr. ROSENTHAL, Mr. ADDABBO, Mr. GLICKMAN, Ms. FIEDLER, Mr. CORCORAN, Mr. BEILENSON, Mr. HARKIN, Mrs. FENWICK, Mr. BINGHAM, Mr. LOWRY of Washington, Mr. MATSUI, Mr. LOWERY of California, Mr. RITTER, Mr. FAUNTROY, Mr. GOODLING, Mrs. HOLT, Mr. PEYSER, Mr. RODINO, Mr. WEISS, Mr. ATKINSON, Mr. WILSON, Mr. FORD of Tennessee, Mr. SMITH of Pennsylvania, Mr. WYDEN, Mr. LEHMAN, Mr. GEJDENSON, Mr. LAFALCE, Mrs. SCHROEDER, Mr. EDWARDS of California, Mr. MOLINARI, Mr. FORSYTHE, Mr. FITHIAN, Mr. FOGLIETTA, Mr. GREEN, Mr. MCKINNEY, Mr. MITCHELL of Maryland, Mr. SCHEUER, Mr. STUDDS, Mr. BARNES, Mr. FISH, Mr. MINETA, Ms. MIKULSKI, Mr. MOFFETT, Mr. HUGHES, Mr. DOUGHERTY, Mr. PHILLIP BURTON, Mr. OTTINGER, Mr. BLANCHARD, Mr. EDGAR, Mr. FAZIO, Mr. SIMON, Mr. CONTE, and Mr. ERTEL.

H. Res. 143: Mr. LOWERY of California, Mr. ROEMER, Mr. FITHIAN, Mr. FAUNTROY, and Mr. BINGHAM.

H. Res. 265: Mr. ANDREWS, Mr. JEFFORDS, Mrs. SCHROEDER, Mr. KINDNESS, Mr. PORTER, Mr. STENHOLM, Mr. FISH, Mr. LAFALCE, and Mr. BADHAM.

PETITIONS, ETC.

Under clause 1 of rule XXII,

295. The SPEAKER presented a petition of the Richland County Council, South Carolina, relative to extension of the Voting Rights Act of 1965; which was referred to the Committee on the Judiciary.

SENATE—*Monday, December 7, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Great is the Lord and greatly to be praised; and His greatness is unsearchable. The Lord is good to all, and His tender mercies are over all His works. Thy kingdom is an everlasting kingdom, and Thy dominion endureth throughout all generations.—Psalm 145: 3, 9, 13.

Mighty God, we recall the infamy of this day 40 years ago. We thank Thee for the resolution of that conflict and the good relationship we now enjoy with Japan. In that memory may we be more sensitive than ever to the irresistible logic of making peace and the insane irrationality of making war.

Father God, I pray that Thou wilt give to the Senate this week a special measure of wisdom and strength for their tasks. Help them to see what a practical resource they have in Thee. Prove to them. Father, that Thou dost understand their situation in every detail and that Thou art willing and able to enable them efficiently and judiciously to complete their business sooner than seems humanly possible.

Bless the Senate leadership, the leaders of the majority and the minority, their assistants and aides. Bless those who chair committees and subcommittees, those who manage bills and their support people. I pray, gracious Father, that this place will be filled with an unmistakable sense of Thy presence which will make it possible for the Senate to handle its pressing legislation in the least amount of time so that all who serve here and in the White House will have time to give priority to their families at this holiday season.

Dear God, show that Thou art a loving, caring, understanding Father who can enable humans to do better than their best, to do what without Thee would be impossible. We ask this in the name of Him whose birthday we celebrate at this season. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

HAPPY BIRTHDAY, SENATOR THURMOND

Mr. BAKER. Mr. President, this past Saturday, the distinguished President pro tempore of the Senate, Senator THURMOND, celebrated his 79th birthday, and I want to take this opportunity on behalf of the entire Senate to congratulate our esteemed colleague on that occasion.

Senator THURMOND's dedication and enthusiasm for this body is as stalwart today as it was in 1954 when he was first elected to the Senate. In recognition of this special occasion, I would like to dedicate a poem by W. H. Auden, entitled "New Year Letter" to Senator THURMOND, with my best wishes and sincerest appreciation.

NEW YEAR LETTER BY W. H. AUDEN

O Unicorn among the cedars,
To whom no magic charm can lead us,
White childhood moving like a sigh
Through the green woods unharmed in thy
Sophisticated innocence,
To call thy true love to the dance,
O Dove of science and of light,
Upon the branches of the night,
O Ichthus playful in the deep
Sea-lodges that forever keep
Their secret of excitement hidden,
O sudden Wind that blows unbidden,
Parting the quiet reeds, O Voice
Within the labyrinth of choice
Only the passive listener hears,
O Clock and Keeper of the years,
O Source of equity and rest,
Quando non fuerit, non est,
It without image, paradigm
Of matter, motion, number, time,
The grinning gap of Hell, the hill
Of Venus and the stairs of Will,
Disturb our negligence and chill,
Convict our pride of its offence
In all things, even penitence,
Instruct us in the civil art
Of making from the muddled heart
A desert and a city where
The thoughts that have to labour there
May find locality and peace,
And pent-up feelings their release,
Send strength sufficient for our day,
And point out knowledge on its way,
O da quod jubes, Domine

Mr. President, I understand the Chair is constrained not to speak in his present circumstance, as he presides in the Senate, but I can see from the place at which I stand that he has nodded assent which is the only acknowledgment that I require because I wish to add my own personal respect, and once again to express my respect and affection for a man who is deeply and uniquely a man of the Senate.

Mr. PROXMIRE. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. PROXMIRE. I want to join the majority leader in wishing a happy birthday to the President pro tempore of the Senate.

When I first arrived here back in 1957 the distinguished Presiding Officer was speaking fervently and devotedly for a cause in which he believed, and with great effect. In fact, I think he spoke that time something like 26 hours.

It was a remarkable feat, very impressive, and although I disagreed with the Senator on occasions, I have great admiration and respect for his integrity, his honor, and the dignity he has brought to this body, and I am happy to join my good friend in wishing him a happy birthday.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I believe there is already an order for the transaction of routine morning business today, is there not?

The PRESIDENT pro tempore. The majority leader is correct.

Mr. BAKER. I have no further requirement for any time under the standing order, and I am prepared to yield it to any Senator seeking recognition or to the control of the distinguished acting minority leader if he has any need for it. He indicates he does not.

I yield back the remainder of my time under the standing order.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

WHAT THE GENOCIDE CONVENTION IS NOT

Mr. PROXMIRE. Mr. President we are seeing a particularly unstable period in Latin American history. To make matters worse this regional strife has provided the latest battle ground for East-West competition. Massive exports of sophisticated weapons by both sides have only worsened the violence and destruction there. Our policy for the region has shifted from an emphasis on human rights to geopolitical considerations. Civilians are the big losers. Many thousand have already died and there is no end in sight.

Civilians in El Salvador are suffering the most. Civil war and vigilanteism are destroying their country. International recognized norms of war concerning civilians are not being observed and the civilian government in power has proved powerless to stop this violence. Meanwhile the civilian death toll mounts. For the first week in November alone, 287 civilians were killed according to the San Salvador Archdiocese.

To escape this violence, thousands of Salvadoran citizens have sought refuge in the Honduras. But, increasingly the Salvadoran civil war is spilling across the Honduran border. Now the Honduran military is in the process of forcibly resettling 19,000 refugees who they feel are aiding Salvadoran guerrillas with food and sanctuary.

Mr. President, the core of the problem in this region is poverty, a basic disregard for human rights and intervention by outside sources. But none of the actions I have just mentioned could be considered genocide under the International Genocide Convention.

This is because the actions of all sides in Latin America are aimed at political groups.

Mr. President, some have argued that excluding political groups from article II fundamentally undermines the effectiveness of this treaty. But, as with all international treaties, it is practical and sound to start with things that all parties can agree on. Sovereign nations would not commit themselves to a treaty which prevents them from quelling domestic insurrection, or defending against external subversion. For this reason political groups were excluded from the treaty.

Mr. President, this treaty is not a panacea for all the ills of the world. It is designed to protect members of national, ethnical, racial, or religious groups from being systematically annihilated for the sole reason that they are members of one of these groups.

I hope my colleagues will take advantage of this opportunity to reaffirm the right of these groups to live which is so basic to our American tradition. It will not solve all of our human rights problems but ratifying the Genocide Convention will be a step in the right direction.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. MATTINGLY). Who yields time?

ORDER OF BUSINESS

Mr. BAKER. Mr. President, might I inquire of the acting minority leader if he has any requirement for the remainder of his time under the standing order?

Mr. PROXMIRE. I have no requirement. I am happy to yield back the remainder of the minority leader's time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to exceed 1 hour with statements therein limited to 5 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ARCHIBALD COX

Mr. HELMS. Mr. President, comes now the Honorable Archibald Cox, who is regarded by many in this city as a man with a constant thirst for savoring his name in headlines, traveling around the country to hold "news conferences" to condemn those with whom he does not agree.

Now, it is interesting that the gentleman is not using his own money for his travels. His expenses are being paid by a well-known liberal lobbying group. Mr. President, I hasten to say that I find no fault with any of that. The gentleman is within his rights. And he is by no means alone in this city in his desire to see his name in the newspapers—particularly in those "liberal" newspapers which use any pretext to attack Ronald Reagan or any other public figure perceived as being a conservative.

Now, Mr. President, Mr. Archibald Cox stopped in Raleigh, N.C., this past Friday for a "press conference" with a newspaper which he knew would be jubilant to hear and report his attacks on the Senator from North Carolina. And he fired both barrels. But upon analysis of what the gentlemen said, the Cox shotgun only sputtered. As Winston Churchill once remarked, nothing is more satisfying than to have been shot at and missed.

Mr. President, Mr. Cox's fury was directed at me because I am attempting to stop forced busing and reinstate voluntary prayer in the schools. I plead guilty to both counts.

But, Mr. Cox cried, while in Raleigh, that Senator HELMS was trying to destroy the Supreme Court and destroy the Constitution.

Mr. Cox should pause at least long enough to read the Constitution. With all due respect to the gentleman, it is fair to wonder if he has read article III, section 2 of the U.S. Constitution. That section contains the important "exceptions clause" which clearly, undeniably gives Congress the right and the authority to limit the appellate jurisdiction of the Supreme Court.

Moreover, the Supreme Court itself, time and time again, has made clear that Congress does have the right to limit the Court's appellate jurisdiction. One constitutional scholar, a liberal, by the way, has said the Supreme Court has made that clear in "an unwavering line through five consecutive Chief Justices, including John Marshall."

Speaking of Chief Justice Marshall, Mr. President, it was he who, in 1788, before the Virginia Ratifying Commission, declared that Congress may limit the Supreme Court's jurisdiction, "As far as Congress may think proper for the interest and liberty of the people."

Now, Mr. President, if Mr. Cox would consult some of the Nation's noted constitutional experts, he might be—he might be—sufficiently embarrassed to tone down his purely political attacks on conservatives with whom he disagrees. He might, for example, inquire of Dr. Raoul Berger, of Harvard, since Mr. Cox feels so much at home at Harvard. Dr. Berger is himself not regarded as a conservative, but he is a recognized student of the U.S. Constitution. He is also a fair man, which Mr. Archibald Cox sometimes appears not to be.

Dr. Raoul Berger once opposed my efforts to limit the jurisdiction of the Supreme Court, but then Dr. Berger decided to study the question further. His verdict after that study: "The Helms amendment seeks only to restore State control of school prayer exactly as the Founders intended."

Mr. President, I rest my case, but I would say again that I do not question Mr. Cox's right to disagree with me on the question of school prayers, on forced busing, or on any other issue. But I do question his motives when he flies around the country making stark misrepresentations of what I am trying to do. It surely was no accident that Mr. Archibald Cox conveniently dropped in to Raleigh for a "news conference" with a newspaper which avidly seeks any morsel of criticism of any conservative, especially if it happens to be Ronald Reagan or Jesse Helms.

So, Mr. President, if Mr. Archibald Cox wants to campaign against conservative government in the United States, that is his right. But he ought to lower his flag of constitutional purity. Either the gentleman does not know what he is talking about or he is deliberately attempting to mislead the American people.

Mr. President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have two unanimous-consent agreements which I am informed have been cleared on the minority side. I would like to state them now for the consideration of the acting minority leader.

APPOINTMENT OF ADDITIONAL CONFEREE—H.R. 4995

Mr. BAKER. First, Mr. President, I ask unanimous consent that the Senator from Oregon (Mr. HATFIELD) be added as a conferee to the Department of Defense appropriations bill, H.R. 4995.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS FOR TODAY

Mr. BAKER. Now, Mr. President, in respect of the schedule for today, I ask unanimous consent that following the

period for the transaction of routine morning business as ordered for today, the Senate proceed to the consideration of S. 10, the Hoover Commission bill; that upon disposition of that measure the Senate turn to the consideration of Senate Resolution 238, the resolution relating to tax deductions for residential mortgage interest payments; that upon the disposition of that measure the Senate turn to the consideration of S. 881, the Small Business Act amendments.

I further ask unanimous consent that any rollcall votes on amendments to or passage of these two measures or amendments to S. 881 ordered before the hour of 4:15 p.m. occur back to back at 4:15 p.m. with the first rollcall vote to be 15 minutes in length and any succeeding rollcall vote to be 10 minutes in length. Mr. President, the request should be on or in relation to these measures or any amendments in respect thereto.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

THE SCHEDULE OF THE SENATE THIS WEEK

Mr. BAKER. Mr. President, I wish to say a word with respect to the schedule of the Senate this week. A number of matters must be dealt with before the Senate can adjourn sine die. There are appropriation bills yet to be considered and disposed of in the Senate. There are, of course, conference reports on appropriation bills; there is the second concurrent resolution. First and foremost, of course, is the passage of a continuing resolution, and there are other matters. In view of this heavy requirement for action by the Senate, I think it is likely that each day this week will be a busy day. Late sessions can be expected any evening, and I especially invite the attention of Senators to the high probability of a Saturday session this week.

That will be particularly so if the House of Representatives, in fact, acts on the continuing resolution and delivers it to the Senate for consideration by this body on Thursday or Friday. I think it would be well worth the investment of time of the Senate, on a weekend that it will be in session on Saturday, to try to complete that important piece of legislation.

Senators, then, should be on notice that the Senate will be in session, of course, each day this week, but especially to consider that there is a high probability that we will be in session on Saturday. I shall have a further announcement to make with respect to the schedule of the session next week and a further assessment of an estimate for a date for sine die adjournment, perhaps, later today.

Mr. STENNIS addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, I have no allotted time at this particular moment, but if anyone comes in who does have allotted time, I would appreciate the Chair letting me know. I do not expect to speak over 5 minutes.

REPEAL OF LEASING PROVISION OF ECONOMIC RECOVERY ACT

Mr. STENNIS. Mr. President, on December 1, Senators PELL and BUMPERS introduced legislation to repeal the so-called leasing provision of the Economic Recovery Tax Act of 1981. Senators BOREN and KASSEBAUM have also spoken out expressing their strong views that this provision should be repealed. I am more than pleased to join in cosponsoring this legislation.

I ask unanimous consent, Mr. President, that I may become a cosponsor of this bill that I have just referred to, S. 1896.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, the provision proposed to be repealed permits the so-called leasing of tax credits from one company to another. It will cost the taxpayers far more than anticipated. The original conservative estimate of the cost to the Treasury was $27 billion to $29 billion in lost tax revenues during the next 5 years. However, other estimates are that the cost could run as much as double the original estimate.

Former Internal Revenue Commissioner Sheldon S. Cohen has dubbed this as the "rent-a-deduction" provision. Enactment of this leasing provision in the Economic Recovery Tax Act of 1981 was clearly a mistake. It was a part of the substitute bill in the House of Representatives and was not considered by either the House or Senate committees. Those are the facts, I am told, Mr. President. It received little more than passing mention during floor debate. This is not the way to pass complicated tax legislation.

Mr. President, I am not trying to impute wrongdoing—the very opposite—to any Member. In the rush and push and clash of massive amounts of legislation here within the last 6 weeks, particularly, I can understand how such a thing could happen but, at the same time, the facts were not fully presented to the membership, either by way of available special official report or by normal ways of debate.

It is clear that this provision is an unjustified and, in fact, I think an outrageous raid on the U.S. Treasury.

The "rent-a-deduction" provision will permit corporations to buy and sell Federal tax credits as though they were stocks, bonds, or bushels of wheat. It helps two kinds of corporations, these being prosperous companies that do not need any help or inefficient, noncompetitive firms that do not deserve any help. The provision benefits only those wealthy corporations who wish to shelter their profits and firms that have done so poorly in the competitive marketplace that they have no profits from which to deduct their tax credits.

It is apparent that the tax loss resulting from this special provision has a direct and heavy impact on the Federal budget. For example, the $27 billion of the originally estimated loss is more than double the projected deficit in the social security trust fund in the next 5 years. That same $27 billion would fully fund for the next 10 years a program of basic educational opportunity grants to needy college students at the current budget level. Many other apt illustrations could be given.

Mr. President, I am convinced that the enactment of this leasing provision was clearly a mistake and that it would be unthinkable to allow it to remain as a part of our tax law. If we do so, the tax loss which results will have to be made up by increased taxes on the average American, additional cuts in the Government expenditures, or by increased Federal deficits. It is poor public policy to permit the selling and trading of Federal tax credits under these circumstances.

I hope that the Senate Finance and the House Ways and Means Committees will take up this matter on an urgent basis and will report out legislation repealing this leasing provision which, as I have said, constitutes an outrageous and unjustified raid on the Treasury and on the resources of this country.

Mr. President, I have voted for many of the reductions this year. I want to support whatever should prove necessary to make the necessary adjustments in our economy, to make the balances sounder in the finances of our Government, and to make sounder the important and necessary segments of our Government, such as the social security fund.

I cannot see any way that Congress now can take off on another round of these reductions in the field where the reductions in many instances actually hurt those who are beneficiaries of the programs. I do not see how, in good faith, we can take off with a new start the remainder of this year or next year in continuing to make those reductions, unless we go back and pick up the mistakes we have made.

I am not charging any conscious bad faith on the part of any Members, but we were at least careless as a body, to home extent, in letting these things happen.

We have to go back and put our legislative house in order before we can start out again, with any kind of good grace or good faith, in making these continued reductions. It is a simple matter. I do not see any complicated aspects to it. This legislation is certainly a simple matter to get through here.

I doubt that 5 percent of the membership really had an understanding of what this language meant, even if they knew it was in the bill. I certainly am surprised and chagrined and disappointed to find this set of facts.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. BUMPERS. I just want to say to the Senator on that point that I have discussed this with members of the Finance Committee. Of course, this is not a reflection on that committee or its members—it is a reflection on all of us—but I have talked to members of the committee who did not know that provision was in the bill.

I assure the Senator from Mississippi that his figure that 95 percent of the Senate did not know it is probably accurate. I would say that, more likely,

99 percent of the Senators did not know it was in the bill.

Mr. STENNIS. In connection with the Senator's reference to the Finance Committee, I am sure he joins me in believing that it is one of our better committees. We know that the membership is diligent and trustworthy, and they have a massive amount of work to do. So it is no lasting reflection on them. However, I believe they should be in a big hurry to help correct the error that has been made, and I feel that they will take that action.

I have talked with Senator KASSEBAUM and Senator BOREN, who have expressed their views on this problem, and I expect to talk to them further, as well the Senator from Arkansas, with whom I have talked a little.

THE EAST COAST TRIDENT SUBMARINE BASE AT KINGS BAY, GA.

Mr. MATTINGLY. Mr. President, contained within the military construction appropriations bill just passed was the first increment of funding for the east coast Trident submarine base located at Kings Bay, Ga. The committee, of which I am a member, made the right decision in approving the full budget request for this vital naval facility. The decision represents strong congressional support for the strategic decision in providing for both east and west coast basing of the next generation of nuclear submarines.

These submarines will be the largest and most powerful submarines ever built. They will serve as this Nation's first line of strategic weapons well into the 21st century.

The Tridents offer many advantages over our aging fleet of Polaris and Poseidon. They possess improved mobility, speed, and can travel virtually undetected for a longer period of time, thus making them more survivable. The Tridents will carry 24 missiles compared to the present 16, and with the addition of the Trident II missile, will be able to strike up to 6,000 miles into an adversary's homeland.

Additionally, the increased range of these missiles will enable the Trident to operate in 10 times more ocean than our present fleet of submarines.

In sum, Mr. President, with the Trident coming on line, the Nation is insured that our sea-based leg of the strategic Triad is sound.

The home for these advanced craft on the east coast of our country will be Kings Bay, Ga., which presently serves as a home for a Poseidon submarine squadron. The fact that the full complement of Trident can be based in the United States is highly significant, providing for higher security and more economically logistic servicing.

The studies of various organizations involved indicate that Kings Bay will serve well as the base for Tridents. According to reports I have seen 11,540 new jobs will be created as a result of the Trident basing and an additional 21,630 people are expected to be attracted to the seven-county impact area by 1998.

Mr. President, I am pleased that this vital project is staying on target as to construction timetable, and I want to thank Senator LAXALT, chairman of the subcommittee, for his interest in this project. I look forward to the facility at Kings Bay being completed by 1989 ready to receive its first ship.

COMPETITION NEEDED IN MILITARY PROCUREMENT

Mr. HEFLIN. Mr. President, I was startled and deeply concerned when I learned that as much as 25 to 30 percent of the $150 billion Department of Defense procurement budget could be saved by greater competition in the purchasing of good and services.

Several independent reports, including a study by the General Accounting Office, show that there is an obvious lack of competition in the Defense Department's procurement process. This lack of competition may be costing the American taxpayers up to $45 billion.

Mr. President, today as much as 70 percent of the dollars spent by the Defense Department for procurement of hardware, operation and maintenance, research, development and testing are awarded on a sole-source basis without any price competition.

According to a General Accounting Office study, the Defense Department could save as much as $25 to $30 billion through greater use of competition.

Mr. President, no one in this Chamber is more supportive of a strong national defense than this Senator. I have voted for increased military spending and for improving our national defense posture since I was elected to the Senate.

But I want to see that those funds are spent wisely for a strong national defense, and not wasted by fraud, abuse, or negligence in the Defense Department's procurement process.

The Defense Department appropriation bill that passed the Senate last week exceeds $208 billion. Of this amount, more than $150 billion will go for procurement. I voted for the Defense appropriation bill because I believe we must have a national defense that is second to none. But, according to independent reports, up to $45 billion is now being wasted because of the lack of competition in the awarding of contracts. This is a shamefully high figure of waste in the Defense Department's budget—and it should not be allowed to continue.

Mr. President, a strict adherence to competitive bidding and multisource contract awarding would save up to 30 percent of military's costs.

I commend my friend from Arkansas, Mr. PRYOR, for raising these concerns during the deliberation on the defense appropriation bill. I voted with him when he offered his price competition amendment. Unfortunately, we were defeated in this attempt to bring about accountability in the DOD's budget.

It is my understanding that there is a bill currently being considered which will require the appointment of an Inspector General for the Department of Defense. I join Senator PRYOR in urging the Senate Committee on Government Affairs to act expeditiously to approve this important measure.

Mr. President, in 1978, the Congress passed legislation establishing the Office of Inspector General for most Government agencies. This legislation has saved billions of tax dollars because the Inspector General acts as an independent watchdog for the prudent use of tax dollars. There is no Inspector General for the Defense Department. The Pentagon, the Nation's largest Government agency, is one of the very few agencies that does not have an independent watchdog to oversee the expenditure of $208 billion.

Mr. President, the American people want, expect, and deserve a strong national defense. But they also deserve to have their hard-earned tax dollars spent wisely and not wasted by a Government which allows for abuse and fraud within the procurement process.

The time is now to appoint an Inspector General for the Defense Department. There is no more important function for this Government than providing a national defense that is second to none—but the Pentagon must not be above minimum standards insuring the wise use of tax dollars.

I am enthusiastic about the bill creating an Inspector General for the Department of Defense and I am pleased to be a joint sponsor of that measure. This Inspector General must have the power and independence to strike fear in the hearts of those who would waste tax dollars—be they civilian or military. There is a crying need for this legislation and I urge its speedy passage by the Senate.

CRUISE MISSILES: A RISK

Mr. MATHIAS. Mr. President, on Friday during the debate on the appropriations for the Department of Defense, I called to the attention of the Senate the problems that will result from the deployment of sea-launched cruise missiles. In particular, I expressed concern over the impact of this new deployment on verification and, thereby, the impact on the whole arms control process since verification is at the very heart of that process.

Subsequently, on Sunday, December 6, the New York Times published a very interesting article by Alan B. Sherr, the president of the Lawyer's Alliance for Nuclear Arms Control, which is a national organization.

Mr. Sherr makes essentially the same arguments and, I believe, his article would be of interest to all Senators and, therefore, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CRUISE MISSILES: A RISK

(By Alan B. Sherr)

BOSTON.—Though public attention has focused on the MX missile and the B-1 bomber in President Reagan's comprehensive plan for developing our strategic nuclear forces, in the long run neither is likely to have as great an effect on our national security as his decision to deploy cruise missiles.

For a variety of reasons, cruise missiles

will substantially damage efforts to achieve effective nuclear-arms control, thus undermining rather than enhancing America's national security.

The United States plans to deploy more than 3,000 air-launched cruise missiles both on B–52's beginning in 1982 and on B–1's in subsequent years; several hundred sea-launched cruise missiles on submarines beginning in 1984; and 464 ground-launched cruise missiles in Europe beginning in 1983.

All three types of cruise missiles are formidable weapons. They are small and mobile, self-guided in flight, and could be highly accurate. Ironically, some of these characteristics spell disaster for arms control.

The size and mobility of the cruise missile make verification of the numbers and locations of these weapons virtually impossible. Because the cruise missile is only about 20 feet long, it can be easily hidden from satellite surveillance and other existing "national technical means" by which each superpower successfully counts the other's missiles and launch silos, bombers, and submarines.

Cruise missiles could be secreted in internally modified commercial aircraft, or in almost any vehicle, for example an aircraft carrier or a truck. A single wide-bodied commercial jet could carry and launch several dozen.

Even though the United States may not plan to deploy cruise missiles this way, the mere potential for doing so is destructive to arms control. There may be no practical way, once deployment has begun, to assure the Soviet Union that we won't create a secret cruise-missile force. When the Soviet Union responded by building its own cruise missiles, we would similarly be left in doubt.

Even assuming that both sides could be satisfied that cruise missiles would only be carried in specified types of vehicles, such as submarines, problems would remain. How could it be verified which submarines carried cruise missiles and which did not? Because you might not be able to tell whether a submarine had cruise missiles by examining it from the outside, on-site inspection would be necessary. The unpleasant alternative would be to count all submarines as cruise-missile carriers, thus inflating the number of nuclear weapons assumed and permitted under any future arms-control agreement.

If for no other reason, the enormous cost of weapons such as the MX and the B–1 ensure that they will be seriously debated. In contrast, the advertised low cost and strategic advantages of cruise missiles present them as expedient alternatives, thus creating such anomalies as aggressive advocacy, by proponents of nuclear-arms control, of cruise-missile deployment on B–52's as an alterantive to the B–1. The number of cruise missiles deployed by the superpowers is thus likely to be pushed upward in coming years, and proliferation to other nations made more likely.

It is not difficult to envision a world in this century in which cruise missiles with nuclear warheads abound on all oceans and continents, in which no country is confident of their whereabouts, and, indeed, in which there is no certain way of identifying which country has launched a cruise missile on its winding way to a target thousands of miles distant.

Cruise missiles have been a subject of strategic nuclear arms talks, however, since the mid-1970's. Why then are we about to deploy weapons that will ultimately prove so inimical to our national security? In large part, it is because of the desires of military strategists and defense contractors to take immediate advantage of our temporary superiority in cruise-missile technology. We are thus repeating the mistake made in the 1970's when we rejected the opportunity to ban MIRV's (multiple independently targetable re-entry vehicles) because we had them and the Soviet Union did not. Today, Soviet MIRV technology contributes substantially to the theoretical vulnerability of our land-based intercontinental ballistic missiles.

It is time to reassess our long-term interests. If we deploy cruise missiles now, we will be trying the hands of our nuclear-arms negotiators in the future; they will not be able to negotiate away a quantity that the Soviet Union cannot measure. The Soviet Union will then deploy its own cruise missiles, thereby completing destruction of the underpinning of nuclear-arms-control agreements: the capacity for mutual verification.

The Soviet Union has not yet developed and tested cruise missiles, and the United States has neither produced them in large numbers nor deployed them. Mutual verification of a ban on production and deployment is still possible. It is of the utmost importance that we do not allow this rapidly evaporating opportunity to pass.

TERRORISM SPONSORED BY LIBYA

Mr. MITCHELL. Mr. President, 3 days ago, the national press reported that the nation of Libya has trained, financed, and sent to the United States a team of five terrorists whose objective it is to murder officials of our Government. President Reagan has acknowledged that these press reports reflect information he has received from American intelligence-gathering agencies, about which he is concerned, and which he is taking seriously. It is my understanding that both the Federal Bureau of Investigation and the Secret Service are taking special extraordinary measures to insure that this terrorist team is not permitted to accomplish its objectives.

Every Member of this Congress, regardless of party, should in his or her own way, condemn Libya for its continued involvement in terrorist activities. All peace-loving nations of the world must apply the influence they possess to stop the kind of destabilizing activity which has become the hallmark of Libya and its president, Colonel Qadhafi, a man characterized by the late Anwar Sadat as "* * * 100 percent sick and possessed of the demon."

As distressing as the report of the Libyan terrorist squad is, it is only the latest chapter in a continuing saga of terrorist activity sanctioned by Colonel Qadhafi. He is reported to have lent substantial support to separatist groups in the Basque region of Spain and in Italy; to have infiltrated fundamentalist hit squads into Egypt; to have actively sought the overthrow of Sudanese President Numeiri, a friend of the United States; to have ordered and obtained the elimination of Libyan dissidents outside of Libya; and to have permitted a raging mob to sack and burn the U.S. Embassy in Tripoli in 1979.

Under 12 years of Qadhafi's rule, Libya has gained world recognition as an exporter of two things: Terrorism and petroleum. The former is financed by the revenues from the latter. Only in recent weeks have the American people become aware that the United States is the primary buyer of the Libyan petroleum which generates the cash for Qadhafi's illegal, immoral, and destabilizing plots.

We paid Libya $7 billion for oil in 1980. By July of this year, we had sent to Libya an additional $4 billion. Each day, over 350,000 barrels of Libyan petroleum enters the United States.

Though the United States is economically vital to the prosperity of the Qadhafi regime and the maintenance of Libya's reputation as the "Patron Saint" of terrorists, Libyan crude is not crucial to the economic future of the United States. In fact, Libya provides just 2 percent of all the petroleum which we consume, and only 5 percent of the petroleum which we import.

If the United States is seriously concerned about the terrorist activities which Western intelligence agencies indicate could not be conducted without Libya's cooperation and financial support, why does not this country, in cooperation with its allies, phaseout the importation of Libyan petroleum? By so doing, the United States could substantially curtail Libyan-sponsored adventurism and could do so without crippling American interests.

The Reagan administration is being presented with a foreign policy option which it should not pass up. The administration has spoken at great length about its commitment to halt the spread of terrorism. By instituting a prompt phaseout of Libyan oil imports, President Reagan would be backing up his administration's words with concrete action.

Five weeks ago, during the Senate's consideration of the foreign assistance authorization bill for fiscal year 1982, I cosponsored an amendment offered by Senator HART which would have resulted in a complete phaseout of Libyan oil within 90 days. Ironically enough, the Reagan administration urged Senators to oppose Senator HART's proposal, and to support a mere study of the ways in which pressure could be brought to bear against Libya. I believe now, as I did then, that the time for studies is past and that firm action is urgently required.

I hope that the reports of Libyan hit men searching for their American targets here in the United States are sufficient to convince the President that he should act quickly to stop the flow of American dollars to Libya by taking immediate steps to terminate the U.S. importation of Libyan oil.

HEALTH WARNING LABEL ON ALCOHOLIC BEVERAGE CONTAINERS

Mr. THURMOND. Mr. President, I rise today to address two issues which have been raised regarding my bill, S. 1543, which provides for the placement of a health warning label on the containers of alcoholic beverages.

One question is the date by which the various distilled spirits companies will have to comply with the provisions of the bill, once it is passed. Similar legislation to my bill, which has been introduced in the House by Representative GEORGE BROWN, provides for compliance within 60 days of enactment. I have been in-

formed by several sources that compliance within such a time frame may well be impossible.

I have no desire to place an unreasonable burden on the distilled spirits industry. Therefore, I intend to recommend to the Senate Committee on Commerce, Science, and Transportation, to which this bill has been referred, that compliance with the terms of the bill shall become mandatory 1 year from the date of enactment. This will, I believe, give the distilled spirits industry ample time to make necessary preparations and to use up their present stocks of labels.

Mr. President, the second question concerns the actual location of the label. The current language of the bill (S. 1543) states that the health warning must "appear on the label of any such container * * *." With regard to imports, the labels will already be intact when they arrive in this country. I would like to state today for the RECORD that I believe a separate label containing the health warning, placed on the outside of the container, would be acceptable under this language. There is no reason why the health warning would have to be a part of the main label, as long as any separate label containing the health warning appears in a conspicuous place on the front of the container. If the Commerce Committee, after receiving testimony on this bill, believes that a separate label would indeed be preferable, I would not be opposed to a committee recommendation or amendment to that effect.

If this is the case, there would, of course, be no reason to allow time for label stock depletion, and the 1-year implementation time previously suggested could perhaps be rolled back to 6 months.

I intend to notify the Commerce Committee directly of these recommendations, and I hope that my remarks here in the Senate will serve to make my views known to cosponsors and others who may have an interest in the bill.

Thank you, Mr. President.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

BUDGET ACT WAIVER

Mr. DOMENICI. Mr. President, I call up Senate Resolution 203 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 203) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 10.

The Senate proceeded to consider the resolution.

Mr. DOMENICI. Mr. President, Senate Resolution 203 waives section 402(a) of the Congressional Budget Act with respect to the consideration of S. 10, the so-called Hoover Commission bill. This waiver resolution is necessary because S. 10 was reported after the May 15, 1981, reporting deadline for fiscal year 1982 authorizing legislation. The Budget Committee reported the resolution to the Senate without recommendation on September 22.

I would like to point out to the Senators that the purpose of section 402(a) of the Budget Act is to prevent authorizing legislation reported after May 15 from disrupting the appropriations and budget processes. Funding for the Commission on More Effective Government, if Congress passes S. 10, could be provided before the end of fiscal year 1982 through a supplemental appropriation bill. I understand that only about $3 million would need to be appropriated in the Commission's first year of existence. In light of the very small direct appropriations on budgetary impact of S. 10 and the possibility that implementation of the Commission's recommendations could yield substantial budgetary savings in the long run, I have no objection to waiving section 402(a) of the Budget Act. I urge the Senators to adopt Senate Resolution 203.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 203) was agreed to, as follows:

S. RES. 203

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 10, to create a Commission on More Effective Government. Such waiver is necessary to permit consideration of an additional fiscal year 1982 authorization of appropriations to carry out the purpose of S. 10.

Such waiver is necessary as S. 10 was not reported before May 15, 1981, as required by section 402(a) of the Congressional Budget Act of 1974.

Because of the need, however, for a broad review of the operation of government, and because of the constructive contribution that the S. 10 Commission can make to improving governmental performance, the Congress should give early and favorable consideration to the passage of S. 10.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the resolution of waiver was agreed to.

Mr. EAGLETON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROTH. I thank the distinguished chairman of the Budget Committee for coming to the floor for this purpose. He and Senator HOLLINGS have been most cooperative.

ESTABLISHMENT OF A COMMISSION ON MORE EFFECTIVE GOVERNMENT

The Senate proceeded to consider the bill (S. 10) to establish a Commission on More Effective Government, with the declared objective of improving the quality of Government in the United States and of restoring public confidence in government at all levels, which had been reported from the Committee on Governmental Affairs with an amendment to strike out all after the enacting clause, and insert the following:

DECLARATION OF POLICY

SECTION 1. It is the policy of the Congress to develop a blueprint for better government in the United States, to set in motion processes by which the Federal Government can more effectively and responsively serve the people for whom it was created and can more rationally meet its present and future challenges, both national and international, and to encourage and justify the full restoration of public confidence in government at all levels.

ESTABLISHMENT OF COMMISSION

SEC. 2. For the purpose of carrying out the policy set forth in section 1, there is hereby established a commission to be known as the Commission on More Effective Government (in this Act referred to as the "Commission").

IMPLEMENTATION OF POLICY BY COMMISSION

SEC. 3. (a) In carrying out the policy set forth in section 1, the Commission shall consider and study the management, operation, and organization of the executive branch and of the independent regulatory agencies of the Federal Government, including the relationships of such entities to each other, to the other branches of the Federal Government, to their State and local governmental counterparts, and to the private sector. Such study and consideration shall give particular attention to the extent to which such relationships and established patterns of action meet or fail to meet governmental responsibilities and are adequate to meet the challenges of the future. Where appropriate and necessary, the Commission's consideration and study shall include the extent to which the policies implemented by the executive branch and the independent regulatory agencies detract from or enhance governmental management, operation, and organization.

(b) On the basis of its considerations and study under subsection (a), the Commission shall make recommendations, including but not limited to specific proposals for changes in Federal laws, regulations and administrative practices, to promote economy, effectiveness, efficiency, and managerial and political accountability, and to improve services and management in the transaction of the public business. Such recommendations shall include, where appropriate, recommendations for altering the present distribution of functions and activities among the Federal agencies and among the Federal, State, and local governments.

(c) In carrying out its consideration and study under subsection (a), the Commission shall avail itself of relevant information and data gathered by such public and private organizations and individuals as it deems appropriate.

ORGANIZATION OF THE COMMISSION

SEC. 4. (a) The Commission shall be composed of eighteen members as follows:

(1) Six appointed by the President of the United States; a maximum of three from the executive branch, and the balance, persons who are not Federal officials.

(2) Six appointed by the Speaker of the House of Representatives; a minimum of two and a maximum of three from the House of Representatives, and the balance, persons who are not current Members of the House of Representatives.

(3) Six appointed by the Senate majority leader; a minimum of two and a maximum of three from the Senate, and the balance, persons who are not current Members of the Senate.

Members of the Commission shall to the maximum extent possiole be chosen from among persons who have particular knowledge and expertise in the major areas of the Commission's consideration and study. Of the members appointed by the President, one shall have had experience in government at the State or local level; of the members who are not Federal officials appointed by the Speaker of the House of Representatives, one shall have had governmental experience at the local level; and of the members who are not Federal officials appointed by the Senate majority leader, one shall have had governmental experience at the State level. In considering individuals for membership, preference shall be given to persons with a broad knowledge and understanding of the working of the federal system of the United States of America.

(b)(1) Of the members appointed by the President from persons who are not Federal officials under subsection (a)(1), two shall be from the major political party which is not the party of the President, and at least two shall be persons not engaged in partisan political activity.

(2) Of the members appointed from the House of Representatives under subsection (a)(2), one shall be from the political party which is the majority party in the House and one shall be from the other major political party. At his discretion, the Speaker may appoint either a second incumbent Representative from the majority party in the House or a former Representative from that same party. Of the remaining three members appointed under such subsection, two shall be persons not engaged in partisan political activity. Of these three remaining members one shall be from the political party which is the minority party in the House.

(3) Of the members appointed from the Senate under subsection (a)(3), one shall be from the political party which is the majority party in the Senate and one shall be from the other major political party. At his discretion, the majority leader may appoint either a second incumbent Senator from the majority party in the Senate or a former Senator from that same party. Of the remaining three members appointed under such subsection, two shall be persons not engaged in partisan political activity. One of these three remaining members shall be from the political party which is the minority party in the Senate.

(4) For the purposes of this Act, the term "persons not engaged in partisan political activity" shall mean persons who for at least six months prior to appointment as a member of the Commission, have not occupied or sought elected public office, or have not served as an official of a State or national political party.

(c) The President shall appoint a Chairman from among the Commission members who are not Federal officials at the time of appointment. The Commission shall elect from among its members a Vice Chairman from the major political party which is not the party of the Chairman. The Commission shall adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations, its organization, and its personnel.

(d) Ten members of the Commission shall constitute a quorum.

(e) Any vacancy in the Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made. Any individual appointed to fill a vacancy in the Commission shall be of the same political party as his predecessor.

(f) An individual who is appointed to the Commission in the status of a Member of Congress or in the status of a person in the executive branch of the Government, and who thereafter ceases to have such status, shall nevertheless continue as a member of the Commission and shall (if he has returned to private life except for his membership on the Commission) be treated as an individual appointed from private life for purposes of compensation under section 5.

COMPENSATION OF COMMISSION MEMBERS

SEC. 5. (a) The members of the Commission who are Members of Congress or who are in the executive branch of the Government shall serve on the Commission without any compensation in addition to that received for their services as Members of Congress or in the executive branch. The members of the Commission from private life shall each be paid compensation at a rate equal to the rate of basic pay in effect for level IV of the Executive Schedule when engaged in the performance of the duties vested in the Commission.

(b) All members of the Commission shall be reimbursed for travel as authorized by section 5703 of title 5, of the United States Code, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

COMMISSION STAFF

SEC. 6. (a) The Commission shall have power to appoint, terminate, and fix the compensation of such personnel as it deems advisable to assist in the performance of its duties, without regard to the civil service laws and without regard to the provisions of title 5 of the United Stats Code (or of any other law) relating to the number, classification, or compensation of employees. The Commission may also procure, as authorized by section 3109 of title 5, United States Code, temporary and intermittent services to the same extent as is authorized by law for agencies in the executive branch but at rates not to exceed the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule. The Chairman and Vice Chairman shall select an executive director for the Commission contingent upon confirmation by the Commission members.

(b) Service of an individual as a member of the Commission (or of an advisory council or committee under section 7) or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of any Federal law relating to conflicts of interest or otherwise imposing restrictions, requirements, or penalties in relation to the employment of persons, the performance of services, or the payment or receipt of compensation in connection with claims, proceedings, or matters involving the United States. Service as a member of the Commission (or of such an advisory council or committee), or as an employee of the Commission, shall not be considered service in an appointive or elective position in the Government for purposes of section 8344 of title 5, United States Code, or comparable provisions of Federal law.

ADVISORY COUNCILS AND COMMITTEES

SEC. 7. The Commission may establish (without regard to the Federal Advisory Committee Act) such advisory councils and advisory committees as it may deem appropriate to provide specialized assistance in the performance of the duties vested in the Commission by the Act. Members of such advisory councils and committees, while attending meetings of such councils or committees or while otherwise serving at the request of the Commission away from their homes or regular places of business (unless otherwise eligible for travel and subsistence expenses under chapter 57 of title 5, United States Code), may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the Government serving without pay.

POWERS OF THE COMMISSION

SEC. 8. (a) The Commission or any member authorized by the Commission may, for the purpose of carrying out this Act, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may deem advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member. The provisions of the Federal Advisory Committee Act shall not apply to the Commission established under this Act.

(b) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require for the purpose of this Act; and each such officer, department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

(c) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this Act, unless the head of such agency determines that urgent, overriding reasons will no permit the agency to make such facilities, services or personnel available to the Commission and so notifies the Chairman in writing.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress or to the President.

MEETINGS, PUBLIC INVOLVEMENT, REPORTS, EXPIRATION

SEC. 9. (a) The Commission shall first convene no later than six months after the date of enactment of this Act, and shall meet from time to time thereafter, as its members deem appropriate.

(b) Consistent with other provisions of this Act, the Commission shall structure its operations and activities to assure the appropriate and meaningful involvement of the public in its deliberations. In doing so, the Commission shall consider the desirability of holding public hearings, particularly in locations outside of the District of Columbia and of establishing toll-free telephone lines or other mechanisms whereby members of the public can readily contribute suggestions for Commission consideration.

(c) The Commission shall from time to time submit to the Congress and the President such reports as it may deem appropriate with respect to its activities under this Act. One year after it first meets, the Commission shall report to the Congress and the President on its agenda and its progress. Thirty months after the date of enactment of this Act, the Commission shall submit to the Congress and the President its final report with respect to

such activities, including all of its findings and recommendations.

(d) Ninety days after the submission to the Congress and the President of its final report under subsection (b), the Commission shall cease to exist, except as provided under section 11(b).

PREPARATION FOR THE COMMISSION

SEC. 10. Upon enactment of this Act, the Comptroller General, the Director of the Congressional Research Service, the Director of the Congressional Budget Office, the Director of the Office of Technology Assessment, and the Chairman of the Advisory Commission on Intergovernmental Relations shall begin to prepare briefing papers for the Commission. Such briefing papers shall catalog and synthesize any recent reports, analyses, and recommendations of the respective organizations, and shall contain such other information deemed by the head of each such organization to be pertinent to the work of the Commission. The briefing papers shall be completed no later than four months after the date of enactment of this Act.

MONITORING AND FOLLOWUP ON COMMISSION RECOMMENDATIONS

SEC. 11. (a) For a period of four years after the Commission ceases to exist, the Comptroller General shall monitor the implementation of the recommendations of the Commission, and shall report periodically to the Congress and the President on the actions being taken to implement such recommendations.

(b) For a period of eighteen months after the Commission ceases to exist, a portion of the staff shall continue to seek the consideration and implementation of the recommendations of the Commission. During such period, such staff shall be under the supervision of and shall report to the Director of the Office of Management and Budget.

(c) Upon submission of the Commission's final report to the President under section 9(c) the Director of the Office of Management and Budget, in coordination with the executive agencies, shall take action to (1) formulate the views of the executive agencies on the recommendations of the Commission; (2) to the extent practicable within the limits of their authority and resources, carry out recommendations of the Commission in which they concur; and (3) propose legislation needed to carry out or to provide authority to carry out other recommendations of the Commission in which they concur. At least once every six month, the Director of the Office of Management and Budget shall report to the Congress and the President on the status of action taken or to be taken as provided herein. A final report on the final disposition of the recommendations shall be submitted within four years after the submission of the Commission's final report under section 9(c).

EXPENSES OF THE COMMISSION

SEC. 12. There are hereby authorized to be appropriated $16,000,000 to carry out this Act.

Mr. ROTH. Mr. President, today the Senate considers S. 10, to create a Commission on More Effective Government. At a time when the problems with the operation of Government are so highly visible and public support is at a low ebb, I can think of no legislation currently before the Congress that would have a more positive long-term effect on the operation of Government than would the S. 10 proposal.

Essentially, S. 10 would assemble an 18-member bipartisan Commission of distinguished citizens to address the issues of governmental organization and management. On the basis of its 2-year review this panel would develop a blueprint for more effective Government at the Federal level and throughout the intergovernmental system. These recommendations would then be made to the Congress and to the President for implementation either through legislation or executive action.

This is not a new idea. In fact, the S. 10 proposal is based upon the two highly successful Hoover Commissions of the late 1940's and early 1950's. These independent reform Commissions proved highly successful at pointing the way to better governmental organization and, ultimately, to improved public service delivery. Yet vast changes have occurred in the size and the role of Government in the nearly 30 years since the second Hoover Commission issued its recommendations. These changes and the new problems that we face in Government create the need for another broad and objective review of the operation of Government.

It was in response to this need that Senator EAGLETON and I on January 5 of this year introduced S. 10, to establish a new review Commission. Congressman BOLLING has introduced companion legislation in the House of Representatives where it has 102 cosponsors. The legislation enjoys broad-ranging bipartisan support. I want to especially compliment Senators EAGLETON and LEVIN for their leadership in improving and advancing this legislation. The administration strongly supports the bill and has testified to this effect. In his statement for the administration before the committee Mr. Harper testified:

President Reagan shares with you a conviction that the operation of Government can be, in fact must be, vastly improved. A clear perception from the 1980 elections is that the American people demand improvement in their Government as the price for their renewed confidence in our basic institutions of public leadership. We heartily endorse the Commission proposed in S. 10 and pledge to cooperate fully with it in meeting its demanding challenge.

Groups as diverse as Common Cause, Citizens Choice, the National Governors' Association, the Business Roundtable, the National League of Cities, and the National Association of Manufacturers also are strongly in favor of the proposal.

Mr. President, I have here a number of letters that I received just in the last several days that clearly indicate the broad gaged interest in S. 10. One, from the Charles F. Kettering Foundation offers the assistance of that organization together with the National Academy of Public Administration, in carrying out preparatory work which will considerably assist the Commission in getting underway.

Mr. President, I ask unanimous consent that these letters be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ROTH. This proposal clearly does have broad backing. For it to have the fullest impact, however, it must be composed of individuals of the highest caliber and who command the respect of our people. President Ford, I believe would make an excellent Chairman for the Commission, and Congressman DICK BOLLING is another individual with a wealth of knowledge to contribute to the effort.

In my view, the need for changes in the way that we manage and organize our departments and agencies and programs at the Federal level can hardly be disputed. The confusing overlap of functions and responsibilities among all levels of government and the strained relationships between the branch of Government have left our people with a feeling of disappointment and our public officials with a strong sense of frustration. Programs that too often promise more than they can deliver, inefficiency, and the loss of accountability all have had a corrosive effect on the public confidence in government. Yet, if our Government is to play its proper role in meeting the tremendous challenges that we will face as a Nation in the coming decade, this public confidence in government must be restored.

Despite the widespread concern with the performance of government, we do possess the resources and the leadership in this country to get government to work better. By including the views of those from inside and outside of government, by relying on the unheeded reform studies that already have been completed, and by encouraging public participation, the S. 10 Commission will bring these energies to bear on the problems that we now face in government.

I think that the Commission will use these energies most wisely by focusing them on two major areas. Its contribution can be made first by reviewing Federal Government organization, not only with respect to present needs, but with the future in mind as well. Over the past 20 years we have tended to create a new government organization to address each new policy issue. This proliferation inevitably leads to duplication and overlap and equally inevitably diffuses accountability and responsibility. We cannot continue to add layers of governmental entities to deal with the rapid change that we face in the decade ahead. It is imperative that we structure our Government for great flexibility in order to properly address these new challenges.

In designing a blueprint, the Commission will surely find it necessary to review a second area of major focus, that of the relationship between and the roles of the Federal Government, the other governments in our Federal system, and the private sector. These intergovernmental relationships have been subjected to such strong forces during the last two decades of governmental change that the relationships themselves exacerbate the problems with accountability and responsibility.

Ultimately, it is the purpose of this Commission to provide recommendations for streamlining government to these ends: To improve the delivery of services, to speed the decisionmaking process, and most importantly, to restore public confidence in government.

Questions relating to the size and the substance of Federal programs, of course, are matters to be resolved through the political process. But the clarification of the roles of the Nation's various levels

of government and the processes by which they relate are issues which the Commission can address without intruding into the political arena. Moreover, it can do its work from an objective standpoint and take the time needed to develop its recommendations and provide the depth and supporting documentation required to substantiate them.

If the Commission follows the pattern of earlier independent reform efforts, it will have a central staff and use task forces composed of experts in the various areas to examine the broad sweep of the subject areas. It will maximize the use of existing studies—both public and private—to avoid duplication of past efforts. The best talent will be sought for the Commission and the staff. Public hearings will be employed to insure citizen participation and to focus the attention on the work of the Commission. One of the principal aims of the Commission will be to serve as a coalition building process to encourage support for the changes that the Commission will recommend. In drafting these recommendations, consideration will be given to the mechanisms for insuring follow through on the Commission's work. In all aspects of the Commission's work, examples of positive governmental performance will be featured at the same time that problems will be analyzed.

Legislation such as the Reorganization Act and the growing awareness of the need to control the budget should provide the authority and the support in Washington for changing the path of Government. But all of these well-intentioned efforts will themselves be destined to fail if there is not concentrated and cohesive support for governmental change on the part of the American people. The S. 10 Commission on More Effective Government represents an important means of developing this public awareness and support.

Mr. President, we cannot continue to conduct business as usual in Government. The inadequacies of our current approaches and the tremendous demands that we will face as a Nation as we near the 21st century dictate that we seek innovative approaches. The S. 10 Commission will permit the independent and objective review that will illuminate these improvements. With its emphasis on citizen participation and awareness it will encourage action on the commonsense governmental improvements that too often receive inadequate attention. For these reasons I encourage all of my colleagues in the Senate to give S. 10 their vote of approval.

EXHIBIT 1

NATIONAL GOVERNORS' ASSOCIATION,
Washington, D.C., December 1, 1981.

Hon. WILLIAM V. ROTH, Jr.,
Chairman, Committee on Governmental Affairs, Washington, D.C.

DEAR SENATOR ROTH: I understand that S. 10, which would establish a Commission on More Effective Government, will soon be on the Senate floor. For this reason, I am writing to you now to reiterate the support of the National Governors' Association for the legislation.

The decade of the 1970's produced a series of studies and position papers on the intergovernmental system, many of which pointed to the need for reform of the federal-state partnership. The current budget situation has intensified the need for efficient use of federal resources. A Commission for More Effective Government could focus on such issues as:

Sorting out roles and responsibilities among levels of government;

Increasing flexibility in intergovernmental programs;

Insuring accountability in grant initiatives; and

Reviewing the role of the judiciary in the federal system.

In view of the importance of the intergovernmental questions that will come before the Commission, we believe that state elected officials should be adequately represented among the membership of the Commission.

The National Governors' Association is concerned about the future of intergovernmental programs, which support some of the most important domestic priorities of this country, including providing subsistence and medical care to people in need, protecting the environment, and revitalizing the nation's cities. Reflecting this concern, individual Governors have called for a domestic summit to discuss fiscal and structural priorities. We view the Commission on More Effective Government as consistent with and complementary to the summit concept.

We look forward to working with you toward enactment of S. 10.

Sincerely,

STEPHEN B. FARBER.

THE BUSINESS ROUNDTABLE,
New York, N.Y., December 2, 1981.

Hon. WILLIAM V. ROTH, Jr.,
Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR ROTH: The Business Roundtable, an organization of Chief Executive Officers of 190 large corporations, supports S. 10.

The enormous growth of the Federal government in the last 25 years since the Second Hoover Commission Report justifies a thorough examination of the workings of the government and how to improve its effectiveness in the remainder of this century.

Such an examination by a group of experienced and credible citizens can point the way to new mechanisms and techniques of management needed to meet current and future problems.

You and Congressman Bolling and your colleagues in both parties have fashioned legislation that will enable the Commission to achieve its important goals. We support the legislation and, if it is enacted, the Commission's operations will have the cooperation and attention of our members.

Sincerely,

JOHN POST.

U.S. CONFERENCE OF MAYORS,
Washington, D.C., December 1, 1981.

Hon. WILLIAM V. ROTH, Jr.,
Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR ROTH: The U.S. conference of Mayors has officially endorsed the proposal to establish a commission on more effective government which is incorporated in S. 10. We have participated over the past several months in the development of this constructive proposal. We hope that it will receive approval when it comes before the Senate.

I know that my colleagues who represent state and local government here in Washington share our enthusiasm for this measure. Clearly, it is in the best interests of the American people that we have the broadest discussion possible as we move toward a more efficient and focused concept of federalism.

We applaud your sponsorship of this measure and pledge our full support and cooperation.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

NATIONAL ASSOCIATION OF COUNTIES,
Washington, D.C., December 2, 1981.

Hon. WILLIAM V. ROTH, Jr.,
Chairman, Committee on Governmental Affairs, Washington, D.C.

DEAR SENATOR ROTH: The National Association of Counties (NACo) has endorsed the concept of a convocation on federalism for some time. County officials, nationwide, believe that the sorting out of our respective roles and responsibilities is absolutely essential if our intergovernmental partnership is to survive. Your bill, S. 10, is a step in the right direction. We applaud your efforts to establish a convocation, and urge the members of Congress to give serious consideration to this important issue.

Mr. Chairman, our American County Platform states "The national government needs to recognize the inalienable right of state and local general purpose governments to participate in the decision-making process of a balanced federal system." We believe a balanced system, that is one which is both realistic and feasible is achievable only when all levels of government sit as equal partners and develop policy jointly. Only then can we realistically design a new federal system that serves our citizens' needs effectively, and yet remains within the budgets of local, state and federal government. A convocation is, in our opinion, the most responsible way to develop polices on sorting out.

On behalf of counties, nationwide, I commend your efforts and urge the Congress to give serious consideration to this important issue.

With warmest personal regards, I remain

BERNARD F. HILLENBRAND,
Executive Director.

NATIONAL ASSOCIATION OF MANUFACTURERS,
Washington, D.C., December 1, 1981.

Hon. WILLIAM V. ROTH, Jr.,
U.S. Senate, Washington, D.C.

DEAR SENATOR ROTH: As an organization comprised of manufacturers vitally interested in the intelligent and effective operations of the federal government, we strongly endorse your proposed legislation S. 10. It is twenty-five years since, under the auspices of the Second Hoover Commission, a high level group of independent citizens has taken a searching look at the federal government. Since that time, an enormous amount of legislation has greatly increased the impact of the federal government on the private sector as well as state and local governments.

It is vital that the kind of bipartisan review you propose take place now. You and your colleagues on both sides of the aisle have put together legislation that will enable a representative group of citizens with broad experience and public commitment to look objectively at government and generate recommendations for the long term. We commend you for your good work and hope that the Senate will speedily and by a large margin take action to bring this needed body into operation.

Despite recent efforts directed at regulatory reform and at establishing a more cooperative relationship between business and government, there are fundamental problems to which this Commission can devote its time and effort. We want to thank you for your efforts and those of your cosponsor Senator Thomas Eagleton and say that we will support the Commission in its work.

Sincerely yours,

ALEXANDER B. TROWBRIDGE.

COMMON CAUSE,
Washington, D.C., December 1, 1981.
Hon. WILLIAM V. ROTH, Jr.,
Chairman,
Senate Governmental Affairs Committee,
Washington, D.C.

DEAR SENATOR ROTH: On Thursday, December 3, the Senate is scheduled to take up S. 10, legislation to create a Commission on More Effective Government. Common Cause strongly supports this important legislation.

The need for such a Commission is clear. Government is not working as it should. The voters believe this, President Reagan campaigned on this, Common Cause believes it, and so do elected officials across the political spectrum.

Within the stream of ideas for improving government's performance, a common theme is emerging—that it is essential to the nation's future to overcome the increasing fragmentation of our society. There is a growing awareness that pressure from narrow interest groups is pulling government apart, with a resulting loss of common purpose. Common Cause views the proposed Commission as an important catalyst for forming a new public consensus about what is necessary to create a government that works.

The Commission's scope of inquiry while comprehensive is also focused. The federal system has become so large and elaborate that the Commission must have substantial freedom to develop a study agenda that covers all aspects of the problem. The federal executive branch is a primary focus of the Commission. We believe, however, that nature and extent of the relationship between Congress and the executive branch also needs substantial attention with an eye toward improving and updating Congress' capacity to play an effective policy setting and oversight role in the 1980s and beyond. Similarly, an examination of the relationship between levels of government—federal, state, and local—is a necessary element of the Commission's charge.

Building consensus on how to overcome fragmentation and forming public coalitions that will work towards a coherent government pose extremely difficult challenges. But no one is a winner when the government is not working right. Ultimately, the success or failure of implementation will hinge on the extent to which citizens feel a stake in the outcome of this effort and are able to make those feelings heard.

Common Cause believes that the Commission on More Effective Government can play an historic role in helping to mobilize a citizen constituency behind fundamental changes needed to improve the performance of government. We urge the Senate to pass S. 10.

Sincerely,

FRED WERTHEIMER,
President.

CHARLES F. KETTERING FOUNDATION,
Dayton, Ohio, November 12, 1981.
Hon. WILLIAM V. ROTH, Jr.,
Chairman, Committee on Governmental Affairs, Washington, D.C.

DEAR SENATOR ROTH: On behalf of the Kettering Foundation, I am very pleased to acknowledge your letter of October 22, 1981, in which the Governmental Affairs Committee has invited the Kettering Foundation to assist in the preparatory work for the proposed Commission on More Effective Government. The Kettering Foundation welcomes the opportunity to be of assistance to the Committee in this important endeavor.

We are especially interested in convening a variety of persons from the public and private sectors to assist in framing the issues which could become a part of the agenda and by identifying a pool of persons for the Commission to draw upon in its work. A guiding interest of the Kettering Foundation has been that of improving collaborative policy making; that is, ways of bringing together diverse institutions and their interests, disciplines, and talents for the development of common purpose and cohesive public policy. We believe that a series of meetings, which draws upon the insight of first rate persons, in an intelligent way, could be of immense utility to the Commission. More specifically, we have begun to prepare, (in cooperation with the National Academy of Public Administration), a proposed series of conferences which will be designed to meet the purposes you have set forth. Our staff will, of course, work with your staff in the refinement of these plans.

An important role for an institution such as the Kettering Foundation (and other foundations) is to fully avail itself of its independent and non-partisan character and to build upon these qualities in a way that best serves our country. We believe that the Committee's request provides a unique opportunity for us to do precisely that. Thank you again for your letter and we look forward to serving the Committee in the development of the Commission's work.

Sincerely,

DAVID MATHEWS.

NATIONAL CONFERENCE OF
STATE LEGISLATURES,
Washington, D.C., December 1, 1981.
Senator WILLIAM V. ROTH, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR ROTH: The National Conference of State Legislatures is concerned that intergovernmental complexity, confusion and conflict are hampering the efficiency and effectiveness of our system of federalism. In the past thirty years, the system has significantly changed due to a growing economy, improved communications, and relatively greater revenues in the federal budget than in state and local budgets. There is no doubt that trend is being altered this very year, as we stated before your committee last May. State legislative functioning and state revenue programs have also improved during the last ten to fifteen years. It is these changes in conjunction with the federal fiscal pressures that make it the proper time to take steps to improve current intergovernmental relationships as well as to review the strengths and weaknesses of the federal government in carrying out its responsibilities.

NCSL applauds your efforts on behalf of improved government efficiency and stands in support of your bill, S. 10, The Commission on More Effective Government. We urge the members of the Senate to join in this support. In this work, the states once again can be seen as laboratories where a wide range of administrative structures and legislative procedures are now being used. These experiences could be an important resource in a review of federal government procedures. The recent improvements and reforms also argue for an examination of the relationship between the federal government and state and local governments. Participation of elected state and local officials and former elected officials on this commission insures that this experience will be utilized.

Sincerely,

Representative CURT KISER,
Florida, Chairman,
NCSL Government Operations Committee.

Mr. ROTH. Mr. President, I ask unanimous consent to have printed in the RECORD a letter which I received today from President Reagan.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, D.C., December 7, 1981.
Hon. WILLIAM V. ROTH,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR BILL: I would like you and, through you, your Senate colleagues to know that I support enactment of S. 10, the bill which you and Senator Eagleton have introduced to establish a Commission on More Effective Government.

You are, of course, well acquainted with my conviction that we should have less Federal Government. I am no less committed to the idea that what properly should be done by the Federal Government should be done effectively and at least possible cost. It is a goal of both Democrats and Republicans at all levels of government. Together we realize that more effective and responsible government is essential if we are to restore the faith and confidence of our citizens in the institutions of government.

A bi-partisan body of knowledgeable and dedicated persons representing a broad and diversified understanding of America's heritage and unresolved issues can make a contribution at this point in our history in the same manner as did the earlier Hoover Commissions. Now, after nearly thirty years, we need a fresh review of our governing processes and institutions that can be clearly perceived as free of partisan bias and, at the same time, is expert and relevant. The Commission created by S. 10, as amended, is well designed to provide this review. It can point the way to needed reforms and, can help generate understanding and support among our citizens.

I endorse S. 10 and am willing to work with both houses of Congress to secure its enactment.

Sincerely,

RON.

Mr. President, I yield to my distinguished colleague, Senator EAGLETON.

Mr. EAGLETON. Mr. President, I yield to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I appreciate the Senator yielding.

Mr. President, I would like to express my support for the establishment of a commission on more effective government. As the Governmental Affairs Committee states in its report on S. 10, in the last 30 years there has been a "veritable revolution * * * in the size, role and effect of Government in the United States." Although this revolution has brought many benefits, there is a widespread perception today that Government at all levels is not functioning as well as it should and can. Americans are increasingly concerned about the apparently declining efficiency and effectiveness of Government and about the poor performance of many Government programs. These and a host of similar concerns have raised doubts about the ability of Government to cope with the future and the problems it will bring. Such doubts have manifested themselves in the public's declining confidence in Government as an institution. The erosion of confidence in Government and Government officials has been revealed by many opinion polls and surveys.

The Governmental Affairs Committee has recommended—wisely, I think—that we address these broad, complex issues by establishing a commission on more effective government modeled after the Hoover Commissions of the 1940's and 1950's. The task of the Commission will

be to develop a blueprint for better Government in the United States. It will identify changes in the management, operation, and organization of our system of government, particularly the executive branch of the Federal Government, that could be used to implement that blueprint. This approach seems very promising to me for a number of reasons.

First, I am confident that the recommendations of the Commission could yield substantial savings in future years, both in the Federal budget outlays and in the expenditures of State and local governments and the private sector. It has been estimated that the initial savings resulting from the implementation of the proposals made by the Hoover Commissions were in excess of $3 billion. The experience of the Hoover Commissions strongly suggests that the money we invest in the kind of careful study and deliberation in which the Commission on More Effective Government will engage will yield dividends to the American people for many years to come.

Second, the Commission will work closely with Federal agencies such as the General Accounting Office which have done studies and prepared in-depth analyses on issues with which the Commission will grapple. S. 10 directs these agencies to prepare, prior to the Commission's first meeting, summaries of relevant research they have done, in order to facilitate the Commission's work, prevent duplication of effort and minimize expenses.

Third, the Commission's efforts will complement, rather than duplicate, the work of President Reagan's Advisory Commission on Federalism. The President has asked the latter panel, chaired by the distinguished Senator from Nevada, to attempt to sort out the functions performed by Federal, State, and local governments, and to suggest how we can change the allocation of those functions to improve the performance of Government at all levels. I anticipate there will be a very fruitful cross-fertilization of ideas and findings between the two panels that will strengthen the examination of federalism both will undertake. The relationship between the commissions will also improve the analyses of general government management and operations and of the relationships among three branches of the Federal Government done by the Commission on More Effective Government.

In closing, Mr. President, I would like to commend the members of the Committee on Governmental Affairs, especially the chairman of the committee, the distinguished Senator from Delaware, for their foresight in developing this legislation. The problems addresed by S. 10 are complex and very broad in scope, but they deserve the attention of Congress and the American people. The committee deserves praise for the creative approach it has taken in this difficult area.

I thank the Senator from Missouri for yielding.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, I rise in support of S. 10, legislation to create a Commission on More Effective Government modeled after the two reform commissions chaired by former President Hoover from 1947 to 1949, and then from 1953 to 1955.

I have cosponsored this legislation along with Senator ROTH for the past 2 years. In 1980, when we introduced it as S. 2993, President Carter was in the White House, the Democrats controlled the Senate, and the legislation was referred to as an Eagleton-Roth bill. This year, President Reagan is in office, the Republicans control the Senate, and S 10 is known as the Roth-Eagleton bill; in my estimation, however, the need for the legislation remains unchanged and acute.

One of the most disturbing developments of recent years has been the growing disaffection of Americans from their Federal Government. Anyone who has run for Federal office knows that the people of his or her State feel that Washington taxes too much, spends too much, regulates too much, and accomplishes too little in return.

This disaffection with Washington and the Federal Government did not occur overnight. It has grown steadily for at least a decade; it contributed significantly to Jimmy Carter's election in 1976; it was one of the strongest forces behind President Reagan's election in 1980.

The Reagan administration is currently embarked on a determined, all-fronts assault on the Federal Government. The far-reaching budget cuts, to be followed by still deeper third and fourth rounds, represent a major reduction of Federal activities, particularly where the poor and minorities are concerned. The outlandish tax cut eradicates the revenue base needed to fund Government services. The administration has called for regulatory relief, which translates into a radical slowdown of Federal regulation in the areas of environment, health, and safety. In the guise of a new federalism, the administration hands whatever responsibilities for the States and localities that it can pry loose from the Congress, without the revenue needed to discharge those responsibilities effectively, and without any serious effort to sort out which responsibilities actually belong at which level of government.

It may be unfashionable to say so, but I believe that a modern industrial society requires a strong and active Federal Government. Unlike President Reagan, I believe that the explosion of activity by the Federal Government in the past 20 years represents the efforts of Congress and successive Presidents to deal with problems which festered in our country for decades: poverty, hunger, racial discrimination, environmental degradation. In all these areas, the Federal Government acted only after massive evidence that the problem was somehow beyond the boundaries, the resources, the capability of the interest of State and local government, or the private sector.

I continue to support many of these efforts which have been undertaken in the past two decades. I do not believe that the activities of the Federal Government represent the macabre picture of waste and fraud which the President sometimes paints. The accomplishments of the Federal Government frequently tend to be ignored or taken for granted, but significant progress has been made in vital areas.

At the same time, those of us who believe that the Federal Government must inevitably play an active role in the last 20 years of this century should not be blind to its failings in the past 20 years. There has been an emphasis on responding to problems by adopting programs and delivering services without sufficient concern for doing it effectively.

By focusing on one program or one agency at a time, we have tended to overlook cumulative effects: Whether the cumulative effects of regulations on business or total number of mandates or strictures imposed on States and localities. There is a justified sense that the Federal Government is not working as well as it should; that too many programs and agencies have been added piecemeal without a clear sense of how the pieces fit together.

I believe that the Commission to be created by enactment of S. 10 can make a significant contribution to improving Government performance in the coming years. While I believe that the ordinary legislative process is adequate to shed light on and suggest answers to many serious issues, it is sometimes necessary to step back and look at the "big picture."

I envision, the Commission stepping back from the narrow focus often used to decide pressing policy questions and doing a searching, broad analysis, one which looks at the structure and organization of the Federal Government, the division of responsibilities between the Federal Government and the States and localities, how we evolved to this point, and what changes are needed. These issues necessitate a comprehensive study outside of the ordinary political process. Proceeding piecemeal has produced the Federal Government as we now know it. Responding piecemeal will not alone solve the problems.

Following the precedent of the Hoover Commissions, S. 10 would create a commission with a purposely broad mandate to focus carefully and skeptically on the Federal Government. The legislation envisions the Commission grappling with basic questions. For example, in light of the problems and realities we will face in the 1980's, how should responsibility and power be distributed among the various branches of the Federal Government? Has the delegation of functions to independent administrative agencies divorced policy from the will of the people as expressed through elected representatives? Does the President have adequate tools to govern? And remembering that Washington is but one of several levels of government, should the division of responsibilities between Federal, State, and local governments be rethought? Can substantive changes be identified which would transform the current tension in intergovernmental relations to a new cooperation?

I recognize that the public is often skeptical of proposals to submit important issues to expert commissions. The

record of the first and second Hoover Commissions, however, testifies to the fact that commission reports do not always languish on the shelves of libraries or in congressional offices. Contemporaneous public accounts, extensive subsequent studies by public administration experts, and the number of recommendations actually implemented all testify to the fact that the Hoover Commissions were extraordinarily productive. While precise statements cannot be made about the cost savings from the successful implementation of hundreds of major recommendations, reliable estimates have put combined annual savings at between $3 and $6 billion. These savings compare dramatically with the total budget of $5 million for both of the Hoover Commissions.

The fear has been expressed that this Commission could become a partisan vehicle, producing a report which reflects the ideological preconceptions of the administration in power. The concern focuses on the fact that since the Republicans control the White House and the Senate, they will be making 12 out of the 18 appointments to the Commission.

In my view, we have taken several specific steps to minimize the possibility of partisanship. Amendments to be offered today will balance the Commission 9 to 9, Democrats to Republicans, and will insure that the Commission report will be issued after the 1984 election, so as to be available for whoever is elected President in 1984 and to avoid the possibility that the document will become politicized by being dropped into the Presidential campaign.

Mr. President, I believe that there is a more fundamental protection at work. If the Commission begins to break down on political lines, passing recommendations by 10–8 or 11–7 or 12–6, the Commission will very soon be seen as a partisan battleground, and it will discredit itself. If we have commissioners of the caliber that we envision, they will understand quite quickly that a lasting contribution will result only from a bipartisan, independent effort. It was this kind of approach which distinguished the first Hoover Commission, in which great success resulted from President Truman's appointment of former President Hoover, despite their political differences.

Mr. President, one reason I am optimistic about the Commission proposed today is the bipartisan origin of the idea. The two foremost advocates of this Commission are Senator ROTH, who has pursued this concept for several years regardless of what administration was in power, and Representative BOLLING, perhaps the most distinguished student of governmental process that has served in the Congress in my lifetime.

I believe that the current disaffection with the Federal Government reflects a dilemma which affects all industrial democracies—how to have a Federal Government strong enough to play a useful role in grappling with the problems of modern society yet sensitive enough to avoid stifling the individual and economic freedom essential in our society. I think we need to take a comprehensive look at the Federal Government to see what changes are needed in order to strike this balance for the next several decades. I believe that the Commission proposed here today can help us accomplish that job, and I urge the enactment of this legislation.

Mr. HATFIELD. Mr. President, I commend the leadership of the Governmental Affairs Committee, Senator ROTH and Senator EAGLETON. I think these two gentlemen and their committee have demonstrated great foresight and great wisdom in bringing up this important bill, S. 10, to initiate a thorough examination of the effectiveness of the Federal Government as we near the end of the 20th century. I am also pleased to be one of the bill's cosponsors.

Mr. President, the Federal Government's activities and spending have expanded in response to significant national economic, social, and political changes, including the increased interdependence of the various economies of the nations of the world. Complex problems have engendered a whole generation of complex institutional structures and power relationships.

Concern exists, however, over the efficiency and effectiveness of many of the new generation of programs that have "just growed" like topsy. Where have we arrived after four decades of governmental growth? What weaknesses have crept into our institutions of Government?

A major objection that is frequently voiced is that governmental activity has encroached upon areas that have traditionally been the domain of the private sector. Others. although not alarmed over the growth of "big government," find fault with the lack of suitability, or success, of programs that are otherwise well-conceived. Others decry the incidence of waste and fraud; still others object to the fragmentation of authority and the lack of accountability of officials throughout the Federal system.

Mr. President, one of our Nation's strengths has been its ability to conduct regular self-analysis and to change our institutions in order to reflect the changing circumstances in which the American people live. Communist states encourage self-criticism by force; our's is a spontaneous and honest self evaluation. And because of these periodic examinations, we have been able to avoid a governmental system that is locked into traditions that frustrate the will and thwart the desires of the people which it is intended to serve.

S. 10 recognizes that a veritable revolution in the size, role, and impact of Government in the United States has taken place in the decades since World War II. During that period the Hoover Commissions of the 1940's and 1950's are examples of governmental reform efforts at their best. Although the specific issues were different during those decades, the Commissions faced a need, similar to our own, for a broad, comprehensive review and overhaul of the agencies of Government. There was a widespread perception that the Goverment was top-heavy and ineffectual, even in the forties and the fifties.

Mr. President, former President Herbert Hoover was called out of retirement to head up a body of distinguished individuals who had held positions of great responsibility in the country for the purpose of combining their knowledge of American society and developing recommendations for reform. Herbert Hoover and his colleagues were able, on a bipartisan basis, to stand at arm's length from the political pressures and passing crises of the day, and to recommend several organizational changes to provide more efficient delivery of governmental services at lower cost. The Commissions were extraordinarily successful. Some 68 percent of their recommendations were adopted and used to reduce the bloated and inefficient bureaucracy inherited by the Eisenhower administration.

The usefulness of another such Commission today is evident. The goal of the panel will not be to reinvent the wheel or to shuffle the boxes on organizational charts. Rather it will be the purpose of the Commission to give visibility and momentum to many, already existing ideas for improving the way the Government serves the people. One source of information that the Commission will use will be the underutilized recommendations of past studies. However, as in the Hoover Commissions before it, the greatest resource available to this proposed body will be the expertise and experience brought to it by its members. Drawn from the most distinguished members of the public and private sectors of American society, the participants will bring objectivity and credibility to the deliberations. It is my sincere hope that one of our former Presidents will be asked, and will consent, to serve as chairman of the Commission.

Mr. President, I have appreciated the efforts of President Reagan to look at problems from fresh perspectives and to propose bold new approaches instead of tired and worn out responses, but all of us are aware that the plans of any sitting President or legislator are always suspect for their political motivations. The Commission envisioned by S. 10 will avoid the taint of "mere politics."

Mr. President, that is part of the genius, I believe, exercised by Senator ROTH and Senator EAGLETON in crafting this particular resolution in such a way, from the standpoint of its content, its structure, and its timing to avoid some of these immediate reactions that will no doubt be made.

Mr. President, we are not blazing new trails. In a sense, we have had well-established precedent. We have had the outstanding effort of the previous Hoover Commissions and we have had little Hoover Commissions that have operated at State levels. I know my own State of Oregon adopted an extensive comprehensive reorganization program patterned after the "Federal Hoover Commission," calling it the "Little Hoover Commission," as many other States did.

So all we are doing is really going down a tested path with a new approach, new machinery, and a new vision, a vision that has been led here today by this committee and its chief officers, the chairman, and the ranking minority member.

I urge my colleagues in the Senate to

support S. 10, to establish a Commission on More Effective Government. I again thank my good friends from Delaware and Missouri for their leadership in this effort.

Mr. ROTH. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROTH. Mr. President, I yield such time to the Senator from Kansas as he may desire.

A MORE EFFECTIVE GOVERNMENT

Mr. DOLE. Mr. President, I am pleased that the Committee on Governmental Affairs has taken the initiative to move the Federal Government in the direction of greater efficiency, simplified structure, and smoother operations. The Commission on More Effective Government that would be established under S. 10. is a major step in the right direction.

Under the legislation reported by the Governmental Affairs Committee in July, an 18-member, bipartisan panel of citizens would be convened for the purpose of reviewing the operations of the Federal Government, its structure, and ways to improve management and enhance the efficiency and responsiveness of a government that too often becomes unwieldy and mired in bureaucratic disputes. The Commission will be objective and independent, but it will be able to draw on the resources of existing public and private groups that have expertise in the problems of Government operation.

PRECEDENT FOR SUCCESS

Mr. President, this Commission makes sense. I know that we have a habit around this place of appointing commissions and task forces, and they do a lot of work and spend money, and the reports are piled up somewhere and are never acted upon. But I do know that the sponsors of this measure—I have discussed it particularly with the distinguished chairman of the committee, Senator ROTH—do not envision that approach so far as this Commission is concerned.

The Reagan program to reduce the size of the Federal Government is the most significant shift in domestic policy in many decades. But even if the Federal role is scaled back, there is no guarantee that the Government will function with maximum efficiency unless we make a concerted effort to find the best ways to streamline Government operations. That is what the Commission is designed to do, and it is significant that the administration has given this legislation a strong endorsement.

There are reasons to believe that an independent commission is the best way to proceed in this endeavor. Over 2 years ago I proposed a similar Commission to review excessive and inefficient Government regulation and make recommendations for reform. That Commission proposal was made because of the signal success of the two post-war Hoover Commissions that made recommendations for the reform of the bureaucracy. Many of those Hoover Commission recommendations were adopted, and they saved some $8 to $12 billion for the American taxpayer. Given the tremendous increase in the range and complexity of Federal Government operations over the past 30 years, it is high time for another objective review.

SCOPE OF THE TASK

Mr. President, the job of the Commission will not be an easy one. Clearly one of its most important functions will be to critique the way the Federal Government regulates our society, along the lines I suggested in 1979. But the Commission must also be concerned with the way we conduct all of our day-to-day business, from procurement and contracting procedures to the flow of paperwork and the overlapping functions of many divisions of the Federal Government. It will require a distinguished panel indeed to fulfill the mandate we propose for this Commission.

Finally, Mr. President, I would note that some commentators, including columnist James J. Kilpatrick, have suggested a man who would be eminently qualified to head the Commission. That man is Gerald Ford, and he was also my choice to lead the Commission on Government Regulation which I proposed in 1979. I am confident that President Reagan will make a wise choice for the leadership of the Commission, but I would just like to add my support to the suggestion that President Ford be asked to do the job.

There are other qualified Americans, in and out of government, some in each party, who are competent to take a hard, objective look at government. Since they are away from the pressures of special interest groups, they can make recommendations to Congress as to how Congress and the Government can be more efficient.

I hope we will expedite this legislation so that the Commission can begin its work as soon as possible. Governmental efficiency is always a matter of urgency.

Mr. President, I thank the distinguished managers of the bill, the Senator from Delaware and the Senator from Missouri, and others who have played a vital role in this legislation.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I support S. 10 and commend the distinguished Senators from Delaware (Mr. ROTH) and Missouri (Mr. EAGLETON), as well as Senator HATFIELD, for their leadership in this body in connection with this proposal.

I also note that the moving force in the other body for the proposal is the distinguished Representative from Missouri, RICHARD BOLLING, who was my chairman when I served on the Rules Committee and who, unfortunately, has decided not to seek reelection in 1982, after more than three decades of service to this country as a Member of the House of Representatives.

I considered him my mentor in the House. I did not know of another Member of the House of Representatives who was more gifted, more talented, and who had a deeper concern about the organization and structure of Government. He had little time and patience for those who dealt with the pettiness and smallness of problems that would come along.

It has been said about Representative BOLLING that he did not suffer fools lightly. As a personal witness to his congressional activities over 6 years, I can bear witness to that.

He recently coauthored a book, together with a resident of my State of Connecticut, John Bowles. It is entitled "American Competitiveness." The book studies four basic areas which confronted this country from 1945 on. It identifies those four areas as examples of what we need to be doing in the 1980's if we are going to grapple with some of the fundamental problems we face.

The four areas of concern dealt within the book are the Federal Highway Act in the 1950's, the Full Employment Act of the late 1940's, the Marshall Plan, and the Hoover Commission.

These four pieces of legislation—the Federal Highway Act, the Full Employment Act, the Marshall Plan, which involved more than just congressional legislation, and the Hoover Commission—were to demonstrate that you can accomplish a great deal through the development of cooperation, consensus, and coalition building.

It is in that regard that S. 10 becomes a fifth idea, or concept which I think deserves support. It is a rather ambitious declaration of policy.

In reading the enacting clause, the objective of improving the quality of Government and the restoring of public confidence in Government at all levels is going to be difficult to accomplish. Despite the degree of difficulty, it certainly is worthy of our efforts.

I simply wish to point out that last year during the heat of the campaign season if there was any single issue which became the catch-all of all the issues that were raised in the campaign it was the issue of Government.

People were arguing about whether or not the Government was too big, whether or not it should be bigger or should be made smaller.

I think what people are really saying in this country is it is not the issue of bigness or smallness but efficiency, whether or not the Government could actually do that which people expect it to do to meet basic services, to fulfill the constitutional obligation at the Federal level and not complicate the responsibilities at the local and State levels.

S. 10 will at least give us the opportunity to try and deal with the overlapping areas of jurisdiction and the fundamental issue of governance. We must deal with these matters in the first instance before even trying to grapple with the more narrowly defined problems that we

confront every day here in Congress. The people are waiting for answers both from the executive and legislative branches. Unless we confront the issue of governance and provide as clear a delineation as we can have within the various levels of Government, it is going to be virtually impossible for us to respond effectively in the long term to specific issues and problems.

Again, I commend Senator EAGLETON, Senator ROTH, and Senator HATFIELD. And I express the feelings of many as to Congressman DICK BOLLING who has really been such a leader in the areas of government, in the Hoover Commission, in the development of the Marshall plan, the Full Employment Act and the Federal Highway Act. These issues dealt with the broad problems in the country and it is only fitting that in his final days as a Member of Congress he should carry on that tradition and confront us with a matter which will deal in a very broad sense with a fundamental problem we face in this country.

Mr. President, I am delighted to have been a supporter of this piece of legislation, and I yield the floor.

Mr. EAGLETON. Mr. President, I very much appreciate the excellent remarks by our distinguished colleague from Connecticut.

I think in focusing on the work and talents of Congressman RICHARD BOLLING, of Missouri, he is giving the proper emphasis insofar as this bill is concerned. With all due respect to my senatorial colleague, Senator ROTH, I think that the true father of this legislation has from the very beginning been Congressman BOLLING who, as I said in my initial remarks, is perhaps the most renowned expert in governmental form, structure, and function in Congress and the country at large.

I appreciate the kind statement that Senator DODD has made with respect to Congressman BOLLING.

Mr. BAKER. Mr. President, the legislation which we are about to consider appeals to me strongly on several counts, and I should like to take a few minutes to summarize my views on S. 10.

All of us, when listening to people back home talk about this country's problems, too often hear words like inefficient and ineffective and out of touch used in describing the way our Federal Government works. I suspect that when other Senators hear such words, they feel, as I do, a twinge of pain mixed with their sympathetic reaction to their constituent and his or her particular horror story.

All of us here, on both sides of the aisle, have spent too many hours during too many long days trying to grapple with the problems that generate these reactions, to feel comfortable with our fellow citizens' comments. And I know that Senators on both sides of the aisle are as concerned as I am with the public's growing distrust of this country's governmental institutions. Trust in Government is the foundation on which our Federal system is built and any damage to that trust is cause for genuine dismay.

Because so many of the Members of this body feel the urgency of reversing the decline in public confidence, I find considerable satisfaction in supporting a genuinely bipartisan effort to establish a Commission on more effective Government patterned on the Hoover Commissions which operated in the 1940's and 1950's under the Truman and Eisenhower administrations. Both of those bodies made not only genuine contributions to improving the country's governmental processes but to increasing the public's trust in these processes as well.

I find the collegial approach embodied in this legislation equally gratifying. Regardless of which party led the administration, most of us here have seen too many Commissions established by executive branch initiative alone which did fine work but came to little or nothing in the end. I feel strongly that one of the basic reasons for these repeated failures is simply that it is the legislative branch's ultimate responsibility to legislate.

Any effort to improve this country's governmental structure and operation through law which does not take that fact into sufficient account is not going to get very far, and I am proud that this administration recognizes that fact and supports this bill so strongly. I think this support indicates that President Reagan, like Presidents Truman and Eisenhower before him, genuinely recognizes the importance of executive and legislative branch cooperation and is eager to work with us in any way that promises to build a consensus for constructive change. The fact that Members of both Houses of Congress as well as administration officials and private citizens will serve on the Commission insures that the cooperation will be ongoing.

I think that this year we have all experienced frustration with the complexities of our processes in the Senate and the sense that they simply reflect an excessively complex governmental structure. The procedural requirements of our day-to-day schedule seldom permits us to look at so many problems we know need attention in the depth that we would like. This Senator for one is already looking forward to reviewing the recommendations of a group of citizens with the breadth of experience and depth of knowledge called for in the legislation before us.

I think that we of the Congress, of both political persuasions, can join the executive branch in considering the ideas and suggestions of some of the country's best talent on their merit. With that kind of approach, I believe our fellow citizens will join us in wholehearted support of the changes we ultimately decide to adopt. I believe, in short, that S. 10 offers us a mechanism for building a national consensus for the steps we must take to assure the citizens of this country that their Government works.

Finally, I would like to commend my good friends, Senators ROTH and EAGLETON, for their sponsorship of this bill and the example of real bipartisanship which they have set. I might add that this bill also is another illustration of the senior Senator from Delaware's perseverance. He started pushing this legislation back in the late 1960's while he was still in the House. Mr. President, I sincerely hope that other Members will join me in supporting Senators ROTH and EAGLETON and the other cosponsors of this bill in getting the Citizens Commission on More Effective Government underway.

Mr. ROTH. Mr. President, I yield to the distinguished Senator from Michigan (Mr. LEVIN).

UP AMENDMENT NO. 760

(Purpose: To propose committee amendments)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes unprinted amendment No. 760.

Mr. LEVIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 14, strike out "Senate majority leader" and insert "President pro tempore of the Senate upon the recommendations of the Majority and Minority leaders of the Senate."

On page 14, line 2, strike out "Senate majority leader" and insert "President pro tempore of the Senate".

On page 14, line 9, strike out "two" and insert "three".

On page 14, line 15, strike out "other major political party" and insert "political party which is the minority party in the House".

On page 14, line 22, insert after the period the following: "In appointing members under subsection (a)(2) who are from the political party which is the minority party in the House, the Speaker shall obtain the advice and consent of the Minority Leader of the House.".

On page 15, line 1, strike out "other major political party" and insert "political party which is the minority party in the Senate".

On page 15, lines 1 and 2, strike out "majority leader" and insert "President pro tempore".

On page 15, line 15, strike out "appoint" and insert "select".

On page 15, line 17, insert after the period the following: "The selection by the President of the Chairman shall be subject to the approval of a majority vote of the members of the Commission, conducted by secret ballot.".

On page 21, strike out lines 17 through 20 and insert the following: "On December 3, 1984, the Commission shall submit to the Congress and the President its final report with respect to such activities, including all of its findings and recommendations.".

On page 23, line 23, strike out "$16,000,000" and insert "$10,000,000".

Mr. LEVIN. Mr. President, the amendment which I sent to the desk is exactly the same as printed amendment No. 648 with the following added words:

On page 13, line 14, we are inserting the words "upon the recommendation of the majority and minority leaders of the Senate."

That language tracks existing law, and the only reason for adding it is to be very clear that the existing law is also part of this statute. It is a clarification, a change, and I thought it would be better to send it up in the form of a new amendment rather than go through any other process.

So I do ask now that the managers of the bill, after I have concluded speaking, agree that these amendments, because this is really a series of amendments, be treated en bloc as one amendment, and I think that may take unanimous consent.

In any event, first of all, let me commend the Senators from Delaware, Missouri, and others who have been so important in this process and such leading advocates of it. Without their hard work this never would have gotten where it is today, and I believe very strongly that it will lead to major improvements in the way Government operates.

It has been a bipartisan effort on the part of the Senators from Delaware, Missouri, and others, and it is proof of the fact that this kind of effort can yield results.

The basic premise from which I am operating in this amendment is as follows:

If we are going to spend $10 million for a thorough review of the way Government operates we need to make sure that the review is complete and that its results will be as reliable and credible as possible.

There is, of course, no way to guarantee that, but the best way to make it probable that the results will have some real impact is to make sure that the Commission doing the review is as nonpartisan, or at least bipartisan, as possible and independent both in fact and appearance. All of these amendments which I am offering are designed to accomplish that goal.

All of these amendments which I am offering are designed to accomplish that goal of independence in fact and appearance of this new commission which we are wisely creating today.

The first amendment in this package is as follows: It will have the effect of changing the makeup of the Commission so that its membership is evenly divided between Republicans and Democrats. As the bill came to us from the committee, it was almost certain that the Commission would be weighted in favor of one party. Given the results of last November, that party would have been the Republican Party; but I would like to think that I would have offered this amendment even if the results of last November had been different and had resulted in a Democratic advantage on the Commission because it should make no difference either way. We have learned from our past experiences with similar Commissions that a balanced makeup is more likely to result in recommendations which are truly useful to Congress and the country because they have a greater bipartisan and nonpartisan credibility. And that is why I now seek to balance the representation of both political parties on the Commission.

Second, this package of amendments will guarantee that the congressional leadership of each party has an active and determinant voice in the selection of members of the Commission who will represent their political party. Under the terms of this bill, the Speaker of the House and the majority leader of the Senate would each appoint six members of the Commission, four members to be drawn from their own party and two members from the other party. Under this amendment, the minority leader in the Senate and the House would be consulted and need to approve the names of those candidates selected from their party.

Third, these amendments modify the way in which the chairperson of the Commission is appointed. Under the terms of the bill as reported, the Presi- would appoint the chairperson. Based on my experience, I believe that such power vested in the President would make the chairperson accountable to him rather than to his other colleagues on the Commission. It also has the effect of making the leadership of the Commission more partisan than I think it should be. Accordingly, this amendment makes a modest change in the way the chairperson is appointed.

The President, under the terms of the amendment would select a candidate and send his or her name to the Commission. The Commission itself would then be required to give its consent to that nominee. In that sense, the Commission would have a power similar to the advice and consent power of the Senate. It is my belief that such an approach will appropriately balance the prerogatives of the President and the legitimate need of the members of the Commission to have a leadership which is acceptable to them and which will protect their independence. This amendment, then, would add to my efforts to make the Commission's work less political and more useful.

Fourth, and finally, these amendments would modify the date for the final submission of the Commission's report. As the bill was originally drafted, the report would be submitted prior to the 1984 elections. I felt that if the report were submitted prior to the elections, particularly if immediately prior to the elections, it would inevitably be politicized. Accordingly, this amendment shifts the due date back a bit and will result in the report being issued after the 1984 election.

Mr. President, all of these amendments are designed to depoliticize the work of this Commission and make it as independent as possible. I believe that the willingness of the chairman, Mr. ROTH, and the ranking minority member of the committee, Mr. EAGLETON, to work with me in developing these amendments indicates again how to achieve results in a bipartisan manner—and I hope that these efforts will serve as a model for the Commission that we are creating today.

If it is agreeable to the managers then at this point and with thanks to Senator ROTH and Senator EAGLETON I now ask that these amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, if I may add one more word, I ask for a unanimous consent that I be listed as a cosponsor of this bill if I am not already so listed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendments.

Mr. EAGLETON. Mr. President, I would like to say a word or two in support of the package of Levin amendments, and the constructive efforts he put into the formulation of this bill. I think all of these amendments are designed to insure, as best mortal man can, that the work and activities of this Commission will be as bipartisan or nonpartisan as possible. I think each of these amendments that comprises his package strives toward that end and, therefore, I am prepared to support the Levin package.

Mr. ROTH. I, too, am happy to support the amendment proposed by Senator LEVIN. These were worked out, I think, in a bipartisan spirit.

I would say we have the cooperation of the administration as well, so that hopefully this can mark a new spirit of cooperation.

Just for purposes of the record I might point out, Mr. President, that the legislation we had introduced was modeled basically on the legislation introduced last year, so I do not think anyone at any time was trying to be partisan in this matter.

I think we have come up with a resolution of an issue that strengthens the Commission and does indeed help to insure the bipartisan spirit in the future.

Mr. LEVIN. Mr. President, I would just like to indeed confirm what the Senator from Delaware has mentioned, that this bill was introduced last year when the President was of a different party, and there was clearly no effort on anybody's part to make this a partisan issue, to gain partisan advantage.

It just happens that it came up this year, and it just happens that some of us caught that problem this year. Again I would like to think that had this come to the floor last year we would be taking the same position.

I certainly want to again thank my friend from Delaware for saying what he has said about these amendments and clarifying that point.

The PRESIDING OFFICER (Mr. WALLOP). The question is on agreeing to the amendment of the Senator from Michigan.

The amendment (UP No. 760) was agreed to.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROTH. Mr. President, if I might, I would just like to, before I call for third reading, make a brief closing statement.

First of all, I express my personal appreciation to the distinguished ranking member of the Senate Committee on Governmental Affairs for his leadership, and his cooperation in trying to develop

a bipartisan approach in those areas where there was an issue.

I should also like to express my personal appreciation to the majority staff and the minority staff for the work they did in bringing this legislation to what I hope is a successful conclusion.

It is a matter of great personal satisfaction to me that this matter has come before the Senate for a vote today. I might say it was something like 13 years ago that I first called for a Hoover Commission based on some work I did as a Congressman in developing what became known as the Roth catalog. At that time, 13 years ago, I called for the enactment of the Commission. I might say that I asked that it be headed up by two distinguished elder statesmen who, at that time, were Presidents Truman and Eisenhower.

We have many elder statesmen today, including President Ford and President Carter and, as I say, it would seem very helpful to me if we had a well-known national figure to head up this Commission at this time.

I, too, want to pay my respects to the distinguished Congressman from Missouri, DICK BOLLING, who has been such a strong leader on the House side for this legislation and to whom we are all indebted for his innovative, creative thinking.

I would like to point out that in our hearings on the Senate side a number of people have emphasized the importance of this legislation, including Congressman BOLLING and Mrs. Margaret Hance, the mayor of Phoenix, Ariz., who appeared before our committee on behalf of the National League of Cities.

Both of these distinguished leaders said they knew of no piece of legislation currently before the Congress of greater importance than this S. 10 legislation.

I must say that this testifies to my own thinking as to the importance of this legislation, and I am indeed grateful to all those who have been sponsoring it.

Mr. President, I call for the third reading of the bill.

The PRESIDING OFFICER. If the Senator will withhold, there is a committee amendment which must be agreed to.

Mr. ROTH. That is the amendment we just adopted. That was the committee amendment.

The PRESIDING OFFICER. There is a committee substitute, I understand.

The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The PRESIDING OFFICER. If there be no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. Under the previous order, the yeas and nays have been ordered, and the vote put off until 4:15 p.m.

Upon the disposition of that matter the agreement this morning was to turn to the consideration of Senate Resolution 238.

Mr. ROTH. Mr. President, may I ask a parliamentary inquiry?

The PRESIDING OFFICER. The Senator will state it.

Mr. ROTH. We had a substitute. Does the Levin amendment apply to that substitute?

The PRESIDING OFFICER. It does.

Mr. ROTH. I thank the Chair.

Mr. NUNN. Mr. President, I am pleased to join my colleagues, Senator ROTH and Senator EAGLETON, as a cosponsor of this legislation establishing a Commission on More Effective Government. Modeled after the first Hoover Commission which was established in 1947 to study the operation of the Federal executive branch, I believe that this new study Commission possesses a similar potential for making a significant contribution to our Nation's public understanding of government and the quality of its performance

The legislation which we consider today creates a distinguished panel of American citizens mandated with the responsibility of examining the performance of our Nation's public institutions. The Commission's study will focus on the management, organization, and operation of the Federal Government and its relationship with Congress and the judiciary, with State and local governments, and with the public sector. From this study, specific recommendations for changes in Federal laws, regulations, and administrative practices will be made in the Commission's final report to be delivered in December 1984.

In the 26-year period since the completion of the second Hoover Commission's work, government growth at all levels has been explosive. Of equal significance is the direction of this growth as governmental activity has expanded in a host of social and economic policy areas previously untouched by Federal involvement. Federal Government activity in areas which have traditionally been the responsibility of State or local government units has created sweeping changes in our Nation's intergovernmental system.

We are now in the process of redefining American federalism. As Congress works to remake the budget of the National Government, significant responsibilities will be returned to the States, the cities, the counties, and towns of America. This sorting out of responsibilities will have a significant impact on the programs of State and local government and it is essential that both the public and private sector understand the capacity and machinery of each level of government to respond to the needs of our society.

The Commission on More Effective Government will be able to spotlight the evolutionary relationships in our intergovernmental system and between government and the private sector by examining cross-cutting public policy questions such as the management procedures and budgetary and accounting practices involved in the implementation of national policy. In their review of the accountability, responsibility, and effectiveness of the management and operation of the Federal executive branch, the Commission will be able to develop recommendations which can reduce government cost while improving its performance.

Mr. President, the recommendations of this Commission will not languish on some back shelf of the bureaucracy. The Office of Management and Budget is designated as the primary agent for the implementation of the Commission's recommendations, and GAO is charged with monitoring the implementation process. The 68 percent of the previous two Hoover Commission's combined recommendations which were implemented are widely credited with reducing Government costs and generally improving its operation, and I am confident that the recommendations from the Commission on More Effective Government will provide a similar opportunity.

Mr. President, the magnitude of this Commission's mandate challenges the best talents in both the public and private sector. I believe that its work can provide a blueprint for Federal Government action for the remainder of this century, and I strongly urge the adoption of this establishing legislation by the Senate.

● Mr. KENNEDY. Mr. President, I am pleased to support S. 10, to create a Commission on More Effective Government. This bill establishes an 18-member Commission to examine the management, organization, and operation of the executive branch of the Federal Government, and its relationships with the other branches of government, with State and local governments, and the private sector. The recommendations of the Commission will form the basis for administrative and legislative initiatives to make government more responsive to the present and future needs of our citizens.

I agree with the sponsors of the bill that a bipartisan, independent study commission jointly sponsored by Congress and the President and comprised of highly qualified persons from both inside and outside government can make a significant contribution to the review and reform of government. The value of such a commission has been demonstrated by the success of the two Hoover Commissions, which are the models for the Commission on More Effective Government. The first Hoover Commission, on which my father served with distinction, made 273 recommendations for government reform, of which 70 percent were implemented, for a total estimated savings of $7 billion. The efforts of the second Hoover Commission resulted in estimated savings of $3 billion annually.

The time is ripe for the thorough, comprehensive examination of government processes contemplated by this bill. As a cosponsor of regulatory reform legislation in this and past Congresses, I have advocated an agency by agency, program examination of our regulatory policies to insure that they meet important public objectives in the most cost-effective manner. I look forward to cooperating with the Commission for More Effective Government in the discharge of its important mission.●

Mr. LEVIN. Mr. President, I ask unanimous consent that Senator PRYOR be added as a cosponsor to a series of amendments to S. 10 that I offered this afternoon, which were adopted.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEDUCTIBILITY OF RESIDENTIAL MORTGAGE INTEREST

The PRESIDING OFFICER. Under the previous order, the clerk will now report Senate Resolution 238 by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 238) to retain the deductibility from personal taxes of interest paid on residential mortgages.

The Senate proceeded to consider the resolution.

Mr. EAGLETON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Parliamentary inquiry, Mr. President. What is the pending business?

The PRESIDING OFFICER. The pending business is Senate Resolution 238.

Mr. DOLE. Mr. President, I would say at the outset that this is a resolution sponsored by the distinguished Senator from Texas (Mr. BENTSEN). He is prepared to speak on the resolution. After he speaks, I have a short statement.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Mr. President, I thank the distinguished Senator, the chairman of the Finance Committee.

I ask unanimous consent that Mr. PRESSLER, Mr. BAUCUS, Mr. ROTH, and Mr. D'AMATO be added as cosponsors to Senate Resolution 238.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, my resolution is a straightforward one declaring that it is the intent of Congress to maintain the current deductibility of mortgage interest payments for individual income tax purposes. The amendment is based on my Senate Resolution 238 introduced on November 3 and cosponsored now by 35 of my colleagues.

The intent of this resolution is clear: To signal homeowners and our most depressed industry that housing and homeownership remain a national priority—that Congress will not permit an erosion of the principle long established in Federal law that the deductibility of interest payments on residential mortgages is a necessary component of a tax system designed in part to promote a stable society.

Congress becomes so engrossed in the day-to-day budget and tax decisions that we sometimes fail to see the forest for the trees. We face staggering Federal deficits and a major effort must be made in the months ahead to slash that deficit in order to free up savings for productive investment by the private sector.

Yet, I for one refuse to see that done on the backs of American homeowners or our most depressed industry. That would be rubbing salt in an open wound. Worse, it would be turning our backs in midstream—just when the going gets tough—on the tens of millions of Americans who have invested in homes as the safest and surest way to save.

Congress after Congress has reaffirmed that our tax system is designed to do more than raise revenues. Thirty-four Congresses have acknowledged that it can and must be used to influence the decisions of our citizens for the common good. And, to my mind, promoting homeownership and the stabilizing influence it has on local communities—the participation it promotes in Government and community affairs, for example—provides benefits to our Nation which far outweigh any revenue loss.

It is a sad commentary on the state of our financial affairs that I must stand here and defend the deductibility of mortgage interest. Yet, ominous rumblings from the Treasury Department cannot be ignored as officials there cast around for quick fixes to our deficit problem. Repeatedly, Treasury officials have hinted that a $5,000 or $10,000 limit on mortgage interest deductibility is warranted. Once they established such a cap it would be relatively easy to continue to lower in stages until it was finally eliminated.

Those rumblings have created further instability in the housing industry and virtually dried up interest in the purchase of new housing at a time when the baby boom is entering its peak years of family formation. We must put a stop now to the rumors spreading throughout America that Congress intends to punish homeowners who reacted to a congressional decision made in 1913 that decent and affordable housing should be a national priority.

GREATER INVESTMENT NEEDED IN HOUSING

The "interest rate depression" in housing is moving our Nation further away than ever from that goal. In recent years, it has become trendy to downplay that goal—to argue, for example, that investment in manufacturing is more important than housing. I will be the first to acknowledge the dismal pace of domestic capital formation. Business investment is far too low for a variety of reasons. It must be increased if we are to halt our productivity slide and the stagflation which accompanies it. But, it should be increased by getting the Federal Government out of credit markets, not by driving another nail in the housing industry's coffin.

It is a mistake to argue that our pace of housing investment is too high, that it needs trimming. The facts show the reverse. Our Nation's rate and level of investment in housing lags well behind most other Western nations. We invest too small a share of our national income in housing. For example, residential mortgages in the 1970's claimed a smaller share of the Nation's credit than in the 1950's or 1960's.

Internationally, residential investment is lower in the United States than in virtually all other major industrial countries. In the 1970's, for example, residential investment as a percentage of GNP was lower here than all other Western industrialized countries except one—Great Britain. The averages for the 1970's in the major Western nations were:

United States—4.44 percent of GNP.
Canada—5.57 percent.
Great Britain—3.53 percent.
Germany—6.39 percent.
Japan—7.24 percent.
France—7.03 percent.

With those facts in hand, arguments for easing our Nation's commitment to housing rings hollow. We should be restoring the Nation's housing investment at least to levels achieved in the 1950's and 1960's, when the level of family formations was below today's level.

THE HOUSING DEPRESSION GROWS DEEPER

Housing starts is the broadest indicator of economic health in housing. With mortgage costs still hovering at 17 percent and more, housing starts at an annual rate tumbled over 30 percent between April and August to a bare 934,000 units. That was the third lowest annual rate of housing construction since World War II and the lowest rate in 5 years.

In October, the depression grew even deeper. Annualized housing starts collapsed still further to the scant rate of 857,000 units, the lowest level in 6½ years. New house sales in September were down over 55 percent from their 1978 peak, while used housing sales were down over 30 percent from that same peak. The construction of new single-family homes in September—perhaps the bellweather of our Nation's ability to meet the demand for housing by young families—was the lowest ever recorded. The housing industry is falling to pieces.

Chairman Paul Volcker of the Federal Reserve System held out no promise of an improvement in his address to the realtors this past weekend. As a result, the housing industry faces a bleak future of month after month where starts will stagnate below 900,000 units. For 1981, total housing starts will almost assuredly rest below the 1.16 million units recorded in the 1975 depression.

As I noted, Mr. President, only 857,000 housing construction permits were issued in August. That key leading indicator of future housing activity is off a full 36 percent since 1980. In September, that leading indicator slumped further to 844,000 units, a sharp 44 percent lower than in 1980. There is simply no light on the horizon for our vital housing industry.

New families have seen affordable housing all but disappear as soaring mortgage costs send monthly payments through the roof. Only 1 new family in 20 can now afford to purchase the average priced new home. Even if they could find a 17-percent mortgage, these families would have to pay $713 in principal and interest monthly on a $50,000 mortgage or almost $300 more than that same mortgage would cost at a 10-percent rate. To carry that $50,000 mortgage, a young couple earning the average family income would have to fork over 85 percent of

their take-home pay to the mortgage holder.

Unemployment in the construction industry is twice the national average. In reality, it is even higher because tens of thousands of carpenters, electricians, and other workers have simply given up looking for work—they are no longer even counted among the unemployed.

The impact of the housing depression on builders, realtors, and others is staggering. Thousands of entrepreneurs with a lifetime of experience, who weathered the 1973–74 housing recession are facing bankruptcy or have already gone under. Other industries dependent on the housing market have been cut down, as well, by the depression.

The depression has spread like a chainsaw through the timber industry, for example, with pink slips and red ink flying everywhere. The numbers are staggering. In mid-September, 32,000 of the 102,000 sawmill employees in the western timber industry were out of work. By the end of September, the number laid off had climbed to an unbelievable 49,200. Timber industry bankruptcies and near bankruptcies are at record levels, and there is no sign of relief ahead.

The thrift industry serving housing is in even worse shape. Fully two-thirds of our S. & L.'s are in trouble and one of the largest financial institution bankruptcies in our history was only narrowly averted last week when the FDIC absorbed a $280 million loss in assisting Metropolitan Savings take over the ailing Greenwich Savings Bank.

I could continue with this modern American horror story. But, the point is clear; housing is our most depressed industry and Congress should be peering into every nook and cranny for ways to get it back on its feet, not conjuring up schemes to nail its coffin shut.

Mr. President, I defer to the distinguished chairman of the Finance Committee.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I wish to commend the distinguished Senator from Texas for his continuing interest in this problem and the housing problem generally. Mr. President, I support Senate Resolution 238 which would express the sense of the Senate that the present home mortgage interest deduction be retained. This resolution was unanimously reported out of the Finance Committee last Wednesday. I do not know of a single member of the Finance Committee who has advocated any cutback of the home mortgage interest reduction.

As has been pointed out in greater detail by the Senator from Texas, the homebuilding industry is in an extremely depressed state. It was recently announced that new housing starts had fallen to 857,000 units in October, the lowest level since October 1966. That housing start level is 43.6 percent lower than the level a year ago. Repeal of the home mortgage interest deduction would have a devastating impact on an already devastated industry. For this reason, I can see some value in reassuring both the housing industry, and the millions of Americans who look forward to homeownership, that the Senate has no intention of advancing legislation to repeal the home mortgage interest deduction.

I expect that this resolution will pass the Senate without opposition. This illustrates the difficulty inherent in any proposal to put an arbitrary limit on so-called tax expenditures. The Congressional Budget Office classifies the home mortgage interest deduction as a "tax expenditure" and estimates that it involves a revenue loss of nearly $25.3 billion in fiscal year 1982 and that figure will grow to about $56.5 billion by 1986.

The revenue loss from this one tax expenditure represents about 10 percent of total tax expenditures for fiscal year 1982 and about 12 percent of the total expenditures for fiscal year 1986. Thus, by adopting this one resolution we are saying that any restrictions on tax expenditures will have to come from the other 90 percent of what CBO classifies as tax expenditures.

Earlier this year the Senate adopted a resolution that we did not intend to tax social security benefits. This action eliminated about $13.8 billion of tax expenditures from consideration in fiscal year 1982, or about 5 percent of the total expenditures for that year. Thus, that leaves only about 85 percent to cut. And very recently the Senate passed a resolution that the Senate does not intend to eliminate any energy tax credits from the law. Thus, it is easier to talk about tax expenditure control than to accomplish it.

I suggest that because I support this resolution. I am not sure that I agree with the Congressional Budget Office or our own Budget Committee, who are looking around for ways to cap the so-called tax expenditures. I would be interested to see how members of the Budget Committee vote on this resolution today.

I thank my distinguished colleague for bringing this matter to our attention.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I ask that when the vote is taken on this resolution, it be a rollcall vote.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. That vote will follow immediately after the vote on S. 10.

OPPOSING ELIMINATION OF HOME MORTGAGE DEDUCTIBILITY

Mr. HEFLIN. Mr. President, I rise today to speak out in favor of Senate Resolution 238, the resolution sponsored by my friend and colleague from Texas (Mr. BENTSEN), expressing the sense of the Senate that no changes shall be made in current tax laws concerning the deductibility of home mortgage interest payments. I commend the Senator from Texas for his foresight and leadership in this matter and I am pleased to be a prime cosponsor of this important measure.

Mr. President, I am strongly and unalterably opposed to any change in the current tax laws on interest deductibility for home mortgages. Any such proposal would have a devastating effect on the housing industry and on millions of Americans who dream of one day owning their own homes.

This ill-conceived and dangerous proposal is making its presence known by rather ominous rumblings within the walls of this Chamber and from within the White House.

With mortgage interest rates at 17 percent and rising, fewer than 5 percent of the potential homebuying market in this country can afford to purchase a home today. This is threatening the average citizen's chances of ever fulfilling the American dream—especially those millions of young people who are just entering the work force and are beginning their families.

Throughout our history owning one's own home—a decent place to live and raise a family—has been a cherished part of the American dream. Tragically, for millions of young people in this country today, that dream of homeownership has turned into a nightmare.

Mr. President, the extremely wealthy will always be able to purchase their own homes. Any proposal to eliminate the tax deductibility of home mortgage interest payments will severely punish the average middle-income American who needs the tax break owning a home offers to be able to afford to purchase his or her own house.

Mortgage interest deductibility is the only real tax break available to the average middle-income American. This proposal would have a devastating effect on the average American citizen who has scrimped and saved to come up with a down payment and who is not struggling to meet monthly payments swollen by inflation and high interest rates.

If the tax break for homeownership was eliminated, millions of Americans now purchasing homes would not be able to survive financially and those who want to buy a home would never be able to fulfill their dreams.

Mr. President, we are in the midst of the deepest and most prolonged housing slump since the 1940's. Unemployment among construction workers and others involved in homebuilding is now at 17 percent—twice the national unemployment average. Any proposal that would eliminate this crucial tax deduction would deal a death blow to the important housing industry.

The tax break for homeownership is an integral part of our Federal tax policy—and represents a longstanding national commitment to homeownership for nearly 70 years. This is a commitment to the average middle-income American that we simply cannot afford to risk.

Mr. President, I strongly support Sen-

ate Resolution 238 and I urge my colleagues to adopt this important resolution.

Thank you, Mr. President.

Mr. SASSER. Mr. President, I want to add my strongest possible support to the resolution offered by Senator BENTSEN concerning the deductibility of mortgage interest. As an original cosponsor of his resolution, Senate Resolution 238, I am absolutely committed to this effort. Home mortgage interest is the wrong place to look for what we are calling "revenue enhancements." I am a member of the Budget Committee, and I am acutely aware of the need to close tax loopholes in order to reduce the deficit. But to cancel out the last hope that most homebuyers—and many current homeowners—have to buy or keep their homes is a misbegotten, destructive idea.

I think we need to look at this situation from the viewpoint of the housing industry, the concept of private property, and the good of the individual American family.

A quick look at the statistics in the housing industry shows how damaging high interest rates have been. Measured in monthly transactions of single-family homes, the trend is dismally clear. In 1979, which was an average year, monthly real estate transactions occurred at a rate of 400,000 per month. In 1980, the first year of the current high interest rate policies, the rate dropped to 310,000 per month. The estimate for 1981 has fallen to 265,000 per month; and the projection for 1982 is 165,000 per month; thus, by the end of 1982 there will be more than 4 million families ready to enter the market, a surge in demand that could send the inflationary spiral back through the roof, so to speak. If we allow taxation on mortgage interest, this pentup housing demand will simply wreck our housing industry.

And I might add that unemployment in residential construction has hit 18 percent, more than double the national average for all industries. The drain on the budget from unemployment is well known: For every increase of 1 percent in the national unemployment rate, there is a cost to the Treasury of some $30 billion. And if the key housing-cycle industries continue to inflate overall unemployment statistics, we will never be able to bring the deficit under control.

Another key aspect of this debate involves the concept of private property. Mortgage interest has been exempt from taxation since the beginning of Federal taxes in this country. That policy is a reflection of our national commitment to individual homeownership. That is why homeownership is frequently referred to as the American dream. But a dangerous trend has already begun where only the very wealthy can afford their own homes. This trend which would only be accelerated if we permit mortgage interest to be taxed.

Finally, and at the heart of the whole debate, is the individual American family. Many young people just starting out have spent a tremendous amount of effort to get a downpayment together—to save enough by doing without a lot of comforts in order to hang onto their homes. Middle-income families who have older children, with all the expenses of food, clothing, and education that this involves, are barely able in many cases to meet monthly payments.

The rise in interest rates has created a whole new world of complicated financing mechanisms for these and other homebuyers, and most of these plans require a substantial amount of fiscal risk and not a little financial brinkmanship.

For example, a family with a combined income of between $35,000 and $45,000, paying the average 17 percent on a mortgage of $75,000—and that is low in most of today's markets—would pay an additional $456 per month in taxes if they could not deduct mortgage interest. Taking even the lowest-income group in the homeowning public, the lowest possible interest rate, 15 percent, with an unimaginably low mortgage of $50,000, it still comes to an extra $156 per month in Federal taxes if mortgage interest is not tax-exempt.

To throw an additional tax burden on these people is out of the question. They do not have the money. A great many would lose their homes, and far more would lose hope of ever buying one. Is that what we want to be doing with our Tax Code? I think not.

Mr. President, I am going to continue to support every constructive means available to reduce unnecessary strains on our economy. That has meant voting for some very painful budget cuts in recent months, but I have felt they were necessary for the overall health of the economy. We have to reduce the deficit where possible. But we will be sowing the seeds of a massive housing crisis if we attempt to balance the budget on the backs of American homeowners.

I want to commend my friend and colleague from Texas (Mr. BENTSEN) for his outstanding leadership in this area. I am fully behind him in this vital effort, and I urge my colleagues to do the same.

SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 881, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 881) to amend the Small Business Act to strengthen the role of the small, innovative firms in federally-funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy.

The Senate proceeded to consider the bill which had been reported from the Committee on Small Business with an amendment to strike out all after the enacting clause, and insert the following:

SECTION 1. This Act may be cited as the "Small Business Innovation Research Act of 1981".

SEC. 2. (a) The Congress finds that—

(1) technological innovation creates jobs, increases productivity, competition, and economic growth, and is a valuable counterforce to inflation and the United States balance-of-payments deficit; and

(2) while small business is the principal source of significant innovations in the Nation, the vast majority of federally funded research and development is conducted by large businesses, universities, and Government laboratories.

(b) The purposes of this Act are to—

(1) stimulate technological innovation;

(2) increase the use of small businesses to meet Federal research and development needs; and

(3) increase private sector commercialization of innovations derived from Federal research and development.

SEC. 3. Section 9 of the Small Business Act (15 U.S.C. 638) is amended—

(1) by redesignating subsections (c) and (d) as (g) and (h), respectively; and

(2) by striking out subsection (b) and inserting in lieu thereof the following:

"(b) It shall be the duty of the Administration, and it is hereby empowered—

"(1) to assist small business concerns to obtain Government contracts for research and development;

"(2) to assist small business concerns to obtain the benefits of research and development performed by Government contracts or at Government expense;

"(3) to provide technical assistance to small business concerns to accomplish the purposes of this section;

"(4) to develop and maintain an information program and source file, including utilizing a procurement automated source system, to provide small business concerns with information about, and the opportunity to participate in Small Business Innovation Research programs and to share the information with Government agencies participating in Small Business Innovation Research programs;

"(5) to coordinate with agencies required to establish an SBIR program on the release of their SBIR solicitations and to compile and make publicly available a release schedule of all forthcoming agency SBIR solicitations so as to maximize small business opportunities to respond to such solicitations; and

"(6) to independently review agencies' annual reports on SBIR program implementation and report not less than annually to the Committees on Small Business of the Senate and the House of Representatives on its review of agencies' reports and actions taken to implement the provisions of the Small Business Innovation Research Act of 1981, together with such recommendations as the Administration may deem appropriate.

"(c)(1) Each Federal agency which had total obligations for research or research and development in excess of $100,000,000 in fiscal year 1980 or any fiscal year thereafter based upon the most recent actual Federal obligations for total research and development, as determined by the National Science Foundation's Federal Funds for Research and Development Series, shall—

"(A) unilaterally establish a percentage goal for funding agreements in excess of $10,000 for research or research and development with small business concerns for the next fiscal year. The goal established for each fiscal year shall not be less than the percentage of the agency's research or research and development budget for the preceding fiscal year which was expended under funding agreements with small business concerns in such fiscal year. Obligations incurred pursuant to an SBIR program as provided for in subparagraph (B) shall not be counted as meeting any portion of the goals established pursuant to this subparagraph;

"(B) establish an SBIR program in accordance with subsection (d) if 1 per centum of the amount available for obligation by the agency for research or research and development for the fiscal year in question, after

application of the formula contained in paragraph (2), equals or exceeds $3,000,000; and

"(C) report annually to the Director of the Office of Science and Technology Policy and to the Administration on actions taken to implement the provisions of subparagraphs (A) and (B), the individual number of research and research and development grants, contracts, and cooperative agreements in excess of $10,000, the total dollar value of all such awards, an identification of SBIR awards, and a comparison of the number and total amount of all such awards with awards for research or research and development to other than small business concerns.

"(2) For the purpose of paragraph (1)(B), the amount available for obligation for research or research and development shall be arrived at by multiplying the total amount available for obligation for research or research and development in the year for which the amount to be made available is being determined by a percentage obtained by dividing the actual expenditures by the agency for research or research and development conducted by non-profit and for-profit entities outside the Federal Government or conducted in or funded through Government-owned, contractor-operated facilities for the most recent fiscal year for which data are available by the total expenditures for research or research and development for such fiscal year.

"(d) Each Federal agency required to establish an SBIR program pursuant to subsection (c)(1)(B) shall—

"(1) make available for such program and for no other purpose—

"(A) not less than 20 per centum of the amount determined pursuant to subsection (c)(1)(B) in the first year of its SBIR program;

"(B) not less than 60 per centum of the amount determined pursuant to subsection (c)(1)(B) in the second fiscal year of its SBIR program; and

"(C) not less than the amount determined pursuant to subsection (c)(1)(B) in the third and each subsequent fiscal year of its SBIR program, except that notwithstanding subparagraphs (A) and (B), any Federal agency which is required to establish an SBIR program pursuant to subsection (c)(1)(B) and which had total obligations for research or research and development of $2,000,000,000 or less in the preceding fiscal year shall make available for such SBIR program and for no other purpose not less than the amount determined pursuant to subsection (c)(1)(B) in the first and every subsequent fiscal year of its SBIR program;

"(2) determine appropriate topics to be included in its SBIR program solicitations;

"(3) issue and make publicly available its SBIR program solicitations in accordance with a schedule coordinated with the Administration and other agencies required to establish an SBIR program so as to maximize small business opportunities to participate in the Small Business Innovation Research programs;

"(4) receive and evaluate proposals resulting from SBIR solicitations;

"(5) select recipients of its SBIR funding agreements;

"(6) make payments to recipients of SBIR funding agreements on the basis of progress toward, or completion of, funding agreement requirements; and

"(7) after consultation with the Office of Federal Procurement Policy, by rule establish uniform procedures which fully implement the policy directives issued pursuant to subsection (e).

Any funding agreements with small business concerns for research or research and development which result from selections other than pursuant to an SBIR solicitation shall not be counted as meeting any portion of the requirements of paragraph (1).

"(e) The Administrator of the Office of Federal Procurement Policy, after consultation with the Director of the Office of Science and Technology Policy, the Intergovernmental Affairs Division of the Office of Management and Budget, and the Administration, within one hundred and twenty days after the date of enactment of the Small Business Innovation Research Act of 1981, shall issue policy directives for the general conduct of SBIR programs within the Federal Government. Such directives shall provide for—

"(1) a uniform agency SBIR solicitation format;

"(2) receipt and review of proposals;

"(3) a funding process which includes—

"(A) outside peer review as appropriate;

"(B) protection of small business interests regarding data generated in the performance of funding agreements;

"(C) transfer of title to property provided by the agency to the small business concern where such transfer would be more cost efficient than recovery of the property by the agency;

"(D) cost principles; and

"(E) payments to recipients of SBIR funding agreements on the basis of progress toward or completion of the funding agreement requirements;

"(4) a format for establishing goals for funding agreements in excess of $10,000 for research or research and development with small business concerns;

"(5) a format for agency annual reports; and

"(6) timely submission of agency annual reports to the Director of the Office of Science and Technology Policy to the Administration.

In developing the policy directives, the Administrator of the Office of Federal Procurement Policy shall, to the maximum extent possible, seek conformity with the Federal Grants and Cooperative Agreements Act of 1977, and the formation of a single, simplified, uniform procurement regulation pursuant to the Office of Federal Procurement Policy Act and Public Law 95-507.

"(f) The Director of the Office of Science and Technology Policy, in consultation with the Federal Coordinating Council for Science, Engineering and Research, shall, in addition to such other responsibilities imposed upon him by the Small Business Innovation Research Act of 1981—

"(1) independently survey and monitor all phases of the implementation and operation of SBIR programs within agencies required to establish an SBIR program, including compliance with the expenditure of funds according to the requirements of subsection (d); and

"(2) report not less than annually, and at such other times as the Director may deem appropriate, to the Committees on Small Business of the Senate and House of Representatives on all phases of the implementation and operation of SBIR programs within agencies required to establish an SBIR program, together with such recommendations as the Director may deem appropriate.".

SEC. 4. Section 3 of the Small Business Act is amended by adding at the end thereof the following:

"(j) For the purpose of this section—

"(1) the term 'Federal agency' means an executive agency as defined in section 105 of title 5, United States Code, or military department as defined in section 102 of such title;

"(2) the term 'funding agreement' means a contract, grant, or coopertaive agreement entered into between a Federal agency and a small business concern for the performance of experimental, developmental, or research work funded in whole or in part by the Federal Government;

"(3) the term 'Small Business Innovation Research Program' or 'SBIR' means a program under which a portion of a Federal agency's research or research and development effort is reserved for award to small business concerns through a uniform process having—

"(A) a first phase for determining, insofar as possible, the scientific and technical merit and feasibility of ideas submitted pursuant to SBIR program solicitations;

"(B) a second phase to further develop the proposed idea to meet the particular program needs, the awarding of which shall take into consideration the scientific and technical merit and feasibility evidenced by the first phase and, where two or more proposals are evaluated as being of approximately equal scientific and technical merit and feasibility, special consideration shall be given to those proposals that have demonstrated third phase, non-Federal capital commitments; and

"(C) where appropriate, a third phase where non-Federal capital pursues commercial applications of the research or research and development and which may also involve follow-on production contracts with a Federal agency for products or processes intended for use by the United States Government, except that nothing in this subparagraph shall be deemed to restrict, or otherwise limit, competition for such follow-on contracts; and

"(4) the term 'research' or 'research and development' means any activity which is—

"(A) a systematic, intensive study directed toward greater knowledge or understanding of the subject studied;

"(B) a systematic study directed specifically toward applying new knowledge to meet a recognized need; or

"(C) a systematic application of knowledge toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements.".

SEC. 5. The amendments made by this Act do not authorize the appropriation of funds.

Mr. RUDMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is S. 881.

Mr. WEICKER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There is a time limit on this bill. How much time does the Senator yield?

Mr. WEICKER. I request the Chair to state what that limit is.

The PRESIDING OFFICER. The Senator has 1 hour on the bill. In addition, there are specific orders for amendments: 1 hour on an amendment by Mr. CHILES; 1 hour each on two amendments by Senator ROBERT C. BYRD. In addition, there is 1 hour on any other amendment in the first degree and a half hour on amendments in the second degree.

Mr. WEICKER. I thank the Chair. I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator may proceed.

Mr. WEICKER. Mr. President, as chairman of the Senate Small Business Committee, I take this opportunity to commend my very able colleague, Senator Rudman, for his skillful handling of S. 881, the Small Business Innovation Research Act of 1981.

Senator Rudman and I introduced this legislation on April 7 of this year. Since that time, the Small Business Committee has held 5 days of hearings, redrafted the bill, and favorably reported it to the Senate by a vote of 16 to 0. The legislation now has 85 cosponsors.

It would not be on the floor today were it not for the perseverance of my good friend and colleague, Senator RUDMAN, and were it not for the expertise he brought to the language of the bill. All in all, when this bill is passed by both Houses and signed by the President, as I have no doubt will happen, full credit should go to WARREN RUDMAN, the Senator from New Hampshire.

This bill, which was referred to in the Washington Star as "one of the most ingenious bills of the 97th Congress," is long overdue. Studies have shown again and again that small businesses are our Nation's most efficient and fertile source of innovations. Small innovative firms also have been shown to have a faster growth rate, to create jobs more rapidly, and to contribute substantially more to the U.S. economy in terms of taxes paid and export sales.

A 1977 study by the Office of Management and Budget found that from 1953 to 1973 almost half of all major U.S. innovations came from firms with less than 1,000 employees. Similarly, a National Science Foundation survey found that small firms produced 24 times as many innovations per R. & D. dollar as large firms and 4 times as many as medium-sized firms.

Yet despite these economic benefits, small firms receive only 3.5 to 4 percent of the Federal R. & D. dollar. The vast majority of Federal research money goes to a few large firms. This despite all the evidence showing that small businesses perform R. & D. more effectively and cheaply. This underutilization of small businesses in Federal research is shameful.

It is time this Nation paid more attention to its own studies. We all know that the slowdown in innovation in this country is dulling our competitive edge in the world market. Since small businesses are best at developing new technologies, we had better start using them.

S. 881, the Small Business Innovation Research Act, will help us to begin. Under this Act, certain Federal agencies will be required to establish a small business innovation research (SBIR) program modeled after that of the highly successful National Science Foundation.

These programs will be funded by agencies setting aside, after the third of the program, 1 percent of their research and development budgets for this purpose. In-house research is exempt from the budget base up on which this 1 percent is drawn. The legislation encourages agencies to spend this 1 percent in addition to the R. & D. money they now give to small businesses.

Small firms will be invited, by the issuance of program solicitations, to submit research proposals to an agency concerning topics selected by each qualifying agency in accordance with its own R. & D. objectives. Proposals that show the most merit and feasibility will be funded in the range of $30,000 to $50,000 for the initial development.

Second-tier financing ranging from $100,000 to $500,000 may be provided for further research on phase 1 proposals that appear the most promising.

In determining who will receive phase II funding, agencies will give special consideration to those proposals that have attracted private sector funding commitments to pursue commercial applications of the research. This special consideration serves as a built-in incentive for participants in the program to seek ways to build upon the Federal research, thus fulfilling one of the bill's primary objectives.

The potential benefits of using small innovative businesses in this way are many. The Federal Government will have its R. & D. objectives met. Private investors will be served by the opportunity to invest in the resulting technologies. Manufacturers will receive follow-on government contracts. Consumers will enjoy the benefits of new products. And most importantly, the increase in new technologies will stimulate our Nation's sagging productivity.

Small businesses have proven their ability to innovate. It therefore makes infinite good sense to increase their participation in Federal research programs. It is good business to use the most effective resource to achieve results, and it is time the Federal Government started acting more like a business and use its limited R. & D. funds in a way that guarantees the maximum benefits.

The Small Business Innovation Research Act provides such a way.

We have been hearing a lot these days about the alleged benefits of trickle down.

It is time we recognized that benefits can also percolate up.

Mr. President, how much time does the Senator from New Hampshire desire?

Mr. RUDMAN. Fifteen minutes.

Mr. WEICKER. I am delighted to yield 15 minutes to the Senator from New Hampshire.

Mr. RUDMAN. Mr. President, for a new Member of this body, the intricacies and difficulties of steering legislation from conception through hearings through reporting to the floor and, finally, being on the floor of the Senate, is no easy task. I have been very fortunate to serve on the Small Business Committee, chaired by my good friend the Senator from Connecticut, Senator WEICKER has given us guidance and counsel and has helped mightily in steering this bill to where it now comes before the U.S. Senate for consideration. I am in his deep debt and thank him publicly for that help.

Mr. President, it is my honor today to speak on behalf of the 86 cosponsors of S. 881, the Small Business Innovation Research Act of 1981. The fact that the bill is before the Senate today for consideration is testimony to the hard work and active support of many on both sides of the aisle. In particular, I commend the senior Senator from Massachusetts (Mr. KENNEDY) for the foundation work he did during the 96th Congress. And, although I was the original sponsor of this particular measure along with seven other members of the Small Business Committee, it is not merely a small business measure that we address today. Let there be no mistake about this: S. 881 is not a small business relief bill.

Rather, it is designed to address a specific problem in the most efficient manner. The problem simply stated is that of the present decline of the United States from its traditional position of preeminence in the field of technology advancement.

The issue of technological advancement is one which plays an underlying role in the ability of this nation to maintain its national security, achieve energy independence, increase productivity and employment, and preserve the quality of life we all enjoy.

The important role for small business in this area has long been recognized. In 1978 an OMB study noted that "our country will lose significant high-technology capabilities absent a concerted effort to increase small business research and development contract awards by the Government."

This statement was merely a recognition of conclusions of numerous studies that have identified small businesses as the most efficient and productive users of research and development dollars. At the same time, those of us attempting to deal with the problem had to recognize another truth: Small businesses face significant difficulty in obtaining Federal research and development contracts. Numerous studies, including the final report of the Commerce Department's Advisory Committee on Industrial Innovation, have recognized that "the burden of Government upon small innovators is disproportionately large and often overwhelming. Government policies and regulations that treat large and small firms equally are, in fact, discriminatory against small firms."

Faced with the above facts, we looked for a mechanism which would achieve a bridge between the small business community and the huge bureaucracy of the Federal Government. Fortunately, the national science foundation small business research program appeared to be a suitable model to build upon for application to all major Federal agencies conducting research and development programs.

That program, started in 1976, has been a tremendous Government success story. Federal R. & D. objectives have been addressed by small firms pursuant to a simplified grant proposal process which emphasized the commercial adaptability of the proposal.

The national science foundation program, providing a two-phase approach to Government financing of R. & D. proposals, has attracted $23 million in private capital for its 1977 phase II award winners alone. This represents a return

of more than 4½ times the Government investment for that year. The obvious benefits in both productivity and job creation cannot be overstated.

This type of success, all too rare in Government programs, should not be a surprise to those familiar with the studies detailing the vitality and performance records of small businesses. A study done for the U.S. Office of Federal Procurement Policy in 1977 concluded that:

Small firms have compiled a striking record of innovation in the private sector. Firms with less than 1,000 employees accounted for almost one-half of major U.S. innovations during the period 1953–1973.

In a 1979 study done by David L. Birch of the Massachusetts Institute of Technology for the Department of Commerce, we learn that small concerns with 20 or fewer employees created 66 percent of all net new jobs in the private sector between 1969 and 1976. In addition, 80 percent of those new jobs came from businesses less than 5 years old.

The same study showed that 87 percent of all net new jobs were created by firms with 500 or fewer employees. While the study was based on 5.6 million businesses, Mr. Birch found that the small, high-technology based firm was the most proficient creator of new jobs. A similar study done by the Canadian Federation of Independent Businesses supported Mr. Birch's findings, concluding that 72 percent of all new jobs in Canada between 1969 and 1977 were created by businesses with 20 or less employees.

Finally, the problem of the shrinking tax base is also specifically addressed by S. 881. To the extent that the program is successful, and I am confident it will be, we can look forward to results that were suggested in a 1975 MIT study of 16 highly successful companies for the period 1969 to 1974. Among other things, the study compared seven mature companies with five younger, innovative companies and concluded that the innovative companies provided nearly $2.3 billion of income tax revenues for the period compared to $1.5 billion for the mature companies. This difference of 34 percent cannot be ignored in the present economic climate.

The conclusions cited above were well supported by witnesses at the five subcommittee hearings that were held on S. 881. Representatives from the academic community, the small business community, and even the big business community all were vocal in their support for the concept embodied in S. 881.

A representative of the Federation of American Scientists, an organization of over 5,000 members, including over 50 percent of the living Nobel Prize winners, worked diligently to insure the success of S. 881.

The testimony offered on behalf of the Federation underscored its conclusion that agency research and development needs could be addressed far more cost effectively through an SBIR-type program, without in anyway jeopardizing any of the more traditional forms of research and development programs.

The Federation's concluding statement was that the Federal Government could do more rather than less research as a result of this program. In a year when we have all been called upon to cut Federal support of many worthwhile programs, this is indeed an important consideration.

In this vein, it is also important to note that the bill specifically states that the establishment of the program will not result in any increased appropriation requests by the agencies involved.

The Congressional Budget Office has estimated that, based on fiscal year 1982 R. & D. budgets projected through 1986, the set-asides required for this program would total $75 million in fiscal year 1982, growing to $415 million in fiscal year 1986. Senators should note section 5 of the bill which specifies that the legislation does not authorize any appropriations.

The committee intends that the cost of implementing the legislation will be absorbed by the affected agencies. This legislation is not intended to "drive up" agency budget requests in order to accommodate this program as well as other ongoing R. & D. programs.

One of the specific questions that I had for many witnesses concerned the general standard of excellence in grant proposals in research and development projects and whether or not the same could be maintained in an SBIR program. From our study of the National Science Foundation program, we were convinced that it could, but I hoped to find corroboration from the private sector.

Dr. Ann Eskerson, director of the Bentley College Small Business Resources Center in Waltham, Mass., told the subcommittee that:

There is no evidence whatsoever that the standard (of the National Science Foundation SBIR proposals) has been lower" than those received from other sources. She went on to say that in her review of the program, she found that the standard is "comparable, if not superior in many cases to that which is being received from the more traditional sources applying to the National Science Foundation.

Of particular, interest to the subcommittee was the fact that a Fortune 500 company testified in favor of the bill, something that one might have considered unlikely at the outset, given the major control exercised by large businesses on Federal procurement programs. Mr. John Tillinghast, senior vice president for Technology at Wheelabrator-Frye, Inc., told the subcommittee that his company stood to gain by the legislation since competition was the key to stimulating innovation throughout the economy. He concluded that:

[I]n the smaller firms, unlike the larger corporations . . . each step does not have to be justified in terms of potential market share or gross operating margins or some other financial criteria.

He asked the following question:

[H]ow can a financial control system evaluate market share when new technology is creating a wholly new market that does not yet exist?

He summarized as follows:

[A]s part of the unstructured nature of the smaller firms, I believe that innovation occurs from creative flights of intellectual invention. Innovation does not come by the formula approach so endemic to larger firms.

Two other major companies, Control Data Corp. and Delorean Motor Co., also testified in favor of the bill.

The subcommittee also received testimony from the Department of Defense, the Department of Energy, NASA, and the Department of Health and Human Services. We are deeply indebted to the agencies for many of their constructive criticisms of the original text of the bill. Indeed, many of the agencies' suggestions have been incorporated in the text as it appears before the Senate today.

To the extent that the agencies differed with our bill, it was a difference of degree and not of goal orientation. The Department of Defense testified as follows:

We wholeheartedly support the objectives of S. 881 to require agencies to establish a small business innovation research program, as we believe this concept to be the most far-reaching initiative to date to bring small, innovative, high-technology firms into the Federal Government's procurement process for research and development products and services.

The agency differences related solely to what they characterized as flexibility problems connected with mandatory allocations. While such an argument may be justified on purely theoretical grounds relating to management control policies, the argument does not recognize the dual function served by Government:

First, to administer the business of Government in the most efficient and cost-effective manner; and second, to address recognized societal needs. Inasmuch as testimony before the committee and the studies cited above had overwhelmingly suggested that S. 881 would address both functions of Government, those on the committee saw opportunity where agencies saw inflexibility.

Indeed, after reviewing the administrative changes that had been made in the original text, the administration was in a position to wholeheartedly support S. 881.

The President has recognized that S. 881 is the type of cornerstone that he must have as part of his economic recovery package if the same is to be successful.

The bill clearly adds the element of revitalizing the economy from its grassroots building blocks. The effect will be a surge upward rather than sole reliance on the so-called "trickle-down" theory. It is a wise recognition that a truly dynamic economy must rely on both theories. The President's support for this measure is embodied in a letter that he has written to me which I shall read into the RECORD at this point.

THE WHITE HOUSE,
Washington, October 6, 1981.

Hon. WARREN RUDMAN,
U.S. Senate, Washington, D.C.

DEAR WARREN: I would like to express my support for S. 881, the Small Business Innovation Research Act.

Your concern that small firms be able to participate equitably in Federal research and development is shared by this Administration. In the long run, all sectors of the economy are likely to benefit from the increased competition and research incentives your legislation would provide.

I congratulate you for the leadership you have shown in advancing the interests of those small businesses which are the job-producing lifeblood of our economy.

Sincerely,

RONALD REAGAN.

Small business is the leading innovative force in this country, the leading job creator in this country, and the most efficient tool with which to address Federal research and development objectives.

The Small Business Innovation Research Act of 1981 will serve to stimulate our productivity, return the United States to its position of preeminence in the field of technology advancement, and create that most precious of all commodities—new, high-quality jobs for many of the citizens whom we serve. I believe that this bill will represent Government at its best, and I am honored to have my name associated with it.

Mr. President, it is, of course, necessary that for any bill to make it through Congress there must be ample cooperation between both bodies. I am pleased we have had such help from the Honorable BERKLEY BEDELL, chairman of the Energy Subcommittee of the House Small Business Committee. Mr. BEDELL recently wrote an article which was published in the New York Times and I ask unanimous consent to have printed in the RECORD a copy of that article.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GIVE THE MONEY TO THE REAL INNOVATORS

(By BERKLEY BEDELL)

In our opinion, a renaissance in innovation in America is possible, but a basic systemic change must first occur in governmental policies affecting small innovative businesses.—Presidential advisory committee on industrial innovation, the final report 1979.

A key element in the great industrial success of this country has been the individual—the entrepreneur, the small-business man. But in the past two decades business activity has steadily shifted away from individuals toward large, centralized organizations.

For the first time in United States history, the share of the gross national product held by large business has passed the share held by small business, and the trend line suggests that by the year 2000, large business will account for almost 50 percent more of our G.N.P. than small business.

The statistics confirm the vital role of the smaller enterprise in the economy. Besides being the nation's leading job creator, the small business sector is also by far our society's leading source of industrial innovations. The National Science Foundation found that small businesses were responsible for half of "the most significant new industrial products and processes."

According to the foundation, small companies produced 24 times more major innovations per research and development dollar than large companies. And small companies manage all this despite accounting for less than 5 percent of all research and development efforts in our economy.

In 1979, the Presidential Committee on Innovation traced the decline in America's industrial base to Federal research and development policies. The committee concluded that "the climate for small business innovation has greatly deteriorated during the past decade" and went on to pin much of the blame on the Federal Government by noting that in the area of Federal funding for research and development "the innovative sector of the American economy, small science and technology-based enterprises, are virtually excluded from effective participation."

The extent to which small, innovative enterprise have been shut out of Federal research and development spending is startling. Small businesses received a mere 3.5 percent of the $30 billion the Federal Government spent on research and development in the fiscal year 1980. Of the $15 billion in research and development services the Government procured from business in fiscal year 1980, just 70 companies received 80 percent of that total.

Federal research and development procurement has become a bonanza for some of the largest corporations in America. Not many citizens realize that a large chunk of the money they pay in taxes is in turn given out to some of the biggest names in American business—General Electric, Westinghouse, Mobil, T.R.W.—to conduct their research and development activities.

In my view, much of the money the Government spends on R. & D. is going to the wrong people. These funds should be spread among as many individuals and enterprises as possible. To concentrate our research and development efforts among the large, centralized institutions virtually assures that we will be dependent upon those who have the greatest stake in maintaining the status quo.

Unfortunately, the research and development policies contained in recent Federal budget proposals will only exacerbate our current technological dilemma. The energy situation is a good example.

The Reagan Administration has requested a civilian research and development budget for the Department of Energy in excess of $3 billion. The department should be using this money to help develop new energy technologies and innovations. Instead, more than half of this budget will be used to finance research related to nuclear power, a centralized energy technology. Meanwhile, decentralized energy programs such as solar, conservation, geothermal, small hydropower and energy storage systems find their share of the research program drastically reduced.

These diverse, new ideas commanded 66 percent of the $4.5 billion R. & D. budget of the Department of Energy for fiscal year 1981. In 1982 they will get 48 percent of a $3.3 billion research budget, representing a 50 percent drop in funding.

Our foreign competitors, on the other hand, are taking a more diverse and open-minded approach to energy research and development, recognizing that there is a huge potential for alternative energy technologies first in developing countries and later in domestic economies. Japan, France and West Germany all are forging ahead with research and commercialization support for new decentralized energy systems.

An official document issued last year by Japan's Ministry of International Trade and Industry stated: "We need to develop and introduce local energy sources including solar energy, geothermal energy, small and medium-scale hydro-electric power plants, factory waste heat, methane produced by fermenting waste, wave power, wind power, tidal power, and biomass. In the area of energy-related technologies and in other pressing areas requiring a large amount of funds, the Government must launch national projects on its own initiatives."

It is clear that if we continue to follow our current course we will soon be far behind our world competitors in the development and marketing of alternative energy technologies.

It is not too late for the United States to free itself from the policies that are holding us back. One important step will be the passage of legislation (S. 881 and HR 4326) that would require large Federal agencies with research and development budgets in excess of $100 million to establish small business innovative research programs.

This legislation requires no new Federal spending, but merely states that an agency must allocate between 1 percent and 3 percent of its budget, in addition to what it already spends on small businesses, to finance small business research efforts. The legislation has been unanimously reported by both House and Senate Small Business Committees and has the support of the President.

Of course, no one likes to advocate the use of set-asides. But in this instance the options are very clear. Unless Federal agencies, which have a tremendous impact on the research and development community, are forced to pay more attention to the most innovative and productive sector of our economy, our productivity and international economic position will continue to erode.

Mr. DIXON. Mr. President, I congratulate the Senator from New Hampshire on his excellent presentation and on this fine bill, S. 881.

● Mr. BAUCUS. Mr. President, I want to express my strong support for this legislation, which seeks to strengthen the role of small innovative firms in federally-funded R. & D. Sure, this bill has its weaknesses, which I am describing separately. But despite the weaknesses, we must not lose sight of the fact that this is a good bill—good for America's small businesses.

Research and development remains the most important part of our competitiveness in world market. If we are to maintain our competitive position, we must be sure that R. & D. resources are spread where they will be most effective.

The Small Business Innovation Research Act of 1981 is supposed to do that. Small innovative firms will be given a chance to receive R. & D. funds and to attract private capital to commercialize the results of Federal research. According to this legislation, each agency with the R. & D. budget in excess of $100 million will be required to establish a small business innovation research program and small firms will be invited to submit research proposals to an agency concerning topics selected by each agency in accordance with its own R. & D. objectives.

Those proposals which show the most scientific and technical merit and feasibility can be funded in the range of $30,000–$50,000 for the initial development. Second-year financing ranging from $100,000 to $500,000 may be provided for further research of projects that appear promising.

We in Montana have already shown how valuable small business research and development can be. Montana has the center for innovation, in Butte, which has shown the way for many small firms regarding the development and marketing of new inventions. It is such imaginative proposals and programs that do help small business and the returns have been clearly seen. It is well known that small business is highly innovative, and if given the chance it can come up with some of the best ideas. A survey by the National

Science Foundation of major innovations introduced in the market between 1953 and 1973 found that small firms produced about 24 times as many innovations per R. & D. dollar as large firms and four times as many as medium-sized firms.

Another study by MIT found that firms with 500 or less employees provided 87 percent of all new jobs in the United States between 1969 and 1976. The best job creator was found to be the small technology based firm.

Mr. President, I strongly support an initiative, such as this. We may have to look at basic research and how the bill affects it to see if some changes might be warranted. But we should not let that detract from the overall objective of S. 881. I am pleased to be a cosponsor of the measure and urge my colleagues to vote for it.

BASIC RESEARCH PROVISIONS—SOME POTENTIAL PROBLEMS

Mr. President, there is serious concern in the university and scientific communities over the direct effect S. 881 will have on the conduct of basic research.

Basic research aims at the creation of new knowledge. It seeks to understand the nature of fundamental processes, the how and why of the way things are. Basic research is not conducted with a commercial application in mind, although when fundamental knowledge is developed, later work with that knowledge frequently leads to useful application. It is widely acknowledged that basic research is utterly essential to our long-range objectives for economic progress and national security. Without the new ideas and dramatic breakthroughs that only come through basic research, the best effort we can make will result in only minor improvements on what we are already doing.

In recognition of the great importance of basic research, the Federal Government has accorded it a special place in our national research and development effort. It is a small, but extremely important part of the total Federal R. & D. expenditures. Of our total Federal R. & D. budget of $40 billion, only $5.5 billion (or less than 15 percent of our total effort) goes to basic scientific and engineering research.

And it is the impact of S. 881 on this small portion of our total R. & D. budget which is the subject of serious concern and objection by research universities. The Association of American Universities opposes S. 881 on the grounds that it "would reduce Federal support for basic science." The National Association of State Universities and Land Grant Colleges also joined in opposition.

UNIVERSITIES AND BASIC RESEARCH

Most basic research is done at universities and national laboratories because such research requires resources and specialized facilities available at universities and national labs and because the scientists who are both capable of doing frontier work in basic science and have devoted their careers to it have by and large congregated there. Certain equipment essential for some research is found only at special installations funded by the Federal Government just for such basic research. Scientists who conduct basic research are also heavily committed to training young scientists and engineers who will continue to work in basic science; therefore, at universities there is an intrinsic relationship between training and basic research.

Now it is true that most basic research is done at universities, and that in some fields, it is done exclusively at universities. That is not a bad thing; our research base is set up precisely to take advantage of the unique suitability of universities to do basic research. Small business, which has a solid record of innovation and can do some research as well or better than other performers, does not engage at all in some fields of basic research and is not likely to do a significant amount of truly basic research in any field.

WHAT DOES S. 881 DO AND HOW DOES THAT AFFECT BASIC RESEARCH?

Unlike a traditional set aside, S. 881 does not require that a certain portion of funds for a specific purpose be set aside so that a specified performer may do part of that work to fulfill that specific purpose. S. 881 sets aside a portion of total agency R. & D. funds to set up a new program, the SBIR program, which may serve useful purposes but which does not necessarily have any relationship to the specific program goals from which the funds are taken.

The DOE high energy physics program is an excellent example of the problem. First, small business would have difficulty doing frontier basic research in high energy physics; indeed, even our great research institutions must rely on three national facilities. Second, while America has been the world leader in high energy physics research, our leadership is threatened by a decade of declining support in real dollars; Western Europe is currently spending twice as much as we are in this critical field (measured as a percent of GNP). Third, the sole source of funds is the Federal Government, and funds taken from the program will not be replaced by any other source.

For a specific illustration, take the fiscal year 1981 budget for DOE's basic research program in high-energy physics. This was $352.2 million; 1 percent of that is $3.52 million. This amount may not seem to be large in the national context, but the leverage of such a reduction has become very large as a result of the high-fixed costs of operating the central accelerator facilities of the basic laboratories, and as a result of the shrinking funding pattern of recent years. As a matter of fact, a detailed analysis carried out by the SLAC laboratory in California shows that a 1-percent change in funding would reduce the productivity by more than 3½ percent and that the recently discussed 12-percent cut would have reduced productivity by about a factor of 2.

To reduce the high-energy physics budget by an additional 1 percent would inflict additional real damage to basic research in high-energy physics.

To compound the problem, each year when the authorizing and appropriating committees evaluate the high-energy physics program, will they be fully aware that they are not authorizing or appropriating the line amounts for high-energy physics?

The Schmitt-Rudman amendment would limit the amount of damage to basic research programs by putting a ceiling on the amount of the set aside which can come from basic research programs, but it still subjects basic research programs, such as high-energy physics, to the set-aside. Indeed, all the illustrations used above assume the passage of the Schmitt-Rudman amendment. Even with the amendment, basic research will suffer under the requirements of S. 881.

A 1-percent cut in the basic research budget represents a 1-percent loss to basic research, not a transfer of the conduct of basic research to other performers. And in the case of the high-energy physics program, a 1-percent cut is leveraged into a 3½-percent cut in productivity. Furthermore, if Congress appropriates only the minimum amount it determines necessary to operate any given program in any given year, S. 881 would, by reducing appropriated funding levels, both undermine congressional intent and fund basic research programs at less than adequate levels. The current budget process and reductions in Federal spending are in themselves reducing some basic research programs to marginal levels. It seems especially unwise to take additional money from basic research programs, which, after all, serve important national purposes and provide the foundation for future scientific and technological development.

As a result, Mr. President, I urge that these issues be given consideration in conference. S. 881 is a good bill, and I cosponsored it. But we should also make sure that basic research is not handicapped by its provisions.

HIGH INTEREST RATES HURT OUR ECONOMY

Mr. President, I understand that Senator CHILES may offer an amendment concerning interest rates. Also, Senator BENTSEN may offer an amendment concerning the deductibility of home mortgages. As a cosponsor of these amendments, both of which concern interest rates, I thought it might be helpful here to offer a few thoughts about the problems that high interest rates have caused our economy.

Ralph Waldo Emerson said it 180 years ago:

> Money often costs too much. Money costs too much today. Way too much.

That is not our only problem. Wall Street is obviously not confident that the President's economic recovery program is on the right track. As one wit once said:

> Anyone who thinks there is safety in numbers hasn't looked at the Stock Market pages.

The underlying cause of so many of our problems is the rate of inflation. The symptom, and part of the disease, is high interest rates.

The problem that people in Washington face on these issues is evident: When inflation is high, the heat is enormous to lower it. When interest rates are high, the heat is enormous to lower them. Unfortunately, it is difficult to do both at the same time. Options are limited.

Congress has been studying various proposals regarding inflation, inflationary expectations, and the demand for money and credit relative to the supply. These issues have dominated the first session of the 97th Congress.

In recent years, there has been interest in controlling the money supply to control inflation. Borrowing and spending are curtailed. Keep in mind that only two things can control inflation: Limiting the supply of money and balancing the budget.

By curtailing inflation, credit will become more available. Interest rates will moderate over the long run. Paul Volcker, Chairman of the Board of Governors of the Federal Reserve System, made it clear that this was his view during recent testimony.

He said many of the accumulated distortions and pressures on the economy could be traced to our high and stubborn inflation. Dealing with inflation was essential for our future well-being as a nation.

However, excessive reliance on monetary policy alone cannot solve the problem. It must be accompanied by other measures, a view supported by the Federal Reserve Board.

For example, balancing the budget is an essential part of any inflation control program.

In other words, we must balance the budget and control the supply of money. We must put a cap on our national debt.

The object of such a tandem of policies is to make us more of a saver nation than a debtor nation. More money would become available for investment and growth.

Money has been too easy for too long for both individuals and Government. Too easy credit leads to inflation and a deteriorating economic situation.

The administration's program is based on that thesis.

It has designed a huge personal income tax cut and business incentive tax cuts to stimulate savings and investment. At the same time, it has massively reduced spending in every area except defense.

The goal is eventually to balance the budget, an objective it sees as essential to bring inflation and interest rates under control.

Unfortunately, in my view, there are many weak points to the administration's program, and many contradictions in its proposals, good as the goal may be.

First of all, the administration recognizes that it will be very hard to bring deficits under control. It does not mind those deficits since it can use them as an excuse for massive cuts in Government spending.

David Stockman and many of his colleagues seem determined to get the Government out of our lives so totally that the benefits we have learned to appreciate can be reduced or done away with.

Social security, loan guarantee programs, and other assistance programs for business as well as the general populace are being threatened.

As long as there is a deficit, the administration can argue that it has to slash away. It wants a deficit so it can continue to reduce or do away with Government programs, good or bad.

Second, while it cuts these programs, its tax program is sacrosanct. It insists that a massive personal income tax will create huge funds of new investment money. Wall Street and many economists disagree with that.

The prevailing view is that the personal tax cut will tend to be spent rather than saved.

Third, there is a growing awareness that tight money, high interest rates and unrestricted cuts in Government programs are a roadmap to recession.

And that, by the President's admission, is exactly where we are. In a recession.

Indicators such as industrial output are dropping. Slight declines in interest rates are discounted by such economists as Henry Kaufman, of Wall Street's Solomon Bros. Respites "are not likely to endure," he states, given expected heavy borrowing by the Treasury and corporations later this year.

So the administration gives us a massive tax cut to stimulate the economy and continues to cut spending in an effort to balance the budget. It insists on not cutting the defensive budget very much.

There is a flurry of proposals to seek artificial answers to our problems.

Most of these focus on the Federal Reserve System itself, which has become the whipping boy for our problems.

Let me analyse the Federal Reserve for a moment.

First of all, the Federal Reserve does not have the power to set interest rates in general. But it does control the Federal Reserve discount rate. Changes in the discount rate can influence other markets.

Second, the Federal Reserve can change reserve requirements. When banks are required to keep more reserves, less money is available to lend out.

Third, the Federal Reserve can influence the market and interest rates through its open market operations, which is one reason there are efforts to make the open market committee more susceptible to economic influences.

That is the extent of the Federal Reserve's powers in this area, large as they are. Interest rates are primarily determined by the market and by actions of either borrowers or lenders. There are economic and psychological factors involved as one can see by the reaction of Wall Street to the administration's program.

But nonetheless, many proposals affecting the reserve have merit, and we should pursue them with vigor.

There are a number of congressional resolutions which encourage the Federal Reserve to lower interest rates while maintaining firm control over the growth of money and credit.

Another resolution protects small business institutions, farms and the housing industry by having these sectors better represented on the Federal Reserve Board open market committee.

Still other measures before the Senate are designed to make the Federal Reserve back down on its interest rate policies and to make it more responsive to different sectors of our economy that are particularly affected by its policies.

It would serve all interests well if the Fed let up on credit stringency by altering its way of gaging the money supply. It also could provide some informal credit guidance to the banking community so that the latter pumps more money into small business, for example, and less into corporate takeovers. In other words, jawboning.

But it is also incorrect to blame the Fed entirely for all our problems, and therefore penalize it excessively. We can do some fine tuning, but we would be dreaming if we think fine tuning is going to make money readily available. And remember, if there is any silver lining to our current situation it is that inflationary rates have diminished over the past year.

A dubious economic policy which will produce enormous future deficits as a result of excessive cuts in taxes and a destruction of our Government program is more to blame for our problems. Wall Street has made that clear.

Many Government programs have functioned well to keep our economy, and our individual economic lives, prosperous.

Suddenly yanking such things as loan guarantee programs away from business does not help the economy.

The business community is not so sure that the economy will expand, and therefore, is holding back on investment dollars. It sees enormous future deficits. Anything that limits the supply of money and credit available for lending is likely to cause market interest rates to climb.

So where does all this put us?

Unfortunately, as you all know too well, there are a number of dangers associated with high interest rates.

One is recession.

And that is where we are now.

Second, is that certain groups or sectors within an economy may share a disproportionate share of the impact of high interest rates and credit shortages.

Small businesses, public utilities, state and local governments, and consumers are all affected. Mortgage markets and the construction industry, as you all know, are in dire straits at the moment.

Indeed, many suspect that such developments are expected and accepted by the administration. Given the choice between a return to inflation and a return to breadlines, David Stockman has testified his preference is for the breadlines.

If you are hardhearted enough, he is right. Recession, unemployment, and breadlines will bring down interest rates because there will not be any work to be done anyway.

If our economy nosedives, you can be sure jobs, work—and interest rates—will diminish.

I wish there was some simple solution to the problems of inflation and interest rates. There is not.

But I do believe that there are things that could be done.

Many suggest that we postpone part of the tax break until we see more clearly when the budget will be balanced.

The administration thinks that the only way to balance the budget is to cut out Government spending.

Yes, Government spending has to be reduced.

But we cannot put the entire burden

on slashing the Government out of existence.

I believe that when the President was elected, the American people made clear they were prepared to bite the bullet and do what it takes to bring our economy back to prosperity.

The administration has undertaken a great experiment that seems to be having trouble getting off the ground. For the good of all of us, it must get off the ground.

There will be a loss of revenue as a result of the tax cuts. The administration will not be able to balance the budget as it hopes to do.

The U.S. Government budget is too big and too committed to entitlements to be able to cut the amount necessary to balance the budget.

Is there not some other alternative that is not going to destroy our economic recovery? That will allow us to balance the budget, and will not end so many valid activities in which the Government is involved?

I know it is politically unpopular and difficult to favor a tax-cut rollback.

That is why the subject is dealt with gingerly.

But many do feel that we can cut no more out of our spending side of the budget, and that defense spending is something the American people want to see increased, as indicated by their vote a year ago. But must the tax cut also be untouchable? Can we not shift with the wind? Would we rather see social security gutted, or agree to hold off on the personal tax cut, perhaps only a few months?

Both personal and business tax cuts can stand review.

On the business side, new depreciation schedules could become subsidies to business. That is, more money is given out to business through tax policy than is taken in. There are also some leasing provisions which are excessive under the circumstances. There are other items, too, which should be rescrutinized, including tax expenditures. After all—22 years ago, corporations paid 19.5 percent tax relative to personal taxes. Today the figure is 7.7 percent.

On the personal side, everybody's paycheck increases by a few dollars each month as a result of the cut. And even that is tilted to favor the higher income people.

Sure, some of that will go into savings. But will enough go into savings to make such a huge cut worth it?

A lot of people are asking that question.

A lot of people think that much of the money will go into consumption which will drive up inflation again.

I remain committed to the idea that we should bring spending under control first, before cutting our sources of revenue. I believe we should give businesses incentives. I believe that a personal income tax is needed to provide relief. But we can afford some flexibility.

I believe we need a strong defense, but I do not think that any sector of our budget can be immune from financial constraint.

We need to look over the tax cut package that we approved. We need to close up loopholes and some day possibly alter our basic structure to make it more fair.

This is what we must do. We should do it in a bipartisan way.

And I shall continue to work in Congress to try to ease interest rates by adjusting our programs in a way that will achieve our economic recovery objectives more sensibly. Modifying the tax cut is one viable and real way to do that.●

Mr. LEVIN. Mr. President, I want to begin this statement by commending my friend from New Hampshire, Senator RUDMAN, chief sponsor of the Small Business Innovation Research Act of 1981, and without whose efforts this legislation would not have been possible. He has worked long and hard with many Members on both sides of the aisle refining the language of this act to create a Government-wide program that I believe holds great potential for small businesses, the Government, and the economy. I know Senator RUDMAN is proud of this legislation and well he should be. I urge Senate approval.

The foundation on which this legislation is based is sound. That is, small businesses are our Nation's most prolific innovators. This fact is documented by numerous studies. A 1976 National Science Foundation survey found that, of major innovations marketed between 1953 and 1973, small firms produced about 24 times as many innovations per research and development (R. & D.) dollar as large firms. In addition, a 1977 report by the Office of Federal Procurement Policy revealed that firms with fewer than 1,000 employees accounted for approximately one-half of the major U.S. innovations.

The Small Business Innovation Research Act attempts to capitalize on the demonstrated innovative capabilities of small business. Under the act, agencies with R. & D. budgets in excess of $100 million would be required to establish a small business innovation research (SBIR) program. Small businesses would submit research proposals to these agencies on topics that are selected by and in keeping with each agency's R. & D. needs. Proposals showing the most scientific and technical merit and feasibility may receive funding of approximately $30,000 to $50,000. Small businesses receiving the initial funding could seek an additional award ranging from $100,000 to $500,000 for further research and development of their proposals.

A major goal of the SBIR program is to encourage small businesses to attract private sector follow-on capital to commercialize the results of the Government-initiated research. To accomplish this goal, agencies would be directed, when evaluating proposals of equal scientific merit that are requesting second-tier funding, to give special consideration to those proposals that have attracted private capital.

The establishment of a Government-wide SBIR program holds great potential for all concerned. The Government makes use of the capabilities of small, innovative firms in the procurement of the Government's R. & D. needs. Small businesses receive that up-front capital so necessary to initiate research in their field of expertise. And finally, society as a whole would be benefited. Commercialization of many of the newly developed technologies and processes will ultimately create new products and improve the competitiveness of American goods and services in the world marketplace. thereby increasing employment and tax revenues.

While the act requires no direct appropriation, there is a slight cost associated with implementation, management and administration of the SBIR program. But these costs, approximately $3 million in fiscal year 1982 and rising to $21 million by fiscal year 1986, are very small when compared with the anticipated economic benefits to be derived from the program.

Again, I want to commend Senator RUDMAN for his efforts, and I urge Senate approval of this legislation.

o Mr. TSONGAS. Mr. President, the Small Business Innovation Research Act of 1981, S. 881, has won well-deserved bipartisan support. This legislation recognizes the Federal Government's inexcusable failure to tap the resources of the small business innovator. The bill puts in place a mechanism to improve this dismal record.

In my own State of Massachusetts, the phenomenon of high technology clearly demonstrates the meaning of innovation spawned by small business.

Digital Equipment Corp. was begun in 1957 by three people. In September of 1980, Digital had 55,000 employees, 20,000 in Massachusetts. Wang Laboratories was begun by Dr. An Wang with one part-time associate. At the end of 1980, the company employed 7,800 in Massachusetts and 13,000 worldwide. Computervision had 10 employees in 1969 and 2,966 in 1980. Data General grew from four full-time workers and one part-timer in 1968 to a 1980 level of 5,000 Massachusetts employees and 14,380 worldwide.

Thus, at the center of much of Massachusetts' economic growth and increased job market over the last two decades lies innovation by entrepreneurs in small companies. Small business innovators—those who successfully carry a new idea from a conceptual point to one where it can be marketed as a product—rescued Massachusetts. As a Nation, we need to improve the climate for such badly needed innovations.

High technology's rapid growth and expansion is a wonderful success story. Nonetheless, we need to learn from its growth and not blindly depend on it. The preponderance of evidence I have studied on this issue indicates that this growth comes fastest and most productively from small firms. Why? Industrial psychologists tell us that the upstart entrepreneur is a risk-taker, a creative thinker, an experimenter—all the attributes of an innovator. These contrast with the mentality of the corporate executive of a large firm who, according to psychologists, is prudent, organized, and able to deal with short-run profitability issues and is therefore geared to efficient production, not innovation.

The Small Business Innovation Research Act simply requires that agencies

with research and development budgets over $100 million establish a small business innovation research program to enable small firms to develop new products for these agencies. Why is a special program needed? Because the way Federal research and development dollars are awarded now strongly favors large, nationally known companies.

A contract officer faced with the task of awarding $1 million in research and development contracts can award 20 contracts of $50,000 each and have 20 grants to monitor. Or, there could be two grants of $500,000 each, a decision which makes his work much less time consuming, easier. Add to this the supposed danger of awarding funds to an unknown firm compared with the safety of providing grants to brand-name companies and it is not surprising that small businesses fail to receive much attention despite the fact that they can produce four times the amount of innovation for every research and development dollar awarded a larger company.

Mr. President, I conclude by pointing out that this legislation is being offered at a time when we are trying to make every Federal dollar yield the greatest amount of benefit possible. By removing an unproductive bias in present regulations, this bill would free up capital for use by a segment of the business community that is uniquely gifted at providing this country with the advances needed to insure that we remain competitive in the marketplace.●

Mr. SCHMITT. Mr. President, the bill of the distinguished Senator from New Hampshire quite rightly recognizes the exceptional contributions to innovations and productivity which are attributable to the small business community of this country. He also recognizes that this contribution has not been fully capitalized on and with this I heartily concur.

At the same time, I have a concern that S. 881, as written, could have unintended, but nonetheless, adversely disproportionate impacts on basic research and on research and development at Government-owned, contractor-operated laboratories.

Even though basic research is a relatively small proportion of the total R. & D. budget, it is exceptionally important as the source of the fundamental discoveries about ourselves and the world around us from which later ideas for inventions spring.

There has been a concern that the set-aside provisions of S. 881 might be taken disproportionately from basic research, even though this category of R. & D. is less germane to the goals of the legislation than are applied research and development. For example, in a mission agency such as DOD, there might well be considerable pressure to take more of the set-aside from the basic research budget, rather than from large but tightly budgeted programs for weapons development. Shifting a small part of the set-aside percentage from applied research and development to basic research would greatly increase the percentage of the basic research budget set-aside.

My concern is heightened by the developing budget prospects for fiscal year 1983, where controllable categories, such as basic research will be severely constrained.

I am pleased to note that many of my colleagues have shared with me similar reservations of their own, particularly in recent days.

And only this morning Dr. Jeremy J. Stone, director of the Federation of American Scientists, urged that basic research be exempted from the set-aside provisions of this bill. Dr. Stone's action is particularly notable because it was this organization that worked more than any other for the broad sponsorship which S. 881 enjoys. I ask unanimous consent to include in the RECORD Dr. Stone's statement.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FEDERATION OF AMERICAN SCIENTISTS STATEMENT ON BASIC RESEARCH AND S. 881

S. 881 calls for 1 percent of R&D funding to be "set-aside" for small business in agencies which have over $100,000,000 of R&D funds at their disposal. The question has arisen whether basic research funds—normally only a small fraction of total R&D funds—would and should be touched by this bill. In our opinion they certainly should not be affected. The purpose of the bill, which is to encourage innovation in small business, has little, if anything, to do with purposes of basic research. Basic research funding should be given out in accordance with peer-review methods, as is traditional. And small business, which does not, in any case, normally do basic research, should not be a specially treated candidate for basic research monies anyway. Most important, basic research monies are in very short supply today, and very much needed to get America moving again. It would be an ironic and counterproductive effect of the bill if it were to encourage innovation in small business only at the cost of depleting the new ideas which small business might apply.

As we understand it, in any case, small business is getting the right, in other changes in law, to bid for basic research monies. And it can therefore compete for basic research funds on a basis of equality with other university-based researchers. It does not need any special set-aside for basic research. Indeed, it is only in the area of innovation in applied work that small business has a well established track record on the basis of which this bill, S. 881, was conceived.

With all this in mind, and since basic research is about 10 percent of R&D funding generally, we see no problem in having the 1 percent set-aside of the bill explicitly drawn from agency funds which are not basic research. Indeed, speaking as Director of the Federation, it has always been my own assumption that this would follow from the nature of the bill.

But since the question has arisen, and speaking for the Federation itself, we wish to state explicitly that we will work to have either the final form of the bill and/or the Conference Committee report—and the Executive Branch regulations under which the act would be carried out—make this full exemption of basic research funding explicit.

JEREMY J. STONE,
Director.

Mr. SCHMITT. Another concern regards a special group of national laboratories, those which are Government-owned but contractor-operated. Two prominent examples are the Los Alamos National Laboratory and the Sandia Laboratory, which conduct a number of the most advanced energy and defense research and development programs in this country. I believe it is important that the legislation and the record be clear that the research and development programs of these vital Government-owned, contractor-operated laboratories are not to carry a disproportionate share of the set-aside requirement.

Note: The Government-owned and operated laboratories are totally exempted in S. 881 from set-aside requirement.

Therefore, I would like to offer an amendment to S. 881 which, I believe, is acceptable to Senator RUDMAN. The amendment would limit to the minimum set-aside percentages stimpulated in the bill the amount of the basic research and Government-owned, contractor-operated research and development budgets which could be used for the purposes of S. 881.

These stipulations would affect neither the agencies which would participate in the small business innovative research programs nor the overall amount of the set-asides for the program. They would, however, assure that our reservoir of new, fundamental knowledge on which future innovation will depend is not burdened disproportionately.

My concerns about the impact of this legislation on basic research remain, but it seems best in the interest of compromise to adopt the amendment as agreed to with Senator RUDMAN. I hope, however, that careful consideration will be given in the conference to the concerns that I have raised and which seem to be shared by more and more of my colleagues.

I would like to thank the distinguished Senator from New Hampshire for his sensitivity to the concerns which I have presented and his cooperation in arriving at an appropriate modification of S. 881.

UP AMENDMENT NO. 761

(Purpose: To amend the Small Business Act to strengthen the role of the small innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy)

Mr. SCHMITT. Mr. President, in order to alleviate any such impact, the Senator and I have agreed on an amendment which I send to the desk at this time.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an unprinted amendment numbered 761.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, line 9, insert the following: "A Federal agency shall not make available for the purpose of meeting the requirements of paragraph (1) an amount of its research

or research and development budget available for obligation for basic research or for research or research and development in Government-owned, contractor-operated facilities which exceeds the applicable minimum percentage required by such paragraph for all research or research and development conducted by non-profit and for-profit entities outside the Federal government or conducted in or funded through Government-owned, contractor-operated facilities.".

Mr. SCHMITT. Mr. President, I would just say to my colleagues that this amendment very simply puts a cap, a 1-percent cap, on the amount of set-aside that can be attributed to basic research under the provisions of this bill, and includes in that the Government-owned, contractor-operated laboratories which provide such a large share of the basic research undertaken in this country.

I believe the amendment is acceptable to the distinguished Senator from New Hampshire and the managers of the bill, and I ask that it be agreed to.

The PRESIDING OFFICER. Is all time yielded back?

Mr. RUDMAN. Mr. President, will the Senator yield me an additional amount of time?

Mr. SCHMITT. I would yield the remainder of my time.

Mr. RUDMAN. Mr. President, I want to thank the Senator from New Mexico who, of course, brings to the floor of the Senate a most unusual background in science and technology.

With that particular background the Senator from New Mexico has been very sensitive to the legitimate concerns of the university research communities throughout this Nation, and his suggestion is a very positive one. I believe it strengthens the bill, and I am very thankful that his help has been forthcoming to make this bill even stronger than it was. The committee, in fact, does wish to agree to the amendment.

Mr. DIXON. Mr. President, the amendment is acceptable on our side. The amendment is consistent with the philosophy of the legislation.

I believe the committee's report was directed at the Senator's very point: The report, on page 11, states

It is left to the agency's discretions to decide which funds to use for this purpose (implementing the SBIR program). However, the Committee expects agencies to exercise this discretion in a manner that will not result in the disproportionate taxing of any single area of research. For example, there has been some concern expressed that basic research in particular may, in some instances, be required to bear a greater share of the burden of funding SBIR programs. It is the Committee's intent that this not occur.

Throughout the development of this legislation we have been mindful of the concerns of the basic research community and the practice of several agencies to use Government-owned, contractor-operated (GOCO) facilities.

On several occasions, witnesses testified at committee hearings about the difficulty of utilizing small business for basic research purposes. No testimony has been presented to this committee in its 3-year review that indicates small for-profit entities are not capable of doing quality basic research. In fact, the committee has received testimony that buttresses the committee's view that small business now has, and will develop, the expertise to pass any legitimate, unbiased peer review.

With respect to GOCO facilities, nothing in this legislation will limit agencies abilities to continue utilizing this approach to Federal research. Nowhere do we suggest that agencies must or should shift funds out of GOCO into the SBIR program.

The PRESIDING OFFICER. Is all time yielded back?

● Mr. SASSER. Mr. President, I support the Schmitt amendment to the Small Business Innovation Research Act of 1981, S. 881. This amendment addresses concerns I have had with regard to the basic research efforts of colleges and universities.

Institutions of higher learning have been responsible for much fine work in the area of basic research. Though S. 881 was not intended to limit these contributions, fears have been expressed that this would be its effect.

In answer to these concerns Senator SCHMITT has proposed this amendment which I understand will be accepted by the floor managers. It will not diminish the value of the small business innovation research program created by the bill. It will insure that the very important basic research efforts being made in this country are not diluted by being included in a program which has an applied research thrust.

Further, the amendment is not intended to cast doubts on the ability of small research firms. Studies have shown time and time again that small firms are at least as capable as their larger counterparts in the area of innovation. The issue here turns on the important differences between applied and basic research.

The Schmitt amendment respects these differences.

For this reason, Mr. President, I support and have cosponsored the Schmitt amendment to the bill.●

The PRESIDING OFFICER. Is all time yielded back?

Mr. SCHMITT. I would be happy to yield back my time.

Mr. DIXON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 761) was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. Mr. President, I ask unanimous consent that a call for a quorum may be issued at this time and that the time for the quorum call be charged to neither side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered

(By request of Mr. WEICKER, the following statement was ordered to be printed in the RECORD:)

● Mr. HAYAKAWA. Mr. President, it is very timely that 85 Members of the Senate are cosponsors of the Small Business Innovation Research Act of 1981, S. 881, and that the President of the United States presonally supports the legislation. I believe that a great deal of credit goes to Senator WARREN RUDMAN of New Hampshire for the personal attention and hard work he devoted to bringing S. 881 to the Senate floor today. He has shown remarkable leadership, and I am very pleased to have worked with him on this bill.

As a member of the Senate Small Business Committee and an original cosponsor of S. 881, I held a field hearing in California where so many wonderful innovative ideas are born and brought to fruition. The name "Silicon Valley" is synonomous with innovation and electronic miracles. As was written in Electronics magazine:

Nothing is so constant for the electronics industries as change. In at least that respect, electronics and California are ideal mates . . . electronics in that region stands on the threshold of some of the most fundamental changes in its relatively short history, many of them deeply affected by and affecting the Golden State of California.

The purpose of this legislation is to increase opportunities to small technological firms and inventors for innovation in America, a nation known throughout the world for technological progress—new inventions. Unfortunately, we are experiencing a serious decline in technological innovation that needs to be fortified. One indication of this decline is the decrease in the number of U.S. patents issued over the past decade. In 1970, the U.S. Patent Office issued 70,-131 patents; in 1980, it issued only 61,-227. Equally significant is the rise in the percentage of U.S. patents issued to residents of foreign countries. While only 25 percent of all U.S. patents issued in 1970 went to foreigners, in 1980 this number rose to nearly 40 percent. If we are to reverse this trend, a more coordinated Federal strategy must be developed.

At the present time, however, the Federal Government spends less than 5 percent of its research and development (R. & D.) funds to small businesses, although individual entrepreneurs and firms account for more than one-half of all inventions and innovations. This legislation directs all Federal agencies with R. & D. budgets of over $100 million to establish a small business innovation research (SBIR) program and to set aside within 3 years a total of only 1 percent of that budget for small business

research. It requires no additional appropriations, and the SBIR program is modeled after the program established by the National Science Foundation, which was highly praised by several witnesses.

The impact of this legislation will be significant. Since small businesses have among the fastest rates of growth in employment, sales, exports, and productivity in our economy, it will help to stimulate the revitalization of our economy. The Federation of American Scientists testified at a hearing held by Senator RUDMAN in Washington that the benefits of this legislation will not be limited to small businesses, scientists and engineers, and universities. Large businesses will interact as licensers of the technology developed, as manufacturers and distributors of the products, and receivers of follow-on Government contracts.

Mr. President, I believe we will all benefit from this legislation. We need new technologies which will provide new, high quality and inexpensive products; new technologies to make our workplaces safer and healthier, and to provide meaningful and satisfying employment.

Thank you, Mr. President.●

● Mr. D'AMATO. Mr. President, technical innovations resulting from research and development (R. & D.) increase productivity, create new jobs, stimulate economic growth, and enhance the ability of products to compete in foreign markets. America's rise to economic dominance has largely been due to an unflinching commitment to R. & D. Economic success is inexorably tied to the discovery of new products and innovative techniques.

When technological innovation lags, however, serious problems emerge. Unfortunately, this has been the situation in the United States for the past decade. The economy has stagnated, jobs have been lost, and the balance-of-payments deficit has widened.

This decline in U.S. technical advances is all too readily apparent. For example, between 1970 and 1980 the annual number of patents issued by the U.S. Patent Office fell by 12.7 percent from 70,131 to only 61,227. Moreover, the percentage of these patents issued to residents of foreign countries increased by 60 percent during the decade from 25 percent of the total in 1970 to 40 percent in 1980.

We cannot allow this situation to deteriorate any further. We cannot allow ourselves to become dependent upon foreign nations for the research and development so necessary to economic prosperity. Domestic R. & D. must be encouraged.

Since the Federal Government now underwrites approximately one-half of all domestic R. & D., it is clearly up to the Federal Government to provide this encouragement. In providing this encouragement, however, we must take advantage of the superior innovative capabilities of America's small businesses. As noted in the final report of the Commerce Department's Advisory Committee on Industrial Innovation:

A fundamental reason for the decline in innovation is the failure of Federal policymakers and administrators to recognize the contributions from small firms to technological innovation.

Despite the widely recognized fact that small businesses are the most efficient and fertile source of innovations, less than 4 percent of the Federal R. & D. dollar is now spent with small firms. This underutilization of small business is both counterproductive and regrettable.

Between 1953 and 1973 firms with fewer than 1,000 employees produced approximately one-half of all major U.S. innovations. During this period small firms had a ratio of innovations to R. & D. employment four times as great as the ratio for large firms. Moreover, the cost per R. & D. scientist or engineer was only one-half the cost in small firms of what it was in large firms.

A National Science Foundation survey of major innovations revealed that small firms have produced about 24 times as many innovations per R. & D. dollar as large firms and David Birch of MIT has found that firms with 500 or fewer employees provided 87 percent of all new jobs in the United States between 1969 and 1976. He also discovered that the small, technology-oriented firm was absolutely the best job creator of all.

Given the obvious and overwhelming rewards of small business R. & D., it is disastrous that so much of our federally funded R. & D. is conducted by large companies. In 1979 only 20 firms received 71 percent of all Federal R. & D. contracted to industry.

This situation must be addressed. Small businesses must be granted more Federal R. & D. contracts. Passage of S. 881 will take a major step in this direction. As the Advisory Committee on Industrial Innovation has stated:

Government policies and regulations that treat large and small firms equally are, in fact, discriminatory against small firms.

Thus, S. 881, the Small Business Innovation Research Act of 1981, seeks to strengthen the role of small companies in federally funded R. & D. by establishing the small business innovation research program through which small firms can be systematically used to meet Federal R. & D. needs. S. 881 is a necessary first step if we are to once again attain the R. & D. dominance so vital to restore health and strength to the American economy.●

Mr. EAGLETON. Mr. President, while I am generally sympathetic to the purposes of the bill before us, S. 881, the Small Business Innovation Research Act of 1981, I wish to raise several concerns with respect to its potential impact on the basic biomedical research programs at the National Institutes of Health.

In my view, the biomedical research effort at the National Institutes of Health is considerably different from the other R. & D. efforts of other Government agencies. Perhaps its most striking difference is that it requires a multidisciplinary approach. Given this considerable difference, it would be my preference to exempt the NIH from this legislation. I would hope that the Small Business Committee members would give this very serious consideration as the bill works its way through Congress.

However, as the bill is reported from committee, the NIH is covered by its provisions. In the context of the broad concern I have articulated above, I would like to raise three specific concerns.

My first concern relates to the peer review system. Although the committee report to accompany the bill "strongly recommends that outside peer review be used wherever possible," it falls short of requiring outside peer review. The NIH peer review system consists of many discipline-oriented initial review groups which consider the scientific and technical merit of each grant application and render their recommendations to the appropriate advisory council or board which provides final recommendations. The advisory councils or boards consider many factors, among them, first, the relative scientific merit of a project; second, the importance of a particular project to the program objectives of the appropriate institute or division; third, the need to protect previous investments in meritorious ongoing research; and fourth, the need to provide opportunities for new research and researchers to enter the system.

The international recognition of the NIH as one of the preeminent biomedical research institutes in the world has primarily resulted from the intensive, incisive review of grant applications under the peer review system.

I hope that the distinguished floor manager of the bill, Mr. RUDMAN, would agree that no provision of S. 881 is intended to lessen that rigorous review of all proposals, whether from the small business, the academic, or the scientific community. It is that process which assures the high quality of the NIH extramural program.

Second, I would like to clarify the intent of the committee with respect to obligation of the funds under the 1-percent set-aside. Should any agency not receive proposals from small business of sufficiently high quality to merit funding, would it be the intent under this bill that the amount of funds set aside from small business be carried over to the subsequent fiscal year? In other words, I am concerned that a mandatory set-aside of funds, in which funds must be expended in each fiscal year, could lead to funding of lesser quality research or the loss of funds to any given agency which chooses not to fund any small business proposals because they do not meet the agency's standards of excellence. Again, Mr. President, this concern stems not from any belief that small business generally lacks R. & D. capability, but from the very specialized nature of basic biomedical research.

Finally, Mr. President, I would like to expand upon the committee's intent with respect to the legislation's reporting requirements. Under the bill, the agencies conducting SBIR programs must report at least annually to both the Office of Science and Technology Policy and the Small Business Administration concerning the conduct of these programs. Those two bodies must in turn report annually to the Senate and House Committees on Small Business. I believe it is important to emphasize that the agencies conducting SBIR programs report promptly to

OSTP and SBA if they are experiencing difficulty in fulfilling the requirements under this program, and that OSTP and SBA promptly so advise the Congress.

Specifically, Congress should be advised of any agency's need to carry over the funds under the setaside, as discussed above, or any further implementation problems which may arise during the 3-year phase-in of the program.

Mr. RUDMAN. I appreciate the concerns of the Senator from Missouri, and while I do not share his view that the NIH should be exempted from coverage under the bill, under the provisions of the bill, the NIH can apply its rigorous peer review system to research proposals from the small business community, should it choose to do so. In terms of the usual 9-month review cycle at the NIH, I hope that that time frame could be shortened somewhat. I understand that at least some institutes are developing a shorter review cycle, on the order of 5 months, for review of small grants, and perhaps that shortened procedure could be used for applications from small business.

With respect to the obligation of funds under the setaside, I concur with the Senator that, in those instances where quality research proposals are not submitted, agencies should be allowed to carry forward the funds earmarked for small business for obligation under small business innovation programs. If it takes time for the small business community to gear up its capacity for basic R. & D., this should allow time for the development of meritorious research proposals. As you well know, the small business community has not had the opportunity to develop expertise in applying for NIH grants. In fact, the university community has for the last decade and a half been virtually the only recipient of these grant funds. But it is clearly not the intent of this Senator, nor I am sure of any other Senate sponsor, that funds under the setaside be used to support research of questionable scientific or technical merit.

Lastly, I share the Senator's view that the reporting mechanism under the bill is extremely important. The stated purpose of the legislation is to use our limited R. & D. resources in a way that guarantees the maximum benefit. If the SBIR program cannot or does not achieve that goal in the area of basic biomedical science, Congress should know about it so that we can make appropriate modifications to the program.

Mr. KENNEDY. I fully subscribe to the concerns expressed by Senator EAGLETON, and I appreciate Chairman RUDMAN'S assurances that Congress will closely monitor the SBIR legislation as it applies to NIH research to prevent any reduction in the quality and effectiveness of our basic research effort.

Mr. DIXON. Mr. President, I am delighted to yield to my warm friend, the senior Senator from Massachusetts, 10 minutes from our side of the bill.

Mr. KENNEDY. I thank the Senator from Illinois.

Mr. President, I rise in support of the Small Business Innovation Research Act of 1981.

The support for this bill in the Senate is considerable. Respected Members from both sides of the aisle are sponsors of this legislation. And I think it is reflective of the growing recognition in Congress that strong steps must be taken to increase our Nation's research and development efforts.

Two of my colleagues deserve special mention for their leadership in connection with this legislation. Senator RUDMAN, who is the principle sponsor of S. 881 and who chairs the Small Business Subcommittee on Innovation and Technology, has demonstrated a deep understanding of our Nation's research and development needs, and particularly, the role for small business in this critical area. And Senator WEICKER, who is the respected chairman of the Small Business Committee and also an original sponsor of this bill, has shown, once again, that he is one of the most effective spokesmen on behalf of small business issues.

I also wish to acknowledge the very special efforts of the Senator from Georgia, Senator NUNN, and also the work and the efforts of the Senator from Illinois, Senator DIXON.

Finally, I would like to mention SBANE, the Small Business Association of New England, for the tireless work of its members in helping to fashion this legislation and in building support for its passage. Once again, SBANE has distinguished itself as one of the most effective small business groups in our Nation.

The problem we seek to address in this legislation is a serious one. In our ability to succeed lies the hope of making real progress in the battle against inflation, high interest rates, and rising high unemployment.

Over the last decade, the United States has lagged behind a number of its competitors in the world market in the rate of productivity increase. While this is certainly attributable to a combination of factors, the decline in our rate of technological innovation has been among the central causes. Studies have indicated that our Nation's advances in technology are coming more slowly than just a decade ago, threatening our competitiveness internationally and the vitality of our economy here at home.

S. 881 represents the opportunity to arrest this decline by harnessing the unique ability of small businesses in the generation of new innovations.

Today, less than 4 percent of our Federal R. & D. expenditures go to small business. And yet study after study has demonstrated that dollar for dollar, smaller firms produce more innovations than do their larger counterparts. Studies conducted by MIT, the Commerce Department, and the Office of Management and Budget have consistently reported that small firms represent the No. 1 source of new innovations in our economy, in addition to being the No. 1 creator of jobs.

Since the Federal Government funds nearly one-half of all the research and development in our Nation, by targeting more of this money to the firms which use it most productively, we can surely enhance our record of innovation and improve our productivity.

The success of the National Science Foundation's small business innovation research program, after which this legislation is modeled, is indicative of this legislation's great potential in promoting innovation in the business sector.

In 1977, the National Science Foundation commenced the program for which this legislation is named. Making a portion of its budget available to smaller firms, it instituted a three phase program to support research by small, high technology firms. Since 1977, the program has enabled 21 firms to attract about $9 million in private investment and to double their employment.

The legislation we are considering today is in many respects a mirror image of the NSF program. Federal agencies with R. & D. budgets in excess of $100 million are required to establish small business innovation research programs funded with 1 percent of their extramural R. & D. budgets. Small businesses will be invited to submit proposals to an agency for research in accordance with the agency's goals. Those with the greatest promise will be funded up to $50,000 to determine whether research is technically feasible. Second phase support up to $500,000 will be made available to phase I firms demonstrating a likelihood of success in further research. And phase III, or actual production is to be financed by private capital.

The National Science Foundation SBIR program has been enormously successful in expanding the role of research and development in our economy. I am proud to have introduced the legislation in 1975 that resulted in this program—the first set-aside of Federal R. & D. dollars for small business. Since then, the program has helped small companies all over the United States explore new ideas at a stage where outside support is so difficult to attain, and to develop those ideas through the production and marketing phases of a business. In my own State of Massachusetts, companies like Collaborative Research, Inc., in the area of genetic research, and Moleculon Research Corp. in the area of toxic gas monitoring have demonstrated the enormous potential of the SBIR program.

Mr. President, for 10 months we have been debating the steps we must take to return our economy to prosperity. But in the debate over tax cuts and budget cuts, we must not forget the critical role innovation plays in our economy as well as the role played by small business.

Finally, I am hopeful that the strong support for this bill by the Senate of the United States indicates that we are finally awakening to the recognition that research and development is vitally important to our economy. In the recent budget cuts, we have seen, tragically, the elimination of support for research and development in a variety of different areas including energy research, which is so extremely important to Massachusetts and New England. We must not back off our support for R. & D.—and for those who have doubts, I would point to our competitors abroad and their emphasis on R. & D.

Each of our major competitors is devoting a greater portion of their resources to R. & D. than we are, and they

are using those initiatives to beat us in the world marketplace. If we hope to regain our stature as the world's leader in innovation, then we must move forward with our R. & D. efforts as well.

In recent years we have taken some steps to improve the environment for innovation in our Nation and I have been proud to have worked actively on behalf of those efforts. Last year we succeeded in enacting into law the Small Business and University Patent Act, to improve the incentives for innovation financed by the Federal Government.

This year, we must take the next step in enacting the Small Business Innovation Research Act. We can do much to enhance our economic recovery and strengthen our long-term position in world commerce with this legislation, and I urge my colleagues to join me in supporting it.

(Mrs. KASSEBAUM assumed the chair.)

Mr. RUDMAN. I thank the Senator from Massachusetts for his leadership and his strong support for this bill.

Madam President, I yield 10 minutes to the Senator from Missouri.

Mr. DANFORTH. Madam President, I thank the Senator from New Hampshire. I would like to present some remarks and then hopefully elicit some comments from the majority and minority floor managers of the bill.

Madam President, let me say at the outset that I am absolutely convinced that the future of this country's economy is, in very large measure, dependent upon our ability to invest what we should in research. It is clear that the United States, in the last decade or so, has not been keeping up with other countries. One of the reasons why we have been falling behind in world trade, where this year we are facing a $15 billion deficit with Japan, is that while 20 years ago we had a clear technological advantage over the rest of the world, we are losing it. We are not putting the kinds of effort and funds into research that other countries are, and we are not putting the same kind of effort into research that the United States historically has.

Therefore, Madam President, I have personally taken a great interest in the Congress in supporting measures which are likely to increase the investment of our country in research and development. For example, in the last tax bill that was passed by Congress this past summer, there were two provisions which touched specifically on the issue of research. One provision provided a tax credit for incremental increases in business spending for research and development. That was my bill that found its way into the Tax Act.

Another provision which I had worked on very early and which Senator BRADLEY took the lead with respect to the last tax act had to do with business contributions to universities for research and development. Those two provisions were tax credits in order to stimulate research—one in order to stimulate business research, business spending, on matters of practical application to the business; the other was an effort to increase the cooperation between the business community and academia, to give the business community a greater incentive for making contributions to the academic community for basic research. So, Madam President, when I first saw S. 881, it was my belief that here was another effort to encourage research, to increase the amount of research that was accomplished.

I very hastily signed on as a cosponsor for the bill, because it was my view that small business has played and does play a very important role in research and development and that small business should require or should receive the kind of encouragement which this bill gives it. I still plan to vote for this bill, but for the first time in the 5 years that I have been in the Senate, I have pulled my name off as a cosponsor. I want to make it clear why I did that and I want on this basis, hopefully, to elicit a response from the managers of the bill which would be reassuring to me.

The basis for withdrawing as a cosponsor was the advice that I received from the academic community in my State of Missouri that this bill was very threatening to them. The universities felt that S. 881 posed a threat. They state their position as follows: That the Federal Government is now going through a phase of squeezing the budget; that research money is going to be more difficult for the universities to come by than has been the case in the past; grants are simply not going to be there in the generous amounts that they have been in the past; therefore, what they see in this bill is that those funds that are available will be in part reallocated from the university community and particularly from basic research to small business.

They feel that setasides do not increase the total amount of money that is available for research but simply recut the pie. To the extent that somebody else is cut into the pie, the academic community is cut out. They understand that the setaside is only 1 percent of Government spending for research and, as I understand the Schmitt amendment, only 1 percent of what is available for basic research could be reached. But the academics with whom I have discussed this bill are concerned that this is simply the first slice of the pie and that, once a taste is acquired for the concept of setasides, that taste is going to be one that grows in the future and that perhaps becomes insatiable; that if it is 1 percent for small business today, it might be 85 percent for small business next year; that if it is small business that receives the setaside now, it might be a geographical region that receives the setaside a few years from now. Therefore, they feel that the camel's nose might be going under the tent and that our effort is not going to be to expand the total amount of research that is done but, instead, to simply reallocate it and reallocate it on the basis of something other than merit.

Madam President, their view, as I understand it, is that Government research should not be like, for example, revenue sharing or like grants-in-aid to States or to local governments because there the effort is to simply distribute funds on the basis of need. Research is different from need. Research is different from welfare. Research is the purchase of a product, the investment of funds where, hopefully, we can get the most return for the dollars spent and the quality and quantity of research produced. Therefore, if the criterion for making Federal grants is something other than pure merit, let the chips fall where they may. If it is, instead, the cutting up for redistribution of the pie according to size or the type of recipient, they feel that the total research picture for the United States might be in jeopardy. I shall vote for the bill on the theory that we do need to encourage small business to do a better job on research and development and that there is great room for improvement of our national economy if we do so.

Madam President, I did want to express to the Senate the concerns that have been expressed to me as to where we are heading and hopefully elicit a response of the managers.

Mr. GLENN. Madam President, will the Senator yield for a question, because I have some of the same concerns the Senator has?

Mr. DANFORTH. Certainly, Madam President.

Mr. GLENN. Madam President, I had proposed speaking to the floor manager of the bill in this same regard, because I have concerns about what happens to the university community also with regard to this bill, but the way I looked at it was in a slightly different vein, I guess. I assumed that any money that was granted to corporations or companies that had a basic research idea would, in many, many cases, be in effect subcontracted to the universities or the colleges. There are not many of these smaller businesses that really have the laboratories and facilities and indeed the scientists on their own payroll, yet they may have one or two people who have some brilliant ideas. Many brilliant ideas from owners of small businesses have started exacty like this in the small business community. Then it would be a quite natural thing to turn to a well staffed and equipped lab next door at a university or college or research center of some kind, to get their staff people in turn to work out some of the details and work with small business, which would mean they would not have to set up their own lab.

I had looked at this as potentially a boon to universities because of that probable arrangement that would prevail out of the small business community.

Madam President, the question I was planning later on to ask, which we might jointly address now is, is there anything in this bill that would prohibit that kind of subcontracting so long as it was not just a front for a university or college but a legitimate research concern? Would this be legal and would our legislative history show that it would be quite proper for the idea which had germinated in the small business community? Would there be anything in this bill that would prevent that from, in turn, being worked on on a subcontract from that business, under the grant provisions

here, by a college or university? It seems to me that that would take care of at least some measure of the fears of the Senator from Missouri.

The PRESIDING OFFICER. The 10 minutes allotted to the Senator from Missouri have expired.

Mr. RUDMAN. Mr. President, I yield additional time if the Senator from Ohio wishes to make another comment. I should like to respond to the Senator from Ohio and the Senator from Missouri.

I yield 2 additional minutes to the Senator from Missouri.

Mr. DANFORTH. I thank the Senator from New Hampshire.

I do not know the answer to the question asked by the Senator. I can say this: We had essentially the same provision in the tax bill we passed last summer, where we provided that businesses would get a credit for incremental increases in research and development spending, and they could get that whether they spent it in-house or contracted with a college or university to do the research for them. I hope that will be the case.

In the broader sense, I say that university people with whom I have spoken are terribly concerned about this bill, very fearful that they are going to lose out, and that what is available to them now, which is going to be in increasingly short supply in the future, is going to be in even shorter supply; that Congress is going to be making decisions, Government is going to be making decisions, on the allocation of research funds, not on the basis of the merit of the project but, instead, simply on the basis of spreading the money on some nonresearch basis, nonsubstantive basis, to small business.

Mr. RUDMAN. Madam President, I wish to respond briefly to the comments of my two friends.

First, I say to the Senator from Missouri that we approached this bill knowing full well that a great amount of money in the National Science Foundation program for basic research has gone to those with university affiliations.

Second, the overwhelming evidence has been that an enormous amount of leveraging comes from small business innovation.

On the other hand, there was overwhelming evidence that there was not fair competition between the small, private entrepreneur and the large university or large corporation.

The Senator's concern is a legitimate one which is shared by all of us who recognize the kind of work the universities do for the National Institutes of Health and others. That is one reason why we believe the amendment of Senator SCHMITT was most effective in meeting the problem.

Let me go a step beyond that. We believe that the $415 million that eventually will come into the private sector under this legislation will leverage an enormous amount of economic activity.

Under an amendment that I believe will be proposed by the Senator from Ohio, and which the committee is prepared to agree to, we will have a good overview by GAO of this matter 2 years out.

It is not our intention with this bill to invade the province of the university community; but, in fairness to the small business community, I am sure the Senator from Missouri will agree with me that the university community, and quite properly so, has had probably the largest setaside of any group in America in the area of basic research. Times are changing.

The Senator from Ohio would be interested to learn that there are more than 1,800 firms in the genetic research business today which are privately owned.

So I say that it is not our intention to impinge on the university community. It is our intention to give small business at least a fair shake, which we do not believe they are getting now.

The PRESIDING OFFICER. Who yields time?

Mr. RUDMAN. Madam President, I will yield a small amount of additional time to the Senator from Missouri. We are running short of time of this side.

Mr. DANFORTH. I wish to ask two short questions.

First, would the Senator from New Hampshire view this as the camel's nose under the tent? Is this going to be the precedent for many more setasides, or can we contain this once we establish the precedent?

Mr. RUDMAN. Our attitude is that this is the percentage which should be applied. We believe that the House percentage is probably too high, and they probably are working toward our percentage for the final bill.

Mr. DANFORTH. The precedent for setasides, therefore, would not be established. This would be sui generis.

Mr. RUDMAN. Absolutely. We believe that the evidence in this case is so overwhelming that there are no other cases we know of that would generate the kind of economic activity we could generate with this particular setaside.

Mr. DANFORTH. Second, I hope the Senator from New Hampshire would join in an effort to look for ways to expand the total research pie in the future that would be available to universities, colleges, research laboratories of one kind or another, as well as small business.

Mr. RUDMAN. I certainly would join in that effort. I know that in the coming months and years, that may be difficult, but it is worth looking at.

Mr. DANFORTH. I thank the Senator.

Mr. HATFIELD. Madam President, I am a strong supporter of S. 881 because the evidence shows that small businesses are receiving less than 4 cents of every Federal R. & D. dollar. Those firms which employ less than 500 employees produce 2.4 times as many innovations per employee as the large firms. Since the Federal Government is spending $35 billion a year on R. & D., it is appropriate that we set aside 1 percent of an agency's funds for small firms who are producing needed innovations.

However, I am concerned about the effect of this legislation on basic research funds. Basic research aims at the creation of new knowledge and generally is not conducted with a commercial application in mind. Basic research, however, is extremely beneficial to our economy by providing a basis of knowledge which leads to new innovations. Since basic research constitutes only $5 billion of our total Federal R. & D. effort, we should be careful to emphasize that it is not our intent to cut basic research funds by 1 percent. At a time when we are enacting deep cuts in discretionary appropriations, I am hesitant to support any legislation which will further cut 1 percent from basic research.

Madam President, it is my understanding that we are attempting to maximize each dollar of Federal R. & D. that is spent. If there are areas where small business lacks the expertise to do basic research—for example, in high-energy physics or molecular biology—then a Federal agency should seek to maximize its basic research dollars by utilizing those universities which have developed a special expertise in basic research. In no way do we intend to reduce basic research funding.

In those areas where small business has the expertise to conduct basic research that is needed, it should be eligible to achieve research awards through open competition. If small business is unable to perform high-quality basic research, it simply should not be granted the research contract. In my view, the final legislation enacted should maximize each dollar of basic research that is funded.

Madam President, with these concerns in mind I wholeheartedly endorse S. 881, and commend Senators, RUDMAN, WEICKER, NUNN, and others on the Small Business Committee for their diligent effort on behalf of the legislation.

UP AMENDMENT NO. 762

(Purpose: To require the Comptroller General to report on the effect of the Act upon basic research programs)

Mr. GLENN. Madam President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 762:

On page 17, between lines 16 and 17, insert the following:

"(g) The Comptroller General shall, no later than two years following enactment of the Small Business Innovation Research Act of 1981, report to the Senate and the House of Representatives on the quality, quantity and nature of the basic research conducted under this Act, including the judgment of the Departments and Agencies involved as to the effect of this Act on their overall basic research programs,".

Mr. GLENN. Madam President, my amendment to S. 881 seeks to strike a balance between two competing concerns that I believe are shared by many Senators. On the one hand, we are all interested in doing everything we can to assist this Nation's small business community. That is why 90 or more Senators have now signed on as cosponsors of S. 881, the Small Business Innovation Act. We know that small business is the backbone of the American economy, accounting for more than half of our private sector employment.

In fact, I believe that the actual fig-

ure is around 55 percent of the Nation's employment. It accounts for half of all industrial inventions and innovations and almost half of our gross national product. We also know that recent economic conditions have not been kind to smaller firms, with inflation and interest rates combining to exacerbate their plight with respect to lack of capital. Because we want to help them—and because we are deeply impressed with their track record regarding efficiency and innovation—a large majority of the Senate will vote to support S. 881.

On the other hand, some of us have long been deeply concerned about the declining amount of basic research that is being conducted in this country. We know that research and development historically has been America's most fundamental tool for meeting and shaping the challenges of the future—and we know that basic research is the cutting edge of that tool.

It is basic research that is innovative. Basic research is inquiry into the unknown. Basic research is the exercise of our curiosity about how we do things in a different and a better way. Basic research is one of the triumvirate of items that is responsible for this Nation's productivity, and our leadership position in the world. The triumvirate to which I refer is, first, research and development; second, education; and third, a free enterprise system that is willing and able to pounce on these new ideas and make use of them in a commercial way.

So some of us have decried the shrinking number of research grants available to our universities—the subject just addressed by the distinguished Senator from Missouri (Mr. DANFORTH).

We have fought against ill-advised cuts in the budgets of the National Science Foundation, the National Institutes of Health, the Department of Energy, the National Aeronautics and Space Administration, and other Federal agencies which do the bulk of our basic research.

The Department of Agriculture should probably be added to that list, for the research done in agriculture has been the envy of the world and is certainly one of the greatest success stories of all time.

And those of us who have been concerned about basic research have told everyone who would listen that we simply cannot afford to be pennywise in this year's budget and pound foolish for the future of this Nation when it comes to this crucial area.

So, Madam President, that is why many of us have been very deeply concerned about the fears expressed by the university and research communities regarding S. 881 that the distinguished Senator from Missouri just finished speaking about.

Senator Schmitt's amendment which was adopted and which I enthusiastically support, is designed to allay those concerns by insuring that basic research budgets are not disproportionately raided in order to supply the small business set-aside called for in this bill.

Nevertheless, I know that many people remain skeptical. They doubt that smaller businesses will be able to perform the basic research that is required. They say that although businesses do well in the area of applied research, they do considerably less well in the area of basic research—and that a substantial portion of their work may therefore be of less than the highest quality. Worst of all, they fear that the small business research program established by S. 881 might have a detrimental effect on the overall basic research efforts of Federal agencies and departments.

Frankly, I believe that these fears are exaggerated. I believe that smaller firms are capable of doing basic research that meets the highest standards of quality. After all, NASA itself testified before the Small Business Committee that it was in the area of basic research that "we find small business contributions and potential particularly relevant."

But the fact remains that no one knows for certain what the effects of this act will be on basic research. And I believe that we owe it to ourselves to find out, especially before deciding to lock this program in for the indefinite future. So my amendment is very simple. It requires the GAO, within 2 years of this bill's enactment, to submit a report to Congress specifying precisely what the impact has been. The GAO report will analyze the quality, quantity and nature of the basic research that has been conducted by small business—and it will include the agencies' assessments of what impact the act has had on their overall basic research programs, and I emphasize the words "basic research."

Madam President, I believe that this amendment will provide Congress with the information it needs to determine whether the program we are creating is working and whether it should be modified, expanded or even terminated.

As I said, I fully expect that it will work and that it will work well. In answer to a question I raised a few moments ago, the distinguished Senator from New Hampshire (Mr. RUDMAN) indicated that small businesses would not be prohibited from, in effect, "subcontracting" out to universities some of the work they may receive under this act. I appreciate those assurances because I believe some businesses may find that to be necessary. But even though I believe this act will work well, I also believe that a GAO examination of the program after 2 years will be in everyone's best interest. I urge my colleagues to support this amendment.

Mr. RUDMAN. Madam President, I thank the Senator from Ohio for proposing a very constructive amendment which we fully support.

Certainly, any program of this type should be looked at very closely a year or 2 after its inception.

By this amendment we insure that that kind of oversight will in fact occur. We will also have a chance to examine this problem of basic research that we are all concerned about and have an evaluation that will enable us to then come back to this floor if necessary and make changes if necessary.

We are certainly prepared to accept this amendment.

Mr. GLENN. Madam President, I yield back all time if appropriate and move adoption of the amendment.

The PRESIDING OFFICER. Does the Senator yield back all time?

Mr. LEVIN. Madam President, I yield myself 2 minutes.

Madam President, the amendment of the Senator from Ohio is indeed a contribution to this bill. It will give us added assurance that the kind of review is undertaken that will make certain that the bill carries out its intended purposes.

I do have some concern about how the GAO will report on the "quality" of the research conducted. The first phase proposals, under which SBIR recipients are provided limited funds to determine the scientific and technical merit and feasibility of ideas, will just be underway.

So I am a little bit concerned about that, but I believe that the GAO can take that into consideration.

In addition, we hope that all of these research proposals would go through the agencies' existing peer review system to insure that only quality proposals are funded.

With respect to the reports on "quantity" and "nature," much of this information will be reported to Congress under the current terms of the legislation. For example, new section 9(b)(6) of the Small Business Act, as added by this bill, requires SBA to independently review the implementation and operation of the SBIR program and report on that review to Congress. Under new subsection 9(f), the Office of Science and Technology Policy has a similar review and reporting requirement.

Finally, new section 9(c)(1)(C) requires each agency with an SBIR program to report to SBA and the Office of Science and Technology Policy on the number of research awards, an identification of the award made and a comparison of small business versus other awards for R. & D. regardless of whether those awards to small business are made pursuant to an SBIR program.

These are technical concerns I believe we can work out easily with the Senator from Ohio, and the House. I am prepared to accept the amendment.

I commend the Senator from Ohio for his usual constructive contribution to the debate and legislation.

The PRESIDING OFFICER. If there be no further debate on the amendment, the question is on agreeing to the amendment of the Senator from Ohio.

The amendment (UP No. 762) was agreed to.

Mr. GLENN. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RUDMAN. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RUDMAN. Madam President, there remains some puzzlement in my mind and in the minds of others on the committee regarding the university system's seemingly dogged opposition to this bill, particularly in light of the addition of Senator SCHMITT's meritorious amendment which imposes a strict ceiling on the possible reduction which could occur in the area of federally funded

basic research activities. As the bill excludes all research done intramurally from its research base, so the amendment excluded all intramural basic research base.

Therefore, the ceiling on reallocations from ongoing basic research activities funded by the Federal Government will be effectively about three-fourths of 1 percent of total outlays in that area. The National Institutes of Health, for example, whose representative admitted in testimony on S. 881 to maintaining a 100-percent set-aside for the university and nonprofit community in the area of research grants over the last 15 or more years would be required under the Schmitt amendment to use no more than approximately $15 million out of their total yearly expenditure in basic research grants, currently over $2 billion.

The figure I use approximates an absolute ceiling, recognizing the possibility that the actual reallocation could be much lower than this comparatively small sum. A representative of the Federation of American Scientists, an organization which is comprised of over 5,000 natural and social scientists and engineers and includes one-half of the living U.S. Nobel laureates among its members, strongly endorsed the legislation and viewed the reallocation in these terms.

Before the Federation became involved in this, we went through the agency budgets carefully and looked at the kinds of funding areas the agencies engaged in, and we compared the budgets overall for the agencies with the budgets which went to universities, and those which went to basic applied and development. We came to the conclusion that there is plenty of flexibility in the agency budgets to include this program's one percent set-aside, if you want to use that term, without jeopardizing, in fact, any of the research that the federal government does. It is our conclusion that much of the agency research if put through an SBIR program, would be done far more cost effectively, which means that we could do more effectively, which means that we could do more rather than less research as a result of this program.

I believe the opposition of the universities rests on two substantive assumptions, apart from an underlying raw desire to protect all of their funding at this time of necessary budget restraint and the need to improve the efficiency of Federal expenditures. The two assumptions to which I refer are:

First. That the inevitable consequences of set-aside proposals will be the receipt of lower quality projects; and

Second. That there are not enough quality small firms in America to justify this kind of minimal expenditure in, for example, the biomedical research area.

I am submitting for the RECORD a colloquy with Senator EAGLETON of Missouri which outlines my concern that these objections undergo ongoing review through the reporting process on SBIR programs and through hearings, if necessary, in the Small Business Committees of the House and Senate. However, I must state that I have strong reason to doubt the validity of these assumptions for two major reasons. The first is that those putting forward these objections have not been able to substantiate their claims with a single shred of evidence. The second is that we have received a significant amount of testimony from experts in the area to the contrary.

You will be interested to know that Ms. Anne Eskerson, director of the Bentley College Small Business Resource Development Center in Waltham, Mass., stated in one of our field hearings that "there is no evidence whatsoever that the standard (of the National Science Foundation SBIR projects) has been lower" than traditionally funded projects. Indeed, in her review of the program she found that the standard is "comparable, if not superior in many cases to that which is being received from more traditional sources applying to the National Science Foundation." Statistics indicate that only one in eight Phase I proposals have been funded by the National Science Foundation.

Of the funded phase I proposals, 25 percent have historically received Phase II funding. Thus, only about 3 percent of all proposals, proposals which themselves underwent a peer review process, received the maximum funding available. Since S. 881 uses the National Science Foundation program as its model, there is no reason to believe that the results will be otherwise. Nor am I concerned that there exists too few small, high-technology firms involved in the life sciences field.

Conservative research, submitted in formal testimony before our committee, indicates that there are at least 2,600 firms involved in a full range of biomedical research projects. I believe that this is one reason that the Federation of American Scientists, Ms. Eskerson and others from the university community have testified in favor of the proposed legislation.

In conclusion, it is my sense of the actual situation that these objections are only window dressing for an underlying fear by administrators of the loss of any funding despite arguments relating to the relative merit of small firms doing research on Federal objectives. Efficiency of Government expenditures is clearly not their main concern. Dr. Roland Lamont-Havers, who opposed this legislation and was speaking at our Boston field hearing on behalf of Massachusetts General Hospital, testified in this way, which I believe best characterizes these administrators' true worries.

What I would be concerned about, in saying that, would be the fact that funds are then set aside, protected funds, which would prevent one of our own investigators not being supported. That's all I'm concerned about. I'm not really concerned about whether or not there's funding. I'm concerned about protecting my own investigators as far as their funding, and any reduction in funds within that system is going to have a perturbation within our system.

I am afraid I must say to you now, as I did to Dr. Lamont-Havers, that if that is the real reason for opposition to the bill, it is not substantive in nature, but represents only an expression of self interest which ignores the overriding national interest.

Mr. LEVIN. Madam President, I yield to the Senator from Washington such time on the bill as he may need.

Mr. JACKSON. Madam President, the Small Business Innovation Act comes to the full Senate with much support. Not many pieces of legislation can boast just under 90 cosponsors.

As indicated by the extent of this support, the goals of this legislation—to enhance innovation and productivity and to foster small businesses as a source of innovation—are certainly worthy ends.

My purpose in addressing the Senate today is to express concerns which have been brought to my attention by the University of Washington Medical School. I understand that these concerns are shared by virtually every medical school throughout the country.

The problem rests in mandating a fixed percentage of agency research and development funds be set aside to support the activities of one class of performing organizations.

Competition and free enterprise are the cornerstones of our economy. I would not want to encourage any action which might impede agency ability to base funding decisions on the technical and scientific merit of proposals. If award mechanisms are to fulfill their purpose of insuring the best use of public moneys to meet Federal research and development needs, guaranteeing a fixed pool of dollars for particular entities seems to be contradictory.

At the National Institutes of Health, which has an exemplary peer review system for awarding biomedical research grants, fixed pools would create two standards in the award selection process. Small business proposals would be judged only against proposals from other small firms and not against all other proposals in the same field of research. My question is whether this maximizes research efforts so that the health of our citizens through advances in the biomedical sciences is most effectively pursued.

Another concern I have is that the 1-percent set-aside not rise higher than that percentage for basic research projects. As one looks across the agencies, there are whole areas of development in the R. & D. budgets which may be held harmless to such a set-aside; and as a result, basic research budgets could suffer inordinately. Applied research and development projects can be committed far in advance. In such a case, the actual cost to basic research would be greater than its original pro rata share. Senator SCHMITT is offering an amendment to guarantee that basic research funds are not tapped disproportionately. Also there are certain fixed costs, such as equipment and operations which could not be affected by the 1-percent set-aside and would therefore raise the cost to basic research even higher.

The fostering of small businesses is a laudable goal. I want only to raise issues to assure that what we are doing also fosters biomedical research without undermining the purpose of these research programs—the improvement in the health and well-being of the American people.

Mr. MATHIAS. Madam President, I make the point of order that a quorum is not present.

The PRESIDING OFFICER. On whose time?

Mr. MATHIAS. That it be equally divided.

Mr. RUDMAN. Madam President, I ask unanimous consent that the time not be charged to either side under this bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Madam President, I yield to the Senator from Georgia so much time as he may need.

Mr. NUNN. Madam President, I am pleased to be a cosponsor of S. 881, the "Small Business Innovation Research Act of 1981." I am looking forward to the Senate's favorable consideration of this measure today.

I wish to commend the Senator from New Hampshire, Senator RUDMAN, for an outstanding job. He has not only championed this cause, but he has pursued this legislation with great tenacity. I also wish to thank my colleagues, Senator LEVIN and Senator TSONGAS, for their important role in this legislation. I think it is a bold step forward. I also add my congratulations to the chairman of the committee, Senator WEICKER, who has been a strong supporter of this legislation and has given the Small Business Committee, I think, extraordinary leadership this year.

I need not recite the role small business plays in our Nation's economy. Others have indicated the proven track record of small business in innovation. Numerous Federal agencies and private sector reports, spanning several different administrations, have all attested to the unique capabilities and drive which small businesses bring to research efforts.

Regrettably, even in the face of these conclusive analyses of small business' capability, small business has been almost uniformly shutout in their efforts to significantly participate in Federal research and development efforts; it is our intention to reverse this trend through the enactment of this legislation.

The impetus for this legislation within the Senate Small Business Committee dates to hearings in August 1978, held jointly by the House and Senate Small Business Committees.

Under the leadership of the former distinguished chairman of the Senate Small Business Committee, GAYLORD NELSON, our committee undertook a thorough review of the role of small business in the Federal research effort.

Shortly thereafter, Milt Stewart, then the first Presidentially appointed Chief Counsel for Advocacy in the Small Business Administration, convened three task forces of key small business persons from around the Nation to study this matter more carefully. The result of those task force reviews was presented to our committee in August 1979. Their collaborative work with our committee led to the introduction of S. 1860, the "Small Business Innovation Act of 1979" in the 96th Congress. The bill had 15 cosponsors.

S. 1860 was a four-title bill which attempted to provide a comprehensive framework for further congressional consideration of small business aspects of innovation. Among its provisions were a mandatory small business set-aside for small business in federally funded research (from which today's legislation is a direct descendent), patent and regulatory reform provisions to lessen the burdens on small business, and tax incentives for research and development to further encourage the small business sector into the research area.

As my colleagues know, the patent and regulatory reform provisions were separately enacted last year. The tax provisions have, in large part, been included in the Economic Recovery Tax Act of 1981. Although the House and Senate Small Business Committees favorably reported separate R. & D. set-aside legislation last year, the Congress was not able to conclude work on those bills.

In January 1980, delegates to the White House Conference on Small Business undertook a review of the Federal R. & D. efforts, and overwhelmingly voted in favor of congressional enactment of a specific set-aside of research and development funds for small business. Frankly, this recommendation was in marked contrast to the general thrust of the Conference that "less was better." But the delegates report was clear, and emphatic, that absent specific positive action by Congress to mandatorily establish a small business set-aside program for research and development, the benefits derived from the efficiencies of small business would be lost, and the Federal Government specifically, and the Nation generally, would suffer.

Madam President, our committee, under the new leadership of the Senator from Connecticut (Mr. WEICKER) and Senator RUDMAN recognized the need to carry forward with this important legislation. To their credit, this bill has been improved by the committee. The legislation now enjoys the cosponsorship of 85 of our colleagues. It is legislation that should be passed, and quickly implemented.

We in the Senate Small Business Committee are convinced that the limited program which we are recommending be adopted today can and must work. The program, although targeted to six Federal agencies for purposes of the set-aside provisions, will bring almost 95 percent of the present Federal R. & D. effort under this design.

The proposals in this bill are modeled in part on the exemplary work of the National Science Foundation's small business innovation research program, and the self-initiated efforts by the Department of Defense in their defense small business advance technology (DESAT) program. NSF, although responding to statute, has developed the prototype SBIR program, and has proven its successfulness.

The Defense Department should be complimented for its willingness to unilaterally undertake this new program, and for assisting us in assuring that the important mission of the Department remains unimpaired by this legislative proposal.

I would like to take a few moments to highlight parts of this legislation.

The role of the Small Business Administration, although still significant in the bill, has been downplayed from the initial version of the legislation. The approach now contained in the legislation recognizes that SBA has a legitimate role to play in acting as a resource for Federal agencies in their implementation of the SBIR programs, and as a liason between the small business community and the Federal agencies in utilizing the program. In addition, SBA is in a unique position in the Federal executive to assist Congress and the administration in assessing the successfulness of this new endeavor. But while the bill does carefully describe the role of the Small Business Administration with respect to the SBIR program, SBA's long-standing statutory direction to provide small businesses with technology assistance remains unchanged. It is not our intention that the present agency actions be diminished, or shifted toward the monitoring of other agencies' efforts to establish an SBIR program.

Another provision in the bill provides for a phase-in of the SBIR program for certain agencies. While it makes sense to permit the agencies required to establish an SBIR program an opportunity to systematically set up their program, I wonder whether the phase-in is too slow. It has been argued, at least with respect to a few agencies, that the SBIR program requires a totally different orientation toward research and development funding for small businesses. Although this may be true for one or two agencies, there is no lack of expertise in administering a research and development program within these agencies. It would seem that the 3-year phase-in period, even for these selected agencies, may be too slow if we believe that there are the numbers, and quality, of small businesses that are capable of doing research for these agencies. We should monitor this closely.

Finally, the legislation establishes a minimum threshold of research and development funds under the formula in the bill before an agency must establish an SBIR program. Here, again, I believe the committee's bill is correct in establishing that "floor" for participation. Our intent is to open up realistic opportunities for small business participation in Federal R. & D., not merely to channel dollars to small business for dollars sake. We should examine in the future whether a somewhat lower floor may not be more appropriate.

Madam President, this is a good bill. It has the support of the overwhelming majority of the Senate and the small business community. Agencies have proven that they will not change their attitude or approach to small business participation in Federal R. & D. efforts without a congressional mandate. This bill will unmistakably, but fairly, provide that mandate.

I urge its passage by the Senate.

● Mr. SPECTER. Madam President, my colleagues will today document the numerous merits of S. 881. In some part these are already well set out in the excellent committee report on this bill.

I should like to stress just one element of the overall consideration—the need for Government to help strengthen the technological capacity of the private sector. There is a tendency, frankly, on the part of some Federal agencies, when a technological need arises, to expand their own resources rather than turn to the private sector to do the job. The hidden costs of expanding public agencies and functions are never really known.

A much better course than continued agency expansion is to look to the private sector, especially the small business portion, where increased productivity, greater cost consciousness and good old-fashioned American competition will assure a better deal for the taxpayer and a better product for the agency. S. 881 by requiring several major Federal departments and agencies to establish small business innovative research programs and to target specified amounts of research and development funds to small businesses will accomplish these purposes.

I am pleased to be a cosponsor and supporter of S. 881. I urge its adoption by this body.●

Mr. SARBANES. Madam President, I rise as a cosponsor of S. 881 to express my strong support for this legislation. S. 881 addresses in a responsible and constructive way some of the most critical problems facing the small business community today, and it is not difficult to understand why it enjoys the cosponsorship of a clear majority of this body.

In terms of its ability to generate employment and innovation, the small business sector plays an invaluable role in the national gross economy. Overall, small business accounts for 48 percent of the gross national product and 55 percent of total employment. A recent study undertaken at the Massachusetts Institute of Technology found that during the 1969–77 period, 66 percent of all net jobs in the private sector were created by firms with fewer than 20 employees, and 87 percent of all net new jobs by firms with fewer than 500 employees. Where innovation is concerned, studies from the Office of Management and Budget have found that more than half of all major innovations come from firms with fewer than 1,000 employees, while the National Science Foundation reports that small firms are significantly and consistently more productive in terms of innovations resulting from research and development expenditures.

Madam President, it is ironic that an economy which looks to the small business community for jobs and innovation should also place small businesses at a significant disadvantage when it comes to financing. Access to capital markets is limited for new, small, developing businesses, which are untested in the marketplace despite the promise they may hold for the future. Recognizing this situation, the Congress last year enacted legislation to facilitate the operation of venture capital companies, which are an important source of capital for new businesses.

To a greater degree than large companies, however, small innovative new companies must seek debt rather than equity financing, and it is therefore precisely these companies which are hit hardest by the current high cost of credit. It is a sad commentary on our priorities that the Federal Reserve Board and the administration adhere to a policy of high interest rates that penalizes the firms which offer the best prospect for strengthening the economy by improving productivity and increasing employment.

While offering no remedy for the current misguided monetary policy, S. 881 does address another major problem facing innovative businesses: lack of funds for research and development purposes. Less than 4 percent of the Federal Government's research and development budget is now channeled to firms shown to be most likely to produce major innovations. By establishing small business innovation research programs in each agency with an R. & D. budget in excess of $100 million, S. 881 will redirect R. & D. resources to more efficient users and focus greater attention on small business potential. S. 881 is a modest beginning—but it is a step in the right direction, a recognition of important priorities. I urge its approval.

● Mr. DIXON. Madam President, the decline in our national productivity has been of grave concern to all of us here in the Senate.

This decline in productivity has gone hand-in-hand with the decline in the development of new technologies.

S. 881 is the beginning step, I feel, in reversing this trend by utilizing our existing Federal research and development resources more effectively.

This legislation does not require any additional Federal money and is an effort to use Federal funds in a way most likely to spur the development of new technologies and insure their commercial application.

I urge my colleagues to support this bill since, clearly, small science- and technology-based firms have a major contribution to make to the revitalization of our economy and to the efficient use of the Federal research and development funds.

This bill provides participating small businesses with an opportunity to establish a successful record in research and development. By making available funds now hard to get in the private sector, this bill will facilitate small businesses' ability to attract venture capital and spur the development of new and exciting technologies.

Consumers will receive the benefits of new high-quality products. Investors will have the benefits of lower risk investment opportunities.

Major corporations will have the benefit of learning new technology manufacturing and distributing new products.

This bill provides a long-needed mechanism which facilitates the use of Federal agencies of the resources of small science- and technology-based businesses.

Madam President and colleagues, I urge you to vote for this bill.●

ESTABLISHMENT OF A COMMISSION ON MORE EFFECTIVE GOVERNMENT

VOTE

The PRESIDING OFFICER. Under the previous order, the hour of 4:15 having arrived, the Senate will not vote on S. 10, with a vote following immediately in relation to Senate Resolution 238. The first rollcall will be 15 minutes and the second rollcall will be 10 minutes.

The bill (S. 10) having been read the third time, the question is, Shall the bill pass?

The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. BAKER. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Indiana (Mr. LUGAR), the Senator from Vermont (Mr. STAFFORD), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Delaware (Mr. BIDEN), the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Colorado (Mr. HART), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Hawaii (Mr. MATSUNAGA) and the Senator from Montana (Mr. MELCHER) would each vote "yea."

The PRESIDING OFFICER (Mr. GRASSLEY). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 79, nays 4, as follows:

[Rollcall Vote No. 457 Leg.]

YEAS—79

Abdnor	Ford	Moynihan
Andrews	Garn	Murkowski
Baker	Glenn	Nunn
Bentsen	Gorton	Packwood
Boren	Grassley	Pell
Boschwitz	Hatch	Percy
Bumpers	Hatfield	Pressler
Burdick	Hawkins	Pryor
Byrd, Harry F., Jr.	Heflin	Quayle
	Helms	Randolph
Byrd, Robert C.	Hollings	Riegle
Chafee	Huddleston	Roth
Chiles	Inouye	Rudman
Cochran	Jackson	Sasser
Cohen	Jepsen	Schmitt
Cranston	Johnston	Simpson
D'Amato	Kassebaum	Specter
Danforth	Kasten	Stennis
Denton	Kennedy	Symms
Dixon	Laxalt	Thurmond
Dodd	Leahy	Tower
Dole	Levin	Wallop
Domenici	Long	Warner
Durenberger	Mathias	Weicker
Eagleton	Mattingly	Williams
East	McClure	Zorinsky
Exon	Mitchell	

NAYS—4

Bradley	Nickles	Proxmire
Humphrey		

NOT VOTING—17

Armstrong	Hart	Metzenbaum
Baucus	Hayakawa	Sarbanes
Biden	Heinz	Stafford
Cannon	Lugar	Stevens
DeConcini	Matsunaga	Tsongas
Goldwater	Melcher	

So the bill (S. 10), as amended, was passed, as follows:

S. 10

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

DECLARATION OF POLICY

SECTION 1. It is the policy of the Congress to develop a blueprint for better government in the United States, to set in motion processes by which the Federal Government can more effectively and responsively serve the people for whom it was created and can more rationally meet its present and future challenges, both national and international, and to encourage and justify the full restoration of public confidence in government at all levels.

ESTABLISHMENT OF COMMISSION

SEC. 2. For the purpose of carrying out the policy set forth in section 1, there is hereby established a commission to be known as the Commission on More Effective Government (in this Act referred to as the "Commission").

IMPLEMENTATION OF POLICY BY COMMISSION

SEC. 3. (a) In carrying out the policy set forth in section 1, the Commission shall consider and study the management, operation, and organization of the executive branch and of the independent regulatory agencies of the Federal Government, including the relationships of such entities to each other, to the other branches of the Federal Government, to their State and local governmental counterparts, and to the private sector. Such study and consideration shall give particular attention to the extent to which such relationships and established patterns of action meet or fail to meet governmental responsibilities and are adequate to meet the challenges of the future. Where appropriate and necessary, the Commission's consideration and study shall include the extent to which the policies implemented by the executive branch and the independent regulatory agencies detract from or enhance governmental management, operation, and organization.

(b) On the basis of its considerations and study under subsection (a), the Commission shall make recommendations, including but not limited to specific proposals for changes in Federal laws, regulations and administrative practices, to promote economy, effectiveness, efficiency, and managerial and political accountability, and to improve services and management in the transaction of the public business. Such recommendations shall include, where appropriate, recommendations for altering the present distribution of functions and activities among the Federal agencies and among the Federal, State, and local governments.

(c) In carrying out its consideration and study under subsection (a), the Commission shall avail itself of relevant information and data gathered by such public and private organizations and individuals as it deems appropriate.

ORGANIZATION OF THE COMMISSION

SEC. 4. (a) The Commission shall be composed of eighteen members as follows:

(1) Six appointed by the President of the United States; a maximum of three from the executive branch, and the balance, persons who are not Federal officials.

(2) Six appointed by the Speaker of the House of Representatives; a minimum of two and a maximum of three from the House of Representatives, and the balance, persons who are not current Members of the House of Representatives.

(3) Six appointed by the President pro tempore of the Senate, upon the recommendations of the majority and minority leaders of the Senate, a minimum of two and a maximum of three from the Senate, and the balance, persons who are not current Members of the Senate.

Members of the Commission shall to the maximum extent possible be chosen from among persons who have particular knowledge and expertise in the major areas of the Commission's consideration and study. Of the members appointed by the President, one shall have had experience in government at the State or local level; of the members who are not Federal officials appointed by the Speaker of the House of Representatives, one shall have had governmental experience at the local level; and of the members who are not Federal officials appointed by the President pro tempore of the Senate one shall have had governmental experience at the State level. In considering individuals for membership, preference shall be given to persons with a broad knowledge and understanding of the working of the Federal system of the United States of America.

(b)(1) Of the members appointed by the President from persons who are not Federal officials under subsection (a)(1), there shall be from the major political party which is not the party of the President, and at least two shall be persons not engaged in partisan political activity.

(2) Of the members appointed from the House of Representatives under subsection (a)(2), one shall be from the political party which is the majority party in the House and one shall be from the political party which is the minority party in the House. At his discretion, the Speaker may appoint either a second incumbent Representative from the majority party in the House or a former Representative from that same party. Of the remaining three members appointed under such subsection, two shall be persons not engaged in partisan political activity. Of these three remaining members one shall be from the political party which is the minority party in the House. In appointing members under subsection (a)(2) who are from the political party which is the minority party in the House, the Speaker shall obtain the advice and consent of the minority leader of the House.

(3) Of the members appointed from the Senate under subsection (a)(3), one shall be from the political party which is the majority party in the Senate and one shall be from the political party which is the minority in the Senate. At his discretion, the President pro tempore of the Senate may appoint either a second incumbent Senator from the majority party in the Senate or a former Senator from that same party. Of the remaining three members appointed under such subsection, two shall be persons not engaged in partisan political activity. One of these three remaining members shall be from the political party which is the minority party in the Senate.

(4) For the purposes of this Act, the term "persons not engaged in partisan political activity" shall mean persons who for at least six months prior to appointment as a member of the Commission, have not occupied or sought elected public office, or have not served as an official of a State or national political party.

(c) The President shall select a Chairman from among the Commission members who are not Federal officials at the time of appointment. The selection by the President of Chairman shall be subject to approval of a majority vote of the members of the Commission, conducted by secret ballot. The Commission shall elect from among its members a Vice Chairman from the major politiparty which is not the party of the Chairman. The Commission shall adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations, its organization, and its personnel.

(d) Ten members of the Commission shall constitute a quorum.

(e) Any vacancy in the Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made. Any individual appointed to fill a vacancy in the Commission shall be of the same political party as his predecessor.

(f) An individual who is appointed to the Commission in the status of a Member of Congress or in the status of a person in the executive branch of the Government, and who thereafter ceases to have such status, shall nevertheless continue as a member of the Commission and shall (if he has returned to private life except for his membership on the Commission) be treated as an individual appointed from private life for purposes of compensation under section 5.

COMPENSATION OF COMMISSION MEMBERS

SEC. 5. (a) The members of the Commission who are Members of Congress or who are in the executive branch of the Government shall serve on the Commission without any compensation in addition to that received for their services as Members of Congress or in the executive branch. The members of the Commission from private life shall each be paid compensation at a rate equal to the rate of basic pay in effect for level IV of the Executive Schedule when engaged in the performance of the duties vested in the Commission.

(b) All members of the Commission shall be reimbursed for travel as authorized by section 5703 of title 5, of the United States Code, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

COMMISSION STAFF

SEC. 6. (a) The Commission shall have power to appoint, terminate, and fix the compensation of such personnel as it deems advisable to assist in the performance of its duties, without regard to the civil service laws and without regard to the provisions of title 5 of the United States Code (or of any other law) relating to the number, classification, or compensation of employees. The Commission may also procure, as authorized by section 3109 of title 5, United States Code, temporary and intermittent services to the same extent as is authorized by law for agencies in the executive branch but at rates not to exceed the daily equivalent of the maximum annual rate of basic pay in effect for grade GS–18 of the General Schedule. The Chairman and Vice Chairman shall select an executive director for the Commission contingent upon confirmation by the Commission members.

(b) Service of an individual as a member of the Commission (or of an advisory council or committee under section 7) or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of any Federal law relating to conflicts of interest or otherwise imposing restrictions, requirements, or penalties in relation to the employment of persons, the performance of services, or the payment or receipt of compensation in connection with claims, proceedings, or matters involving the United

States. Service as a member of the Commission (or of such an advisory council or committee), or as an employee of the Commission, shall not be considered service in an appointive or elective position in the Government for purposes of section 8344 of title 5, United States Code, or comparable provisions of Federal law.

ADVISORY COUNCILS AND COMMITTEES

SEC. 7. The Commission may establish (without regard to the Federal Advisory Committee Act) such advisory councils and advisory committees as it may deem appropriate to provide specialized assistance in the performance of the duties vested in the Commission by this Act. Members of such advisory councils and committees, while attending meetings of such councils or committees or while otherwise serving at the request of the Commission away from their homes or regular places of business (unless otherwise eligible for travel and subsistence expenses under chapter 57 of title 5, United States Code), may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the Government serving without pay.

POWERS OF THE COMMISSION

SEC. 8. (a) The Commission or any member authorized by the Commission may, for the purpose of carrying out this Act, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may deem advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member. The provisions of the Federal Advisory Committee Act shall not apply to the Commission established under this Act.

(b) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require for the purpose of this Act; and each such officer, department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

(c) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this Act, unless the head of such agency determines that urgent, overriding reasons will not permit the agency to make such facilities, services or personnel available to the Commission and so notifies the Chairman in writing.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress or to the President.

MEETINGS, PUBLIC INVOLVEMENT, REPORTS, EXPIRATION

SEC. 9. (a) The Commission shall first convene no later than six months after the date of enactment of this Act, and shall meet from time to time thereafter, as its members deem appropriate.

(b) Consistent with other provisions of this Act, the Commission shall structure its operations and activities to assure the appropriate and meaningful involvement of the public in its deliberations. In doing so, the Commission shall consider the desirability of holding public hearings, particularly in locations outside of the District of Columbia and of establishing toll-free telephone lines or other mechanisms whereby members of the public can readily contribute suggestions for Commission consideration.

(c) The Commission shall from time to time submit to the Congress and the President such reports as it may deem appropriate with respect to its activities under this Act. One year after it first meets, the Commission shall report to the Congress and the President on its agenda and its progress. On December 3, 1984, the Commission shall submit to the Congress and the President its final report with respect to such activities, including all of its findings and recommendations.

(d) Ninety days after the submission to the Congress and the President of its final report under subsection (c), the Commission shall cease to exist, except as provided under section 11(b).

PREPARATION FOR THE COMMISSION

SEC. 10. Upon enactment of this Act, the Comptroller General, the Director of the Congressional Research Service, the Director of the Congressional Budget Office, the Director of the Office of Technology Assessment, and the Chairman of the Advisory Commission on Intergovernmental Relations shall begin to prepare briefing papers for the Commission. Such briefing papers shall catalog and synthesize any recent reports, analyses, and recommendations of the respective organizations, and shall contain such other information deemed by the head of each such organization to be pertinent to the work of the Commission. The briefing papers shall be completed no later than four months after the date of enactment of this Act.

MONITORING AND FOLLOWUP ON COMMISSION RECOMMENDATIONS

SEC. 11. (a) For a period of four years after the Commission ceases to exist, the Comptroller General shall monitor the implementation of the recommendations of the Commission, and shall report periodically to the Congress and the President on the actions being taken to implement such recommendations.

(b) For a period of eighteen months after the Commission ceases to exist, a portion of the staff shall continue to seek the consideration and implementation of the recommendations of the Commission. During such period, such staff shall be under the supervision of and shall report to the Director of the Office of Management and Budget.

(c) Upon submission of the Commission's final report to the President under section 9(c) the Director of the Office of Management and Budget, in coordination with the executive agencies, shall take action to (1) formulate the views of the executive agencies on the recommendations of the Commission; (2) to the extent practicable within the limits of their authority and resources, carry out recommendations of the Commission in which they concur; and (3) propose legislation needed to carry out or to provide authority to carry out other recommendations of the Commission in which they concur. At least once every six months, the Director of the Office of Management and Budget shall report to the Congress and the President on the status of action taken or to be taken as provided herein. A final report on the final disposition of the recommendations shall be submitted within four years after the submission of the Commission's final report under section 9(c).

EXPENSES OF THE COMMISSION

SEC. 12. There are hereby authorized to be appropriated $10,000,000 to carry out this Act.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEDUCTIBILITY OF RESIDENTIAL MORTGAGE INTEREST

VOTE

The PRESIDING OFFICER. Under the previous order, the Senate will now conduct a 10-minute rollcall vote in relation to Senate Resolution 238. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Indiana (Mr. LUGAR), the Senator from Vermont (Mr. STAFFORD), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Delaware (Mr. BIDEN), the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Colorado (Mr. HART), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Montana (Mr. MELCHER) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 83, nays 0, as follows:

[Rollcall Vote No. 458 Leg.]

YEAS—83

Biden	Heinz	Stafford
Cannon	Lugar	Stevens
DeConcini	Matsunaga	Tsongas
Goldwater	Melcher	

So the resolution (S. Res. 238) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 238

Whereas the Federal Government has a fundamental and traditional commitment to provide all Americans with decent housing at an affordable price;

Whereas this commitment was made to promote the living standards of all Americans, to encourage stability, and to encourage attention to and interest in participatory government;

Whereas this commitment has been jeopardized by the relatively low level of investment in housing in the United States compared to other nations;

Whereas this commitment is now being jeopardized by excessive interest levels and mortgage rates which have pushed the cost of the average size family home to $14,500 annually or $1,200 per month equal to 55 per centum of the typical family's income;

Whereas these excessive mortgage rates have plunged the housing and related industries into their worst depression of the post-war period, with over eight hundred thousand men and women out of work, bankruptcies spreading, and with two of every three savings institutions insolvent;

Whereas a key component of the Federal commitment to housing is the deductibility from personal income taxes of the interest paid on residential mortgages;

Whereas the deductibility of mortgage interest has resulted in homeownership becoming the largest, most important, and most viable form of individual wealth in America; and

Whereas the Federal Government should acknowledge and honor its commitment to decent and affordable housing and to preserve and protect the wealth of its citizens: Now, therefore, be it

Resolved, That it is the sense of the Senate, that the present home mortgage interest deduction be retained as an essential component of a fair and equitable tax system designed in part to promote a stable and productive society.

SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

The Senate continued with the consideration of S. 881.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Louisiana without losing my right to the floor.

Mr. LONG. Mr. President, I support the Small Business Innovation Research Act. If the United States is to maintain its competitive position in the world market it must use its limited R. & D. resources in a way that guarantees the maximum benefits. S. 881 is a step in that direction.

I wish to comment on one aspect of the research issue raised by this legislation. Colleges and universities all across this Nation, including many in my home State no doubt, have made tremendous contributions to science, medicine, and many other fields. These efforts are greatly appreciated. They should and will continue. For this reason, Mr. President, I agree with the views of Senator SASSER, a cosponsor of the bill, and other Senators when they say that this legislation should not be construed as an attempt to diminish participation in federally sponsored research by colleges and universities.

Mr. ROBERT C. BYRD. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. The business before the Senate is S. 881. The pending question is on agreeing to the committee substitute.

Mr. ROBERT C. BYRD. This is the Small Business Innovation Act?

The PRESIDING OFFICER. Yes.

UP AMENDMENT NO. 763

(Subsequently numbered amendment No. 651.)

(Purpose: To provide for an appointment of a small business representative to the Board of Governors of the Federal Reserve System)

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) for himself, and Mr. RANDOLPH, Mr. BURDICK, Mr. MATSUNAGA, Mr. CANNON, Mr. LEVIN, Mr. HARRY F. BYRD, JR., and Mr. SASSER, proposes an unprinted amendment numbered 763.

At the appropriate place in the bill, insert the following:

SEC. . The President shall nominate an individual whose background is in a credit-sensitive sector of the economy and who is representative of small business, including farming and ranching, to fill the first vacancy on the Board of Governors of the Federal Reserve System which occurs after the date of enactment of this Act.

Mr. ROBERT C. BYRD, Mr. President, I am proposing an amendment to assure that a small business representative is named as a member of the Federal Reserve Board of Governors when that position opens on January 31, 1982. By appointing a small business representative to the Board, the President will take a giant step toward assuring that a voice from Main Street will be heard amid the chorus from Wall Street. Under my amendment, a farmer or a rancher would be eligible for the position.

A small business representative will temper the Board's monetary policy with an understanding of this credit-sensitive sector's concerns. This appointment will bring the Board of Governors closer to realizing the intent of the 1913 Federal Reserve Act that envisioned a Board representing the full spectrum of American financial, business, and geographic interests. The act specifically said that—

In selecting the members of the Board, not more than one of whom shall be selected from any one Federal Reserve district, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country.

The current Board of Governors is a far cry from the pluralistic group the Federal Reserve Act envisioned. The long, 14-year terms of the Governors require that a fair sampling of the Nation's interests be included on the Board to prevent it from drifting away from the concerns of the Nation. A look at the current Board would lead us ineluctably to one conclusion: We are a nation of Federal Reserve employees and private bankers. Of the seven Governors, five are former employees of the Federal Reserve System, and the other two were private bankers before their appointment.

The Federal Reserve Board has a special place in our Government. Although there are other nominally independent agencies, none of them have the Federal Reserve's power to affect the well-being of all Americans. Despite its power, independence was assured, so that the conduct of monetary policy would not be affected by partisan politics, and the swiftly shifting tides of public opinion. But structured thus to be an island of stability, it was not to be an island cut off from the effects of its policies on the mainland of the body politic.

We must all realize the danger that arises from filling the Board with people of the same limited range of experience and understanding. No one person can represent the needs and views of the entire American economy. Our Nation was founded on a notion of pluralistic representation that is as important for the Federal Reserve Board as it is for both Houses of Congress. By naming a small business representative to the Board of Governors, we help to bring this important body back within the framework that originally shaped our Government.

Nearly 200 years ago, during the great debate about our Constitution, three of our Founding Fathers conducted a public campaign for ratification that has since commanded the attention of thoughtful citizens from many lands. Writing under the joint nom de plume of Publis, these three men, Alexander Hamilton, John Jay, and James Madison, produced 85 newspaper articles that became know collectively as the Federalist Papers.

Within this mother lode of political theory and practical wisdom, stands James Madison's Federalist Paper No. 10. In this paper, Madison makes the most concise and convincing argument for pluralistic representation ever put forth. While attempting to convince his readers that a United Republic provided more readily for internal and external peace than did the loose confederation of States, Madison recognizes the number of varied interests which spring up from the system of private enterprise. In discussing them he writes:

The most common and durable source of factions has been the various and unequal distribution of property. Those who hold and those who are without property have ever formed distinct interests in society. Those who are creditors, and those who are debtors, fall under a like discrimination. A landed interest, a manufacturing interest, a mercantile interest, a money interest, with many lesser interests, grow up of necessity in civilized nations, and divide them into different classes, activated by different sentiments and views.

The clash of interests that surrounds money, its availability, and its cost is the realm over which the Federal Reserve must watch. The nexus where the

lenders face the borrowers is the focus of most Board activity, yet all of the current Governors represent private experience they acquired as central bankers. That is, they are lenders.

Perhaps it is thought that, because of their expertise in financial markets and monetarist theory, these Governors are able to assure that the country's broad interest is considered when making policy decisions. Thus, some might say, we do not need a person whose expertise lies in small business operations, although he may be acquainted with financial markets.

Madison foresaw a similar argument coming from his contemporaries, and responded clearly:

It is in vain to say that enlightened statesmen will be able to adjust these clashing interests and render them all subservient to the public good. Enlightened statesmen will not always be at the helm. Nor, in many cases, can such an adjustment be made at all without taking into view indirect and remote considerations, which will rarely prevail over the immediate interest which one party may find in disregarding the rights of another, or the good of the whole.

This is not to say that any member of the Board of Governors has ever, or would ever, taken an action he or she thought to be against the best interests of the country. What is important in Madison's argument is that a person who represents one interest or one set of experiences, may not be the best judge of how his decision affects those in differing situations. That is what concerns me here.

The wisdom of James Madison is, perhaps, even more valuable in this age of increasing specialization. The ability of an experienced central banker to truly understand the needs of credit-sensitive sectors of the economy cannot be taken for granted.

For that central banker, a small business is not much more than one piece of datum among many millions. The 15,449 businesses that have collapsed this year are simply 15,449 faceless, nameless entries onto a data sheet which are coolly discussed along with the 9 million jobless citizens now among us.

For the small businessman, however, the 15,449 failures are made up of people like himself, and the 9 million unemployed have a great deal in common with his own employees, whose livelihoods depend on the decisions made by the Board of Governors.

I do not believe this country should go another year without a small business resentation in policy-setting bodies; 1981 nors. All indications are that 1982 will be a rough year for our economy. All the mail, public meetings, congressional hearings, and newspaper editorials are less important to the Board than a member who can understand and sympathize with the needs of borrowers, and who can penetrate those oak-paneled walls with the message of people struggling to stay in business, and to hang onto their jobs.

James Madison knew nearly 200 years ago that danger stems from limited representation in policy-setting bodies; 1981 has taught us that lesson anew.

Let us vote to return to the spirit of our Founding Fathers, and to the legislative intent of the Federal Reserve Act, by assuring small business representation on the Board of Governors next January 31.

I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I yield 5 minutes to the distinguished Senator from Utah (Mr. GARN).

Mr. GARN. I rise in opposition to this amendment on two bases: The first one is procedural. No one has more admiration than I for the distinguished minority leader, of his knowledge of the rules and procedures of the Senate. I have heard him for years argue about proper procedure.

I first object to this amendment on the basis that it is brought up on this particular bill. If I had been informed, as chairman of the Banking Committee, that this kind of nongermane amendment was coming up, and asking for unanimous consent, I would have objected, and the reason I would is there are several Senators on each side of the aisle, both Democrats and Republicans, who have submitted various bills and resolutions to this body, which have been referred to the Banking Committee, on how to restructure the Federal Reserve Board.

Hearings were promised to those Senators, and this very day the Banking Committee held hearings and had a number of Senators, again both Democrats and Republicans, testify in favor of their particular position.

Yet, here we have a proposal coming directly to the floor that has very serious implications to restructure the Federal Reserve Board by statute, injure its independence, and not have the benefit of committee hearing or deliberation. So I object on that basis that I think this proposal by the distinguished minority leader should have come to committee, as with many other Senators: Senator PRESSLER, Senator BURDICK, Senator KASSEBAUM, Senator WEICKER, Senator JEPSEN, Senator CRANSTON, and others. That is the No. 1 reason why I object and think this should be considered in a proper method, and I do not mean this is improper. The Senator is certainly entitled to ask unanimous consent, but it is not proper in the sense of normal procedure.

Second, I would say that I understand the concerns of my colleague from West Virginia. I do not like the appointments to the Federal Reserve Board as a group over the last couple of decades, either.

The nomination of Lyle Gramley was made in April, April 15 and 16, of 1980, and I would quote my comment at that time:

One thing that concerns me in general, certainly not with Mr. Gramley particularly or any of the individuals I am going to mention, but as I have watched the last several Federal Reserve Board appointments, they all seem to come generally from the same geographical area of the country or at least from the Fed. Look at Chairman Volcker from the New York Fed; Mr. Schultze, the only exception, a Florida businessman; Governor Partee, an economist with the Federal Reserve Board; Nancy Teeters, Congressional Budget Office; Rice from the Washington, D.C. Bank; Governor Wallich, the professor formerly with the New York Fed; Governor Coldwell came from the Dallas Fed; and it disturbs me in general that we are picking people from within the Fed system's geographical area that tend to be getting away from the geographical requirement of not more than one from one Fed district by picking where they were born regardless of where they have lived or worked for a long number of years.

This was said in April of 1980. Also, at that time, the Banking Committee, with a majority of both Democrats and Republicans, announced to the Carter administration that we would not pick on Lyle Gramley because of the fact it was not fair to treat him as an individual on an announced policy. At least a year and a half ago, the Banking Committee was on record of telling the Carter administration that we simply would not accept the kind of appointments that were coming out, because the law was very specific.

It says:

In selecting the members of the Board (of Governors of the Federal Reserve System), not more than one of whom shall be selected from any one Federal Reserve district, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographic divisions of the country.

That simply has been ignored by several Presidents in a row. But it allows for everything all these bills are trying to accomplish, including that of the minority leader.

The committee announced at that time that we would not, if it fit the current practice of selecting inbreeding through the Fed, approve those nominations. This year, after becoming chairman of the Banking Committee, I have let the Reagan administration know of that policy adopted in April of 1980.

Rather than taking the time of the Senate at this point, I ask unanimous consent that my opening statement at the hearing be printed in the RECORD, so that we can see of the concern for the present makeup of the Board.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

OPENING STATEMENT OF SENATOR GARN

Section 10 of the Federal Reserve Act today says:

"In selecting the members of the Board (of Governors of the Federal Reserve System), not more than one of whom shall be selected from any one Federal Reserve district, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographic divisions of the country."

I have repeatedly stated my concern that, while recent appointments to the Board of Governors may have conformed to the letter of this law, they have not conformed to its spirit. In particular, I do not believe that recent appointments to the Board have created a membership that, as is intended in the Federal Reserve Act, represents the broad range of geographical and economic interests in this country.

As evidence, I point to the fact that six of the seven current Board members spent most of their professional lives—before joining the Board—in Washington or with the Federal Reserve System itself in a different capacity:

1. Paul Volcker was president of the New York Fed.

2. Henry Wallich, while he was a professor at Yale, also woked on the staff of the New York Fed, on the President's Council of Economic Advisers and at the Treasury Department.

3. Chuck Partee was Director of Research at the Board of Governors.

4. Nancy Teeters came from the staff of the House Budget Committee.

5. Emmitt Rice came from a Washington, D.C. bank.

6. Lyle Gramley came from the President's Council of Economic Advisers and had previously worked at the Board.

Moreover, the one Governor who did not spend the majority of his previous professional life in Washington or working for the Federal Reserve elsewhere—Vice Chairman Frederick Shultz—is the Governor whose term expires next month.

This afternoon's hearing is on seven resolutions and bills—which are all now before the Banking Committee—dealing with upcoming Presidential nominations for new members of the Federal Reserve Board and/or with the very structure of the Board itself.

Along with Senator Jepsen and 33 other Senators, I have sponsored S. Res. 209 which points out that the: ". . . present composition of the Board (of Governors) does not conform to the spirit of . . . (the) statutory provisions (of the Federal Reserve Act) and no President since 1959 has appointed an individual (to the Board) from either the agricultural or commercial sector. . . ."

The resolution goes on to call for the future following of the "fair representation" provision of the Federal Reserve Act providing for "agricultural, commercial (including small business), and broad regional representation on the Board of Governors. . . ."

Other resolutions and bills call for the naming of a representative of a specific economic constituency—such as small business—to the Board and/or a change in the Federal Reserve Act's list of specific economic constituencies that are to be represented on the Board of Governors.

Once before Congress has amended the listing of economic constituencies to be represented on the Federal Reserve Board. The Federal Reserve Act as passed in 1913 said that, in nominating a member of the Federal Reserve Board, "the President shall have due regard to a fair representation of the different commercial, industrial and geographic divisions of the country." In 1922, two additional economic constituencies—financial and agricultural interests—were added to the list, and the language of Section 10 was changed to read, as it does today, that "the President shall have due regard to a fair representation of the financial, agricultural, industrial and commercial interests, and geographic divisions of the country."

On the other hand, if we start down the road of naming very specific constituencies that should be represented on the Board of Governors, where do we stop:

a. Shouldn't homebuilders and realtors likewise have their representative?

b. Shouldn't automobile companies and dealers also have their representative?

c. Shouldn't retired Americans have their representative?

d. Shouldn't mayors and state officials have their representative?

e. Shouldn't labor have its representative?

Other bills and resolutions now before the Banking Committee would change the very structure of the Board of Governors. Among the proposals are:

1. Make the terms of the Board's Chairman and Vice Chairman concurrent with the President's term or change their current four-year statutory term to "service at the pleasure of the President."

2. Shorten the current fourteen-year term as a member of the Board to either seven or five years.

3. Increase the number of Board members from seven to nine or give both the President Pro Tempore of the Senate and the Speaker of the House of Representatives power to appoint a member of Congress as an ex-officio member of the Board.

In sum, this afternoon I believe there are two groups of issues before the Committee.

One is: have recent appointments to the Board of Governors followed the spirit—as well as the letter—of the Federal Reserve Act and is there a need to call on the President to follow the spirit of the Act in making future nominations?

The second group of issues is: is there a need at this time to go even further and change the language of Section 10 by adding to the list of economic constituencies to be presented on the Board or—even more drastic—to change the very structure of the Board?

Finally, I should point out that this hearing could hardly be more timely, for amendments are expected to be offered on the Senate floor this very afternoon dealing with the subjects of this hearing.

Mr. GARN. Mr. President, my point, very strongly is this: That to tamper with the independence of the Board by mandating a particular statute to save businessmen, then I suppose we need a realtor, then I suppose we need a labor leader, we need a consumer, we need a representative, and we start expanding the Board and where do we end up when we start being so specific?

The law is already specific. The Banking Committee of the Senate has the authority to reject it if it does not fit the guidelines of the law. And certainly if we do not do our duty, the Senate of the United States can reject the nomination. I think that is by far the best way to handle it.

Rest assured that this Senator has been on record for more than a year and a half about the makeup of this Board and will not yield as chairman of the Banking Committee. If the Reagan administration sends up one of these inbred Federal types to be nominated, it will be rejected. I will guarantee you it will not get through the committee.

I think the most we should do is an expression and sense of the Congress that the law be adhered to and we select somebody from these groups in the fair representation clause in section 10 of the Federal Reserve Act. We certainly can control the Board in that way without taking away their independence by statutorily mandating that any particular group be put on the Board.

I will withhold further comments at this time. I thank the Senator from Connecticut for yielding.

The PRESIDING OFFICER (Mr. MURKOWSKI). Who yields time? If neither side yields time, time runs equally against both sides.

Mr. ROBERT C. BYRD. How much time does each side have remaining?

The PRESIDING OFFICER. The Senator from Connecticut has 25 minutes and the minority leader has 19 minutes remaining.

(By request of Mr. ROBERT C. BYRD the following statement was ordered to be printed in the RECORD:)

SOME THOUGHTS ON THE FEDERAL RESERVE

● Mr. BAUCUS. Mr. President, it is my understanding that Senator BYRD of West Virginia is offering an amendment to S. 881 which I am pleased to be a cosponsor of, which seeks to accomplish three goals: First, to help lower interest rates, and they are slowly inching down as we wallow in recession; to help bring inflation under control; and to help make our Nation's businesses more productive again.

The administration's reliance on monetary policy has helped cause interest rates to be so high. I do not think the use of monetary policy, per se, is wrong—so long as it is coordinated with other policies and does not bring undue hardships on a few sectors of our economy. But, in fact, there has been excessive reliance on monetary policy, and to compound the problem, those who make the decisions on the Federal Reserve Board do not have adequate representation from that sector of the economy most affected by high interest rates, the small business community.

So this amendment simply calls for the Federal Reserve to have such representation. It gives a voice to the small business community in the Federal Reserve. It is something which is long overdue.

I strongly support Senator BYRD's amendment and urge my colleagues to support it as well.●

● Mr. SASSER. Mr. President, I support the Byrd amendment which would require that the next nominee to the Federal Reserve Board have a small business background.

I commend Senator Byrd for his amendment. The issue of Federal Reserve Board membership is most important, especially now on the eve of the retirement of the Federal Reserve Board Vice Chairman, Frederick Schultz. With the retirement of Mr. Schultz, the board loses its only member in 20 years who can claim a small business orientation.

I have had an abiding interest in seeing that the Federal Reserve Board is representative of those affected by its policies. The Federal Reserve Act, as amended in 1922, calls for the President to demonstrate "due regard to a fair representation of financial, agricultural, industrial and commercial interests" in making appointments to the Board of Governors. Yet, Members of the Board in the recent past have come almost exclusively from the regional Federal Reserve Banks, the board of directors of the Nation's largest banks or from the staffs of the Board of Governors and the regional Federal Reserve Banks.

Last year, I asked the Library of Congress to study the backgrounds of the past and present members of the Federal Reserve System to determine the extent of input by representatives of the agriculture sector.

The study which found that the representation of the agriculture sector was grossly inadequate, confirmed my worst

fears. No person having a primary interest in agriculture has been appointed to the Federal Reserve's Board of Governors since the Eisenhower administration. And of the 108 directorship positions on the regional bank's board, only three positions are currently filled by people who appear to have agriculture as their principal occupation. That amounts to less than 3 percent of the 108 positions nationwide.

Unforunately, these depressing figures are not merely a recent phenomenon. During a 20-year period ending in 1970, only 27 of the 756 positions on the 12 regional boards were filled by persons who identified agriculture as their principal occupation.

The representation of the small business community, especially in recent times, is not much better. Despite the fact that small business suffers most from the high interest policies of the Federal Reserve Board, the makeup of the Board does not reflect small business.

And this lack of representation shows, Mr. President, small firms today are going under at unheard of rates. The latest figures on business failures from Dun & Bradstreet show that over 15,000 firms have gone under so far this year.

What is really ominous, however, is the rate at which these failures are occurring. If the failure rate established so far this year continue, 17,093 businesses will have failed by the end of calendar year 1981. This would be the highest number of failures since the height of the Great Depression in 1933.

Mr. President, it is absolutely outrageous that we tolerate this kind of devastation. The Federal Reserve Board high and volatile interest rate policies are in large measure to blame for this loss of literally thousands of small businesses throughout the country and the loss of jobs and other dislocation that accompany their failures.

Monetary policy is a very complex and far-reaching tool of our economic policy. Its impact on the small business and agriculture sectors of our economy is most pronounced. Thus, it is extremely important that national monetary policy not be left in the hands of a narrow group of individuals. Congress realized this in 1913 when it passed the legislation creating the Federal Reserve Board and in 1922 when it added agriculture to those sectors—financial, industrial and commercial—that it felt should be represented by the Federal Reserve System.

This need has not changed, Mr. President. It is still extremely important that the entity which exercises life and death power over the Nation's small business community be representative of that community.

I have spoken out repeatedly on this issue. I cosponsored Senate Resolution 434, passed by the Senate in the last Congress, which sought to correct these oversights by calling for a more representative board. I testified at the confirmation hearings of the last member of the Federal Reserve Board to be nominated, Dr. Lyle Gramley, on this issue. Though Dr. Gramley was in other ways well qualified to serve as a member of the Board, he lacked experience either as a small business person or a farmer. He did not possess an intimate knowledge of these sectors and their special needs and problems. Yet he now sits as a member of the Federal Reserve Board of Governors and, through his participation in the affairs of the Board, decides the fate of thousands of small firms. More recently, I along with several other Senators wrote to President Reagan urging him to appoint an individual with significant small business experience to the Board.

The previous chairman of the Senate Banking Committee and the members of that committee wisely placed language in the 1980 committee report on Dr. Gramley's nomination expressing concern for the lack of representation of the Board.

In May of this year, during the floor debate on my own antihigh interest rate resolution, the present chairman of the Banking Committee, Senator GARN, expressed his support for efforts aimed at having a more representative Federal Reserve.

The Senate Small Business Committee, on which I serve, formed a small business advisory council made up of small business people from all across the country. The council's first meeting was held here in Washington on October 28, and the issue of small business representation on the Federal Reserve Board was an overriding concern of this group. In a recent letter to the committee, the chairman informed us that the council had unanimously agreed upon the need for a person with a small business background to be a member of the Federal Reserve Board.

As his letter stated:

> The special credit and monetary needs of the small business sector of the economy have not been adequately addressed by the Federal Reserve Board. It is our hope that the appointment of a small business man or woman to the Board by the President would do much to increase the Board's sensitivity to the special economic and fiscal conditions that affect a small entrepreneur.

I urge my colleagues who have not taken a position on this important issue to support the Byrd amendment to redress the lack of adequate business representation on the Federal Reserve Board.

In addition, Mr. President, I would ask to have printed at this point in the RECORD two letters I received from the Tennessee Roundtable for Small Business, Inc., and the National Federation of Independent Business. Both strongly support efforts to insure the nomination to the Federal Reserve Board of a person with small business credentials.

The letters follow:

TENNESSEE ROUND TABLE
FOR SMALL BUSINESS INC.,
Nashville, Tenn., November 27, 1981.

HON. JAMES R. SASSER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SASSER: The pending vacany on the Board of Governors for the Federal Reserve Board presents a unique opportunity to appoint a person with small business experience or one with agriculture background. These two attributes, which assure many common interests, have not previously been represented on the Board of Governors. Small business in this country represents a large segment of the gross national product and accounts for more jobs and innovations than big business; we believe it is the backbone of our free enterprise system. It is being hurt by policy decisions which do not consider the impact of these decisions of small business.

Agriculture is similarly situated. Many farmers today are faced for the first time in their lives with bankruptcy and the loss of their land which in many cases has been in their family for generations. We strongly suggest that a person with small business and/or agricultural experience be appointed to the Board of Governors of the Federal Reserve and the Senate of the United States encourage and support this move with the appropriate suggestion to the White House.

Very truly yours,

BILL NOURSE,
President.

NATIONAL FEDERATION OF
INDEPENDENT BUSINESS,
Washington, D.C., December 2, 1981.

DEAR SENATOR: During the floor consideration of S. 881 an attempt will be made to add an amendment to it that would indicate to President Reagan that the U.S. Senate believes the next vacancy occurring on the Board of Governors of the Federal Reserve System should be filled by an individual who is representative of the small business community. Very likely this attempt will be made by various Senators using various means to convey their message to the President.

On behalf of its 500,000 small business owner-members, the National Federation of Independent Business would like to indicate its support for any and all such amendments which let the President know that the upcoming vacancy on the Board of Governors of the Federal Reserve System should be filled by an individual of proven familiarity and knowledge of the macro-economic role of small business in our economy. Such a person should possess all the necessary technical skills for the job and thoroughly understand how small firms are affected by policy actions of the government and by overall economic activity of the economy.

The present composition of the Board clearly does not conform to the spirit of the Federal Reserve Act. Given the significant impact Federal Reserve policy has on small firms, the appointment of an individual with a proven expertise in how monetary and other economic issues relate to small businesses would be a signal to the millions of small businesses in this country that the U.S. Senate and this Administration recognizes the vital role small businesses plays in the American economy.

Sincerely,

JAMES D. "MIKE" MCKEVITT,
Director Federal Legislation.●

Mr. WEICKER. Mr. President, I am prepared at this time to yield back the remainder of my time.

Mr. ROBERT C. BYRD. Mr. President, I could yield back time and call up an amendment to my amendment in the same breadth, which has been done, but I am not going to do that. The distinguished majority leader indicated to me earlier that he had an amendment in the second degree. Of course, I understand how the parliamentary game is played. But he has extended to me many courtesies and I am not going to abuse the courtesy that he has extended to me by telling me he has an amendment in the second degree. I yield back my time.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I wish to express my appreciation to the minor-

ity leader. He, more than perhaps anyone, understands the rules and precedents of the Senate, understands the role and responsibility of the leadership and sometimes the difficult circumstances that it presents. But I did indeed speak to him of this situation before and he has explained his reaction to it. He need not have reacted in that way, but he did and I am grateful.

UP AMENDMENT NO. 764

(Subsequently numbered Amendment No. 652.)

(Purpose: To declare the sense of the Senate that the next vacancy on the Board of Governors of the Federal Reserve System should be filled by an individual who has substantial small business, agricultural, or other small business experience)

Mr. BAKER. Mr. President, I have an amendment at the desk to the BYRD amendment and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for himself, Mr. JEPSEN, and Mr. WEICKER, proposes an unprinted amendment numbered 764.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted, insert the following:

Since the Board of Governors of the Federal Reserve System directly oversees the growth of the monetary aggregates, the availability of credit and monetary policy generally, all of which substantively affect every sector of the national economy;

Since section 10 of the Federal Reserve Act of 1913, as amended, provides that in submitting nominations for the Board of Governors of the Federal Reserve System, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country;

Since the present composition of the Board does not conform to the spirit of these statutory provisions and no President since 1959 has appointed an individual from either the agricultural or commercial sector to the Board of Governors;

Since the impact of Federal Reserve policy is particularly significant on those constituencies which by law are to be represented on the Board;

Since high interest rates are having a devastating effect on the credit-sensitive sectors of the economy, particularly small businesses, which includes small farms;

Since business bankruptcies are nearly 50 per centum above 1980;

Since over 97 per centum of the businesses in the United States are small businesses, which account for over 50 per centum of the Gross National Product, 80 per centum of the new jobs created in the private sector, and nearly half of the nation's industrial innovations;

Since the problem lies not with the statutory language of the Federal Reserve Act;

Since the United States Senate, in Senate Resolution 434, Ninety-sixth Congress has already expressed its concern about past insensitivities to the requirements of the Federal Reserve Act; and

Since the next vacancy on the Board of Governors of the Federal Reserve System will occur January 31, 1982, and preparations for the nominations will commence soon: Now, therefore, be it

Declared, That in recognition of the fair representation provision in the Federal Reserve Act of 1913, as amended, the President of the United States, the United States Senate and the Senate Committee on Banking, Housing, and Urban Affairs should assure that the next vacancy on the Board of Governors of the Federal Reserve System should be filled by an individual who has substantial small business, agricultural or other small business, experience.

Mr. BAKER. Mr. President, is there 30 minutes to be equally divided?

The PRESIDING OFFICER. Fifteen minutes for the Senator from Tennessee and 15 minutes to the manager, unless he is in favor of the amendment.

Mr. BAKER. Mr. President, I believe the manager is a cosponsor and is in favor of it, in which event the minority leader would be in control of the time; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. I yield control of my time for the debate in support of the amendment to the distinguished Senator from Connecticut.

Mr. ROBERT C. BYRD. Mr. President, I yield myself 1 minute. Could we agree to a time certain tomorrow for votes?

Mr. BAKER. Mr. President, I would be pleased to do that. May I announce, as I already told the minority leader and others, that there will be no more RECORD votes tonight.

I would propose, Mr. President, that we convene tomorrow at 10 and be on this bill by 10:30 and we would be on this amendment at the time we reached that point.

Mr. President, will the Senator from Connecticut yield me 2 minutes?

Mr. WEICKER. I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, let me suggest, after consulting with the minority leader and the manager of the bill, that we postpone debate on this amendment until tomorrow.

I will formulate unanimous-consent requests at this time.

ORDERS FOR TUESDAY

RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDERS AND PENDING BUSINESS

Mr. BAKER. I ask unanimous consent, Mr. President, that after the recognition of the two leaders under the standing order, the two Senators from Pennsylvania (Mr. HEINZ and Mr. SPECTER) be recognized for not to exceed 15 minutes each, and that following the recognition of the two Senators from Pennsylvania, the Senate resume consideration of the pending business, at which time the Baker-Weicker-Jepsen amendment will be the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

TWO-HOUR RECESS TOMORROW

Mr. BAKER. I further ask unanimous consent, Mr. President, that at 12 noon tomorrow the Senate stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

LENGTH OF VOTES

Mr. BAKER. I ask unanimous consent that any votes that are ordered prior to the hour of 12 noon be stacked to occur at 2 o'clock, and if more than one vote is ordered that the first rollcall vote be 15 minutes in length and subsequent back-to-back votes be 10 minutes each. The votes will be on or in relation to these amendments, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, the Senate, when it completes its business today, will stand in recess until the hour of 10 o'clock tomorrow. After the recognition of the two leaders under the standing order and the recognition of two Senators under special orders, the Senate will resume consideration of the pending business, the Small Business Innovation Act, Calendar 283, S. 881, at which time the Baker-Jepsen-Weicker amendment in the second degree to the Byrd amendment will be the pending amendment.

Mr. President, debate will continue on that amendment and perhaps on other amendments, and votes that are ordered between the time the Senate resumes consideration of this measure and 12 noon will be stacked until 2 p.m. A number of votes may occur, including, perhaps, final passage, after the voting sequence begins at 2 o'clock in the afternoon.

After the completion of this measure, Mr. President, it is the intention of the leadership to ask the Senate to turn to the consideration of the second concurrent budget resolution. That has not been fully determined at this time, but the clearance process is underway and I see the prospects are good that we will at least be able to begin debate, and I hope finish debate, and have final passage on the second concurrent budget resolution during the day tomorrow.

Mr. President, after we finish S. 881, the Small Business Act, there is another matter that I am told has been cleared on both sides, S. 1700, the U.S. Claims Court Act, which also will be sequenced in as it is possible to do so during the day tomorrow.

Tuesday will, therefore, be a busy day, Mr. President. I expect the Senate will be able to complete this Small Business Act, the Claims Court Act, and perhaps the second concurrent budget resolution before we complete our business on Tuesday.

On Wednesday, Mr. President, I will have a further announcement to make.

Mr. President, earlier today I indicated that I hope to be able to make a further announcement about the continuing resolution. I am now not in a position to do so, but it is my hope that the minority leader and I can confer, either

this evening or in the morning, and more clearly ascertain the intentions of the House of Representatives and have a further announcement to make on the remainder of this week at that time. Once again I urge Senators to consider the high probability of a Saturday session this week.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, if the managers of the bill and of the amendments are prepared to do so, I am prepared now to ask the Senate to go into routine morning business.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend past the hour of 5:40 p.m., during which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT ON THE U.S. PARTICIPATION IN THE UNITED NATIONS—MESSAGE FROM THE PRESIDENT—PM 95

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am pleased to transmit herewith a report of the activities of the United States Government in the United Nations and its affiliated agencies, as required by the United Nations Participation Act (Public Law 264, 79th Congress). The report covers calendar year 1980, the last year of the previous Administration.

The United Nations remains an important institution for the foreign policy of the United States, and the United States will uphold the ideals upon which the United Nations was founded.

RONALD REAGAN.

THE WHITE HOUSE, *December 7, 1981.*

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:46 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 4591. An act to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2315. A communication from the Under Secretary of Agriculture for International Affairs and Commodity Programs transmitting, pursuant to law, the Annual Report on Public Law 480 activities for fiscal year 1980; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2316. A communication from the Plan Administrator, Farm Credit Banks of Omaha, transmitting, pursuant to law, the pension actuarial report on the plan for the Farm Credit Banks of Omaha, Nebr.; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2317. A communication from the Chief Deputy Clerk, U.S. Court of Claims transmitting, pursuant to law, the court's judgment order in the matter of Turtle Mountain Band of Chippewa Indians, and related cases against the United States, Nos. 113, 246, 191, 221; to the Committee on Appropriations.

EC–2318. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to Venezuela; to the Committee on Armed Services.

EC–2319. A communication from the Assistant Secretary of the Army for Installations, Logistics and Financial Management transmitting, pursuant to law, a listing of studies of various functions for conversion to contractor performance to be undertaken during fiscal years 1982 and 1983; to the Committee on Armed Services.

EC–2320. A communication from the Assistant Secretary of the Air Force for Research, Development and Logistics transmitting, pursuant to law, notice of a decision made to convert the graphic arts function at Lowry Air Force Base, Colo., to performance under contract; to the Committee on Armed Services.

EC–2321. A communication from the Secretary of Housing and Urban Development transmitting, pursuant to law, the semiannual report of the Department's Inspector General for the period April 1 to September 30, 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC–2322. A communication from the Secretary of Transportation transmitting, pursuant to law, relative to the diversion of freight traffic off the rail lines on the Northeast Corridor; to the Committee on Commerce, Science, and Transportation.

EC–2323. A communication from the chairman and president of the National Railroad Passenger Corporation transmitting, pursuant to law, the annual report on progress relative to completion of Northeast Rail Corridor Improvement Project; to the Committee on Commerce, Science, and Transportation.

EC–2324. A communication from the Under Secretary of Energy transmitting, pursuant to law, a report on certain reassignments of responsibilities pertaining to the alternative fuels production program; to the Committee on Energy and Natural Resources.

EC–2325. A communication from the Acting Secretary of the Interior transmitting, pursuant to law, a report relative to the imminent construction of the Brantley Project, N. Mex.; to the Committee on Energy and Natural Resources.

EC–2326. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "User Charge Revenues for Wastewater Treatment Plants—Insufficient to Cover Operation and Maintenance"; to the Committee on Environment and Public Works.

EC–2327. A communication from the administrator of the Environmental Protection Agency transmitting, pursuant to law, the semiannual report of the Agency's Inspector General for the period April 1 through September 30, 1981; to the Committee on Environment and Public Works.

EC–2328. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC–2329. A communication from the Assistant Secretary of the Treasury for Legislative Affairs transmitting, pursuant to law, reports of the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank; to the Committee on Foreign Relations.

EC–2330. A communication from the Acting Deputy Assistant Secretary of the Interior for Indian Affairs (Operations) transmitting, pursuant to law, a report on the cancellation and adjustment of reimburseable charges of the government as debts against Indians or tribes of Indians for fiscal year 1980; to the Select Committee on Indian Affairs.

EC–2331. A communication from the Chief Justice of the United States transmitting, pursuant to law, a copy of the report of the proceedings of the Judicial Conference of the United States, September 24 and 25, 1981; to the Committee on the Judiciary.

E–2332. A communication from the Associate Commissioner of Immigration and Naturalization (Examinations) transmitting, pursuant to law, orders in cases of certain aliens admissible under section 212(a)(28)(I)ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–2333. A communication from the Acting Commissioner of Immigration and Naturalization transmitting, pursuant to law, an order suspending deportation in the case of Wilfredo Nector Columna; to the Committee on the Judiciary.

EC–2334. A communication from the Acting Commissioner of Immigration and Naturalization transmitting, pursuant to law, orders suspending deportation of certain aliens under section 244(a)(1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–2335. A communication from the Attorney General of the United States transmitting, pursuant to law, a report under the Parental Kidnaping Prevention Act of 1980; to the Committee on the Judiciary.

EC–2336. A communication from the Assistant Secretary of Defense for Manpower, Reserve Affairs and Logistics transmitting, pursuant to law, the audit report on the American Red Cross for the year ended June 30, 1981; to the Committee on Labor and Human Resources.

EC–2337. A communication from the Secretary of Education transmitting, pursuant to law, the semiannual report of the Department's Inspector General for the period April 1 through September 30, 1981; to the Committee on Labor and Human Resources.

EC–2338. A communication from the Administrator of Veterans Affairs transmitting, pursuant to law, the semiannual report of the Administration's Inspector General for

the period April 1 through September 30, 1981; to the Committee on Veterans' Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-634. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE CONCURRENT RESOLUTION No. 390

"A concurrent resolution memorializing the Congress of the United States to expand the scope of coverage of the Federal Crop Insurance Act of 1980.

"Whereas, Due to increased costs in agricultural production, Michigan farmers are subject to devastating losses in the event of natural disasters destroying their crops. While some of this risk is mitigated by the continuing implementation of the Federal Crop Insurance Act of 1980, the protection afforded by this act is not extended to numerous crops which are of extreme importance to the Michigan agricultural economy; and

"Whereas, The exclusion of these selected agricultural crops from the Federal Crop Insurance Act of 1980 places Michigan farmers at an economic disadvantage compared with farmers in other states and other regions of our nation and is a disservice to the entire Michigan agricultural community. This discrimination is both unfair and needless; and

"Whereas, As a matter of fairness and equity to Michigan's farmers, it is vital that the following crops be included for coverage under the Federal Crop Insurance Act of 1980:

"Beans (edible), asparagus, grapes, soybeans, cantaloupe, apricots, barley, cauliflower, cherries, grain sorghum.

"Cucumbers, plums & prunes, forage crops, lettuce, sweet corn, rye, snap beans, potatoes, tomatoes.

"Apples, oats, cabbage, peaches, sugar beets, carrots, blueberries, corn (grain), celery.

"Pears, wheat, green peppers, strawberries, forage, seed crops, onions, peas, sunflower, spearmint; now therefore, be it

"*Resolved by the Senate (the House of Representatives concurring)*, That the Michigan Legislature memorializes the Congress of the United States to extend coverage of the Federal Corp Insurance Act of 1980 to the above-mentioned crops; and be it further

"*Resolved*, That a copy of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, the members of the Michigan Congressional Delegation, and to the Secretary of the United States Department of Agriculture."

POM-635. A petition from citizens from Michigan, relative to licensing of CB radios; to the Committee on Commerce, Science, and Transportation.

POM-636. A resolution adopted by the International Federation of Professional and Technical Engineers, opposing the decontrol of natural gas; to the Committee on Energy and Natural Resources.

POM-637. A resolution adopted by the Senate of the Commonwealth of Massachusetts, favoring extension and improvement of the Clean Air Act; to the Committee on Environment and Public Works.

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO EXTEND AND IMPROVE THE CLEAN AIR ACT, SO-CALLED

"Whereas, the Clean Air Act, so-called, the cornerstone of our national air pollution control program, has resulted in improvement in the ground level air quality problem, but has failed to adequately address the problem of the long range transport of pollutants, and the attendant problem of acid deposition; and

"Whereas, the entire northeast region of the United States in general, and the Commonwealth of Massachusetts in particular, has been identified as the most susceptible to severe damage from acid deposition transported by wind currents from other regions; and

"Whereas, there is strong evidence that our ever-decreasing supply of water resources, such as the Quabbin Reservoir and other such resources are in serious danger of becoming excessively acidic, and also endangered by the release of toxic metals into our drinking water supply; and

"Whereas, the impact of acid deposition does not only adversely affect the health of human beings, but also seriously affects hundreds of New England lakes and streams, whereby they become stripped of aquatic life; and

"Whereas, since it has been determined that various species of fish are severely affected by low Ph levels leading to failure in the reproductive cycle, deformities, and eventually the death of such species; and

"Whereas, other effects of acid deposition include damage to plants, soil, agriculture, and corrosion of man-made objects such as sandstone sculptures, buildings, steel and paint; and

"Whereas, the Commonwealth of Massachusetts suffers the most extensive damage in the United States associated with national emissions of sulfur dioxides and other pollutants, to a degree out of proportion to the Commonwealth's contribution to the problem; and

"Whereas, the Commonwealth of Massachusetts recognizes the importance of maintaining clean air and water to industry, forestry, agriculture, recreation and tourism; now therefore be it

"*Resolved*, That the Massachusetts Senate memorialize the Congress of the United States and the Members thereof from Massachusetts to extend and improve the Clean Air Act, particularly as it relates to the control of acid deposits of sulfates and other pollutants to protect human health and preserve the right of the public to breathe clean air, drink clean water and enjoy other benefits of an unpolluted atmosphere; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the clerk of the Senate to the Speaker of the United States House of Representatives, the President of the United States Senate and to the Members of Congress from the Commonwealth."

POM-638. A resolution adopted by the City Council of Santa Cruz, Calif., supporting efforts by the Federal administration to return powers to local entities and urging implementation of those efforts in ways which will enhance home rule; to the Committee on Governmental Affairs.

POM-639. A resolution adopted by the Florida Sheriffs Association, relative to sharing information and opposing manpower cuts in the area of enforcement of drug laws; to the Committee on the Judiciary.

POM-640. A resolution adopted by the County Council of Richland County, S.C., relative to an extension of the Voting Rights Act of 1965; to the Committee on the Judiciary.

POM-641. A resolution adopted by the 16th Guam Legislature; to the Committee on Labor and Human Resources.

"RESOLUTION No. 199

"*Be it resolved by the Legislature of the Territory of Guam:*

"Whereas, in the October 16, 1981 edition of the Federal Register, the U.S. Department of Labor gave advance notice of proposed rule-making action to address the Adverse Effect Wage Rate for Guam; and

"Whereas, in this notice, the Department of Labor requested advice and comments from interested members of the public on the Adverse Effect Wage Rate for Guam; and

"Whereas, the Sixteenth Guam Legislature has adopted a consistent policy calling for the abolishment of the Adverse Effect Wage Rate through Resolution No. 112, adopted on May 8, 1981 (attached as Exhibit I), and Committee on Economic Development Resolution No. 1, adopted on July 17, 1981 (attached as Exhibit II); and

"Whereas, it is appropriate that the Legislature reaffirm this position and transmit this input to the U.S. Department of Labor for consideration during the forthcoming rule-making procedure; and

"Whereas, statutes enacted by the Twelfth Guam Legislature government payment of wages to alien construction workers at a rate not lower than the minimum wage; and

"Whereas, the Legislature should make every attempt to inform interested members of the public of this procedure and advise them of their right to submit testimony on the Adverse Effect Wage Rate to the U.S. Department of Labor; now, therefore, be it

"*Resolved*, That the Sixteenth Guam Legislature hereby reaffirms its position that the Adverse Effect Wage Rate for Guam has had a damaging impact upon Guam's construction industry and calls upon the U.S. Department of Labor to exercise its administrative authority and abolish the Adverse Effect Wage Rate for Guam; and be it further

"*Resolved*, That the Legislature requests the United States Department of Labor provide technical and financial assistance to the government of Guam for the training of local workers in the construction industry; and be it further

"*Resolved*, That the Legislature requests the United States Department of Labor provide an in-depth study of the long-range effects of foreign labor on Guam; and be it further

"*Resolved*, That the Legislature requests the Governor to submit testimony to the United States Department of Labor on equitable wage rates in Guam's construction industry; and be it further

"*Resolved*, That this Resolution shall be submitted to the U.S. Department of Labor for consideration during its proposed rule-making procedure as testimony; and be it further

"*Resolved*, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Honorable George Bush, Vice-President of the United States of America; to David Williams, Administrator, U.S. Employment Service, U.S. Department of Labor; to Pedro San Juan, Assistant Secretary-Designee, Department of Interior; to Congressman Antonio B. Won Pat, House of Representatives; to Roger Sardea, President, Guam Contractor's Association; to Mr. Joe San Agustin, Director, Department of Labor; to the Guam Chamber of Commerce; and to the Governor of Guam."

POM-642. A resolution adopted by the 16th Guam Legislature; to the Committee on Labor and Human Resources:

"RESOLUTION No. 112

"*Be it resolved by the legislature of the Territory of Guam:*

"Whereas, the U.S. Immigration and Naturalization Act of 1952 which went into effect in December of that same year, gave Guam the authority to import temporary alien workers; and

"Whereas, it is this same labor force that helped rebuild Guam after its destruction by World War II; and

"Whereas, from the inception of the program up to 1965, requests to import temporary alien labor to Guam was cleared at the

U.S. Department of Labor's Office in San Francisco; and

"Whereas, in 1965, the authority to certify for the importation of temporary alien workers was delegated to the local Department of Labor through the Guam Employment Service, a program administered by the local Department of Labor, but operated entirely with a federal grant from the U.S. Department of Labor; and

"Whereas, the Guam Employment Service continued to certify for requests for alien workers until 1977; and

"Whereas, in August 1977, the U.S. Department of Labor removed the authority from the local government and established a local office of the United States Department of Labor of Guam to certify all importation of temporary alien workers; and

"Whereas, concurrent with the USDOL's takeover of the temporary alien worker certification program, they established an adverse effect wage rate which gradually increased the wages of skilled H-2 workers from $3.03 per hour in August, 1977 to $7.90 per hour on January 1980; and

"Whereas, the justification given by the USDOL in establishing the adverse effect wage rate was to attract local workers to learn construction trades and accept jobs in the construction industry; and

"Whereas, the experience gained during the past three years clearly indicates that the adverse effect wage rate did not attract the local work force to seek jobs in construction; and

"Whereas, as a result of the implementation of the adverse effect wage rate, the cost of building a 1,500 sq. ft., three-bedroom concrete house on Guam has gone from $45,000 in 1977 to $73,500 in 1980, an increase of sixty three percent (63%); and

"Whereas, as a result of the increased cost, very few people on Guam are able to build homes and construction today is virtually dead; and

"Whereas, it is estimated that as a result of the adoption of the adverse effect wage rate, the dollar outflow from Guam has increased by $20 million during the period 1977 through 1980; now, therefore, be it

"*Resolved*, that in view of the adverse impact of the adverse effect wage rate to the construction industry on Guam and ultimately to Guam's economy, the Sixteenth Guam Legislature hereby requests the President of the United States and the U.S. Secretary of Labor to remove the adverse effect wage rate established by USDOL for Guam in 1977; and be it further

"*Resolved*, that the Governor of Guam shall designate the Department of Labor to determine the number and need of H-2 alien labor for the territory—and that said department or agency present to the members of the Legislature within thirty days (30) upon adoption of said resolution, the equitable wage rate for H-2 alien labors; and be it further

"*Resolved*, that the authority to certify for the importation of temporary alien workers to Guam be redelegated to the local Department of Labor; and be it further

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the Secretary of Labor, Raymond J. Donovan; to the Secretary of the Department of Interior, James C. Watt; to Congressman Antonio B. Won Pat; and to the Governor of Guam."

POM-643. A resolution adopted by the 16th Guam Legislature; to the Committee on Labor and Human Resources:

RESOLUTION No. 1

"Be it resolved by the Committee on Economic Development of the Sixteenth Guam Legislature:

"Whereas, on September 13, 1977, the United States Department of Labor implemented the Adverse Effect Wage Rates for Guam's construction industry; and

"Whereas, these Adverse Effect Wage Rates have had a tremendous negative impact on the local construction industry, particularly small contractors; and

"Whereas, in addition, the Adverse Effect Wage Rates have increased the cost of residential construction to a level where most average income consumers cannot afford to build a home; and

"Whereas, a San Francisco District Court recently froze the Adverse Effect Wage Rates at the 1980 level after finding that, in 1977, the Secretary of Labor exceeded his authority in establishing the Adverse Effect Wage Rates for Guam; and

"Whereas, the Department of Labor recently announced that they will open proceedings to determine whether the Adverse Effect Wage Rates for Guam should be lowered; now, therefore, be it

"Resolved, that the Committee on Economic Development of the Sixteenth Guam Legislature hereby testifies in opposition to the Adverse Effect Wage Rates for Guam; and be it further

"Resolved, that the Committee on Economic Development of the Sixteenth Guam Legislature hereby requests the Secretary of Labor to exercise his administrative authority to totally abolish the Adverse Effect Wage Rates for Guam; and be it further

"Resolved, that the Speaker and Chairman of the Committee on Economic Development certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to Raymond Donovan, Secretary of Labor, Jim Medas, Special Assistant to the President, Intergovernmental Affairs; Pedro San Juan, Assistant Secretary-Designee, Department of Interior; Congressman A. B. Won Pat, House of Representatives; Roger Sardea, President, Guam Contractors' Association; Joe San Agustin, Guam Department of Labor; and to Paul M. Calvo, Governor of Guam."

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. WILLIAMS (for himself, Mr. CRANSTON, Mr. RIEGLE, Mr. SARBANES, Mr. DODD, Mr. DIXON, Mr. BRADLEY, Mr. TSONGAS, Mr. MOYNIHAN, and Mr. HUDDLESTON):

S. Con. Res. 51. Concurrent resolution relative to Federal investment in housing; to the Committee on Banking, Housing, and Urban Affairs.

ADDITIONAL COSPONSORS

S. 706

At the request of Mr. DOMENICI, the Senator from Idaho (Mr. SYMMS) and the Senator from Nevada (Mr. LAXALT) were added as cosponsors of S. 706, a bill to establish a National policy for the timely notice, conduct, approval, and record of Federal land surveys, and for other purposes.

S. 1348

At the request of Mr. SASSER, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1634

At the request of Mr. COCHRAN, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 1634, a bill to incorporate the National Federation of Music Clubs.

S. 1879

At the request of Mrs. KASSEBAUM, the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 1879, a bill to amend the Milwaukee Railroad Reconstructing Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail and for other purposes.

S. 1896

At the request of Mr. STENNIS, his name was added as a cosponsor of S. 1896, a bill to amend the Internal Revenue Code of 1954 to repeal the special leasing provisions enacted by the Economic Recovery Tax Act of 1981.

S. 1901

At the request of Mr. LEVIN, the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 1901, a bill to amend chapter 137 of title 10, United States Code, to impose certain requirements on the awarding of sole-source contracts by the military departments.

SENATE JOINT RESOLUTION 127

At the request of Mr. COCHRAN, the Senator from Maryland (Mr. MATHIAS), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of Senate Joint Resolution 127, a joint resolution to grant official recognition to the International Ballet Competition.

SENATE RESOLUTION 209

At the request of Mr. JEPSEN, the Senator from South Carolina (Mr. THURMOND), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Resolution 209, a resolution expressing the sense of the Senate that the President of the United States, the U.S. Senate, and the Senate Committee on Banking, Housing, and Urban Affairs should pay careful deference to the specific provisions of the Federal Reserve Act, requiring broad regional and economic representation on the Board of Governors of the Federal Reserve System, in their consideration of nominees to the Board.

SENATE RESOLUTION 238

At the request of Mr. BENTSEN, the Senator from New York (Mr. D'AMATO), the Senator from Delaware (Mr. ROTH), the Senator from Montana (Mr. BAUCUS), the Senator from Florida (Mr. CHILES), the Senator from South Carolina (Mr. THURMOND), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of Senate Resolution 238, a resolution to retain the deductibility from personal taxes of interest paid on residential mortgages.

At the request of Mr. DOLE, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of Senate Resolution 238, supra.

SENATE RESOLUTION 253

At the request of Mr. DOLE, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of Senate Resolution 253, a resolution expressing the sense of the Senate on "National Circle K Week."

SENATE CONCURRENT RESOLUTION 51—RELATIVE TO FEDERAL INVESTMENT IN HOUSING

Mr. WILLIAMS (for himself, Mr. CRANSTON, Mr. RIEGLE, Mr. SARBANES, Mr. DODD, Mr. DIXON, Mr. BRADLEY, Mr. TSONGAS, Mr. MOYNIHAN, and Mr. HUDDLESTON) submitted the following concurrent resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. CON. RES. 51

Whereas, the United States housing industry is suffering from one of its worst recessions since World War II, marked by historically high interest rates, widespread unemployment, business failures, disastrously low levels of production and sales, and diminished hopes for homeownership among millions of potential homebuyers, and

Whereas, as many as ten million American households either live in substandard housing or pay excessive portions of their income for rent, and

Whereas, deteriorated shelter, obsolete infrastructure, and economic decline exacerbated by the current recession continue to plague urban and rural communities across the country, and

Whereas, for almost two generations the federal government has demonstrated a continuous national commitment to the goal of a decent home and a suitable living environment for each American family, through its housing assistance, community development, and mortgage finance programs, and

Whereas, the maintenance of this national commitment is essential to the health of the economy, and the well-being of individuals and their communities, and

Whereas, the adoption of certain recommendations of the Office of Management and Budget would have a catastrophic effect on the country's ability to meet housing and community development needs.

Resolved by the Senate (the House of Representatives concurring), That the Congress strongly reaffirms the federal government's role in improving housing opportunities for all Americans, and the social and economic conditions in distressed urban and rural communities by:

(1) supporting cost-effective and meaningful federal efforts to address the unmet housing needs of low and moderate income persons, the elderly, the handicapped, and others with specialized housing problems,

(2) preserving the capacity of federal mortgage insurance and secondary market programs to perform their traditional roles in serving potential homebuyers, and

(3) maintaining an important role for the Community Development Block Grant program, and the Urban Development Action Grant program in answering pressing community development needs.

Mr. WILLIAMS. Mr. President, today I am submitting a concurrent resolution relating to the administration's proposals to curtail sharply Federal involvement in housing, and to phase out the community development block grant and urban development action grant programs.

The purpose of this concurrent resolution is to put Congress clearly on record in opposition to these callous proposals and in favor of a continued Federal commitment to decent housing and better communities for all Americans.

As my colleagues are no doubt aware, the press has been filled with stories about OMB's proposals to slash the heart out of housing and community development programs which are of vital importance to almost every American community and millions of needy citizens. The catastrophic impact of these proposals is immediately understandable by a reading of the text of OMB's recommendations and the subsequent draft of the HUD response. I will be submitting these materials for publication in the RECORD.

Suffice it to say that if OMB were to have its way we would have no more production of assisted housing; we would cripple the ability of FHA to be an effective source of mortgage credit for moderate income Americans; and we would simply end the community development block grant and UDAG programs, which are a crucial source of assistance for the mounting economic and infrastructure needs of our cities.

Mr. President, it is my view that the Congress of the United States will not support the approach Mr. Stockman is suggesting. It is therefore my hope that the President would choose not to adopt the OMB proposals, but would work with the Congress to help assure that these important programs continue to serve our people in a cost-efficient and compassionate manner.

I believe that the concurrent resolution I am submitting today will help convince the President of the wisdom of that choice.

Mr. CRANSTON. Mr. President, I am pleased to cosponsor this concurrent resolution because it expresses Congress intent to reaffirm its support for housing and community development programs.

These programs are threatened because the Office of Management and Budget proposes to slash the Department of Housing and Urban Development's budget by terminating construction of assisted housing projects, increasing the amount of rent that tenants will have to pay in order to receive Federal housing assistance, cutting operating subsidies for public housing, and phasing out needed community development programs. Even HUD officials after reviewing the proposed cuts have commented that this proposal will lead to "rent strikes, riots, vandalism, and irreparable damage to projects." If enacted, the OMB proposals would wreak havoc on this Nation's supply of federally assisted housing units by causing widespread bankruptcies and receiverships.

Housing is in a mess today because of the Reagan administration's policy of tight money and high interest rates. But instead of getting the Government out of the business of making housing scarce, OMB wants to get the Government out of the business of making housing available.

I do not agree with that cruel and shortsighted philosophy. Considering the pressing unmet needs for housing and community development, a Government role clearly is essential. This concurrent resolution reaffirms the Federal Government's traditional compassionate role in this vital area and I strongly urge my colleagues to support it.

AMENDMENTS SUBMITTED FOR PRINTING

SMALL BUSINESS INNOVATION ACT OF 1981

AMENDMENT NO. 651

(Ordered to be printed.)

Mr. ROBERT C. BYRD proposes an amendment to the bill (S. 881) to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy.

AMENDMENT NO. 652

(Ordered to be printed.)

Mr. BAKER (for himself, Mr. JEPSEN, and Mr. WEICKER) proposed an amendment to the amendment (No. 651) proposed by Mr. ROBERT C. BYRD to the bill S. 881, supra.

NOTICES OF HEARINGS

TEMPORARY SUBCOMMITTEE ON FEDERAL CREDIT

Mr. GORTON. Mr. President, the Temporary Subcommittee on Federal Credit of the Senate Budget Committee will hear testimony relating to Federal credit activities on Thursday, December 10, at 10 p.m., in room 6206 of the Dirksen Senate Office Building.

Witnesses scheduled to appear are Alice Rivlin, Director, Congressional Budget Office; Larry Kudlow, Assistant Director of Economic Policy, Office of Management and Budget; Nancy Teeters, Board of Governors, Federal Reserve System; Roger Mahle, Assistant Secretary of Domestic Finance, U.S. Department of the Treasury; and Harry S. Havens, Assistant Comptroller General, Government Accounting Office.

For more information, contact David Nummy of the Senate Budget Committee staff at 224–0536.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH AND RULES

Mr. DANFORTH. Mr. President, on Thursday, December 10, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs will hold a hearing to consider the draft proposal for a uniform procurement system, recently submitted to the Congress by the Office of Federal Procurement Policy. The Hearing will begin at 2 p.m., in room 3302 of the Dirksen Senate Office Building. This hearing was previously scheduled for December 3. Interested persons should contact Patricia Otto, chief clerk, at 224–0211.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. WEICKER. Mr. President, I ask unanimous consent that the Committee

on Foreign Relations be authorized to meet during the session of the Senate at 2 p.m. today, Monday, December 7, to hold a full committee hearing on the nominations of Gerald Thomas to be Ambassador to Guyana and James Theberge to be Ambassador to Chile.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution, of the Judiciary Committee, be authorized to meet during the session of the Senate today, Monday, December 7, to discuss Senate Resolutions 17, 18, 19, and 110, resolutions pertaining to the abortion issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 8, at 11 a.m., to hold a business meeting to discuss treaties, nominations and legislation before the committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet during the session of the Senate at 9 a.m. on Tuesday, December 8, to hold a full committee oversight hearing on debt collection in the health professions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

EXECUTIVE ORDERS ON INTELLIGENCE ACTIVITIES

● Mr. SCHMITT. Mr. President, on Friday, December 4, 1981, the President issued two new Executive orders on U.S. intelligence activities after detailed consultation with the Select Committee on Intelligence. The first order sets forth the mandate and standards for the conduct of intelligence activities, and the second order is the charter for the President's Intelligence Oversight Board.

As chairman of the subcommittee that reviewed the draft order, I am pleased that the orders reflect substantially the views of the committee as expressed in the consultative process. While not every Member may be fully satisfied with every provision, I believe that the orders can provide a firm foundation for the conduct of intelligence activities with bipartisan support from the Congress.

Let me take this opportunity to report to the Senate on the consultative process that occurred with respect to the Executive orders.

Early in 1981, the administration made known its intention to replace the previous Executive order on intelligence activities with its own Executive order. During the confirmation hearings on William Casey for the position of Director of Central Intelligence, Director Casey made a commitment to the select committee that we would be consulted prior to the promulgation of any new such order.

In the spring of 1981 two proposed Executive orders surfaced. The committee was informed that these two orders were only working drafts, but they came to the attention of the press and created some controversy. The admministration, once again, assured the committee that, prior to promulgation of an Executive order on intelligence activities, the committee would be consulted.

The administration forwarded copies of its proposed Executive order to the committee on September 23, 1981. As part of the consultative process, the committee agreed to review the proposed order and to forward its comments, observations, and suggestions to the administration in an expeditious manner.

The committee understood that the promulgation of an Executive order is solely within the prerogative of the President. It was not the intention of the committee to limit that prerogative. However, within the oversight responsibilities of the committee and due to the important and highly sensitive nature of intelligence and the turmoil within the intelligence community during much of the 1970's, the best interests of the community are served by cooperation between the executive and legislative branches of Government. The consultation on this Executive order took place in that spirit.

It is the opinion of the committee that the review process, which involved three meetings of the Subcommittee on Legislation and the Rights of Americans with representatives of the intelligence community in addition to written questions and answers, was useful to both the committee and the intelligence community. Because of this process, the committee developed a better understanding of the rationale for the provisions of the Executive order and some of the problems which arose under Executive Order 12036.

The intelligence community has also benefitted from these exchanges in that it better understands the concerns of the members of the committee as well as possible concerns of the public at large.

The recorded meetings and written correspondence between the committee and the intelligence community agencies has provided the committee and the Congress with a history of the intent of the provisions of the Executive order. This history will assist the committee in discharging its oversight duties.

The committee is pleased with the positive tone of the new Executive order. This cannot but help the morale of individuals working in the intelligence community. The outlining of the goals in section 1–1 is helpful in providing direction to the intelligence community and a better understanding for the public at large of the purpose of intelligence.

It is especially important for the American people to understand that the new order maintains adequate safeguards against improper intelligence operations within the United States. There is no change in the restriction on undisclosed participation by CIA employees in domestic organizations to influence the activities of the organization or its members.

The order does widen CIA authority to conduct special activities (or covert action) so that operations of limited scope could take place within the United States. However, there are specific checks to prevent abuse of this authority.

First, the purpose must be to support national foreign policy objectives abroad. Second, the operation cannot involve undisclosed participation by CIA in any domestic organization to influence the activities of the organization or its members. Third, under a new limitation added in this order, no special activities anywhere may be undertaken to influence U.S. political processes, public opinion, policies, or media. This new limitation makes clear that the CIA does not have the authority to undertake special activities to influence U.S. media, even if the ultimate objective might be to affect foreign countries.

In general, the new order fully respects the duties and responsibilities of the Congress and the two oversight committees. The President has made it clear in the order itself and in the consultation process that preceded in that the administration understands the importance of congressional oversight of intelligence activities.

This is particularly significant with regard to some of the other provisions of the order that change the standards for collection of intelligence concerning the activities of U.S. citizens. While in several respects the authority of the CIA is expanded, the Select Committee expects to be consulted on the procedures that will implement the order. The committee also intends to exercise its oversight authority to insure that there is no abuse of these powers and that within the United States the collection of intelligence concerning U.S. citizens is conducted by the FBI unless there are truly exceptional and compelling reasons for the CIA to assist.

The administration acted in good faith in its consultations with the committee. The willingness of the administration to provide an "on the record" discussion of the proposed order and to respond to oral and written questions of committee members was most forthcoming and much appreciated. It is hoped that this process will continue in this and other matters relating to issues affecting the Intelligence community.●

WANTED: LEADERSHIP IN HOUSING

● Mr. DODD. Mr. President, I recently addressed the Senate with my concerns with the reported recommnedations of the Office of Management and Budget for Federal housing and community revelopment programs. The OMB is advancing budgetary proposals for the next fiscal year which will immediately halt any additional housing assistance for lower income families and senior citizens and begin a phase-out of the major efforts which support community development and revitalization in distressed urban and rural communities. These pol-

icies not only signal a reversal in this Nation's historic commitment to assist the housing needs of the poor, but also represent an abdication by the present administration of any leadership in attempting to fashion alternative housing policies which recognize both the admitted shortcomings of current programs and budgetary limitations.

This latter point is well borne out in an article by I. D. Robbins in the real estate section of the December 6, 1981 edition of the New York Times. This article rightfully points out that the recent OMB proposals and the recommendations in the interim report of the President's Commission on Housing fail to offer any constructive alternatives for encouraging the development of new housing opportunities despite the desperate need for additional housing and the worst depression on record in the housing industry. The article goes on to suggest a very modest subsidy initiative to foster the construction of single-family, owner-occupied homes.

This idea is similar to a bill I have introduced for the development of rental housing through housing development or second mortgage loans. While both concepts may not be the ultimate answers to current problems, the point is that there is no dearth of constructive ideas which deserve our consideration and immediate attention. If the administration will not assume this traditional leadership role with the Congress, then the Congress must go it alone before existing programs are severely reduced or eliminated completely.

According to this article, "research suggests that there is not a country anywhere that does not claim to have a practical national program to encourage housing construction." We must not allow this administration to put this Nation in a unique position in this regard. I will call the attention of my colleagues to this recent article and ask that it be printed in the RECORD.

The article follows:

WANTED: LEADERSHIP IN HOUSING

(By I. D. Robbins)

If the recent report of the President's Commission on Housing is any guide, the Reagan Administration is making no provision for the "supply side" in its housing policies.

Home construction, already in the doldrums, will stay there.

The report contains no proposals for incentives for new construction or rehabilitation, no inducement for home ownership, no proposed offsets for high interest rates or high construction costs. And there is no provision for public housing.

Historically, administrations have favored and Congress has adopted new legislation to encourage housing construction in response to the needs of the building industry, the general economy and consumer demand for shelter. Research suggests that there is not a country anywhere that does not claim to have a practical national program to encourage housing construction.

But the commission has essentially proposed only a new form of rent subsidy to lower-income people, payable to tenants instead of landlords as at present. This time the subsidy is to be a form of welfare payment—vouchers that would give low-income tenants licenses to hunt for vacant apartments. Whenever they are lucky enough to find a place to live, poor people would get a portion of their rent paid.

Welfare departments and housing agencies, which now place tenants, would presumably try to help tenants who are eligible for vouchers. Other than "decent housing" and "not better housing than moderate-income households," the commission did not spell out the upper limits of the voucher payments. Nor did it place a limit on the number of vouchers and their total cost. The final laws or regulations would no doubt limit payments and put controls on vouchers.

If the Administration wants to combine a socially useful governmental housing program at the least cost, what it should do is provide one-time interest-free capital loans or outright grants toward the construction of single-family, owner-occupied row houses.

This program should be aimed at providing conventionally constructed shelter for families earning as little as $16,000 a year. Depending on size and amenities, these houses could carry price tags of $34,000 to $50,000.

One market effect would be to induce upwardly mobile families in public housing to choose ownership and leave space for those on waiting lists. Single-family row houses cost only half as much to build as equal space in high-rise buildings. And they avoid costly managerial and maintenance services.

A small and practical Federal program, about all we can hope for from a cautiously conservative Administration, might well contemplate 100,000 dwelling units a year, each with a grant of $25,000 for a total of $2.5 billion a year. As security for the grant money, the Government would get a lien, with the grant to be returned when the house is resold.

The grantee obviously must not be permitted to treat the Government's contribution as part of the profit in a sale. Based on an average of the rising sales prices and turnovers since 1936, the Government could reasonably expect to recover all of its capital grant money in less than 10 years. After that, the program would be substantially self-financing out of the recovery on the liens.

Although mortgagees should be delighted with the security of their relatively small position in the financing, their loans could, if necessary, be insured. The grant fund could be further protected through small annual grant insurance payments by the homeowner.

To get the most mileage from the grant program, a system of qualifying for grant commitments could take into account land costs (to encourage cities to contribute property taken for nonpayment of taxes), available municipal tax abatements, the cost of construction, the size of the project and how it will create a sound neighborhood, voluntary community interest and evidence of sales potential and the speed with which a city contracts to process the program and commits itself to the work.

At this point, however, it appears that the Administration is concentrating on the voucher system. As a substitute for the current rental assistance program known as Section 8 for existing housing, it has one major advantage: it is not by law or by contract either continuing or cumulative. It can be changed or cut off. It is a true welfare-like program, to be available to families earning 50 percent or less of the median income in the area.

In addition to the voucher proposal, the commission made only two recommendations of substance. One was that cities or states should be allowed to use present community-development block grants, now devoted to other purposes, to assist new housing construction. The other was that owners of "residential rental structures" 30 years or more old should have an investment tax credit of up to 20 percent on rehabilitation expenses, similar to that now permitted on nonresidential real estate.

It is easy to see why the Administration would like to stop the growth of cumulative housing debt. According to the 1982 budget of the Department of Housing and Urban Development, subsidy obligations for all programs now total $250 billion. A $6,000-a-year Section 8 rent subsidy would in 40 years aggregate $240,000, four times the original construction cost. With only 500,000 units covered since the program started in 1974, obligations of $119.5 billion have been accumulated.

An 8 percent interest subsidy on a mortgage loan of $80,000, under Section 236 for multiple dwellings or Section 235 for single-family housing, would cost the Federal Government $4,800 a year per unit. A modest 100,000-unit, 40-year program would aggregate obligations of $245 billion.

But, as the housing industry declines further, as inevitable scandals erupt in the voucher program, as the people demand new housing but lack the funds to pay for it or finance it at high interest rates and the states and cities are unable or unwilling to fill the gap, the Federal Government will probably have to come forward with a new supply side program.

There must be either a change of attitude at the top within the Reagan Administration or a vastly greater concern for housing by states and cities. Samuel R. Pierce Jr., the Secretary of Housing and Urban Development, would like to find ways to encourage home building that are more acceptable to the White House. He would like to encourage stable family life through the values in the cities' existing schools, sewers, streets, parks and utilities.

But the Secretary is boxed in at present. He lacks the status in the Administration necessary to push a new program. His natural allies—the cities, the minorities, the home builders, the young families seeking first homes—are not the major clients of those in power. If new programs are to be adopted, they will probably have to be initiated in Congress or be the result of tide of public opinion nurtured by governors, mayors and legislatures and by organizations that make more and better housing a main goal.

The hope is that this will yet develop.●

THE ADMINISTRATION'S 1983 BUDGET FOR THE DEPARTMENT OF ENERGY

● Mr. KENNEDY. Mr. President, over the weekend we have begun to learn the details of the administration's plans for the Department of Energy budget for fiscal year 1983.

I am deeply concerned that the administration is once again following a one-sided policy of eliminating or nearly eliminating funding for virtually every component of DOE—conservation, solar and other renewable energy, and fossil fuels—except nuclear energy. These budget proposals are tantamount to a dismantling of the agency, without any formal proposal from the administration. They reflect a policy that ignores our most pressing national energy needs—reduced dependence on imported oil and development of diversified energy sources, including conservation.

Today I have sent a letter to the Director of the Office of Management and Budget expressing my concerns over these proposals, and ask that the text of the letter appear in the RECORD.

The letter follows:

COMMITTEE ON LABOR
AND HUMAN RESOURCES,
Washington, D.C., December 7, 1981.

Hon. DAVID A. STOCKMAN,
Director, Office of Management and Budget, Executive Office Building, Washington, D.C.

DEAR MR. STOCKMAN: I am distressed to learn of your efforts to virtually eliminate funding in the FY 1983 budget for a vital portion of our national energy program—conservation and renewable energy sources. It is my understanding that you have proposed reducing conservation programs by over 97 percent below the 1981 level and would cut solar and other renewable programs by approximately 85 percent below 1981. Coupled with a nearly 50 percent reduction for fossil fuels research, your proposed budget would convert DOE into little more than a resurrected Atomic Energy Commission.

For the better part of a decade, our national energy policy has been guided by a consensus on two fundamental principles—the need to reduce our dependence on foreign oil and the need to develop a balance among conservation and the various sources of energy. In a single stroke your proposal undermines these two vital goals.

I strongly urge you to reconsider the levels and allocation of funds for the Department of Energy for 1983. If you and the Administration are determined to hold fast to your course of eliminating all but the nuclear component of the Department, I believe you have an obligation to undertake a forthright, abolition of DOE, rather than attempting to do so through the budget process.

Sincerely,

EDWARD M. KENNEDY,
Ranking Minority Member.●

ARMY'S DAWKINS: FROM ALL-STAR TO ONE-STAR

● Mr. KENNEDY. Mr. President, I wish to call the attention of the Members of the Senate to an article in the December 1 edition of the Washington Post entitled, "Army's Dawkins: From All-Star to One-Star."

Pete Dawkins' name has become synonymous with excellence and service to our country. At West Point, he established a record of accomplishment that has yet to be equaled. While having the responsibility of being first captain of the Corps of Cadets, he also became a "star man" ranking in the top 5 percent of his class academically, president of the senior class, captain of the undefeated Army football team, an All-American halfback, and won the Heisman Trophy.

To top off his last year, he was chosen as a Rhodes Scholar. During his time in England, he took a short break from his studies and from becoming a star at rugby, to attain perhaps his greatest achievement, marrying Judi. They are now the proud parents of two children, Sean and Nicole.

Since his graduation from the Military Academy, General Dawkins has served his country in Vietnam and Korea, as well as distinguishing himself in assignments at the Pentagon, Fort Ord, and Fort Campbell. In his spare time, he got his doctorate degree in international relations from Princeton.

His leadership and vision have been a credit to the U.S. Army, and it is fitting that he should become its youngest general. It is heartening for all Americans to know that a man of Peter Dawkins' ability is involved in our national defense. He is certainly an outstanding example of the inspirational ideal expressed in the West Point motto: Duty, honor, country.

Mr. President, I submit this article for printing in the RECORD.

The article referred to is as follows:

ARMY'S DAWKINS: FROM ALL-STAR TO ONE-STAR

(By Dave Kindred)

The way Pete Dawkins dashed through his Pentagon office, you'd have thought somebody had pushed, oh nooo, the button. Either that or Al Haig was on his way over to inspect Cap Weinberger's quarters. Or someone said Army needed a running back for this Saturday's war with Navy. Turns out it wasn't anything so scary. "Staff meeting—I'll back in five minutes," Dawkins said.

Pete Dawkins is 43 years old. A bit over 6 feet tall. Lean, athletic, in balance. Heavy in the shoulders. Brown-going-gray hair, trimmed just so. Chin high, eye contact solid, handshake firm. He won the Heisman Trophy for being a good halfback in 1958, when his coach said, "I can practically prophesy that someday Dawkins will be chief of staff." Bombs or Alexander the Great or Navy, you get the idea this guy can handle it.

Brig. Gen. Peter M. Dawkins is the Army's youngest general. His title: Deputy Director, Strategy, Plans and Policy. He works for a four-star general who is a deputy chief of staff for operations and plans. In the labyrinthine complexity of an Army organization chart, Dawkins is just another name in little type—a one-star kid on the way up but with a long way to go.

"We deal with everything from contingency planning for the rapid deployment force to what the Army ought to look like five years from now," Dawkins said, back in his office. "We develop strategy on, say, Southwest Asia or the Caribbean or NATO, or for the theater nuclear force negotiations with the Soviets."

When Roger Staubach talks about bombs and Pete Dawkins talks about bombs, they're not saying the same things.

Dawkins won the Heisman while captain of the U.S. Military Academy's last undefeated team. Staubach won it five years later at Navy. Nowadays we see Staubach a lot. He's the TV fellow asking people on the street corner how they spell relief. He did his tour of duty after graduation, keeping a hand in football at every port (we didn't lose a sub while Staubach quarterbacked at Penscola). Then he did okay with some pro team in Texas.

So while Staubach grew famous in Pittsburgh and Minneapolis, Dawkins got lost in Vietnam and Korea, Fort Ord and Fort Campbell. Staubach got rich, Dawkins got medals. The last sighting of Dawkins came in 1972, when he surfaced in the national media as the ultimate soldier of America's new volunteer army: the t.t.u.—tough, thoughtful, unarmed. He helped shape the volunteer force, insisting the Lombardi authoritarian manner wouldn't work on kids who resent nothing as much as an order to get a haircut. Longer hair in the Army is one of Dawkins' suggestions.

Elvis was a bigger deal in '58 than Pete Dawkins, but not in one house where the kid, a high school junior who didn't even play football, thought Dawkins was as good as it gets in this world. He was this good: the biggest deal at West Point is to be first captain of cadets because you're the boss of everybody; after that comes the football captain, followed by class president and then "star man," which means you rank academically in the top 5 percent of your class.

It's a big deal to reach two of those stations. Douglas MacArthur was first captain and a star man in 1903.

Pete Dawkins was first captain, football captain, class president and 10th in a class of 499.

Nobody did that before or since.

There's a Heisman television show coming up Saturday night, with the presentation of this year's hunk of bronze, and Bud Greenspan will have film showing how Pete Dawkins won his Heisman. The guy caught passes averaging 30.6 yards, he led Army in rushing, he signaled the plays to the Lonesome End, Bill Carpenter. In his spare time, he became a Rhodes Scholar.

There's a little picture on his office wall from his Oxford experience as a rugby player. He is sitting on a fellow's chest, one hand at the miscreant's throat latch, the other drawn back to punch his lights out. Such repartee is inevitable in rugby.

"He insisted on tackling me after I had passed the ball," Dawkins said, "and so we had several discussions of the rules. As I was about to punch the fellow, he smiled at me and he didn't have any teeth at all. Somehow or other, I couldn't punch a guy who had no teeth."

On the picture is the caption, "When I say one-eighth-inch tape, I mean one-eighth-inch tape!"

His staff at Fort Campbell had attached the caption as a going-away present this summer when Dawkins moved from chief of staff of the 101st Airborne Division into his new job with the one star on his shoulders.

"I had expressed disgruntlement at what I thought was a lack of precision on a bar graph," Dawkins said, explaining, "I worked with them in detail to spruce it up. I wanted one-eighth-inch tape for the graph."

The competitive urge—"a congenital flaw," the general confesses—moves Dawkins to the tennis court once a week these days. Heskis, too, with his wife, Judi, and children Sean and Noel. He doesn't bring it up a lot, because he's sensitive to the football identity so long removed from the field, but Dawkins says he sees "striking similarities between a really top-flight military unit and a winning team. It's teamwork, in which you simply can't succeed unless you understand that only by each person doing his thing very well can the group succeed. They have to want to be part of something, and to go beyond what just their task is. All of the great plays, the game-winning plays, came about because somebody did something extra that they weren't supposed to do."

As for Army's recent football decline, the old grad said, "I don't feel good about it. But let me be quick to say, if I had a ready solution to reversing it, I would certainly not be sitting here keeping it a secret. . . . Three things contributed to it: An unpopular war in Vietnam, an antiauthority mood across the country and the dramatic emergence of professional football. . . . But now, the mood of the country has changed, I think, markedly. It's much more healthy and supportive of the academies."

When he could be a politician (the Senate has an old basketball player already) or a diplomat (PhD, Princeton, International Relations), Dawkins says he remains a career soldier because he likes the people he works with and he thinks this country ought to have a strong national defense.

"If there ever came a day that I didn't feel I could make some contribution personally to life, to make a difference in what the Army is and what it does, then I'd do something else," Dawkins said.

The Redskins could use a running back.

"Oops, I have to go," Dawkins said, smiling. "A four-star general is waiting for me."

Still smooth after all these years.●

SCM CORPORATION

● Mr. D'AMATO. Mr. President, the Wall Street Journal reported on Tuesday, De-

cember 1, that Smith-Corona Corp. (SCM) laid off 500 of the 4,000 employees of its typewriter group indefinitely. Also, production of Smith-Corona typewriters will be suspended at three plants for 3 weeks starting December 14, affecting 3,450 workers.

SCM has claimed, and the Department of Commerce has agreed, that several Japanese typewriter companies have been "dumping" typewriters in the United States since the early 1970's. The present court case between SCM and the Commerce Department is not over dumping, but over SCM's contention that the dumping charges on the Japanese typewriter manufacturers are too low.

While I am in favor of a free-trade economy, I am also in favor of a fair-trade economy. Clearly, the Trade Agreements Act of 1979, and the report language of the bill, spelled out congressional intent in this bill—to have the U.S. Government provide strict enforcement of antidumping laws. The Treasury Department was not enforcing these antidumping laws; therefore, the Trade Agreements Act of 1979 gave the Commerce Department jurisdiction over antidumping enforcement. Since the early seventies, when the Japanese began their typewriter dumping practices, the employment levels in SCM's upstate New York plants have been steadily decreasing.

I wish to put myself on the side of William Brock, President Reagan's trade negotiator. In his statement of U.S. trade policy, he says:

> A strong U.S. economy is our goal. Free trade based on mutually acceptable trading relations, is essential to the pursuit of that goal.

In explaining this point, he goes on to say:

> The administration will strictly enforce United States laws and international agreements relating to international trade. Specifically, our antidumping . . . duty, and similar structures are designed to neutralize or eliminate trade distortive practices which injure U.S. industry and agriculture. We regard these laws as essential to maintain the political support for a more open trading system.

I cannot sit by while my own Commerce Department has decided this issue on the side of SCM, but has made the penalty for dumping so low for the foreign manufacturer that it does nothing to discourage them from continuing the practice. I support President Reagan's trade goals for free trade based on mutually accepted trade agreements. I must also make the strong plea for our own Government to enforce those trade agreements, which means enforcing antidumping practices where they exist, allowing the penalty to discourage a practice which most of our trading neighbors have mutually agreed is an unfair trade practice.●

COURT-ORDERED CLOSING OF A PUBLIC HIGH SCHOOL

● Mr. JOHNSTON. Mr. President, on November 25, the Times of Shreveport, La., presented an article headlined "Ashland: Closing of the Town School Sends Community Reeling."

In this story, writer Keenan Gingles offers a poignant and powerful account of the court-ordered closing of a public high school and its impact on the small community of Ashland.

I commend the article to the attention of my colleagues and ask that it be printed in the RECORD.

The article follows:

ASHLAND: CLOSING OF THE TOWN SCHOOL SENDS COMMUNITY REELING

(By Keenan Gingles)

ASHLAND.—For decades life here has revolved around a couple of things basic to rural folk of north Louisiana—religion and education.

If there was one thing that a man could hang his hat on, as the saying goes, it was the fact that on Sunday morning a sermon would be preached from the pulpit of the local Baptist church and that education would be spooned out Monday through Friday.

The sermons are still being preached, but education is no longer taken for granted in this tiny village that has an almost pastoral setting, peacefully situated along a narrow ribbon of highway that cuts through the pine-studded, rolling hill land of extreme northwest Natchitoches Parish.

Across the road from the combination post office and town hall building are the Ashland Baptist Church, the parsonage and the Coffey General Store. There are a couple of streets, lined with white frame houses that lead off the main highway. From either direction of the highway cattle can be seen grazing in autumn-browned fields.

It was once a larger place. Years ago a cotton gin operated for hardy farmers who tilled the thin top soil, producing bales of cotton, corn and other row crops.

To more than a small degree life was laid back, revolving slowly around the white cinder block church and, until recently, the school. During spring, summer, fall and winter, basketballs swished through hoops in the school's small gymnasium. Baseballs cracked off bats on the playing field outside and small children entertained themselves on the "monkey bars" on the playground.

But times change. Farming, particularly cotton, began to disappear with the Depression and fell by the wayside as sons and daughters gave up tilling the soil for the chance at a college education and the jobs that urbanized areas offered.

Those who stayed made their living off the thriving timber industry or by commuting to jobs in Natchitoches or Shreveport.

A large portion of the good life stayed the same. Just as it had been for decades, there was still the cold home-made ice cream on warm summer nights and dinner on the grounds on Sundays after church. At school, the Bearcats still did battle every fall and winter with nearby rival schools such as Fairview Alpha, Castor and Martin.

And all the while, all over the state, small schools were being boarded up, succumbing to a fate that school officials euphemistically refer to as consolidation, caused by too few students or court-ordered desegregation plans.

In Ashland, Mayor Randall Martin and other residents had heard talk of closing the Ashland school for years. "They wanted to close it. They (school officials) even bought a piece of property over at Creston and built some buildings," he said.

The Natchitoches Parish School Board proposed closing the high school and sending the students to the newer facility. Parents, after a few gasping breaths, rallied and met the proposal head on and persevered, according to the mayor.

That threat was knocked down. Desegregation in the early 1970s brought more students—a third of the enrollment was black—and a new complacency. Worries about meeting pupil enrollment standards were over with the added black students.

There would still be commencement exercises and again a dozen or so students would march out of the hallowed halls of Ashland High School, diploma in hand, ready to take on the world.

But trouble was brewing. The Natchitoches Parish School Board was under a class action federal lawsuit to further desegregate the public school system. The ball was seemingly in the court of local officials, who hurriedly prepared new plans to ensure racial equality in education.

Senior U.S. District Judge Nauman Scott wasn't a man to fool around. The year before, he had drawn his plan for nearby Rapides Parish, a plan which brought massive change to that system, busing rural students into Alexandria. The case became known nationally as the "Buckeye Three" affair after three teen-age girls defied a federal court order and attended a school to which they had not been assigned.

The School Board presented its plan, as did a new group that had formed called S.O.S., for Save Our Schools. But just as he did in Rapides, Scott designed his own plan.

A single stroke of his pen wiped out the very existence of the Ashland school, as well as several other schools in the parish. The new court order sent Ashland and the other communities reeling as it put into motion the wheels that would bus the Ashland children to Goldonna and Campti.

Now the school sits abandoned, its sidewalks overgrown with tall grass. Heavy steel chains are padlocked around the door handles to the gym, binding the doors closed. A large case of trophies amassed by Ashland athletes over the years is still visible through dusty glass of the doors.

Last fall workers hired by the school system, accompanied by federal marshals, removed school equipment, carrying it to other schools in the parish. The trophies are about all that remains. "They wouldn't dare touch those," the Rev. Earl D. Roderick said.

Roderick, a former Air Force chaplain for 10 years, is the pastor of Ashland Baptist Church and one of a group of parents who decided that instead of buckling under and sending the children by bus several miles away to new school zones, a new school would be started.

"It just about killed everybody," Martin said of the closing of the school, as he sat across the table from Roderick. The pastor, his hands clasped across his knees, agreed. But in a way, he said, the closing pulled the community together as it perhaps never had been toward a unified purpose of saving the school.

Last year, school again was held at Ashland, but not in the school. Roderick, Martin other residents began the Ashland Community School armed with sheer determination, some volunteers and some aid from the village and the church.

Today, about 90 of the village's children attend classes. The high school meets in the two-room town hall, adjacent to the post office, while the other grades meet in small rooms in the church's education building.

Volunteers, seven who have teaching certificates, preside over classes ranging from chemistry to the basics of English and reading.

Martin is on the school board. His brother, Jerry Martin, teaches biology and mathematics, while the two's mother, a retired teacher, also has a couple of classes.

Both men disavow any intention to hurt public education or equality for minorities. "We're not trying to destroy the public school system. All we are concerned about is the

school at Ashland. This, as far as we are concerned, is a temporary measure. We hope to get our school back," Roderick said.

Roderick said that until recently a black served on the private board and although no blacks attend, they are welcome at the school.

Like many other town residents, the two say that the village's only hope for that is an anti-busing amendment offered to a bill pending in Congress. The amendment by Louisiana Sen. J. Bennett Johnston would prevent busing children to any school, but the closest one, for any period of time longer than 15 minutes or five miles from their homes.

Subject to local board approval, it would in effect, they said do away with busing their children outside Ashland and require that Ashland be reopened.

"That's about our best shot," Martin said. "We began the school and we said we would try it for a year. Right now, we're not thinking in terms of any alternatives to reopening the (public) school."

During the day, the town hall and education building is a hubbub of activity. Three classes are under way in the town hall, while nine or 10 are going on in the education building. Several children are playing on the equipment at the playground near the church.

"It went a lot better than I expected it would," said Mrs. Clovis Pullig, principal of the school and a retired elementary teacher.

She surveys the group of students and smiles. "The main problem has been in keeping enough workers, but the parents support it. It's also somewhat of an inconvenience because the parents have to send lunches and provide transportation, but all in all, it has run pretty smoothly," she said.

Asked how long she or the others could continue on a voluntary basis, she laughed. "I didn't think I would get through this year, but I'm still here."

Next year, Martin said, they hope to have the school reopened. But it appears to be an almost impossible dream. Already there are cracks in the paint on the home economics building. The sidewalk canopies are leaning some.

The school looks forlorn and lost, and oddly abandoned, as the court order prohibits the private school from using its facilities or even the village utilizing it as a community center.

Finally, Martin speaks softly about maybe another plan, one that would establish another school at Creston—a centralized location which would serve all area students.

He doesn't dwell much on the thought—as he says, Ashland isn't looking for alternatives to reopening. Townsfolk are hopeful that the Johnston amendment will be approved. If that happens, then maybe come next year then the school bell will ring again, ushering in another year much like the ones in the not-yet distant past.

Martin leans back, frowns, then agrees that he has heard of several small schools closing over the years. Few reopen.●

THE SURVIVAL OF DEMOCRACY IN COSTA RICA

● Mr. MOYNIHAN. Mr. President, on Sunday, December 6, 1981, the people of Costa Rica celebrated the 33d anniversary of the abolition of the army as a permanent institution. The celebration was also the occasion for a grand public demonstration in honor of my friend. Don Jose Figueres Ferrer, who recently turned 75, since it was Figueres who, as leader of the revolution of 1948, made the decision to abolish the army on December 2, 1948.

Costa Rica is the only republic in the world without an army. Domestic security rests with a civilian police force divided into a civil guard and a rural guard, while external security depends on the inter-American security system. At the end of 1948 and again at the beginning of 1955, Costa Rica was invaded by insurgent forces supported by Nicaraguan Gen. Anastasio Somoza Garcia. On both occasions the Government of Costa Rica solicited assistance from the Organization of American States to defend its territorial integrity.

In March 1948, a group of civilians led by Figueres fought a 3-month civil war against a corrupt administration which had refused to recognize the electoral victory of the opposition party. Following the victory of the Army of National Liberation, Don Jose Figueres headed a junta which held power for 18 months. During the junta's rule a National Constituent Assembly was elected, and in 1949 approved the constitution which is still in force today. At the end of the state of emergency, Figueres turned the government over to President Otilio Ulate, who had won the 1948 elections which the defeated regime had refused to recognize.

The most historic action of the transition government of Don Pepe Figueres was the abolition of the army as a permanent institution. For the first time in the history of mankind, a general victorious in battle disbanded his army, arguing that a civilian police force was sufficient for internal security. Regardless of the size of the nation and the number and strength of the forces involved, the fact remains that Costa Rica chose the "zero option", and decided to put into practice the civilizing ideal of total and unilateral disarmament.

The ceremony abolishing the army was brief and simple. Surrounded by 500 students, Don Pepe declared that this act was an offering from Costa Rica to the American continent as a token of "love of civility, democracy, and institutional stability." In a symbolic gesture, Figueres took a wooden hammer and struck one of the battlements of the fortress Bella Vista, principal barracks of the army. He then gave its keys to the Minister of Education to transform it into the National Museum. By this act, Figueres was not only realizing the Costa Rican motto "a country with more teachers than soldiers," but was laying the basis for its transformation into "a country with more schools than police."

Almost a year later, the National Constituent Assembly incorporated the concept of "the abolition of the army as a permanent institution" into article 12 of the new constitution.

When Figueres took power in 1948, there were only five secondary schools in Costa Rica. Today there is at least one school in each of the nation's 80 cantons, and four public universities plus a private university. The savings resulting from the abolition of the army were channeled into vigorous programs of economic and social development which have made Costa Rica into the "Switzerland of Central America."

Currently Costa Rica is experiencing its most difficult economic crisis since 1929–30. A series of external factors have severely shaken the very basis of the Costa Rican economy—low prices for coffee and other primary exports; increases in interest rates by international financial institutions; the shortage of funds in the international banking community; an unprecedented political and security crisis in Central America which has paralyzed the Central American Common Market, one of Costa Rica's principal markets; as well as the increase in the price of oil.

It has taken more than 150 years to build a democratic system in Costa Rica, since it obtained its independence from Spain in 1821. The political unrest in Central America and the Caribbean basin coupled with the economic crisis have put to test the continued survival of democracy in Costa Rica.

Although faced with enormous economic problems and mounting political and security difficulties, Costa Ricans have not turned to arming themselves but rather have sought to deepen their historical commitment to peace, total disarmament, the democratic process and liberty. General elections will be held on February 7, 1982.

In this hour of difficulty, Costa Rican democracy is in dire need of the effective support of the United States and all nations capable of appreciating the importance of the survival of democracy in Costa Rica: A nation which has sought to put into practice the highest ideals of Western civilization.●

REFLECTIONS ON THE JAPANESE ATTACK AT PEARL HARBOR 40 YEARS AGO TODAY

Mr. RANDOLPH. Mr. President, today marks the 40th anniversary of the Japanese attack on Pearl Harbor, a day which "will live in infamy" and the most terrible 2 hours in the history of our Nation.

It ignited a worldwide conflict which cost an estimated 50 million lives over the next 4 years, and culminated in the dawn of the atomic age with the destruction of Hiroshima. It also thrust on the United States a new role as world leader and ended forever a trend to isolationism. This leadership role produced one of the most humane foreign aid programs ever devised, a policy of sharing and rebuilding which included our former enemies, Germany and Japan. Ironically, these two countries are today formidable competitors in the world economic market.

The meaning of Pearl Harbor is lost to many Americans. This is perhaps understandable because a majority of our citizens were not even born on that infamous date in 1941. This lack of knowledge, however, demonstrates a serious failing in our educational system, for the significance of Pearl Harbor and the resultant war was to this Nation, perhaps the most important single event since the Revolutionary War.

Many of us who experienced the effects of Pearl Harbor pause to recall how it changed our lives on this particular an-

niversary. In 1941, my wife, Mary, and I were at the old Griffith Stadium watching the Redskins play. I noticed that during the game several generals and admirals were being paged on the loudspeaker, a highly unusual practice and something I remarked on at the time.

Three months before, the Congress was locked in debate on an issue which was to have a far-reaching effect on our future. I, as a Member of the House of Representatives, voted to continue the draft over the strong opposition of persons who felt that no nation would dare to attack the United States. The draft extension was approved, 203 to 202. Those who voted affirmatively were attacked as "warmongers" but, as several historians have noted, the narrow affirmative vote on continuing the draft demonstrated a divided Nation and, perhaps, indicated to the Japanese war lords our lack of resolve. Gen. George Marshall was later to comment that those chaotic days following Pearl Harbor might have been even more disastrous had not the system of selective service been in place at the time. Draftees formed the nucleus for a citizen army which later faced and defeated the most powerful war machine of that time.

Mr. President, it is appropriate that we remember Pearl Harbor and its aftermath not for the sake of history alone, but as a lesson in international relations. No war is inevitable; every effort must be made in all future conflicts to avoid that final, irrevocable step that causes the Apocalypse. When we look to the violent past, let us renew our resolve to create and perpetuate an understanding of peace on Earth, and goodwill to all its inhabitants.

JOHN McCLOY ON JEAN MONNET AND THE STATE OF AMERICAN RELATIONS WITH EUROPE

Mr. MATHIAS. Mr. President, one of the most important assets of a great nation is the wisdom of the citizens who have played a part in the epic events of their generation. Such men and women have been able to distill the experiences of battlefield, council chamber and marketplace, through years of learning by both observation and participation. What they can offer to a nation willing to listen is counsel that is unique, irreplaceable and invaluable.

Just that kind of wisdom is embodied in a speech that John McCloy gave recently in Lausanne, Switzerland when he accepted the Jean Monnet Award. This award was, of course, singularly appropriate, since John McCloy and Jean Monnet were friends and each of them contributed in a major way to both the present condition of Europe and to the weaving of a fabric of association across the Atlantic to reassure and stabilize both sides.

Mr. McCloy's personal reminiscences of Jean Monnet should not be dismissed as merely anecdotal, because they are part of the message. Great events do not occur in human affairs, particularly great positive events do not occur, without the intervention of great and positive persons. In an age when many people are on the verge of giving up because our problems are so complex and solutions are perceived as being beyond human grasp, it is good to be reminded that the lives and actions of men and women do make a difference. While fate plays a role in our lives, as it always has, we also share in shaping our destinies. Two men who were willing to shoulder crushing burdens and carrying them safely through some of the most dangerous years of Europe's history were John McCloy and Jean Monnet and their work changed the course of events.

But beyond this philosophical note, Mr. McCloy raises a question as to the present state of our relations with Europe. Friendships, national as well as personal, are like gardens that need constant cultivation. The concepts that Jean Monnet developed and preached need to be tended and adjusted as situations change, problems arise and new potentials are available. Without such care, even the best ideas can become dated and gradually lose utility and acceptance.

So John McCloy urges us to look closely at our relationship with Europe—now a continent as productive and creative as our own. The equalization of resources has changed the nature of our relations and requires new approaches to exercising leadership in the defense of freedom, in sharing the cost of that defense and in enjoying the fruits of our labors. Our partnership with Europe is too vital to us and to our friends there to be a victim of neglect or inadvertence. I accept John McCloy's advice that we give the state of American relations with Europe our first priority as we adopt our agenda for national security and welfare.

I ask unanimous consent that Mr. McCloy's speech be printed at this point in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS ON THE OCCASION OF THE CEREMONY FOR THE PRESENTATION OF THE JEAN MONNET AWARD

I am, of course, deeply warmed by the receipt of this award which bears the name of my old and dear friend, Jean Monnet. I suppose I was as old a friend of his as almost anyone in this room. My association goes back to the time he spent in the United States as a member of an American investment banking firm. Indeed, it goes back farther to the period immediately following World War I and the early days of the League of Nations. I had the good fortune to work with him during some of his most productive years and I continue to marvel at his dedication to the public tasks he set himself.

Monnet and I had a mutual friend dating from those Blair & Co. days. His name was Swatland, a man of great ability, perhaps the ablest I have ever known. Typical of Monnet, who was a past master when it came to identifying talent, they soon came together and produced a most impressive combination. In comparing my ability, somewhat unfavorably, with that of my friend's and former partner, Jean once said "You also have a most admirable trait, you are lucky." While I know there are a number of Monnet's later colleagues and followers who are at least as well entitled to this Award as I am, I do believe that there are none who could appreciate more than I do the thought which caused the Trustees or jurors of the Monnet Foundation to grant this Award to me.

I can quite readily think of one who deserves, beyond all others, a Jean Monnet Award, First Class. Of course, it is his wife, Sylvia. Their life together was, as we all know, a real romance, though at times, due to some of his idiosyncracies, it might have seemed somewhat less than idyllic. She was the moderator of his optimisms and a mender of his frustrations. She frequently played a most constructive role in refining his judgments as to both people and events. In this, and other imponderable contributions to his work, she was indispensable.

Throughout his career, Jean could identify talent as I say, but he also had a highly developed sense of where power lay. He never seemed, however, to be interested in having his own recognized. After he had been in Washington only a short time, he gained the ear of such men as Harry Hopkins and Averell Harriman, as well as Secretary of the Treasury Henry Morgenthau and Justice Felix Frankfurter. He didn't have to know many more such influential figures, but he soon did. I could name perhaps a half dozen, who by reason of their position or capacity, were prime movers in the Roosevelt Administration with whom Jean gained easy access. These contacts, joined with his vision and perseverance, and I was about to say, coupled with a touch of his own obstinancy, was all our friend needed to make his influence deeply felt in the Washington of those war days.

You have probably heard it said that Monnet was the originator of the term "The Arsenal of Democracy" which Mr. Roosevelt used in making one of his great wartime speeches. There were several who claimed to have originated that expression, including some speech writers and White House staff members. I cannot prove that Monnet originated the term, but I do know this much about it. Monnet used it in my presence one day and I was struck by it. Shortly thereafter I cribbed it in talking to Mr. Justice Frankfurter about the role the United States should be able to play at that stage of the war. The Justice immediately admonished me never to use the phrase again and in my presence called up Bob Sherwood, the playwright and one of the President's best speech writers. It was not long before it appeared in President Roosevelt's famous speech. I have reason to believe that Justice Frankfurter also personally passed it on to the President.

I firmly believe that Monnet, during his stay in the United States, gained much of a United European Community concept from his observance of the continental sweep and depth of the American economy and its markets. In later days, when we worked together attempting to marshall the resources and productive potential of the United States for the successful conduct of the war, I recall that Monnet, almost out of thin air, hit upon an objective of 50,000 war planes in one year. He arrived at this total with no precise or carefully calculated analysis of the men and materials it would take to produce it. It was largely his own instinctive and pragmatic vision of what a country of the magnitude and size of the U.S. was capable of producing. And it was accomplished.

Commentators properly called Monnet a "supranationalist". He certainly had a breadth of vision which transcended narrow nationalism wherever he encountered it. This brought him in conflict with a good many able and devoted public servants whose outlook and training had largely been framed within the conventions of nationalistic thinking. Later, when he began his massive individual effort to advance the concept of a United Europe, he came to be known as "Mr. Europe", and he well earned the title.

Yet it was an element of his strength that he embodied so many of the virtues and

characteristics of his own countrymen. He was quite as Gallic as DeGaulle, even though they were very differently motivated men. He was proud of his sturdy, middle class French winemaker's background, and I often felt he, like Antaeus, used to gain strength from his contact with the soil of France.

When he encountered an impasse in his thinking, he would take a walk in the countryside, preferably it seemed to me, in the mud and the rain, plodding over his Houjourray acres. Well shod and clothed, with a sort of Loden mantel cloak about him and a sturdy cane, (whether he needed it or not), he would defy the elements (as long as there was no thunder and lighting about), and confidently return with a solution to the current problem confronting him.

Though he was most unsympathetic to political dictatorships, he was disposed, I thought, to employ quite dictatorial methods when it came to the administration of his own office. He imposed mercilessly on the time and good will of his staff, men and women alike, but he always seemed to have the time to come forward, after the battle, with some particularly thoughtful recognition of their loyal devotion and service to him. Whenever I called at his Avenue Foch office, it seemed to be at a point where work was interrupted by the search for a misplaced document or file, whose production Jean was demanding. I learn that his archives are now reposing here in Lausanne. I would be inclined to think there may be some gaps in them.

Moreover, it always seemed to me that he was either telephoning or just putting on his hat and coat to go out and see someone of importance in the government, or elsewhere, sparing himself meanwhile no exertion or indignity in the process of getting the matter at hand advanced. I have difficulty in thinking of him as a collector or a preserver of documents, but then he did have, always at hand, a Kohnstamm, a Duchene, a Hirsch, a Marjolin or a Uri or similarly well equipped individual to compose a draft or make a record.

I depart from these reminiscences of our friend with one more picture I have of him in Houjourray. I came upon him once looking at himself in the mirror just before he was to set out on one of his walks. He had on his heavy shoes and rustic clothes, but he also had on his head a beret with a red bandana scarf at his neck, his "plume" as it were, all of which combined, set off his rather confident and somewhat handsome appearance. There was no vanity in the scene. He was simply satisfied with what he saw, and it gave him the self confidence to confront and solve the challenges which his spacious vision brought forth.

Having had these things to say about my friend and having indulged to some degree my urge to reminisce a little about him and me our rich association, I quite realize that something more than this is called for today in accepting and thanking you for this Award. Monnet's memory needs no new eulogies at this time. The existence of this Foundation does greater homage to the man and his accomplishments than any I could now render. Furthermore, most of you now present in this room knew Jean Monnet personally and were familiar with his quality, his achievements and his method of operation. You need no further account of them from me.

In giving thought to what would be relevant to this occasion, I concluded I would try to identify what Jean would feel were the priorities which should be applied today to the further progress of the European Community he did so much to advance.

One hears from many sources that a lack of progress or slackening of pace has occurred in the development of the European Community. There has been a too extended discussion amongst the members as to whether they are receiving individually as much from the Community as they feel their contributions to it entitle them. Overconcentration on the agricultural program has deflected consideration of serious industrial and political developments of a more fundamental character. One also hears of resolutions leading to a possible British withdrawal. After all the delay and debate surrounding the U.K. entry, this is indeed, discouraging news.

I have also read recently some severe criticisms of the lack of coordination and apparent malfunctioning in the existing institutions of the Community. If true, it should not be allowed to drift into any prolonged lack of progress. But it would be a great mistake if, in taking note of the present imperfections, we lose sight of the great advances which have already taken place, and the solid base on which the new leaders of the movement have the means to build. Not all of the progress in the area can be related to the establishment of the Community concept, but much of it clearly can be.

The institutions on which Monnet placed such great store are in place, including the very significant direct election of delegates to the Assembly. Trade and commerce have increased and a standard of living has reached levels never contemplated before the advent of the Community. The European Community has become the world's largest trading block. Moreover, the dangers which were predicted as the Community was being created, have simply not been realized.

Political advantages of far reaching significance have been achieved to parallel the economic advance. Today people cross boundaries and old frontiers in Europe as if they were no more than county lines, while hostilities within the Community, including the perennial ones between France and Germany, have become virtually unthinkable. Indeed, I can think of no respect in which the world would be as well off, as it is today, were it not for the United Europe movement.

To be sure, the Soviet Union continues to take a hostile attitude toward a United Europe, and considering the exclusively nationalistic approach it takes, it is perhaps understandable.

Khrushchev, while still in power, once said to me at Putzinda, that the major part of Russia's distress followed invasions from Western Europe, not Eastern Europe, and this was when it was divided. Napoleon in one century, the Kaiser and Hitler in another. The last thing the U.S.S.R. sought, according to him, was a United Western Europe, which might undertake another Eastern adventure. Nor could be comprehend why the United States so consistently supported it. Because he could think only in nationalistic terms, its creation and competition, he contended, would only bode ill for United States' economic and political interests. Because of the desire of the U.S.S.R. to extend its hegemony over all of Europe, we can continue to expect a constant effort from the Soviet Union to wish a divided Europe, sharply separated from the U.S.

The world has greatly changed from the condition it was in when Monnet first began his crusade for a United Europe. Europe has, it is said, miraculously recovered from the devastation of World War II, and now two great super powers have emerged, as Alexis de Toqueville prophesied they would so long ago. Interests and attitudes that once existed between Europe and America have now been greatly altered. American prestige following the war, once so immeasurably high because of the victories and the extent of the expectations of benefits sought from the U.S. is now considerably, and I believe, fortunately, moderated. No longer are Americans incomparably richer than their European counterparts, as the per capita income of a number of European countries is now about the same as it is in the United States. And so it is with the G.N.P. Moreover, the level of technology is about equal, although the productivity ratios of the United States have not kept pace with foreign competition, nor with previous high records set by the U.S. economy.

The world is also more diverse. One of the most significant developments is that the broad Atlantic is no longer the impassable barrier to any serious aggression against the United States. Cities in the western part of the United States are as vulnerable today to the heavy Soviet missiles as are Hamburg and Frankfurt. An indisputably heavy Soviet buildup in conventional and strategic military power has been taking place within the last fifteen years, to a point where serious thought and attention must be given to it by the North Atlantic Treaty Organization Alliance. It is no longer possible for us to confine our perceptions, whether from Europe or the United States, to the NATO area. And as the world becomes more diverse and our perceptions vary, new strains, and quite possibly serious differences, will develop as we face our respective problems. We shall need to apply our best combined statesmanship to resolve them. This is the stage at which I sense we now find ourselves.

At one interesting point in my public service, I was asked what I thought should be the chief imperative, or priority, of the new Federal Republic of Germany. The Military Government was about to end and that of the Federal Republic to begin. Konrad Adenauer was the new Federal Chancellor. On the eve of the transfer of authority, he sought from me my opinion on this question. As Allied Military Governors, we had been rather heavily preoccupied with economic affairs related not only to the rehabilitation of West Germany, but of all Western Europe as well.

We had such things as monetary reforms, the valuation of the Mark, the economic priorities, the allocations of the counterpart funds, the disposition of the refugees from the East, and a number of other economic matters with which to contend. I believe the new Chancellor was thinking of what economic measures I had in mind, when he put the question to me. I had no hesitation, however, in replying that his chief priority, I thought, was political rather than economic. It was, in short, the establishment of a permanent rapprochement with France.

The Chancellor had made it quite clear that he was not asking any directive from me, for I would and could give him none, nor was he making any commitments in regard to my recommendations.

He was simply asking for my views for whatever they might be worth. I pointed out that twice in my lifetime I had been called upon to commit all my energies to help end wars started in Europe, in large part because of the prevailing hostile attitudes of France and Germany. In an earlier generation, there had been still another war—the Franco-German war of 1870. Whether it was in 1917 or in 1940, the intervention of the United States had been accompanied by a costly expenditure of U.S. blood and treasure.

On both occasions the United States had thrown the balance, belatedly perhaps, but, indisputably. I suggested that the pattern was getting tiresome. I felt it was to a very large degree within the Chancellor's power to put an end to the pattern. I emphasized it was not a matter of placing blame—it was simply incumbent upon rational leaders in Europe to end the process. The Chancellor needed little urging. He was a Rhinelander. Charlemagne, Aachen and the Holy Roman Empire loomed large in his heritage.

This, I think, accounted, in an important degree, for his later highly constructive relationship with General de Gaulle. I mention this here because the thought of such a permanent rapprochement between Germany and France was an integral factor in the

genesis of the United Europe concept. It was an augury of peace. I did not need to "crib" this idea from Monnet, as his thinking, and mine, as well as that of many others coincided on this subject.

I have likewise little hesitancy now in identifying, in my own mind, at least, what would be Monnet's chief priority today were he alive and active.

I would imagine that Monnet would have to give thought to several priorities, some would relate to the need for better functioning and coordination of the work of the institutions which compose the structure of the Community. Among these would certainly be to impart more significance to the functioning and situs of the Assembly, on which Monnet placed such importance. I would imagine he would try to divert the attention of the Community's agencies from the minutiae it deals with now to more fundamental European problems.

But my conviction is that his main preoccupation would be on the increasing need for a better recognition, and understanding, of the sense of partnership and interdependence between the people of Western Europe and those of the United States. The political and economic challenges of the two communities would be much better dealt with at this critical point in history by the fuller acceptance than now exists of the sense of a common commitment and a common responsibility for the preservation and protection of the free and democratic societies which compose the Alliance.

I have already indicated that it was my belief that a large part of Monnet's emphasis upon the unfortunate effects of the fragmentation of Europe, and its intensive nationalism arose from his life in the United States, and his observations while there. One of the chief tenets in his philosophic attachment to the idea of a European Community, was the part which could and should be played by a firm partnership with the United States. To him, it was a matter of mutual necessity. Europe needed the example of the wide markets and the depth of the American economy, as well as its profound attachment to political freedoms, while, on the other hand, the United States needed the support of Europe, its culture and experience in government, as well as its like attachment to our common values.

When one looks at the world map and observes the massive territory presided over by the Soviet dictatorship, one can appreciate the need of Europe to rely on the strength, resources, economy, and goodwill of what is both a nation and a continent, to act, not so much as a guarantor, but as an effective partner in the protection of our common freedoms.

All this connotes something more than improved communication, or intermittent consultations—it requires, to repeat, the full acceptance of the need of fairly sharing our common commitments and common responsibilities. At the outset, in his devotion to the concept of a European Community, Monnet strongly stressed the integral importance of such a common partnership with the U.S.

Because, as time went on he became preoccupied with the need for structuring the institutions upon which his United Europe could be based, together with the fact there were then in Europe some less disposed to place as much emphasis as he did on the Atlantic partnership, Monnet made less reference to the partnership, but he never doubted its necessity. Today, with the strains developing from the differing perspectives of our common interests, the need for renurturing the vigor and quality of the United States-European cooperation becomes more apparent. The Soviet build up and its increasingly aggressive moves, in highly strategic parts of the world, directly and through its militant proxies, only accent this need.

Moreover, the sustained character of the Soviet build up, together with the loss of U.S. prestige in the Vietnam war, has resulted in some impairment of the credibility of the American deterrent which, during a vital period of European recovery, served as a comforting umbrella of security.

But, if it is said that there has been some impairment of that credibility, not only the commitment of a great nation remains intact, but an eloquent earnest of that commitment is the fact that there are now deployed in Europe upwards of 300,000 American troops, and they have been there for a very long time. The NATO commitment, when closely examined, is not automatic. Indeed, it has what might be called some illusory aspects. The United States has, however, buttressed its NATO commitment with this extraordinary earnest. These troops are still deployed in substantial size on the ground in Europe in spite of Mr. Roosevelt's desire to have them return as soon as possible. They remain in Europe, and they will be involved the minute any attack occurs. The response, as a practical matter, would be automatic and all out. There is no comparable security given by any other NATO member to its commitment to defend the United States. Judged by any criterion in history, it is an extraordinary phenomenon.

The quality of our troops has been criticized in some quarters. They may not have the bearing of traditional Guard Regiments, but they are still American soldiers, quite like those who, on many battle fields, including not a few in Europe, have proven, by their fighting qualities, to be worthy of their allied counterparts, as well as of those they opposed. It should also be remembered that they have the advantage, in their present posts, of being able to train and maneuver with some of the finest troops in Europe.

It has been unpleasantly suggested that for the U.S. to urge our European allies to take steps to improve their defenses against the formidable new missiles actually being deployed against Western Europe and its capitals, is due to our wish to shift the possibility of a nuclear exchange, from one across the Atlantic, to a Soviet-European one. The presence of our troops in such quantity in Europe, so long after the war, ought to be quite enough to demonstrate to any fair mind the utter falsity of the charge.

To the extent that the Soviet Union is faced with a convincing European-U.S. determination and capacity to meet any attack, or any threatened attack, the chance of it ever occurring greatly diminishes. The joint will, in itself, suitably demonstrated, would be worth many missiles and many tanks. As it is unthinkable that hostilities could ever recur within the community today, so is it unthinkable that the U.S. could ever be induced to attack the Soviet Union, unless attacked, or directly threatened by an attack. Moreover, I believe the Soviet leaders would never be so foolish as to attack, or attempt to blackmail, either Western Europe, or the U.S., once they were convinced of the solid unity and determination of the Alliance to protect itself. Only if there existed any likelihood of a division within the Alliance would there be a real temptation for the U.S.S.R. to do so.

A full and convincing acceptance of the implications of the European-U.S. Alliance, throughout its membership, can at one and the same time constitute a guaranty of the security of those covered by it and an assurance to the U.S.S.R. and to the world, for that matter, of the continued adherence to a policy of combined restraint on the part of the Alliance.

Recently there have been appearing on both sides of the Atlantic, but I think perhaps more here than in America, a spate of recriminations. It is due perhaps to a series of interrelated economic and political developments. The world is clearly out of joint and very tense. No wonder, with the Pope, the President of the United States, President Sadat, and a good many others, being shot. On top of which, high interest rates and anti-inflation measures induce repercussions in our respective economies. In the meantime, the invasion of Afghanistan seems almost forgotten. El Salvador has taken its place as a point of apparently greater international concern than Afghanistan, Poland or Pakistan. Only on one thing do the critics now seem to agree.

It is that the U.S. is somehow responsible for it all. The time has certainly come for us to stop indulging in these recriminations, and set about doing what I believe Jean Monnet would do, go to a high hill and search for new and more objective perspectives. He would, I think, come back with them, worried, as indeed, I am, but with a clearer sense of the need for a deeper understanding and appreciation of the fundamental commonality of our interests than we seem now to display. Whether our problems be political or economic, they would be more readily soluble by such an understanding, though to achieve it may demand a level of leadership and statesmanship comparable to that of those who were responsible for the creation of the Alliance.

When I was recently in Europe, in Berlin as a matter of fact, I gained the impression that Europe had rather convinced itself that it could not alone defend itself, and it was uneasy about the credibility of the American deterrent. There was some irritation in the air, as a result, as well as a real element of fear. I doubt that the mood was representative of the city as a whole, but any suggestion of such an attitude was something new to me, for when I was officially in Berlin, it was the symbol of combined strength and resistance. There might have been a few qualms in what we used to call "the Zone," but not in Berlin.

There the U.S. could do no wrong. We are all subject to fear at times, for we are human, but as a general course of action, it is never wise to take counsel only of one's fears. It is a poor guide. It is clear to me that if Europe, in combination with the U.S., undertook to do what is necessary to deter any attack it could be accomplished. Western Europe and the American continent have tremendous strengths and great resources, difficult to marshal perhaps, but quite large enough to make it quite irrational to risk any aggression against them.

We must all realize that though our friend, whose name accompanies this Award, spent such a large part of his life and energies in endeavoring to move forward his grand, and yet pragmatic, concept of a United Europe, it was all in the context of achieving a further purpose, that is the preservation of our freedoms, the elimination of wars in Europe and the general advancement of the cause of peace. It is because he always had these objectives so deeply in mind, I feel confident that if he were with us today, his chief priority would be as I have outlined it. His aim of peace within the community, as well as, of course, between the communities of Europe and the United States seems already to have been achieved.

Monnet was, indeed, a man of peace. He sought a United Europe as a stepping stone to peace. He was well on the way to it. Our recollection of him and his work should inspire us to reach for the new perspectives which would help bring about the accomplishment of his full vision.

Thank you.

FORTIETH ANNIVERSARY OF THE ATTACK ON PEARL HARBOR

Mr. DENTON. Mr. President, 40 years ago today, December 7, 1941, major mili-

tary and naval units of the United States were attacked, ruthlessly and without warning, with devastating effect.

December 7, 1941, "a date which will live in infamy," resulted in death and damage to a degree that was previously unimaginable to the American people. Hundreds of aircraft, lined up wing tip to wing tip at Hickman Field and the Ford Island Naval Air Station were destroyed on the ground before the crews could be scrambled. Virtually unimpeded, dive bombers and torpedo bombers laid waste to battleship row in Pearl Harbor. The U.S.S. *Arizona* destroyed by a direct hit to her ordnance magazine, remains capsized in the harbor in perpetual tribute to the more than 2,400 dead as a result of the attack.

It has been stated that the attack on Pearl Harbor served to awaken the sleeping giant—unified a divided Nation. In retrospect, the facts bear out this assertion. The unified determination and perserverance displayed by the United States throughout World War II underscored President Roosevelt's admonition that "with confidence in our Armed Forces—with the unbounded determination of our people—we will gain the inevitable triumph—so help us God."

Mr. President, it is fitting and proper that on this 40th anniversary of the attack on Pearl Harbor we pay tribute to those who gave their lives on that day. There could be no greater tribute than the rededication of our willingness to protect and defend those precious liberties for which they so honorably sacrificed their lives to preserve for us and our posterity.

Forty years later, Americans mourn that fateful day. In reflecting on the tragic loss of thousands of lives, we are reminded of all Americans, before and after, who have given their lives for their country and the cause of liberty. This sacrifice, the ultimate sacrifice, has never been in vain.

Today, Americans can stand proud, secure in the knowledge that as a people we have never failed to hold high the mantle of freedom. As the leader of the free world, we can state with conviction that the United States has remained true to the mandate of our Founding Fathers to establish a nation where the strong are just, and the weak secure; where all men are created equal, not by a declaration of the State, but by the law of our Creator. May we, as we enjoy freedom, peace, and plenty, continue to realize that military strength and the willingness to sacrifice are necessary to retain that enjoyment.

TOMMY CORCORAN

Mr. DOLE. Mr. President, Washington has lost another of its monuments. Thomas G. Corcoran, "Tommy the Cork," has died on the eve of the centenary of the birth of the man whose political revolution owed much to his legislative genius. Fifty years have passed since the brain trust descended on Washington. Fifty years since F.D.R.'s whiz kids, of whom Corcoran was the most notable, pushed and pulled and wheedled government out of the 19th century. Fifty years in which to build legends—and learn lessons.

Tommy Corcoran knew as well as any man in this town that change is the only constant. Through nine Presidencies and three wars, amidst startling changes in the office and the politics that surround it, Franklin Roosevelt's whiz kid remained to tell us what it had been like in those heady, dangerous days of the 1930's—and what it could be like in days to come. Corcoran loved to talk about the past—but he had no intention of ever living within it.

And whatever changes he lived to see in 80 years, he died secure in the knowledge that the fundamental work of his life, the landmark reforms of Wall Street and the workplace that characterized the New Deal at its finest—these were as permanent and ingrained in American life as any legislation ever can be.

So if Washington has lost one of its monuments, Tommy Corcoran will never lose his. He serves as an example to young dedicated, public minded men and women everywhere. If they wonder about the difference one life can make in the life of a nation, they need look no further than Tommy Corcoran.

ANDREI SAKHAROV

Mr. DOLE. Mr. President, many of us have been deeply distressed in the past few days to learn about the very great indignities and anguish that are being suffered by the Nobel laureate, Soviet physicist Andrei Sakharov.

Not only has Dr. Sakharov been condemned for almost 2 years now to internal exile in Gorky, but also his private research materials and manuscripts apparently have been taken from him—and thus his work and, as he has put it, his "memory" in the field to which he has been dedicated throughout his professional life.

Now, in addition to these difficulties, he suffers from the conviction that because of his own position the Soviet authorities are denying a visa that would permit Liza Alekseyeva to join her husband, Dr. Sakharov's stepson, in the United States.

Dr. Sakharov and his wife have undertaken a hunger strike, as the only means they have available to them to press the Soviet authorities to grant their request for a visa for Liza Alekseyeva. They are now reportedly in a hospital and perhaps being forcefed.

These grave conditions strike us first as a cause for serious humanitarian concern and sympathy. But the Soviet Government, in its treatment of Dr. Sakharov and his family, is taking steps that are not only cruel but also directly contrary to its own commitments in the Final Act of the Conference on Security and Cooperation in Europe.

We must urge—now and repeatedly for as often and as long as it is necessary—that the Soviet Government bring to an end the psychological brutality that it is using not only against Dr. Sakharov and his family but also against many others within the Soviet Union.

We must urge that the Soviet Government abide by its international commitments to protect human rights, if it wishes—as we for our own part earnestly hope it does—to be part of the community of civilized nations.

NATIONAL SCIENCE CENTER FOR COMMUNICATIONS AND ELECTRONICS

Mr. MATTINGLY. Mr. President, today I rise in support of and to commend my colleagues' attention to the National Science Center for Communications and Electronics. The Center, to be located in Augusta, Ga., represents 3 years of work on the part of many dedicated individuals concerned about preserving our Nation's history in this area and promoting it across the country.

This project will represent a joint effort by industry and Government over 5 years wherein industry will build this facility and then the Government will manage its daily operations.

In this era when our Nation must maintain and strengthen our technological base and when we must continue to attract the best of our young people into this field of study, I find it commendable to see such a project undertaken and will do all I can to enhance its completion.

JOHN BRADEMAS AS PRESIDENT

Mr. PELL. Mr. President, the New York Times recently printed an interesting story about the new president of New York University, our former colleague John Brademas. As one who worked closely with him on numerous legislative issues in education and the arts and humanities, I am especially delighted to know that he is settling into his new life as a university president with such ease and enthusiasm. The next few years will be tough ones for all academic institutions but NYU is fortunate indeed to have such an experienced and dynamic leader at its helm. I am also pleased to note that President Brademas has been speaking out so eloquently against the magnitude of cuts in Federal education programs—a concern I certainly share.

I commend this article on John Brademas to my colleagues and ask unanimous consent that it be printed in the RECORD. It appeared in the New York Times on December 17, 1981.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOR NEW N.Y.U. PRESIDENT, A FAST PACE

(By Deirdre Carmody)

John Brademas of South Bend, Ind., and Washington—Phi Beta Kappa from Harvard, Rhodes scholar, member of Congress for 22 years and former majority whip—is now Dr. John Brademas, president of New York University. It's as if he had been preparing himself all those years for the job.

"He's a natural president," said L. Jay Oliva, provost of the university and vice president for academic affairs, who has worked in one capacity or another under five N.Y.U. presidents. "No one hit the ground running as well as Brademas. All his instincts were university presidential."

"I think he's working harder here than he did in Washington," said Mary Ellen Brademas, his wife. "He works all the time."

"The truth of the matter is, I'm enjoying myself enormously," said John Brademas.

INAUGURATED IN OCTOBER

It is still the honeymoon period, to be sure, and universities, like the nation at large, tend to look kindly at first on fledgling presidents. Dr. Brademas arrived on the Washington Square campus of N.Y.U. in July and was inaugurated in October. He took over from the acting president, Ivan L. Bennett, who had replaced John C. Sawhill in 1979, when Mr. Sawhill took a leave of absence to become Deputy Secretary of Energy.

While Dr. Brademas's instincts may indeed be university presidential, there are times when his style is still distinctly Congressional. In his first few days on the job, he learned dozens of names and shook the hands of everyone in sight.

Then he buckled down to the business of administering a university with an enrollment of 44,000 students and an annual budget of half a billion dollars that refers to itself as the largest privately supported university in the country.

His pace is whirlwind. There are continual meetings with aides, students, deans, trustees, visiting dignitaries, heads of N.Y.U.'s 12 undergraduate divisions and 10 graduate and professional schools. There are also breakfasts with university officials, lunches with foundation presidents, dinners with corporate executives, and a round of formal dinner parties, evenings out with former colleagues from Congress, art gallery openings and galas of various kinds.

He is also a movie buff, and when he can, he and his wife sneak off and go movie-hopping.

Many of his activities, of course, reflect not so much the duties of a university president as Dr. Brademas's own eclectic interests and social energy—some of it native and some of it acquired over the course of more than 20 years as a politician.

He receives dozens of invitations from every quarter and meets regularly with Naomi B. Levine, the university's vice president for external affairs, and members of his staff to discuss what he should accept and what he should turn down.

Mrs. Levine, a distinguished-looking, gray-haired woman wearing a tailored suit, sat across the coffee table from Dr. Brademas the other day in the sitting area of his office while staff members grouped around them.

Dr. Brademas picked up the pile of invitations before him and began to go through it. It was a varied lot and many were quickly disposed of. But some were more tempting than others, and Dr. Brademas looked questioningly at Mrs. Levine about one of them.

"No," said Mrs. Levine.

He picked up another invitation and read it out loud.

"No," Mrs. Levine said again.

"But they just want me to go on the committee," he said, slightly plaintive.

"Committees take time," Mrs. Levine said.

"They are asking me because of my brother," he insisted.

Silence from Mrs. Levine.

Dr. Brademas sighed and turned to the staff.

"Be sure that my brother, Jim, knows that I can't do that," he said.

Dr. Brademas says that he is still learning about the university and has not fully decided what the priorities of his administration will be. He has, however, already taken a strong public stance against the Reagan Administration's proposed cuts in funds for education, particularly student aid.

It is a subject with which he is quite familiar, having played a principal role in helping to write most of the major education legislation during the 22 years he served on the House Education and Labor Committee.

In his inaugural address and again last month in a speech in Washington to the Carnegie Foundation for the Advancement of Higher Learning, he pointed out that students at N.Y.U. last year received more than $50 million from Federal programs and that the proposed cuts would be devastating to a university such as N.Y.U., which is dependent for 70 percent of its income on student tuition.

"Anything that makes it difficult for students to enroll here, such as reductions in student aid, directly impairs our capacity to continue to offer education of high quality," he said in his inaugural address and has been saying repeatedly since then.

"Universities, if they do anything, should produce ideas," he said. "University presidents should be more than fund-raisers. I do not think I should plunge into every issue, but if from time to time I feel I have something to say on the issues in the wider society, I intend to say it."

For the time being, he says he is not talking but listening. Following him around for two days makes that evident. He gives his full attention to whatever subject is at hand, waiting until the speaker is through and then usually commenting quietly.

"He listens but not only that," says Dr. Oliva, the provost. "You find out later that he has heard. He is a maker and user of information. He's someone who is not threatened by opposing views. A lot of people who are university presidents these days have stern and rigid personalities. But he's very assured and doesn't feel the need to pretend. He's a person who can take all that information and put it together."

Dr. Brademas—who merits his title because he has a Doctor of Philosophy degree in social studies from Oxford University—is not the only doctor in the family. His wife, Mary Ellen, is a resident in dermatology at the New York University Medical Center.

She came home the other day to the elegant penthouse on Washington Square that comes with the presidency of N.Y.U., flopped on the white couch in the large oak-paneled and mirrored living room and kicked off her shoes. She had been up all night because she had been on call, and she said she was very tired.

"I'm a pill to live with when I'm tired," she said cheerfully. "I get grumpy, and then I feel guilty because I'll have promised John I'd go out with him to something and then I just can't do it."

"Most of our life is formal," she said. "We go out to donner, to parties, with people associated with the educational or art world. We love it here."

"But we never, ever do anything on weekends with other people," she added. "Last weekend we just went to the movies. We love movies. We saw 'Invaders of the Lost Ark' and John loved it. Then we walked through Bloomingdale's. He doesn't often get to do that kind of thing because he's always haunted by the pile of papers on his desk."

Mrs. Brademas lived in Bloomfield Hills, Mich., for years, raising four children and as she puts it, playing tennis and going to fashion shows. At the age of 38, divorced and her children mostly grown, she decided to go to medical school.

Four years ago, while she was at the Georgetown University School of Medicine, she married Representative Brademas, then 50 years old and inevitably referred to as one of Washington's most eligible bachelors.

With her busy schedule these days, Mrs. Brademas says cooking meals for the family—her daughter, Jane Briggs, who is doing postgraduate work at the N.Y.U. School of the Arts, lives with them—is a problem. Mrs. Brademas, however, has found a rather original solution for the nights when dinner at home is required.

"Look!" she said the other day, hauling a vast purse onto the kitchen counter and removing aluminum foil-wrapped bundles.

"Chicken a l'orange!" she exclaimed proudly. "And ravioli. Jane and John can have their choice."

The food was straight from the New York Medical Center cafeteria, for which, as a doctor, she gets a certain number of free chits. She has found that it is easier to buy herself a light lunch and save the chits to feed the family of the president of the university.

"This is the most fantastic life," she said.

TAX CREDIT SALES LEGISLATION

Mr. PELL. Mr. President, last week in introducing a bill to repeal the leasing, or tax-credit sales provision of the Economic Recovery Tax Act of 1981, I stated that there had been no hearings or floor debate on the provision. That statement was based on research done for me by the Congressional Research Service of the Library of Congress. The Senate Finance Committee has since informed me that the leasing or tax-credit sales provision was the subject of testimony before the committee, and there was, in fact, some discussion of the tax-credit sales provision during consideration of the bill by the Senate. As a matter of fairness and accuracy, I make this statement to set the record straight.

"TOMMY THE CORK"—FOUNTAIN OF WIT, CHARM, AND AMAZING ACCOMPLISHMENTS

Mr. PELL. Mr. President, Thomas G. Corcoran, 80, died yesterday but left an amazing legacy of accomplishments, both in public service and private practice.

One of President Franklin D. Roosevelt's principal strategists, Mr. Corcoran helped shape such landmark measures as the Securities Act of 1933, the Securities Exchange Act of 1934 and the Fair Labor Standards Act of 1938.

"Tommy the Cork," as he was called by President Roosevelt, was born in Pawtucket, R.I., on December 29, 1900. His father, Patrick, was an Irish immigrant, a leading lawyer, and Democratic politician.

Mr. Corcoran earned both his bachelor's and master's degrees at Brown University, where he was valedictorian and a member of Phi Beta Kappa. At Brown, he worked as a dance band pianist, won academic prizes, and graduated at the head of his class.

He subsequently went to Harvard University Law School and graduated at the head of his class in 1925, but he never forgot his native Rhode Island. His lightening wit has brightened many a gathering of Rhode Island students in the Washington, D.C. area.

Although he entered public service in 1932, as an employee of the Reconstruction Finance Corporation, and returned to private practice in 1941, he left his imprimatur on the "New Deal," and a lasting impression on all who met him.

His wit and charm were his most apparent and endearing traits, making his company a pleasure. What made him truly great, however, was his skill, his

brilliance, and his dedication to hard work.

He brought to his private practice the same traits that he had demonstrated during his years of Government service. He plunged into corporate law with enthusiasm, representing major businesses before Federal departments and agencies.

Throughout both public service and private practice, "Tommy the Cork" was a fountain of wit and charm, as well as that rare combination of brilliance and dedication. His work and character touched all who knew him, and many who never heard his name.

I grieve with and for his family and friends. We shall not see his like again. Speaking personally, I know how much affection I had for him and how much I shall miss him. My wife joins me in these thoughts.

Mr. President, I ask unanimous consent that the following articles about Mr. Corcoran be printed in the RECORD: "Thomas G. (Tommy) Corcoran, Lobbyist of New Deal Era, Dies" from the December 7, 1981, Washington Post; "Thomas G. Corcoran, Lawyer and Adviser to Roosevelt, Dies" from the December 7, 1981, New York Times; and "Thomas G. Corcoran, FDR 'Braintruster,' Dies at 80 in D.C." from the December 7, 1981, Providence (R.I.) Journal.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 7, 1981]

THOMAS G. (TOMMY) CORCORAN, LOBBYIST OF NEW DEAL ERA, DIES

(By Kenneth Crawford)

Thomas Gardiner (Tommy) Corcoran, 80, a leading architect and lobbyist for much of the legislation establishing President Franklin D. Roosevelt's New Deal, and one of this city's most prominent lawyers since the early 1940s, died of a pulmonary embolism yesterday in the Washington Hospital Center.

Mr. Corcoran and his colleague in government, Benjamin V. Cohen, were a team who came close to revolutionizing American government in the early New Deal days. In the process, Mr. Corcoran became an almost mythical hero to Rooseveltians, who viewed the New Deal as a bright light at the end of the tunnel of depression. By the same token, he became a symbol of irresponsibly destructive experimentation to Roosevelt's equally dedicated opponents.

He was not underrated in either camp. His legal scholarship, vitality and wit made him a formidable innovator and advocate. In the early 1930s, "Corcoran and Cohen" entered the language of political controversy as though the two names were a single word: "Corcorancone." It was a word much used in congressional and campaign debate. In Wall Street and business board rooms it was a pejorative.

Yet when he left the government in 1940, Mr. Corcoran's law office was besieged by some of the same corporate leaders who most volubly had denounced him when he was a government official. So many became his clients that his law firm, Corcoran, Foley, Youngman, and Rowe, grew and prospered through subsequent decades. Newspapers usually identified him in his private career as a lawyer-lobbyist. He called himself a lawyer-entrepreneur.

Mr. Corcoran and Cohen were among the first of the bright young Harvard Law School alumni recommended for service in the New Deal brain trust by Felix Frankfurter, then a professor on the school's faculty.

Both Mr. Corcoran and Cohen had practiced law in Wall Street and were knowledgeable about the operations of securities exchanges, so their first assignment was to draft the Securities Act of 1933. Under orders from the White House, but working with legislative leaders—especially House Speaker Sam Rayburn—they pushed the reform legislation through in record time.

Their collaboration later accounted for the Securities and Exchange Commission Act of 1935 and the Public Utilities Holding Company Act of 1935. They also contributed to the Federal Housing Administration Act of 1934.

Their reputations made by these successes, they went on to legislation establishing the Tennessee Valley Authority and Fair Labor Standards. They also took a hand in enactment of the Wage and Hour Law. These were among the most important and enduring of New Deal reforms.

The National Recovery Act, another key measure, which the Supreme Court ultimately invalidated, was not a Corcoran-Cohen product. Neither was the so-called court-packing plan, which Congress rejected, although Mr. Corcoran supported it as an administration lobbyist.

Through all the years they worked together as a Roosevelt task force, contriving legislation that would stand up in the predominantly conservative courts and engineering it through congressional committees dominated by orthodox politicans, Mr. Corcoran and Cohen held relatively obscure positions in the executive bureaucracy. Neither ever was officially on the White House staff. Their salaries through most of their government careers were $8,000 a year.

Both bachelors, they lived with a group of congenial young lawyers in what was called "the little red house on R Street," the former summer residence of President U.S. Grant. In those times Mr. Corcoran and his friend were said to have a "passion for anonymity." Both felt that their jobs could best be done out of the spotlight. By cooperating with certain reporters, they managed for a time to keep their names out of print or, at most, on the inside pages.

Whatever anonymity Mr. Corcoran and Cohen had achieved ended with the fight over the so-called "death sentence," imposed by the Utility Holding Company legislation.

Sen. Owen Brewster of Maine, who had been one of the supporters of the legislation, changed sides in mid-conflict. When Mr. Corcoran remonstrated with him, Brewster reported that he had been threatened with cancellation of plans for a hydroelectric plan in Maine.

At a congressional hearing, Mr. Corcoran denied threatening Brewster. Brewster called him a liar.

"We'll see who's a liar," Mr. Corcoran replied.

From then on, Mr. Corcoran's cover, such as it was, was blown. That committee, like many others over the years, failed to censure or even reprove Mr. Corcoran, who had a winning way with House and Senate committees.

All pretense that the team of Corcoran and Cohen operated without White House credentials was abandoned after the Brewster uproar.

Mr. Corcoran did not have direct access to Roosevelt until 1935. Joseph P. Kennedy happened to remark to Roosevelt that Mr. Corcoran could sing admirable Irish ballads and sea chanties, and Mr. Corcoran was called to the White House, where he subsequently became a frequent guest and presidential counselor. Roosevelt called him "Tommy the Cork."

Mr. Corcoran became an invaluable administration operator, with a network of friends forged in the executive branch, federal agencies, and in Congress. He influenced judicial appointments and worked on the president's political speeches. He had a gift for the language that put lilt into oratory.

He traveled with the president on campaign trips and became involved in the unsuccessful attempt to "purge" certain anti-New Deal Democrats in the 1938 elections. Ten years later, Mr. Corcoran suffered another failure: the attempt to nominate William O. Douglas for president in place of Harry S Truman.

Mr. Corcoran was born in Pawtucket, R.I. His father, Patrick was the son of an Irish immigrant and a leading lawyer and Democratic politician. His mother's family had moved south from Nova Scotia.

At Brown University, Mr. Corcoran worked as a dance band pianist, won academic prizes, and was graduated at the head of his class. He moved on to Harvard Law School, where he again led his class, then became a law secretary to Justice Oliver Wendell Holmes Jr. After an interlude at the court, Mr. Corcoran went to Wall Street, where he practiced from 1926 to 1932.

Mr. Corcoran came to Washington in 1932 to work for the Reconstruction Finance Corp. under Eugene Meyer. With the advent of the New Deal, the RFC became a model for several other government agencies and its personnel was scattered through them. Mr. Corcoran was transferred to the Treasury Department where he worked for Dean Acheson, then its under secretary. He later returned to the RFC, where he stayed for the remainder of his government career.

He began the private practice of law in Washington in 1941, saying that his personal fortunes needed mending and he wanted to get out from under the Hatch Act, which outlawed political activity by government employes.

A few months after retiring from government service, he told a congressional committee that he was earning about $100,000 a year. That was just the beginning. He plunged into corporate law on a grand scale, representing major businesses before federal departments and agencies.

One of his first and most important clients was Sterling Products, a pharmaceutical company whose export affiliate was headed by his brother, David. Sterling and its subsidiaries had contracts with the German giant, I. G. Farben industries, which limited Sterling's operations in Latin America. A consent decree in response to an antitrust suit had the effect of opening Latin America to Sterling. Mr. Corcoran was instrumental in bringing about this result.

Another of Mr. Corcoran's clients was the Tennessee Gas Transmission Co., which grew into an enormous conglomerate. At one point Mr. Corcoran was accused of impropriety in conferring privately with members of the Federal Power Commission for his client.

He represented many defense contractors in wartime, and several times was called upon to defend his methods before committees of Congress. He staunchly defended his legal methods. Other clients included Burlington Industries, the United Fruit Co., and American International Underwriters.

One of Mr. Corcoran's preoccupations through the war and beyond was Gen. Claire Chennault's Flying Tigers, American volunteer fighter pilots who flew missions against the Japanese before Pearl Harbor.

Sterling gave Mr. Corcoran's brother, David, a part-time leave of absence to manage an organization called China Defense Supplies, to support the Flying Tigers with American material. Thomas Corcoran served as lawyer for the organization, and soon was wrestling with the problem of shipping supplies around the world through Brazil, Africa, India and across the Himalayas—"over the hump"—to the Far East.

After the war, Mr. Corcoran retained his interest in the two civilian airlines spun off

from the Flying Tigers. One of them, C.A.T., was sold to the Central Intelligence Agency for operations in Indochina. The other, retaining the Flying Tiger name, continued.

Because of their work together, Mr. Corcoran became a close friend of Chennault and the general's China-born wife, Anna.

Mr. Corcoran's involvement in Washington politics survived the war and Republican administrations. Sen. William Proxmire (D-Wis.) once accused him of lobbying for the confirmation of James R. Durfee's appointment to the Court of Appeals, a nomination that Proxmire opposed.

On another occasion Mr. Corcoran interceded with the then-House Speaker Carl Albert (D-Okla.) against some consumer legislation. In this matter, Mr. Corcoran spoke for U.S. Chief Justice Warren Burger, who feared that the legislation would clog the court system.

One of Mr. Corcoran's newer enthusiasms was the Waterville Valley Ski resort in New Hampshire, a development he had dreamed of since his youth. The project is headed by Thomas Corcoran, David's son, who once was an Olympic skier.

Mr. Corcoran's wife, the former Peggy Dowd died in 1957. His survivors include four sons, Thomas Jr., of Washington, Dr. David, of Bethesda, Howard, of Potomac, and Christopher, of Newfoundland, Canada; a daughter, Cecily Kihn of Philadelphia; two brothers, David M., of Waterville Valley, N.H., and Judge Howard Corcoran of Washington.

[From the New York Times, Dec. 7, 1981]

THOMAS G. CORCORAN, LAWYER AND ADVISER TO ROOSEVELT, DIES: KEY STRATEGIST OF NEW DEAL

(By Wolfgang Saxon)

A lawyer of undisputed brilliance and wit, Thomas Gardiner Corcoran was the personification of the Washington insider whose enormous influence on legislation and Government dealings endured well beyond his heyday in the Roosevelt Administration. It often also made him the target of political opponents and those whose interests were affected by his backstage maneuvers.

He was one of Roosevelt's principal strategists in shaping such historic innovations as the Securities Act of 1933, the Securities Exchange Act of 1934 and the Fair Labor Standards Act of 1938.

The precise measure of his efforts rarely emerged. As a drafter of legislation and, later, as a lobbyist-lawyer with countless friends in high positions, he worked behind the scenes.

Mr. Corcoran, a young protégé of Felix Frankfurter and a holdover from the Hoover Administration, became one of the "hot-dog boys," a band of bright young lawyers who guided Roosevelt's New Deal through some of its most perilous years.

HELPED SHAPE SECURITIES PANEL

He teamed with Benjamin V. Cohen in the battle to create the Securities and Exchange Commission, shaping it and steering it through the legislative shoals. Their victory was one of the New Deal's headiest moments.

Mr. Corcoran stood on the left flank of the Roosevelt staff, which often fought internally with such conservative advisers as Postmaster General James A. Farley, a formidable power in the Democratic Party.

Men like Mr. Corcoran and Mr. Cohen were obscure lawyers at the time, working quietly to push the President's program through Congress. But by 1935, "Tommy the Cork," as Mr. Corcoran was called, and other "bright young men" had become known well enough around the capital for their legislative influence and power of patronage to draw fire personally.

While clearing some of the laws most bitterly resisted by the opposition, Mr. Corcoran was also reported to have played an important role in Roosevelt's efforts to enlarge the Supreme Court and to "purge" Democratic legislators not wholly committed to his policies.

CONGRESSIONAL ANTAGONISM

Mr. Corcoran's activities then led to Congressional antagonism, which reportedly blocked plans to appoint him to a high Government position in 1941. He decided to return to private law practices in Washington and promptly built a flourishing clientele of businessmen dealing with the Government.

His opponents said he was a lobbyist for big interests, a charge that gave rise to a number of public quarrels and formal inquiries over the years, starting in 1941 and as recently as last year.

Thomas Gardiner Corcoran was born Dec. 29, 1900, in Pawtucket, R.I. He attended Brown University, where he was valedictorian and a member of Phi Beta Kappa, and earned both his bachelor's and master's degrees in 1922.

Just losing out on a Rhodes Scholarship, he enrolled at Harvard University Law School and quickly won the reputation as the most brilliant member of his class, an assessment with which Professor Frankfurter agreed. He graduated at the head of his class in 1925 and went on to a doctor of juristic science the following year.

SECRETARY TO JUSTICE HOLMES

His performance also won him the honor of serving a year in Washington as secretary to Justice Oliver Wendell Holmes of the Supreme Court.

For five years, Mr. Corcoran practiced corporate law in New York with the Wall Street firm of Colton & Franklin, specializing in the reorganization of companies and the issuance of new stocks.

In 1932, after a short stint with the Federal Reserve Board, he was appointed by President Herbert Hoover as counsel to the newly formed Reconstruction Finance Corporation in Washington. That year, Mr. Hoover was soundly defeated by Mr. Roosevelt, but Mr. Corcoran, having always been a Democrat, remained in his post to build his influence in the Government and the White House.

Mr. Corcoran was introduced to Mr. Roosevelt by Professor Frankfurter, who had never lost touch with his "favorite pupil." He was assigned to the Treasury as assistant to the Secretary.

HELPED BY SECRETARY

Mr. Corcoran received much help in those days from Mr. Roosevelt's secretary, Marguerite Lehand, who was a personal friend. Gifted with what seemed like boundless energy, reviving himself with large doses of black coffee and dextrose through merciless workdays, all he had to do on the telephone was to use his opening gambit, "This is Tommy Corcoran at the White House," and Cabinet members, legislators and administrators snapped to attention.

"White House Tommy" became one of his nicknames, though his detractors had some less endearing phrases for him. Many, even among the New Dealers, resented his closeness to the President, who often followed his advice and whose most-remembered speeches bore the mark of Mr. Corcoran's trenchant wit and sharp phrase-making.

In the early 1930's, Mr. Corcoran also served as special assistant to the Attorney General. In 1934, he returned to the Reconstruction Finance Corporation as special counsel, a post he kept until the end of Roosevelt's second term.

The peak of his power came in the President's fights to "pack" the Supreme Court and to defeat certain members of Congress in the 1938 election.

Although he disagreed with both these aims, Mr. Corcoran loyally fought so hard for them that when they failed he had to pay the price: A new Presidential favorite, Harry Hopkins, took his place.

In 1940, he wed Margaret Dowd, the closest of his secretaries.

CALLED BEFORE INVESTIGATIVE PANEL

Frustrated in every attempt to get a better job at a higher salary, Mr. Corcoran quit for the rewards of private practice the next year. Shortly thereafter, he was called before a Senate investigations committee to answer the first of what was to become periodic charges of influence-peddling on behalf of private clients.

He testified that he earned $100,000, then a huge sum, in the first few months as a private lawyer. It was not established then, or ever, that he had done anything illegal.

In the words of a friend, Mr. Corcoran's trouble was that he worked as strenuously and in the same manner for private interests as he once had for the President: "He has never been able to make a distinction between them, or to realize that what might be justified within the Government cannot be from outside it."

Mr. Corcoran's wife died in 1957. He is survived by four sons, Thomas Jr. of Washington, David of Bethesda, Md., Howard of Potomac, Md., and Christopher of Newfoundland; a daughter, Cecily Kihn of Philadelphia; two brothers, David of Waterville Valley, N.H., and Judge Howard Corcoran of the District Court of Washington, and six grandchildren.

THOMAS G. CORCORAN, FDR "BRAINTRUSTER," DIES AT 80 IN D.C.

WASHINGTON.—Thomas G. "Tommy the Cork" Corcoran, a native of Pawtucket who rose to power as Franklin D. Roosevelt's personal troubleshooter and fixer, died yesterday. He was 80.

Mr. Corcoran, who had been in good health and who had kept active as a lawyer and lobbyist, died at the Washington Hospital Center of a pulmonary embolism after gall bladder surgery, a family spokesman said.

Mr. Corcoran, as FDR's liaison to Capitol Hill, cajoled, persuaded and bullied a recalcitrant Congress into passing Roosevelt's liberal and far-reaching legislation that formed the New Deal.

In addition to FDR, Mr. Corcoran worked for Supreme Court Justice Oliver Wendell Holmes and helped form the Flying Tigers, which kept the Chinese supplied with materials until the United States entered World War II.

Until his death, Mr. Corcoran's Washington law firm—Corcoran, Youngman and Rowe—dealt with a long list of top corporate clients including Tenneco and large New York insurance companies, and he used his experience to lobby on their behalf.

He was born Dec. 29, 1900, on Randall Street in Pawtucket. His father, Thomas P. Corcoran, a lawyer and former common councilman, was the son of an Irish immigrant; his mother, the former Mary Josephine O'Keefe, was a descendent of a pre-Revolution New England family.

"My father always used to say that a boy who did not take the politics of his father and the religion of his mother was either a victim of child abuse or a filial ingrate," Mr. Corcoran once said. He was a Democrat and a Roman Catholic.

At 12, he peddled newspapers, at 15, he worked on a farm for 15 cents an hour, led a strike for better pay and was fired.

Afer graduating from Pawtucket High School in 1918 as class president, he followed in his father's footsteps to Brown University where, many years later, he would become a trustee.

He worked his way through Brown, capturing numerous prizes for debate and English composition along the route to bachelor's and master's degrees, and then enrolled in Harvard Law School. To build up income he gave lectures—at $2 a head—on how to pass tough exams.

His law school professor, Felix Frankfurter, was instrumental in his appointment

as secretary to Supreme Court Justice Oliver Wendell Holmes in 1926. Mr. Corcoran called the job "one of the greatest periods in my life. I learned more from him than any history book."

When the clerkship expired, he joined a New York law firm and specialized in corporate law, stock mergers, and issuances. In 1932, at the request of Federal Reserve Board governor Eugene Meyer, he returned to Washington as counsel to the newly created Reconstruction Finance Corporation.

There, he got involved in politics and worked on the Federal Housing Act. House Speaker, Sam Rayburn, then asked him for help with the Securities Act, which faced a tough congressional fight. It was through Rayburn that he met Ben Cohen.

Together, Mr. Corcoran and Cohen became known as "The Whiz Kids" and "The Gold Dust Twins."

They soon became part of FDR's "brain trust" and took on the majority of the President's tough jobs. Mr. Corcoran was the White House premier odd jobber, legman, expediter, arm-twister and speechwriter.

Together, the "Twins" wrote and pushed through Congress the Stock Exchange Act, the Fair Labor Standards Act, the Securities and Exchange Act, the Public Utility Holding Act and others that completely transformed American life.

The turning point in Mr. Corcoran's White House career came when he sought the job of solicitor general. According to civil rights lawyer Joseph Rauh, he got four Supreme Court justices to sign a letter to Roosevelt urging the appointment.

Frankfurter, whom Mr. Corcoran had helped place on the court refused to sign. The appointment was never made. And the breach with Frankfurter never healed.

Mr. Corcoran left the White House in 1941 to form China Defense Supplies; lend-lease to China and a thriving law practice. With Claire Chenault, he organized the Flying Tigers to keep the Chinese supplied until America entered the war.

His law practice grew and flourished. His dealings on behalf of large oil companies and pharmaceutical firms produced congressional wrath, and his law firm was investigated four times by Congress. Each time he emerged unscathed.

Mr. Corcoran is survived by four sons, Thomas Jr. of Washington; Dr. David of Bethesda, Md.; Howard of Potomac, Md., and Christopher of Newfoundland; a daughter, Cecily Kihn of Philadelphia, and six grandchildren.

Funeral arrangements are pending.

OMB'S HOUSING AND COMMUNITY DEVELOPMENT RECOMMENDATIONS

Mr. WILLIAMS. Mr. President, the Office of Management and Budget (OMB) has proposed a series of budget recommendations that can only be described as a near total abandonment of one of the Nation's most basic and long held commitments, that of decent, affordable homes and suitable living environments for our people.

The proposals would bring to a dead halt, almost immediately, any progress toward meeting the country's serious unmet housing and community development needs, at a time when vast segments of the economy are reeling from serious recession. Housing assistance programs, except for commitments in force, would terminate, while worthwhile, successful programs such as the community development block grant program and the urban development action grant program would be crippled right away and snuffed out within two years.

And what bright hope would OMB offer to distressed cities and to needy citizens? Apparently, it would offer only the hope of private charity, self-help, and the President's economic recovery program. This is not hope.

It is a wild-eyed dream that in the real world of today, with a pervasive recession and an 8.4-percent unemployment rate, we could save money through adopting a housing policy that means the nightmare of continued joblessness, and wretched housing conditions for millions of people who have nowhere else to turn but to their Government.

Let me outline some of the recommendations that OMB would have the Congress implement:

First, no additional commitments of Federal housing assistance after fiscal year 1982.

Second, no funding for the modernization of public housing, beginning in fiscal year 1982, except that which can be recaptured from the rescission of funds for new public housing development.

Third, a slash of public housing operating subsidies by 60 percent, with the difference to be made up presumably through rent increases for tenants.

Fourth, no new funding for the troubled projects program, aimed at restoring troubled HUD-insured projects to economic stability.

Fifth, a dramatic cutback in the population served by the FHA insurance programs; with FHA commitments to total no more than $20 billion by fiscal year 1984.

Sixth, the total elimination of the housing counseling program, which is designed to help prevent defaults on FHA-insured dwellings.

Seventh, the elimination of the section 202 housing loan program for the elderly and the handicapped, beginning with fiscal year 1983.

Eighth, the termination of GNMA tandem programs once fiscal year 1983 tandem activity is completed.

Ninth, the total phaseout of the GNMA mortgage-backed security program by 1987.

Tenth, the total phaseout of the community development block grant program by fiscal year 1984.

Eleventh, the total phaseout of the urban development action grant program by fiscal year 1984.

Mr. President, the outrage over the proposals is broad based. Republicans and Democrats alike have reacted with the deepest concern about the havoc that OMB's recommendations would wreak. In fact, the seriousness of the OMB proposals are reflected in the strong protest that the Department of Housing and Urban Development has lodged in an effort to overturn them.

I believe it would be useful for my colleagues to see in greater detail the depth and breadth of the OMB proposals, and learn the Department's strong objection to them. I think this would put in proper perspective the enormous implications these proposals hold for the whole range of housing and community development concerns in this country.

To that end, I would like to submit for the RECORD a copy of a document I have obtained which details the OMB recommendations, characterized in the document as "decisions" and the draft language of HUD's appeal to these housing proposals.

It should be emphasized that while some of the strongest language was toned down in the final version of the Department's appeal, language in this document reveals the deep sense of outrage that these proposals have provoked in the Department, and should in turn engender in all truly concerned that this Nation keep its promise to improve housing opportunities and conditions in our urban and rural communities.

Mr. President, I ask unanimous consent that OMB's housing and community development proposals, and the draft HUD appeal be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, 1983 BUDGET—DEPARTMENTAL TOTALS

[In millions of dollars, FTE in units]

	1982	1983	1984
Ba	−1,999.8	−7,425.6	−4,182.7
O	12,831.8	11,341.1	10,007.1
FTE	14,318	13,334	NA
	1985	1986	1987
BA	−1,506.5	30.7	2,930.7
O	8,784.9	8,825.9	9,457.5
FTE	NA	NA	NA

Note: Any appeal items must be submitted by noon Tuesday, Dec. 1. Specific appeal items must be ranked individually in priority order. Negative amounts of budget authority reflect planned rescission of deobligated multiyear subsidized housing commitments.

Total 1982 rescission for subsidized housing		−24,865,503,101

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—SUBSIDIZED HOUSING, 1983 BUDGET

Program: Sec. 8 moderate rehabilitation.
Decision: Do not obligate for 34,000 moderate rehabilitation units in the pipeline which have been "reserved" but not reached "reserved not started" stage. Rescind budget authority associated with these 34,000 n oderate rehabilitation units.

BUDGETARY IMPLICATIONS

[In millions of dollars]

	1982	1983	1984	1985	1986	1987
BA	−2,397					
O	0	−75	−75	−74	−74	−74

Program: Subsidized new production.
Decision: Consistent with the Department's decision to curtail sec. 8 new construction and substantial rehabilitation activity beginning in 1983, we have proposed a rescission of budget authority for all sec. 8 and public housing new construction and substantial rehabilitation in 1982.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Programs: Rent Supplement and Rental Housing Assistance.

Decision: All Rent Supplement and RAP units currently under payment in FHA-insured or Secretary-held projects should be converted to Section 8 as soon as possible. Simultaneously, HUD should attempt to eliminate any HUD obligation to fund Rent Supplement and RAP units that are under contract but on which payments are not currently being made because of vacancy, occupancy by tenants with incomes over program maximums, or other reasons. (For computation purposes, it is assumed that 158,600 Rent Supplement units and 13,700 RAP units will be converted as of September 1, 1982.)

Units in projects that are not insured by FHA or held by the Secretary will not be converted. The policy for these units is that the Department should not provide any amendments to contracts for units in State-aided projects. If necessary, legislation should be proposed that will specifically relieve the Department from any obligation to amend the contracts for these units for future rent increases. Moreover, HUD should take action (including proposing legislation, if necessary) that will permit the recapture and rescission of funding for Rent Supplement and RAP units in these State-aided projects when the tenants in the units on which subsidies are currently being paid move or otherwise become ineligible for subsidies. According to HUD estimates, payments currently are being made on about 14,400 Rent Supplement units and 20,300 RAP units in State-aided projects.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Subsidized Housing Tenant Rents.

Decision: Rent increases will be accelerated through the following steps:

1. Legislation will be proposed to permit food stamps to be counted as income (assumed to be effective in FY 1983).

2. The 1981 Reconciliation Act changes will be implemented through regulation in FY 1982 so that income is defined as all cash income without any deductions or special adjustments.

3. The rent to income ratio will be increased to 30 percent by 1984: the increase will be 1 percent of income in 1982, and 2 percent in both 1983 and 1984.

Legislation will be proposed to repeal the 10 percent ceiling on the rate of annual rent increases (excluding tenant income growth) as included in the 1981 Reconciliation Act.

[1] Impacts are shown for the subsidized housing account only; the impact on public housing is reflected in decision for public housing operating subsidies.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Subsidized Housing.

Decision: The Section 8 existing program will be modified as follows in 1983:

(a) A payment standard approach will be used to determine a rental allowance. The payment standard will be set at a level equivalent to the 40th percentile of the distribution of rents for all rental units of standard quality, excluding new units.

(b) Consistent with the rent increase decision, the tenant contribution will be set at 30 percent of cash income plus food stamps, if applicable. No adjustments to income will be assumed.

(c) PHA's will continue to administer the program through payments to landlords.

(d) A minimum 10 percent contribution will be required of participating households.

Program level for 1983 will consists of: (1) replacement of current Section 8 Finders Keepers certificates with vouchers as tenants exit the program; (2) 20,000 vouchers for tenants currently occupying Section 8 new or sub rehab units whose owners are expected to terminate their involvement with the Section 8 program at the time of their 5 year renewal option; and (3) 3,750 vouchers for public housing tenants in projects being sold or demolished.

The bounty vouchers demonstration has been rejected.

The budgetary details for the revised Section 8 existing program are as follows:

Vouchers will be issued for 5 years with no adjustments for inflation.

The assumed subsidy per voucher per year is $1,800.

When a Section 8 existing certificate is replaced with a voucher, the PHA's ACC will be extended for 5 years at a commitment of $9,000 per voucher in BA; the balance of the BA currently allocated to that PHA will be deobligated and proposed for rescission.

Finally, support for a revised Section 8 Existing (voucher) program is tied to the achievement of the legislative changes to permit rents to be increased at an accelerated pace, and upon deobligation of funds currently obligated in support of the Section 8 new/sub rehab program.

PROGRAM LEVEL

	1982	1983	1984
Existing (finders keepers)	734,746	557,790	425,090

BA	−2,159,287	−2,128,241	104,289
O	1,147,482	1,769,806	1,793,056

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT SUBSIDIZED HOUSING 1983 BUDGET

Program: Section 8.

Decision: Deobligations of Section 8 Authority:

HUD's estimated $4 billion in Section 8 "recaptures" for 1982 and 1983 has been accepted. These additional resources will be used to finance approved subsidized housing program levels in 1982 and 1983. Appropriated 1982 budget authority or requests for new budget authority in 1983 will be reduced to reflect any excess between the $5 billion in deobligations and approved program levels.

All 1981 carryover budget authority will be proposed for rescission.

Section 8 Amendments for New Construction/Sub Rehab:

Amendments will be made in 1982 and 1983 only for approved cost increases (no amendments to increase numbers of units).

HUD will continue to implement its policy of limiting cost amendments to a maximum of an annual 7½% increase above original contract reservation amounts, with an exception only for FAF.

The 1982 amendments for FAF will be limited to $1.4 billion for tax-exempt financed projects. These amendments will be financed from deobligations and FAF amendments for State agency projects will be financed only from deobligations of State agency units. The other conditions governing the FAF decision continue to apply.

Total approved Section 8 New/Sub Rehab amendment program levels are $2.95 billion (including FAF) for 1982 and $1.05 billion for 1983. No amendments are projected beyond 1983.

Section 8 Amendments for Existing:

Amendments budget authority will not be provided in 1982 and 1983 pursuant to the Department's decision to roll back existing FMR's in 1982 and limit future increases in FMR's to 5 percent.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Section 8:

Decision:

Adopt HUD Recommendation (No. 5) to roll back existing housing FMR's in 1982 and limit future increases in FMR's to 5 percent.

Adopt HUD Recommendation (No. 5) to set future existing housing FMR's levels at the 40th percentile rather than the median.

This recommendation has been incorporated into our computation of the voucher payment standard.

Calculate the rent standard using the distribution of all non-newly constructed standard units (rather than only those units occupied by recent movers as it is currently computed). This methodological change has been incorporated into our computation of the voucher payment standard.

Adopt HUD Recommendation (No. 8) to reduce the PHA's administrative fee for the non-voucher Section 8 existing program from 8.5 percent of contract rent to 6.0 percent.

Adopt HUD Recommendation (No. 11) for revising the Annual Automatic Adjustment Factors.

Adopt HUD Recommendation (No. 12) to use excess residual receipts from certain nonprofit and limited dividend Section 8 projects to offset housing subsidy payments.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Public Housing Production and Modernization.

Decision: No funds will be requested in FY 1983 and any FY 1982 funds appropriated will be proposed for rescission. However, PHA's will be permitted to use 50 percent of any funds now obligated in the public housing pre-construction pipeline for public housing modernization. It is expected that about 75 percent of the new construction pipeline will be deobligated and the 50/50 rule applied to these funds. The other 50 percent of the funds deobligated will be proposed for rescission. Regulations for public housing modernization will give priority on the use of funds to energy conservation. Regulations will also emphasize the need to assure the economic and social viability of projects being rehabilitated. Finally, regulations will permit the use of modernization funding for the demolition of projects. (Appropriations language will be proposed to permit the use of deobligated production funds for public housing modernization.)

BUDGETARY IMPLICATIONS [1]

[In millions of dollars]

	1982	1983	1984	1985	1986	1987
BA	−793	−1,586	−1,586	−793		
O			−3	−3	−3	−6

[1] Rescissions of BA and associated outlay impacts net of new obligations for modernization.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Indian Housing.

Decision: No additional funds will be requested in the 1983 budget for any Indian housing program pending completion of the interagency task force review. No further funds are being requested for the water and sanitation programs of the Indian Health Service. The Indian Housing construction pipeline is assumed to be completed. However, to the extent that added water and sewer facilities are needed to complete the current Indian housing pipeline, those funds will have to come from deobligations of Indian housing units.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Payments for Operation of Low Income Housing Projects.

Decision:

1. The Administration will continue to oppose any add-ons to the 1982 appropriation bill such as the $148 million intended to apply retroactively to 1981 public housing operating subsidy requirements.

2. The 1982 proposed appropriation level of $1,060 million wil be retained based upon increased rental revenues resulting primarily from the elimination of all adjustments to income effective immediately (see Subsidized Housing Tenant Rent decision).

3. The 1983 program level assumes not only the full effect of the rent increase as discussed elsewhere, but also a one-time downward adjustment in PHA base utility consumption allowances of 20 percent, effective beginning in 1983.

4. Other sources of reduced operating subsidy requirements include:

A regulation change to preclude counting vacant or "deprogrammed" units in PUM totals for purposes of computing subsidy.

Regulation changes to permit PHA's to reduce tenant energy allowances and to revise lease and grievance procedures.

Reductions in the number of units under management attributable to (a) deobligations of units in the construction pipeline; and (b) a deliberate policy of closing down the most expensive projects.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Rental Rehabilitation Initiative.

Decision: The Rental Rehabilitation Initiative has been denied due to a lack of food analytical reasons to begin such a program especially in a very tight budget year.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Troubled Projects Operating Subsidy.

Decision: Beginning in FY 1983, Troubled Projects will be funded solely from transfers from the Rental Housing Assistance Fund; Legislative proposal 97–105 should be changed accordingly. In addition, legislation should be proposed to redefine eligible housing projects such that only FHA-insured or Secretary-held projects will be eligible for Troubled Projects assistance beginning in FY 1983. Legislative proposal 97–106 is disapproved.

BUDGETARY IMPLICATIONS

[In millions of dollars]

	1982	1983	1984	1985	1986	1987
BA	4	0	0	0	0	0
O	115	35	0	0	0	0

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Federal Housing Administration.

Decision: Beginning immediately, FHA insurance of unsubsidized single-family mortgages should be specifically targeted at only those homebuyers who are not adequately served by the private sector. FHA should not compete with or attempt to compete with the private sector. Instead, FHA should encourage the private mortgage insurance industry to handle as much of the market as possible. Thus, the role for FHA should be a residual one: FHA should provide mortgage insurance only to the extent that the private sector is not capable of responding to market demands.

FHA should begin in FY 1982 to collect the discounted present value of premiums at the time mortgages are initially insured. The discount rate used should be based on the Administration's current economic assumptions; the discount period used should be the full term of each mortgage. In addition, FHA should eliminate cross-subsidization by charging higher premiums to those homebuyers who are in higher risk categories (i.e., low downpayment homebuyers). Note that the sum of the mortgage plus the discounted present value of premiums should not be allowed to exceed current maximum mortgage amounts (i.e., 97 percent of the first $25,000 of value, and 95 percent of the value above $25,000). Coincident with these changes, FHA should eliminate the mutuality provisions of the Mutual Mortgage Insurance Fund. If necessary, legislation should be proposed to accomplish this change.

Consistent with the retargeting of FHA stated above, the following changes should be implemented:

Instead of legislative proposals 97–225 and 810, legislation should be proposed to repeal the maximum interest rates charged on FHA insured mortgages and loans. In addition, the restrictions on the number of points that may be paid by homebuyers should be eliminated.

The maximum mortgage limitations currently in place should not be increased.

Expansions of FHA insurance authority are disapproved. Specifically, legislative proposals 97-204, 205, 206, 209, 216, 217, 218 and 219 are disapproved.

Instead of legislative proposal 97-220, HUD should submit legislation to repeal Section 518 of the National Housing Act.

Legislative proposals 97-207, 210, 211, 212, 213, 215, 224, 801, 803, 805, 806 and 808 are approved.

The provisions of legislative proposal 97-214 that eliminate the requirement that FHA accept debentures at par in exchange for premiums and that give the Secretary the choice of cash or debenture settlement for all multifamily programs are approved. The remaining provisions of this proposal are disapproved.

HUD should redraft legislative proposal 97-802 to exclude Sections 232 and 242. In addition, legislative proposals 97-804 and 809 are disapproved.

Instead of legislative proposal 97-201, HUD should propose the total elimination of Section 203 of the Housing and Community Development Amendments of 1978 as amended. As a result of this action, it is assumed that the receipts from selling multifamily properties will be increased by $37 million in FY 1983.

Purchase money mortgages (PMM's) may be used to sell 7,000 units in FY 1982 and 2,500 units in FY 1983.

FHA should obtain receipts from the sale of PMM's of at least $150 million in FY 1982, $150 million in FY 1983, and $50 million in FY 1984.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Tax Incentive for Leasing of Energy Conservation Equipment to Section 202 Housing Sponsors and Low Rent Public Housing Agencies.

Decision: This legislative proposal has been rejected.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: Public Housing Loan Fund.

Decision: A portion of the subsidized housing program budget authority which becomes available through deobligations will be proposed for transfer to the public housing loan fund. The amounts proposed are $1.4 billion in FY 1982 and $1.4 billion in FY 1983. These funds will be used to finance the sale of public housing bonds to the FFB. Legislation will be proposed to increase the recently enacted ceiling on the obligation of funds by HUD in conjunction with such sales.

Program: Tax-Exempt Financing for Multifamily Housing.

Decision: No legislation will be proposed in this area (i.e., to amend Section 11(b) of the U.S. Housing Act or Section 103 of the tax code).

Program: Solar Energy and Energy Conservation Bank.

Decision: Any amounts appropriated in FY 1982 and FY 1983 will be proposed for rescission.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT 1983 BUDGET

Program: GNMA Tandem Programs.

Decision: 1. Legislation to forgive the net Treasury borrowings of the SAF and EMPA funds will not be proposed at this time.

2. Demand for tandem loan commitments in 1982 should be screened initially through the use of pricing mechanisms:

(a) Initial commitment fee of 6 percent.
(b) Purchase price of 95 percent of par.

3. The proposal to terminate the Tandem authorities should be resubmitted once 1983 Tandem activity is completed.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—GOVERNMENT NATIONAL MORTGAGE ASSOCIATION, 1983 BUDGET

Program: Guarantees of mortgage-backed securities.

Decision: The commitment level of the GNMA mortgage-backed securities program will be set at $38,400 million in 1983. The application fee for commitments will be set at $1,000 per $1 million of commitment authority issued beginning in 1982. The program is expected to be phased-out by 1987, which represents a $9.6 billion or 20 percent decrease in commitment levels each year 1982 to 1987.

BUDGETARY IMPLICATIONS

BA	300	150				
O	599	620	470	180	69	

Program: Rehabilitation loan fund.
Decision: If the sec. 312 program is not terminated in 1982, its termination will be proposed for 1983 with all assets, deobligations, and income being transferred to the revolving fund (liquidating programs). However, for as long as the program continues, its activity will be exclusively used for multifamily rental rehabilitation. Revised regulations should be promulgated as soon as possible increasing the interest rate to the maximum allowable by law and making the interest rates dependent upon landlord's (not tenants') incomes.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—STAFFING 1983 BUDGET

Based on the program decisions for 1982 and 1983, 14,593 staff-years will be allocated for 1982 and 13,609 staff-years for 1983 (excluding staff-years for terminal leave). The FTE equivalents are as follows:

	Total	FTP
1982 FTE's	14,318	13,864
1983 FTE's	13,334	12,911

On a decision unit basis, the following staff-years were decided upon for 1982 and 1983.

	1982	1983
Housing:		
Headquarters	876	823
Sec. 8	812	650
Public housing	500	403
Public housing modernization	157	144
Other field	667	639
FHA—mortgage insurance	1,612	1,282
FHA—all other	2,099	2,096
Nonprofit sponsor	1	1
Housing payments	859	859
Revolving fund	15	15
Community disposal	1	1
Congregate services	4	4
Regulatory functions	40	40
Less shortfall	−277	0
Total	7,366	6,957

Departmental management	170	150
General counsel	225	225
Field legal	320	320
Inspector General	483	483
A & SS	1,410	1,300
WCF	380	350
FD & OS	620	560
Field administration	1,270	1,200
Total	14,593	13,609

From these totals, 200 overtime staff-years and 75 nonceiling staff-years were subtracted in order to achieve the FTE numbers.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—SALARIES AND EXPENSES, 1983 BUDGET

The following table summarizes the S & E mark for 1983 (dollars in thousands). Amounts, where appropriate, are based on 1983 staffing recommendations. Staff will gladly provide details.

Personnel services	$394,622
Travel	15,800
Transportation	800
Rents, communications, and utilities:	
Space rental	40,000
FTS	8,300
Penalty mail	10,500
Other communications	8,300
Equipment rental	6,700
All other	100
Total	73,900
Printing and reproduction	7,500
Other services:	
ADP	31,500
Special contracts	2,714
Trainihg contracts	1,000
Property protection	100
Regulatory analysis	100
All other	9,000
Total	44,414
Supplies	4,000
Furniture and equipment	1,500
Indemnities	45
Total	542,581

The approximate distribution of these obligations between budget authority and transfers is as follows (dollars in thousands):

Budget authority	294,744
FHA transfer	236,450
Other transfers	11,387
Total	542,581

Due to the apparent tightness of the 1982 situation, a partial waiver has been granted to the 50 percent absorption of the pay raise. HUD will only be required to absorb 50 percent of the budget authority, not the FHA transfer. With an increase in 1982 pay costs of $14,334 million (excluding working capital fund), it is assumed that about 45 percent would normally come from increased FHA transfers, or about $8,700 million. In order to absorb half the remainder, supplemental appropriations of $5,317 million would be permitted.

It is believed that with this waiver and with other nonpersonnel cost reductions (such as in ADP and travel), more than sufficient funds should be available so as not to force a reduction in personnel below the recommended 1982 staffing evel and to pay for any necessary severance costs.

BUDGET APPEALS—HOUSING: SUBSIDIZED HOUSING LEVELS FOR FISCAL YEAR 1982

	HUD request	OMB mark	Real impact of OMB mark
Public housing	$17,000		−$26,000

	144,611	177,300	79,300
Total	[1] 161,611	177,300	53,300
Proposed funding:			
Sec. 8 and public housing	[1] 17,374	595	595
Rent supplement	−1,037	−9,457	−9,457
Total	16,337	−8,862	−8,862

[1] Revised to reflect the President's 12-percent cut in appropriations.

OMB Mark:

The revised FY 1982 Budget requested an appropriation of $17.4 billion to fund the approval of 161,611 units under the Section 8 and Public Housing programs. The OMB mark proposes a rescission of $15.4 billion and the transfer of $1.4 billion to the Federal Financing Bank.

The OMB anticipates the availability of $11.5 billion in deobligations, carryover and permanent authority for a total gross program level of $12.0 billion for Section 8 and Public Housing (See attached computer printout). No new approvals are proposed for FY 1982. The only activities to be funded are amendments to ongoing projects and modernization of Public Housing projects (both from deobligations) and the conversion of projects now being funded under older subsidy mechanisms to funding under Section 8.

Impact:

HUD had proposed a gradual phase-out of subsidies for new construction in favor of less expensive subsidies for existing housing. At the same time, the Department proposed to meet the need for new rental housing construction after 1982 through the use of tax-exempt financing: a less costly, and administratively simpler devise which places greater reliance on the private entrepreneur and market demand.

BUDGET APPEALS

HOUSING

The OMB Mark not only eliminates entirely the new construction program, but also the use of additional existing housing subsidies as well. Moreover, in order to carry out the OMB proposal, the Congress will have to vote—in an election year—for a massive rescission of budget authority. This would represent the third major funding reduction for housing programs proposed for FY 1982. Given the fate of the latest round of cuts, it seems doubtful that added reductions of this magnitude are even remotely possible. At a time when the housing industry is at an all time low, when construction unemployment has reached depression levels, the OMB would eliminate current housing programs without offering any alternative vehicle for providing assistance.

It is simply infeasible to expect to be able to convert all Rent Supplement and RAP projects to Section 8 funding within the next 10 months. More importantly, neither the Congress nor the industry will be misled by the transparent ploy of counting these units as additions to the subsidized stock. Even if sufficient recaptured authority could be made available—which it cannot—it will be blatantly obvious that the proposed 1982 program represents merely an attempt to reneg on valid existing contracts and to try to reverse the government's valid commitment to helping the very poor find decent housing.

The OMB proposal would require the cancellation of an estimated 124,000 units of subsidized housing—and would offer no positive alternative in place of the current programs. If the Administration chooses this approach, it runs the risk of having Congress reject the entire proposal and simply reinstitute the current, costly subsidy programs instead—at the higher levels originally proposed in the 1982 Budget.

The OMB Mark proposes the deobligation of 34,000 units reserved under the Section 8 Mod Rehab program which have not yet reached construction start. This arbitrary action violates existing agreements with local housing agencies. In many cases, these agencies have advertised the availability of subsidies and accepted bids from local owners and developers. Cancelling these commitments without cause would leave HUD and the local agencies vulnerable to litigation.

The OMB Mark would eliminate the use of Section 8 to achieve the sale of FHA properties in 1982—thus leading to higher HUD outlays.

While the OMB recognizes the valid need for modernization of Public Housing projects, its proposal to fund this program using one-half of all Public Housing deobligations is infeasible. There is simply no way that sufficient recaptures can be achieved rapidly enough in FY 1982 to be used to fund the modernization program—and legal restrictions on the use of recaptures will prevent its use for modernization in many localities. Moreover, the OMB's proposal would require us to ask Congress for authority to reprogram the use of recaptured authority at precisely the same time that we were asking them for massive rescissions—including a rescission of authority specifically provided by them for this very purpose.

The OMB assumes that 75 percent of the Public Housing pipeline will be cancelled during 1982–85 in order to fund the Modernization program. There is absolutely no basis for this estimate—nor is there any way of legally requiring the arbitrary cancellation of over 100,000 units of valid Federal commitments to provide needed new housing.

The proposed rescission of 1981 carryover balances will result in litigation as well, since in many cases the carryover authority is needed to fund valid program commitments (e.g., Section 8 subsidies for approved Section 202 projects).

The failure to fund amendments to existing housing units now under payment would violate the requirements of the Section 8 authorizing statutes, and the implementation of a roll-back in FMRs during FY 1982 is administratively unworkable.

Finally, the OMB proposal ignores the consistent direction of Congress to continue making funding available for under a number of set-asides: Public Housing, State Housing Finance and Development Agencies, Section 202, and Farmers Home Administration units. The political support for a number of these groups is incredibly strong—and it is foolish to antagonize organizations which would normally be strong supporters of the Administration by engaging in a battle where the political losses will inevitably be far greater than any forseeable outlay savings.

HUD REQUEST

The HUD submission proposed the modification of the Section 8 existing housing program in 1983 to make it more in line with the findings of the Experimental Housing Allowance Program (EHAP). A total of 88,000 additional units were proposed for 1983 under various forms of the voucher proposal. In addition, HUD proposed a reduced level of funding for the politically popular Section 202 program, and 44,000 units of eixsting housing subsidies to maintain the current subsidized housing stock.

OMB MARK

Some of the features of the Voucher program would be introduced under the Mark, but under a very different funding level and program direction:

The basic feature of vouchers—the payment standard—would be retained, and the standard would be based on a rent at the 40th percentile of the market, as HUD had proposed, but:

Food stamps will count as income and the tenant payment will be based on a percentage of gross income without any allowances and counting both cash and non-cash income. Current legislation limiting the rise in an tenant's rent to 10 percent per year would be eliminated under the Mark, and the rise in rent burden to 30 percent will be accelerated to occur by 1984—rather than by 1986 as originally approved by Congress.

Two changes are proposed to the way in which the 40th percentile rent is determined: At present, only the rents paid by recent movers is counted, while OMB would count all renters; and at present, the rents of all rental units are counted, while the OMB would exclude the rent of newly constructed projects.

	Units
Funding is proposed as:	
For tenants of new or sub rehab projects where the owner drops out of the program	20,000
For tenants of Public Housing projects sold or demolished (3 vouchers for each 4 units eliminated)	3,750
Phase-out of current Section 8 certificates (full phase-out in 4 years)	191,186
Total	214,936

The subsidy will average $1,800 per year for 5 years—with no increase for inflation over the term. The excess BA from the phase-out of the Section 8 program will be rescinded. Recaptures from new construction projects will be used to fund the 23,750 "incremental" units approved for 1983. Because of a higher level of existing housing cancellations in 1983, however, the OMB projects a net decline in existing/voucher units under payment of 20,750 units in 1983.

PHAs will continue to make payments directly to landlords.

The Housing Bounty demonstration and the Rental Rehab initiative were rejected.

HUD's outlay savings proposals on rolling back the existing FMRs, on reducing PHA fees, and on revising the Annual Adjustment Factor were accepted.

The OMB conditions its support for a revised Section 8 existing program on the enactment of legislation to speed up rent increases and the achievement of higher deobligations under Section 8.

IMPACT

Last year, the Department was able to achieve passage of higher tenant rents only by promising to carefully limit the adverse impact on current tenants. The OMB Mark would require us to violate every agreement made as part of last year's package. Not only will this proposal not pass the Congress, it will totally destroy any remaining semblance of credibility the Administration has with the Hill.

As part of its recent outlay reduction exercise with the OMB, the Department examined and specifically rejected the changes to tenants rents now being proposed by OMB. The reasons for rejection, which were discussed in detail in the Secretary's November 6th letter, included political impracticality, the danger of higher vacancies, rent strikes, massive evictions, project defaults, higher outlays, political and social unrest, and likely litigation.

The estimate of 20,000 new/rehab units dropping out of the Section 8 program is too high and cannot be supported under any basis.

The estimated turnover of the entire Section 8 existing inventory in 4 years is simply unrealistic—moreover, it ignores the fact that HUD has valid contracts with local housing agencies to administer the current program for the next 5 years.

The $1,800 estimate is probably too low a figure for 1983—it is clearly too low for 1987. By refusing to allow for any increase in the subsidy, the OMB is assuring that tenants will bear a significant hardship—and by doing so is losing sight of our mutual goal. HUD proposed the shift to vouchers and the roll-back in FMRs in part as a way to save money and thereby help more families. By being too niggardly, the OMB has made the voucher program unacceptable to those groups whose support we will need if we are to convince the Hill to enact vouchers in lieu of the current existing housing program.

The OMB's clumsy threat to deny support for vouchers if it doesn't get its way on tenant rents and deobligations is not only offensive and juvenile—it ignores the fact that both HUD and OMB have agreed that vouchers are a better, less expensive and philosophically more defensible program than the current Section 8 mechanism. Which is why HUD proposed it and why the OMB should endorse vouchers without reservation and stop playing games with themselves.

The denial of the Rental Rehab initiative and the Housing Bounty demonstration merely prove that the technicians at OMB would rather criticize old programs than examine new ideas. Their argument that a "tight budget year" is the wrong time for innovative ideas shows a good deal about the OMB mentality and the intellectual level of their analysis.

BUDGET APPEALS

Topic:

Federal Housing Administration.

HUD Request:

Consistent with the HUD-OMB agreement last year, the Department proposed maintaining FHA insurance activity at the $35 billion level for FY 1983. Within the agreed upon limit, HUD proposed a number of innovations aimed at improving the opportunities of first time homebuyers and at encouraging the construction of badly needed unsubsidized rental housing throughout the country.

OMB Mark:

All proposed innovations were denied. In addition, the level of FHA commitments would be reduced to $24 billion in 1983 and $20 billion in subsequent years. Insurance activity would be targeted only to those buyers not served by the private insurance industry.

The HUD proposal to collect the discounted insurance premium at time of mortgage insurance was approved—to begin in FY 1982. Under the OMB Mark, the discount is to cover the full mortgage term, and no increase in current mortgage limits was allowed. These two provisions will have the effect of making the HUD proposal unworkable.

The OMB also proposed higher premiums as well as the end to insurance mutuality under the MMI Fund.

Legislation would be proposed to eliminate FHA interest ceilings and the limitation on points paid by buyers.

The Mark also directs repeal of Section 518, which provides remedies for purchasers of FHA insured homes with major structural defects that should have been noticed under normal inspections.

Repeal of Section 203 of the HCD Act of 1978 (covering the sale of formerly subsidized HUD properties) is also mandated, and the estimate of HUD sales receipts in 1983 is increased by $37 million.

The use of purchase money mortgages is decreased to 7,000 units in 1982 and 2,500 units in 1983. The estimated proceeds from the sale of assets (including PMMs) was also increased by $50 million each year.

Impact:

The proposed decrease in FHA insurance activity will give a clear signal that this Administration intends to abandon the housing industry and ignore the plight of young home buyers.

Last year the OMB failed in its attempt to eliminate the FHA directly, so this year it has altered its approach slightly. Instead of taking the issue on directly, it has chosen to propose changes to the fee structure, the mortgage limits, the mutuality provisions, and the provisions which protect home buyers. The net effect of all these changes would be to make FHA insurance no longer attractive to those who traditionally rely on our programs. The refusal to approve the various innovations proposed as part of this year's legislative package is also an indication of OMB's desire to achieve indirectly the abolition of FHA—despite repeated support within the Administration for the goals of the FHA programs.

Since legislation will be required before the advance collection of FHA premiums can be implemented, there is no way that the OMB proposal can be effective in 1932.

The Department considered proposing the elimination of Section 203 and rejected the idea as politically infeasible. We have instead proposed a more moderate revision to the basic provisions. The OMB seems to prefer a more extreme stand even if it is never enacted to the HUD proposal which has a chance of passage.

The OMB proposal to eliminate mutuality can only be applied prospectively—and will therefore have little if any effect on outlays in the foreseeable future—except perhaps to

make FHA less attractive thereby reducing premium income.

The OMB Mark is inconsistent since it eliminates the use of Section 8 assistance in property sales and severely limits the use of PMMs—and at the same time increases the projected sales receipts. Its projections of higher property and mortgage sales are merely arbitrary (and phony) devices to make the Budget look better than it really is. There is no basis for these additional proceeds and the proposed limits imposed by OMB will make even the earlier sales goals proposed by HUD unattainable.

HOUSING

Topic:
Rent Supplement recaptures.
HUD Request:
The HUD submission assumed an orderly program for conversion of Rent Supplement and RAP units to Section 8 over a 7–9 year period. Authority recaptured from the conversion process would be used to amend the remaining units that needed rent increases pending conversion to Section 8.
OMB Mark:
Convert 172,300 units to Section 8 in FY 1982 and rescind $9.5 billion.
In addition:
Cancel commitments where the subsidy is not actually being paid out at present (e.g., vacant unit or a tenant not eligible).
Convert only those units insured by FHA or held by the Secretary—do not fund any increases for State-agency units. Propose legislation which retroactively eliminates any obligation to amend State-aided projects and which also authorizes the recapture and rescission of subsidies to these projects tenant turnover.
Impact:
The proposal is not feasible at the level of conversions proposed by the OMB. There is no way that HUD can force owners to convert that quickly even if we were able to process the documentation—which we are not.
There is no legal basis for canceling subsidies not actually being paid—this violates existing contracts.
The exclusion of State-agency projects is unfair and is guaranteed to antagonize Congressional supporters.
The proposal to recapture subsidies to State-aided projects upon tenant turnover is both politically infeasible and legally indefensible. The subsidy contract is with the project owner, not the tenant, and cannot be abrogated unilaterally.

HOUSING

Topics:
Tax-exempt Financing for Multifamily Housing.
HUD Request:
In a major departure from its previous position, HUD advocated the complete termination of all deep subsidies to new construction of rental housing for low-income families. However, in order to meet the need for rental housing construction where it existed—and to counter the arguments of those on the Hill who would oppose the Administration's position—we proposed the use of tax-exempt financing for rental housing: a relatively inexpensive and administratively simple mechanism which places maximum reliance on the private market and the private entrepreneur.
OMB Mark:
The OMB completely denied the use of tax-exempt financing without reason or explanation.
Impact:
The OMB's position might make some sense if it were made in a vacuum. In reality, the choice is between the very expensive programs we now have and the relatively inexpensive use of tax-exempt financing. There is simply no way we can sell the Hill on eliminating the current production programs unless we can offer a feasible alternative. The use of tax-exempt financing offers precisely such an alternative: and one which we can support from both a philosophical as well as budgetary perspective.
Even with the use of tax-exempt financing as alternative, there is no guarantee that the Department will be able to assure the elimination of set-asides for new construction under the current programs—but without it we can guarantee that the Congress will continue Section 8 and Public Housing despite the very high costs of these programs.

HOUSING

Topic:
Public Housing Operating Subsidies.
(Dollars in Millions)

	FY 1982	FY 1983
Latest estimate of need based on PFS formula update	$1,407	$1,583
Proposed funding under the OMB Mark	1,060	402

OMB Mark:
There are only two major sources of operating funds for Public Housing agencies: Federal operating subsidy payments and tenant rents. The OMB is proposing to decrease the Federal payments to 75 percent of need in 1982 and 25 percent of need in 1983. To compensate, the OMB has directed a number of changes which would permit higher tenant rent payments:
Accelerating the rise in rent burden to 30 percent of income by 1984—rather than 1986 as approved by Congress (+1 percent in 1982, +2 percent in 1983 and +2 percent in 1984).
Including the cash value of food stamps as income in calculating rents (1983).
Ignoring any deductions of adjustments in calculating rents—using gross income—effective immediately in 1982.
Repealing the 10 percent limit on rent increases per year for poor families.
Decreasing tenant energy allowances and revising tenant lease and grievance procedures.
In order to reduce the formula payments by the amount desired, the OMB would propose:
A one-time reduction in the energy consumption base for 1983 by 20 percent.
Excluding vacant or "deprogrammed" units from being counted in computing PFC subsidies.
Reducing subsidies on the basis of anticipated deobligations or elimination of expensive projects.

BUDGET APPEALS
HOUSING

Impact:
Preliminary calculations indicate that tenants would be faced with rent increases of well over 60% in order to meet the shortfall in Operating Subsidies in 1983. Increases of this magnitude are politically and socially unacceptable.
The OMB has offered no constructive suggestions on how to improve management or reduce the costs of operating Public Housing projects—areas where the Department has been making considerable progress. Instead, the only solution that OMB has discovered is to pass the costs on to those who are least able to afford it. There is simply no way to disguise this attempt to "balance the Budget on the backs of the poor."
The OMB has grossly overestimated the impact of the proposed "savings" by ignoring the effect that these rent increases will have on tenant movement. With rent increases this drastic, many low income households will choose, or be forced, to move: Often to overcrowded or substandard private housing. A more realistic estimate would indicate increases in rental income of only one-third that assumed by the OMB—in other words, even with these drastic changes there is no way that Public Housing projects could be adequately maintained if the level of Operating Subsidies is reduced this much.
The proposed reduction to Operating Subsidies will mean:
Critical cash flow problems for many PHAs leading to the cutoff of utilities and other essential services.
Massive layoffs of PHA personnel, strikes, and the inability to maintain projects in liveable condition.
Reduced rent rolls because units cannot be maintained and are boarded-up for lack of funds.
Rent strikes, riots, vandalism, and irreparable damage to projects.
Litigation, bankruptcy and receivership of several major PHAs.
Major political disruptions in several large cities, increased Congressional pressure to increase the level of funding for Public Housing above present amounts.

BUDGET APPEALS
HOUSING

Topic:
Troubled Projects Operating Subsidy.
HUD Request:
The Department proposed a total program level of 41.8 million in 1983 to be funded in part from appropriations ($22.8 million) and in part from the transfer of excess balances from the Rental Housing Assistance Fund ($19 million).
OMB Mark:
No appropriation in 1983. Only the $19 million from the RHAF will be available. Proposed legislation will extend the authority to transfer excess receipts from the RHAF, but no additional authority for appropriations will be requested.
No funding of any kind is proposed for this program after 1983.
Legislation will be proposed to eliminate the use of Troubled Projects funds for State-aided projects.
Impact:
Troubled Project funds are used to prevent multifamily project assignments and insurance claims. Refusal to assure adequate funding for this program is counterproductive to the Administration's effort at holding down Federal outlays.
The proposal to eliminate funding for State-aided projects is counter to the Administration's policy of reliance on State programs and bears little chance of success given the strong support that State Housing Finance and Development Agencies have in Congress.

BUDGET APPEALS
HOUSING

Topic:
Section 202 and Section 106 Loans
HUD Request:
The Department proposed to reduce the level of Section 202 loans from $830 million in 1982 (17.200 units) to $423 million in 1983 (only 10.000 units). This program is one of the most popular programs in Congress, and is the only new construction program proposed for funding by HUD for 1983—specifically because of the strong support on the Hill and among the elderly lobby.
HUD also proposed the use of $1.8 million under the companion program. Section 106 loans for nonprofit sponsors. This program, which requires no appropriation. provides start-up funds for minority and other small, inexperienced sponsors of Section 202 projects.
OMB Mark:
Rescind the authority provided for both Section 202 and Section 10[illegible] and terminate both programs.

Sell all Section 202 loans in the HUD portfolio with coupon rates above 6 percent.

Impact:

The political fallout of making this proposal in an election year will be astronomical. There will be no outlay savings from killing the Section 202 program until 1985 at the earliest, but the cost of even making this suggestion will be felt—and felt strongly—in November of 1982.

Section 202 loans are not insured by HUD, and there is simply no way of predicting what the proceeds of the proposed sale may be. However, it is sane to assume that these loans will only sell at a substantial discount and loss to the Treasury. No provision has been made in the OMB estimates to reflect the impact on HUD outlays of the cost of financing this loss in future years.

BUDGET APPEALS

HOUSING

Topic:

Housing Counseling Assistance.

HUD Request:

The Department proposed a program level of $5 million for 1983 to fund cost-effective default counseling.

OMB Mark:

Terminate the program after 1982 because of budget constraints and because of the availability of local funding.

Impact:

This program has been repeatedly proven to be cost-effective in preventing FHA insurance claims. Failure to fund the program will mean higher outlays.

The argument that localities will pick up the shortfall in Federal funding ignores the fact that they already provide considerable support for counseling programs—and that the greatest interest in preventing defaults and FHA insurance claims lies not with local governments but with the Federal Treasury.

The program is politically very popular with Congress and there is little likelihood that the proposed cut will be enacted.

OMB Mark:

Rescind the authority provided for both Section 202 and Section 106 and terminate both programs.

Sell all Section 202 loans in the HUD portfolio with coupon rates above 6 percent.

Impact:

The political fallout of making this proposal in an election year will be astronomical. There will be no outlay savings from killing the Section 202 program until 1985 at the earliest, but the cost of even making this suggestion will be felt—and felt strongly—in November of 1982.

Section 202 loans are not insured by HUD, and there is simply no way of predicting what the proceeds of the proposed sale may be. However, it is safe to assume that these loans will only sell at a substantial discount and loss to the Treasury. No provision has been made in the OMB estimates to reflect the impact on HUD outlays of the cost of financing this loss in future years.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, one item has been brought to my attention that can be transacted, I believe, this evening. Our executive calendar shows that the nomination of Charles Timothy Hagel, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs is cleared. May I inquire of the minority leader if that is cleared on his side?

Mr. ROBERT C. BYRD. Mr. President, that item on the executive calendar has been cleared on this side.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session at this time for the purpose of considering that nomination.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

VETERANS' ADMINISTRATION

The legislative clerk read the nomination of Charles Timothy Hagel, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I yield the floor, Mr. President.

40 YEARS AND COUNTING

Mr. MATHIAS. Mr. President, as we all know, today is the 40th anniversary of the attack on Pearl Harbor. This historic and tragic event is the subject of an editorial in today's issue of the Christian Science Monitor, an editorial entitled "40 Years and Counting." The editors of the Christian Science Monitor comment that if the people devote themselves as singlemindedly to winning the peace as they did 40 years ago to winning the war, then the great-great-grandchildren of World War II veterans will read in their history books that it really was the last one.

This is a challenge to our generation. It is a challenge that I hope we will accept and that we will succeed in meeting.

This editorial is so thoughtful and so challenging that I believe that all Senators will wish to read it. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

40 YEARS AND COUNTING

It is an opportune moment for Americans to pause and take stock. Millions of the new generation will not remember that dark event 40 years ago today when the Japanese struck at Pearl Harbor and plunged the United States into a war in Asia and Europe. But no one can be unmindful of the awesome military power unleashed in World War II and the challenge which the growth of that power poses for humanity.

There is much to be thankful for in this intervening period. By the reckoning of history, forty years is a long time for global peace. In that period the national wounds of war have been healed. Japan—democratic and prosperous—has become a constructive partner of the West. The influence and honor it failed to win by military means, it has won through technological prowess and economic dynamism. Here, surely, is a pointed example for all.

Pearl Harbor drove home the need for a strong national defense. The geopolitical situation that evolved after World War II—with the expansion of the Soviet empire and a communist ideology hostile to the West—only confirmed the truism that the price of freedom is unceasing vigilance. The American people have willingly accepted that price. Yet in 1981 they cannot but flinch as they read that their Congress has approved the largest peacetime military budget in history—$207 billion—and at a time when so much else needs doing.

Indeed the overkill of weaponry worldwide is staggering. The global arms budget of all countries now exceeds $500 billion a year, including about $100 billion for nuclear weapons, according to Ruth Leger Sivard's "World Military and Social Expenditures." This is estimated to equal the entire annual income of the poorest half of the world's population. The nuclear buildup almost defies comprehension. Today the U.S. has some 10,000 atomic warheads and the Soviet Union 8,000—each of which has three times the explosive power of the atomic bomb dropped on Hiroshima. Would a visitor from outer space think the planet Earth had gone berserk?

Ironically, this insane pile-up of weaponry comes at a time when military power seems less and less capable of achieving desired ends. It could not win a war in Vietnam in the face of determined nationalism. It could not prevent a sweeping religious revolution in Iran or be used to rescue American hostages. Nor has it proved an unmitigated boon to the Soviet Union, which is unable to conquer the people of Afghanistan or to put down the popular movement for democracy in Poland. The fact is, it is not arms but political and economic strength and above all moral and spiritual vision which provide true security. Without these, weapons in the end will prove of no value.

Four decades after Pearl Harbor there are signs that mankind is waking up to the dangers. Some countries, to be sure, are striving to get the bomb. But an aroused public conscience, as evidenced in the marches for peace, and especially the resumption of superpower negotiations to tamp down the arms race give hope that the world will draw back from nuclear holocaust and seek peaceful solutions to its problems.

In some Washington quarters it is fashionable to speak of our times as no longer a "postwar" but of a "prewar" period. We are aghast at the thought. It will remain only an idle hypothesis, however, if the American people devote themselves as single-mindedly to winning the peace as they did—40 years ago—to winning the war. Then the great-great-grandchildren of World War II will read in their history books that it really was the last one.

RECESS UNTIL TOMORROW, DECEMBER 8, 1981, AT 10 A.M.

Mr. BAKER. Mr. President, I now renew the observation I had begun earlier. I know of no other business to come before the Senate. If no Senator now seeks recognition, and I see none, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10 a.m. tomorrow.

The motion was agreed to, and at 5:33 p.m., the Senate recessed until Tuesday, December 8, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate December 7, 1981:

THE JUDICIARY

Robert H. Bork, of the District of Columbia, to be U.S. circuit judge for the District of Columbia Circuit vice Carl E. McGowan, retired.

Harold L. Ryan, of Idaho, to be U.S. district judge for the district of Idaho vice Ray McNichols, retired.

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

To be permanent major general

Brig. Gen. Norman G. Delbridge, Jr., [redacted], U.S. Army.

Brig. Gen. Frederic J. Brown, III, [redacted], U.S. Army.

Brig. Gen. Stephen E. Nichols, [redacted], U.S. Army.

Brig. Gen. Francis J. Toner, [redacted], U.S. Army.

Brig. Gen. James R. Henslick, [redacted], U.S. Army.

Brig. Gen. Leo A. Brooks, [redacted], U.S. Army.

Brig. Gen. Richard A. Scholtes, [redacted], U.S. Army.

Brig. Gen. H. Norman Schwarzkopf, [redacted], U.S. Army.

Brig. Gen. Robert M. Joyce, [redacted], U.S. Army.

Brig. Gen. Johnny J. Johnston, [redacted], U.S. Army.

Brig. Gen. Joe S. Owens, [redacted], U.S. Army.

Brig. Gen. Claude M. Kicklighter, [redacted], U.S. Army.

Brig. Gen. John F. Wall, Jr., [redacted], U.S. Army.

Brig. Gen. Victor J. Hugo, Jr., [redacted], U.S. Army.

Brig. Gen. John H. Mitchell, [redacted], U.S. Army.

Brig. Gen. Jerry M. Bunyard, [redacted], U.S. Army.

Brig. Gen. Crosbie E. Saint, [redacted], U.S. Army.

Brig. Gen. James E. Moore, Jr., [redacted], U.S. Army.

Brig. Gen. William G. O'Leksy, [redacted], U.S. Army.

Brig. Gen. Thomas J. Flynn, [redacted], U.S. Army.

Brig. Gen. Robert W. Riscassi, [redacted], U.S. Army.

Brig. Gen. William E. Odom, [redacted], U.S. Army.

Brig. Gen. Henry J. Schumacher, [redacted], U.S. Army.

CONFIRMATION

Executive nomination confirmed by the Senate December 7, 1981:

VETERANS' ADMINISTRATION

Charles Timothy Hagel, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs.

EXTENSIONS OF REMARKS

PERCY L. GREAVES, JR., ON THE DAY OF INFAMY—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. McDONALD. Mr. Speaker, it was 40 years ago today that Japan attacked Pearl Harbor. On December 13, 1966, Percy Greaves had an article on this subject published in National Review. For the benefit of my colleagues and interested historians I submit today, part I of the original manuscript. Mr. Greaves' statement on those who will not give us the truth of Pearl Harbor that he made in that article of 1966 is still germane today:

There is now a new order of things in the land. Big Brother in Washington knows best. He prints the money and calls the tune. He underwrites the history books and hides the facts he does not want us to know.

As chief of the minority staff in the joint congressional investigation of Pearl Harbor, Percy Greaves is in a position to let the American people know who really was to blame for Pearl Harbor. Part I follows:

DAY OF INFAMY

(By Percy L. Greaves, Jr.)

As Pearl Harbor Day—December 7, 1941—fades a quarter of a century into the paragraphs of history, only a small part of our present population can recall how our country was led, step by step, into World War II. Still fewer can remember, as adults, the pre-New Deal America in which government was largely limited to the protection of individuals in their right to enjoy the savings of their ancestors and the fruits of their own labor.

There is now a new order of things in the land. Big Brother in Washington knows best. He prints the money and calls the tune. He underwrites the history books and hides the facts he does not want us to know.

The leader of the New Deal, as the new order was once known, was Franklin Delano Roosevelt, our only four-term President (1933-1945). In his own words, he "built up new instruments of public power." However, in one of his first fireside chats to the nation, May 7, 1933, he did assure us he was "going to be honest at all times with the people of the country."

Later that year, F.D.R. informed us that American foreign policy was "from now on * * * opposed to armed intervention." On his signing of the Neutrality Act, August 31, 1935, we heard, "It is the policy of this Government to avoid being drawn into wars between other Nations."

When running for a second term, he pontificated, "I speak from a long experience—the effective maintenance of American neutrality depends today, as in the past, on the wisdom and determination of whoever at the moment occupy the offices of President and Secretary of State."

The outbreak of a European War in 1939 witnessed no change in his public statements of official neutrality. On January 3, 1940, George Washington's wisdom was recalled with: "The first President of the United States warned us against entangling foreign alliances. The present President of the United States subscribes to and follows that precept."

During the unprecedented third term campaign, we heard on October 23, 1940, "The worst bombshell of fear * * * let loose on this people is the accusation that this Government of ours * * * without the knowledge of the Congress or of the people, has secretly entered into agreements with foreign nations * * * I repeat again that I stand on the Platform of our Party: 'We will not participate in foreign wars and we will not send our army, naval or air forces to fight in foreign lands outside of the Americas except in case of attack.'"

A week later it took the form, "And while I am talking to you mothers and fathers, I give you one more assurance, I have said this before, but I shall say it again, and again, and again. Your boys are not going to be sent into any foreign wars."

Even after the election, peace still had a popular appeal. During a post-Christmas 1940 fireside chat we heard, "There is no demand for sending an American Expeditionary Force outside our own borders. There is no intention by any member of your Government to send such a force. You can therefore, nail any talk about sending armies to Europe as deliberate untruth."

Note just a few of the undeniable facts.

August 15, 1940, American representatives started secret war plan negotiations with representatives of a foreign government at war.

March 27, 1941, American representatives signed a secret agreement that interwove our basic strategic war plans with those of another nation already at war.

April 10, 1941, an American destroyer dropped depth charges on a foreign submarine much nearer its home base than was the destroyer.

May 26, 1941, the United States Navy secretly promulgated to the top Navy Command a Basic War Plan (WPL-46) based on secret agreements previously made with foreign powers, referred to therein as "Associated Powers."

July 7, 1941, American armed forces, which were not to be sent "outside our own borders", landed in Iceland. This was a quick shift from preparations to land on the Azores. The U.S. Navy was soon escorting foreign ships carrying war material across the Atlantic.

August 10, 1941, Britain's Prime Minister, Winston Churchill, at the Atlantic Conference off Argentia, Newfoundland, secretly asked the President to send an ultimatum to Japan.

August 17, 1941, the President cooperated by presenting the Japanese Ambassador with a somewhat weaker version, cabling Churchill the next day: "The statement I made to him was no less vigorous than and was substantially similar to the statement we had discussed."

September 11, 1941, the President announced orders to the Navy to shoot at warships of nations without possessions in the Americas.

November 10, 1941, the U.S. Navy started convoying foreign troops on American ships.

November 26, 1941, the Japanese, forced by unfriendly American actions into an impossible economic situation, were handed a note making further negotiations impossible. Our reading of Japanese codes had informed our officials that it meant "things are automatically going to happen," or as our Secretary of State told our Secretary of War: "It is now in the hands of you and (Secretary of the Navy) Knox—the Army and the Navy."

After the Pearl Harbor attack, Americans were told that it had come without any warning. The official story has been that it was a surprise attack that forced us into war against our wishes.

For years the charges that Roosevelt lied us into war were vehemently denied. In 1948, the great historian, Charles A. Beard, presented a preliminary case for the truth in "President Roosevelt and the Coming of the War, 1941—A Study of Appearances and Realities." He was immediately reviled.

In an article in the August issue of the Atlantic, he was accused of being "the darling of the McCormick-Patterson axis * * * the most indecent of Beard's numerous innuendoes in his book are those respecting the Roberts Commission. Mr. Stimson suggested Justice Roberts to head the Pearl Harbor Commission * * * Beard insinuates that Justice Roberts' appointment was part of a triple play to put Kimmel and Short 'out' and conceal the iniquities of F.D.R. and Stimson in a cloud of dust."

These were the words of the court historian, Samuel Eliot Morison. In 1942, Professor Morison was drafted from Harvard by President Roosevelt and placed on the public payroll as a Navy officer to write the official "History of United States Naval Operations in World War II" (15 vols.).

Whereas Beard, searching for the truth, was not permitted to see the papers he considered pertinent, Morison, writing the official line, had no such problem. In the words of the Secretary of the Navy, "All naval activities, afloat and ashore, were directed to make available to Captain Morison such records as he might desire to consult."

Actually, the facts conform Beard's innuendo. Mr. Stimson bears a heavy responsibility not only for the Pearl Harbor disaster, but also for the Roberts Report which tried to make Admiral Kimmel and General Short the scapegoats for responsibilities that rightly rested on those in Washington, including Mr. Stimson himself.

Mr. Stimson not only suggested Justice Roberts, a pre-Pearl Harbor advocate of "Aiding the Allies," as top investigator, but he also suggested the two Army members. This gave him a majority of the five-man Presidential Commission. In writing his suggestions to F.D.R., he added: "Marshall and I united on all the foregoing suggestions after very careful consideration by each of us."

One of Mr. Stimson's nominees was Joseph T. McNarney, a recently promoted Brigadier General and right hand of Chief of Staff George C. Marshall. Officially, the appointment was suggested to give the Commission an air expert. It was also hinted that the General was not personally suspect as he was out of Washington at the time of the attack.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

In fact, General McNarney, as a Colonel, had acted as General Marshall's junior representative when signing the March 27, 1941, secret military agreements with the British. Two of his superiors, the Chiefs of War Plans and Military Intelligence, as aides of Marshall, were heavily involved with Pearl Harbor responsibilities. At the time of the attack, General McNarney was actually in London participating in further secret negotiations.

The other Stimson nominee was Major General Frank R. McCoy, an aide, friend and coconspirator of Mr. Stimson's for more than thirty years. Back in 1911-1912, Mr. Stimson, as President Taft's Secretary of War, became involved in a controversy with Congressional leaders. Major McCoy, then his aide, helped him draft a Presidential veto which divided his Party but helped Mr. Stimson defeat the Congressional leaders.

In 1931-1932, Mr. Stimson, as Secretary of State, was unable to sell his anti-Japanese ideas to President Hoover. He then turned to the League of Nations, of which we were not a member. He persuaded the League to investigate Japan's actions in Manchuria and to appoint General McCoy on the investigating committee. General McCoy sold Mr. Stimson's ideas to the committee and the League with the result that Japan withdrew from the League.

Before the Roberts Commission left for Pearl Harbor, Mr. Stimson invited General McCoy to spend an evening at his home. The invitation was repeated upon the Commission's return. It should also be noted that another protege of Mr. Stimson's, Felix Frankfurter, his 1906 assistant, invited both Justice Roberts and Secretary Stimson to his home for a private dinner and quiet evening during the period the Roberts Report was being drafted. So perhaps it is no wonder that Mr. Stimson later wrote in his dairy that he had informed Marshall that he thought the Roberts Report took both of them off the hook.

A well "well done" for Messrs. Roberts, McNarney and McCoy.

Incidentally, one of the Commission's Navy members, Admiral Standley, later publicly rebuked Justice Roberts and the War Department. Among other things, he wrote: "I knew from first-hand experience the shortcomings of our base at Pearl Harbor, for which Short and Kimmel were in no way responsible. From the beginning of our investigation, I held a firm belief that the real responsibility * * * was lodged thousands of miles from the Territory of Hawaii."

Court historian Morison has long believed that Roosevelt's New Deal "saved the capitalist system in the United States and democratic government as well." In his latest paean to his patron, "The Two-Ocean War," the now retired Rear Admiral praises F.D.R.'s foresight in leading this country into World War II by secret steps taken ahead of the public opinion he later led so skillfully to the goal he publicly denied—War.

Morison presents the events preceding Pearl Harbor in an abbreviated and slanted version, now the official one: that Japan invaded Manchuria and China and the American people had a duty to prevent any Nipponese expansion in Asia, whether they wanted to or not. His chapter, "Disaster at Pearl Harbor" presents one-sided sections on the "Last Days of 'Peace' in the Pacific" and "The Unsuspecting Victim." The fourth and final section, "Who Was Responsible?" gives a grotesque glimmering of the facts that were available to the court historian.

Not satisfied with his own travesties on total truth, the retired Admiral tells us: "The best book by far on the question of why we were surprised at Pearl Harbor is Roberta Wohlstetter's 'Pearl Harbor: Warning and Decision.'" A first reading of this book revealed more than 100 factual errors. It raised other questions which, if properly researched, would undoubtedly unearth still more errors, not to mention the acceptance of sentiments more in keeping with Administration releases than the obscured realities.

Some of Mrs. Wohlstetter's errors are trivial, such as footnotes that do not check. Others are ridiculous, such as her "Note on Rank." She wrongly accuses the Navy of having a monopoly on the double standard of "temporary" and "permanent" ranks. She evidently did not know that both General Short and Admiral Kimmel, had higher "temporary" ranks on December 7, 1941, than the "permanent" two-star ones on which their later retirement pay was based.

As the person probably more familiar with the Pearl Harbor record than any other living person, the writer appreciates the tremendous task that Mrs. Wohlstetter faced. The record is voluminous. The printed works of the Joint Congressional Committee ran to 44 volumes. Like many others, she overlooks four volumes—three State Department tomes and Ambassador Grew's "Ten Years in Japan," which were part of the Committee's official record. In addition, there are also the Departmental documents and histories, the official papers of other countries, including those of the defeated nations, the books written by participants and other authors, and the myriads of magazine articles, newspaper stories and personal interviews which have added a tremendous amount of fodder to the silo of available information about Pearl Harbor. There is still much more that is being suppressed for political reasons.

Mrs. Wohlstetter completely ignores "revisionists," those historians seeking to reveal truths the political powers prefer to keep hidden. Nevertheless, her well-subsidized volume won rave reviews across the nation and in the American Historical Review. Columbia University awarded her the $4,000 Bancroft prize, apparently accepting Admiral Morison's accolade that, "she is cognizant of all the intricate details of the codes, has made a thorough study of all extant sources, and uses them with the perception of a well-trained mind. Her book ought finally to dispose of some of the nonsense about Pearl Harbor that has been written."

Unfortunately, the book probably contains as much nonsense about Pearl Harbor as any that has ever been written.

Mrs. Wohlstetter concentrated on the Intelligence phase of the episode. She thus devoted considerable attention to the message of the two services and the information Washington gained from reading Japanese codes. These messages played a major role in the last months, days, hours and minutes preceding the disaster. If she had done a thorough and objective job her book would have been a very valuable contribution. Unfortunately, she misfired and joined the union of "court historians."

In a volume dealing with communications, particularly Naval communications, you would expect accuracy in reporting the filing time mentioned in each such message. This is particularly so since the top official Naval historian gave the book such a boost. Unfortunately, she never learned the Navy's time system.

Every Navy message states its date and time in six digits—the first two represent the day of the month, the second two the hour of the day, and the last two the minutes of the hour. For example, one of the key messages was number 242005. Mrs. Wohlstetter writes, "The digits 242005 mean November 24, 20:05, which is 8:05 p.m. Washington time."

If she had read the Congressional Hearings through Volume 33 to page 1150, she would have noted, "For communication within the Navy, Greenwich civil time (GCT) is used in headings of messages." If she had read the Hearings at all thoroughly she would have learned that Washington's time is Plus 5, i.e. five hours earlier than Greenwich Time. So this message was actually sent at 3:05 in the afternoon, Washington time.

How valuable is a book on pre-attack intelligence that is five hours off in the timing of all Naval communications? How authoritative is a Naval historian who thinks such a book the best on the subject?

Another serious error is Mrs. Wohlstetter's statement, "No one knew who possessed the final command responsibility for defense of the Hawaiian Islands in the event of an enemy attack." It was clearly understood by all concerned at the time, and in all the investigations, that Pearl Harbor was the responsibility of the Army in general and of the Chief of Staff, General George C. Marshall, in particular. His agent on the scene was Lt. Gen. Walter C. Short. General Short took orders from and reported to no one else but George C. Marshall. What he lacked in materiel, orders, intelligence (information) and proper alert status was the responsibility of none other than General George C. Marshall. This will be discussed later.

Mrs. Wohlstetter also states, "The [Japanese] Pearl Harbor task force was under orders to return up to 24 hours before D-Day if anything favorable developed in the U.S.-Japanese negotiations." Actually, while this Task Force had orders to return to Japan if detected by any foreign forces up to 24 hours before D-Day, it could have been recalled up to the time the planes left the decks, if anything favorable had developed in the United States-Japanese negotiations.

One could go on and on for a hundred more blunders. The facts were just too much for Mrs. Wohlstetter. Someday, someone, or some foundation should underwrite an objective study of the Pearl Harbor disaster. Until that day comes, Americans who want to know the truth must rely on the writings of impecunious "revisionists" hacking away at the well-financed writings of the "court historians" and official publications.

In his own book, Admiral Morison ignores the contributions of "revisionists" while finding the writings of the Administration's apologists "especially valuable." He does, however, mention "The Great Sea War," by the late Admiral Chester W. Nimitz and E. B. Potter of the U.S. Naval Academy staff. Perhaps he did not notice that this semi-official volume states:

By December 6 it was known in Washington that the Japanese were sending to their Washington embassy a message for the U.S. State Department breaking off diplomatic relations, the sort of message that in times past had been followed up with a surprise attack on the opposing fleet. It was known too that Japanese diplomats in London, Hong Kong, Singapore, Batavia, Manila,

and Washington were burning their secret documents and codes—usually done only when war is imminent.

Thus by Saturday afternoon there was every reason to believe that war with Japan was only hours away. Then between 0400 and 0600 on Sunday, December 7, the U.S. Navy Department deciphered instructions to the Japanese ambassadors to deliver their message at 1 p.m. One o'clock in the afternoon in Washington would be 7:30 a.m. at Pearl Harbor.

However, Admiral Morison does admit that the "'short of war' was not so very short for the Atlantic Fleet * * *. These officers and men were enduring all the danger and hardships of war; yet it was not called war. They were forbidden to talk of their experiences ashore, or even to tell where they had been or what they were doing." He also admits that our economic measures against Japan were taken with the cooperation of the British and the Dutch, and that "The fundamental reason for America's going to war with Japan was our insistence on the integrity of China."●

OUTRAGEOUS SOVIET HARASSMENT AND THREATS AGAINST ANDREI SAKHAROV CONTINUE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. PORTER. Mr. Speaker, Andrei Sakharov, the noted Nobel Peace Prize winner and Soviet dissident, and his wife, Yelena Bonner, are staging a hunger strike to persuade authorities to let their daughter-in-law emigrate to the United States.

Sakharov was exiled from his home in Moscow 22 months ago to the industrial city of Gorky, which is closed to foreigners. He and his wife now live under 24-hour guard.

Sakharov's stepson, Aleksei Semyonov, Bonner's son by an earlier marriage, emigrated 4 years ago and is currently a graduate student in mathematics at Brandeis University. He married Yelizaveta Alekseyeva last summer in a proxy ceremony in Montana that the Soviets do not recognize.

Dr. Sakharov has said that the Soviets are preventing his daughter-in-law from leaving as a form of revenge and pressure to curb his public activities.

In addition to Dr. Sakharov's original open letter to scientists in the West describing plans for the hunger strike, he has since charged that the KGB has threatened to kill him and use the fast as a cover.

Mr. Speaker, this violation of human rights is another Soviet outrage. We must continue to speak out against the Soviet Union's blatant disregard for the Final Act of the Conference on Security and Cooperation in Europe.●

LEGISLATION TO REQUIRE POSTING OF AUTO CRASH TEST RESULTS

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. BEILENSON. Mr. Speaker, today I am introducing a bill which would provide automobile crash safety information to consumers shopping for new cars. My bill would require auto manufacturers to post crash test results on a window sticker on each new car. Consumers would then have information about crashworthiness, in addition to fuel economy and list price, as they examine new car models in their dealers' showrooms. I think this will encourage auto manufacturers to compete for safer designs while continuing to achieve improvements in fuel economy.

Consumer surveys done for the National Highway Traffic Safety Administration (NHTSA) have shown that, although there is a strong trend toward smaller, lighter cars because of their better fuel economy, consumers are aware of the greater risk of severe injury or death that small-car riders may suffer in an accident. The survey results show that car purchasers want data on the comparative safety of the various car models, and would be willing to pay a higher purchase price for a safer car. The widespread attention paid by the media to the Government's crash test results, and the very strong consumer demand for NHTSA's "Car Book" which contains comparative listing of the test results, are evidence that consumers want and need this information.

However, currently many prospective purchasers do not have comparative crashworthiness data available to them at the time they are deciding which car to buy. Clearly the best way to call attention to the test results would be to post the information on a sticker on each new car window, in the same way fuel economy and list price information is now posted. The stickers would mention that booklets are available from each new car dealer listing the ratings for all new cars in a comparative format.

Under this bill, each new car manufacturer would test its own cars, under criteria established by NHTSA, and certify the result to NHTSA. Manufacturers would be free to test their cars at speeds greater than the 30-mile-per-hour standard—already established under Federal Motor Vehicle Safety Standard No. 208—and post the highest speed at which the car passed the test criteria. Thus, consumers would have the information needed to choose a car which provided an extra margin of safety—and manufacturers would have the incentive to compete for sales to safety-conscious purchasers.

There is evidence that, when manufacturers are faced with a poor crash test result, they can sometime make inexpensive changes resulting in significant improvements in their results. For example the Honda Civic, which failed the 1980 test, easily passed in 1981 after several relatively simple changes were made.

I am convinced that this bill will help the operation of the competitive free market. Consumers need information to make informed choices, and the automakers need the incentive to produce safer cars. I suspect that when the automakers begin to compete for safer designs, we will see far more progress than Government regulations could ever produce.●

INTERIOR SECRETARY JAMES WATT—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. McDONALD. Mr. Speaker, the second part of Lee Edwards' article on Secretary James Watt, which appeared in the October 1981 issue of Conservative Digest, discusses what the Secretary and the Interior Department are actually doing compared to what they are reported to be doing. I commend this second of two parts to the attention of my colleagues:

SECRETARY WATT—PART II

The rhetoric usually gets hot and heavy when you start talking about Jim Watt, but here is one writer's attempt to take a calm look at the charges made against Watt and then at what he and the Interior Department are actually doing.

Environmentalists and others claim that Watt plans to overturn laws that protect the environment.

In fact, Interior is carrying out environmental laws, including the Surface Mining Act of 1977, which will improve state efforts to meet environmental protection standards. Furthermore, Watt has said that it is industry's responsibility not only to observe the rules but to search for new and better ways to "protect the environment."

The Secretary describes himself as a "conservative," and as a conservative, he is dedicated to the "conservation" of America's natural beauty and resources.

Gov. Jerry Brown of California and others charge that Watt has ordered the lease of land off the coast of northern California for oil and gas exploration despite the state's opposition.

First, Watt has not "ordered" anything. He has requested that such a leasing action be considered, with a final decision to be made only after full and fair examination.

Second, Governor Brown himself, within the last 90 days, has approved oil and gas applications to drill off the coast of northern California, near Santa Barbara. And the California State Senate overwhelmingly re-

jected a motion to prohibit the offshore leasing of northern California tracts.

It has been charged that Watt will allow oil and gas drilling and logging in national parks, wilderness areas and wildlife refuges.

In May, Watt told a House Interior Subcommittee that the Department "has never intended to change, nor will it ask Congress to change, the law in order to allow drilling for oil or gas, hardrock mining or logging in the national parks." Only hunting and fishing are permitted within the specific areas outlined by Congress in national parks.

The National Wildlife Refuge System is closed to oil and gas leasing and exploration except where it can be shown that the refuge lands are subject to drainage by operations on nearby lands. The Arctic National Wildlife Refuge is closed to oil and gas activity pending authorization by Congress.

Furthermore, the policy of the Fish and Wildlife Service is not to lease for minerals such as coal, potassium and sodium in refuge areas. All refuges are now closed to mining of hardrock minerals.

It has been reported that Watt has compiled a "hit list" of national parks and refuges.

The Secretary is not interested in getting rid of national parks and refuges but in managing them better for the welfare of the public. In fact, he has requested a 225 percent increase in park funds to improve the condition of the national parklands.

It is asserted that Watt doesn't like the outdoors.

This charge can best be answered, I think, by quoting the man himself in a recent speech:

"With my family or with friends, I have fished the creeks and streams and lakes of Wyoming. I have fished for bass in Louisiana, salmon off the coast of the Pacific Northwest, flounder in the Chesapeake, marlin in the seas off American Samoa and bottom fish in the Red Sea. . . .

"My son and I lifted our canoe onto our old station wagon on many weekends so we could paddle through the backwaters of the Chesapeake and the waters of Colorado. . . . I have enjoyed . . . snorkeling off the Florida Keys and water skiing and sailing on the manmade lakes of Colorado and Wyoming, floating the Snake and Platte in Wyoming, the Colorado in Arizona and the New River in West Virginia.

"My son and I went trail biking near the Canyonlands National Park. . . . After our first night out in the early spring, we awakened to find 12 inches of snow covering our tents and motor bikes. Getting out of that area reminded me of our snowmobile trip in the Wind River mountains along the Continental Divide in Wyoming. As we stood on our snowmobiles atop those mighty and majestic mountains, we could see how those very snow packs would melt and flow to the Pacific Ocean, the Gulf of Mexico and the Gulf of California. The beauty of God's creation is captivating."

That may not be vintage Thomas Wolfe, but it's moving prose for a Secretary of the Interior.

It has been charged that Watt has ordered Interior to design its policies so as to help the U.S. minerals industry.

First of all, that is illegal. If true, Jim Watt and anyone else cooperating in such a policy would be sent to jail.

Second, it is an undeniable fact that the United States has been growing more and more dependent on foreign sources for minerals and materials vital to the nation's economy and security.

For example, we import 100 percent of our manganese and cobalt, both vital to the production of steel. Interior estimates that of the 62 basic materials stockpiled, only 21 meet national security quantity requirements. And of these 21, many are of poor quality, "making them unusable in the event of a minerals crisis."

Consequently, Watt has ordered a comprehensive review of our strategic minerals stockpile. He is following not just his own dictates but the mandates established by Congress in 1970 and 1980 to "encourage" the development of the nation's domestic minerals.

It is claimed that Watt has pushed for budget cuts as a "back-door" way to eliminate the Endangered Species Program.

Consistent with the Reagan administration's budget cuts, the Endangered Species Program has been trimmed, but not eliminated. Watt has ordered his department to implement the Endangered Species Act, believing that preventing the extinction of wildlife and plants is important.

How conscientious is he? Consider for example, kangaroos.

In 1974, eastern gray, western gray and red kangaroos were listed as "threatened species." At the same time, the United States placed a ban on the import of kangaroos and their parts and products until Australia demonstrated "adequate management plans" for kangaroos.

In 1979, Australian states submitted plans for the three kangaroos. Interior biologists were not satisfied. In March 1980, the Fish and Wildlife Service sent a specialist to personally investigate the various Australian kangaroo management plans.

Dr. David R. Anderson found that the kangaroos were abundant and the management plans adequate. In June, officials of the Fish and Wildlife Service recommended removing the import ban. Responding to public interest, the service extended the comment period to October 1, 1980, and held a public hearing in Washington, D.C.

It was decided that the data received was not sufficient to warrant any change in the recommendation, and on April 29, 1981, the Fish and Wildlife Service published a final rule permitting the import of kanagaroos and kangaroo products. The final rule became effective May 29, 1981, nearly 6½ years after the original listing and five full months into the administration of Jim Watt, who allegedly does not give a hoot about animals, four-legged or otherwise.

It is asserted that Watt's five-year offshore leasing program leases too much offshore area, ignores environmental laws and regulations and usurps all powers of the coastal states.

First of all, we are not talking about leasing 1 billion acres of offshore land to any "robber barons" of the oil and gas industry. Industry will be interested in or will offer bids for only a very small percentage of the 875 million acres (not 1 billion) included in the proposed program. In the past, over any one-year period, the largest area for which bids were made was 1.7 million acres.

Second, Watt has pledged that he will continue to implement all environmental laws and regulations that protect the Outer Continental Shelf. He has said that he does not favor, nor does he plan to propose, any major amendments to existing standards and practices for managing the offshore oil and gas program.

Third, Watt has promised that Interior will continue to consult with the states and comply with all state advisory requirements. There is no plan to revise Interior policies calling for "extensive state input concerning leasing proposals." And besides that, all of the coastal states, including California, badly need the added tax revenues which would flow from oil and gas leases.

As can be seen from this brief review, the charge and the fear that Jim Watt is going to "rape and ruin" America the Beautiful are without foundation. Yes, he is determined to make policy changes, and to redress an imbalance which had developed in the Interior Department over some 20 years. As he told Conservative Digest, environmentalists will no longer receive the preferential treatment they were given in the past.

Watt believes that the land belongs to all the people, not just the special-interest groups with headquarters in Washington, D.C. As he told the Outdoor Writers of America earlier this year: "Man is a key component in the environmental equation. Too often in the recent past, there has been a strong tendency to write people out of the equation. This administration begins with the motion that all Americans have a right to enjoy and benefit from their natural heritage."

To suggest that Jim Watt does not care about the land is to misunderstand the man badly. He sees his role as that of a good steward who has a solemn responsibility "to turn over the lands to future generations in better condition than when I found them."

His roots are deep in the soil of Wyoming, "windy and cold in the winter, hot and still in the summer," as the Los Angeles Times put it. "You are closer to the frontier here than many people realize," a rancher told a reporter.

A phrase often heard in the state is, "Wyoming is what America was." Jim Watt came back to Washington and the Interior Department to help Ronald Reagan reinstill the frontier spirit in all America.●

ANDREI SAKHAROV'S HUNGER STRIKE

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. CARMAN. Mr. Speaker, the Washington Post editorial that follows describes the awful tragedy of a man whose country has betrayed him. A hunger strike is always a striking demonstration of human will, but when one of the great men of our generation chooses this road because his country leaves no other avenues open to him, his actions should evoke far more than just our passing sympathy:

[From the Washington Post, Dec. 1, 1981]

TRAGEDY IN THE MAKING

Andrei Sakharov refuses to be silenced. Despite everything the Kremlin has done to isolate him, intimidate him and break his spirit, he fights back. His weapons—eloquence, courage and a worldwide reputation as a champion of human rights—are proving difficult for the Soviet authorities to parry. But this unequal struggle, which has escalated steadily since Dr. Sakharov was sent into internal exile two years ago, entered a new phase last week that could quickly end in a senseless tragedy.

Dr. Sakharov, feeling that he has little else left to lose, embarked on a hunger strike nearly two weeks ago. He is protesting the authorities' refusal to allow his stepson's fiancée to leave the Soviet Union and join the man she married last year by proxy. Her detention, Dr. Sakharov feels, is "undisguised blackmail against me." She is, he says, "a hostage of the state," detained so that his hope for her eventual release will keep him from being too troublesome. He is probable right. But he is also an aging man, and reportedly not in good health. His fast will not last very long.

The Kremlin's decision to exile Dr. Sakharov to the closed city of Gorky, only 250 miles from Moscow, was a halfway step that never promised to last for very long. Dr. Sakharov's stature, inside and outside the Soviet Union, as a great physicist. Nobel Peace Prize winner and intellectual leader, as well as the country's leading dissident, apparently protected him from the harsher fate—prison, labor camp, incarceration in a mental hospital—that has befallen hundreds of those who followed his lead.

But Dr. Sakharov has refused to accept a comfortable silencing. He savagely criticized the invasion of Afghanistan and smuggles out messages that are heard everywhere. Gradually conditions have been tightened so that now his apartment is guarded constantly. Friends and family—excepting his wife—may not visit. He has been beaten by KGB thugs and threatened with psychiatric commitment or sanctions against his wife. He may not use a telephone. His apartment is regularly searched and ransacked. Though he no longer works on classified matters (his security clearance was lifted in 1968), he is now even prevented from trying to keep up with physics. Last spring a smuggled message reported that the KGB had removed his scientific notebooks and manuscripts in "a new attempt to deprive me of any opportunity for intellectual activity, even in my solitude, and to rob me of my memory."

Where this confrontation will end no one can predict. Perhaps the Kremlin will finally realize that internal exile has only amplified Dr. Sakharov's voice and will decide at last to send him and his family out of the country. As the world rightly focuses on his gallant struggle, he would be the first to point out that there are hundreds of others in Soviet prisons, without the protection of a famous name and reputation, whose crime, like his, was to try to get the Soviet government to permit its citizens a measure of intellectual and personal freedom.●

NUCLEAR ARMS BUILDUP

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. WEAVER. Mr. Speaker, last week I received the following resolution from a distinguished group of Oregon churchmen, the Bishops and Executives Forum. The message is clear: Stop the insanity of nuclear arms buildup, here and abroad, and divert those desperately needed moneys away from arms and toward real human needs. The text and names of the signers of the resolution follows:

A STATEMENT OF CONCERN

1. We believe that human beings are created in the image and likeness of God, and derive their inherent dignity and worth from that relationship. We believe that the physical universe was created for the good of all human beings who are destined to live within it.

We believe that individuals and nations have responsibilities to and for each other and a genuine concern for the world in which they live.

Among these are:

a. Respect for human life;

b. Respect for human relationships;

c. Respect for the world of nature.

2. As bishops and religious executives—as persons of faith—who have been entrusted with pastoral responsibilities toward considerable numbers of people, and who are accountable to them, we cannot remain silent on the disturbing and distressing question of the nuclear arms race which is becoming more widespread and proliferating wildly every day. Accordingly, we voice these very real anxieties:

a. We are concerned about the number of nuclear weapons presently existing among the nations of the world.

b. We are concerned about the growing opinion in our nation which accepts the inevitability of the use of nuclear weapons, whether in limited, tactical, retaliatory, or first strike situations.

c. We are concerned that the present arms race involves an unending search for new and even more destructive weapons, inevitably blunting our sensitivity to the value of human life and the regard we should have for our environment.

d. We are concerned that an intensified arms race will not only increase the number of such weapons, but weaken the resolve of nations to seek peace through avenues other than war.

e. We are full of shame that billions upon billions of dollars are being expended by our nation and by other nations to build up our nuclear arsenals, when that money is needed by the poor of the world.

3. Therefore:

A. We urgently request the President and the Congress of the United States to begin immediately to conduct negotiations with Russia and other nations leading to:

(1) An immediate halt to the development and manufacture of nuclear weapons;

(2) A plan whereby a phased nuclear disarmament may be agreed upon by all nations, leading to the total removal of all such weapons by the year 2000.

(3) A transfer of funds from development and construction of weapons of total destruction to research and development of means to improve the human conditions of peoples throughout the world.

B. We urge the congregations and institutions for which we have pastoral care and responsibility:

(1) Prayerfully to consider these concerns in the spirit of Jesus, Prince of Peace.

(2) To designate the first Sunday in Advent as Peace Sunday.

(3) To communicate with the President and Congress of the United States the concerns we all have with regard to nuclear war and the futility of surrounding ourselves with nuclear weapons to preserve us from a nuclear holocaust.

(4) To share the vision of peace with all people, everywhere.

The Rev. Dr. Glenn Camper, Executive Minister, American Baptist Churches, 0245 SW Bancroft, Suite G, Portland, OR 97201.

The Rev. Tom Castlen, Synod Executive, United Presbyterian Church, 0245 SW Bancroft, Suite D, Portland, OR 97201.

Bishop Calvin McConnell, United Methodist Church, 1505 SW 18th Ave., Portland, OR 97201.

The Most Rev. Cornelius M. Power, DD, JCD, Archbishop, Roman Catholic Church, 2838 E. Burnside St., Portland, OR 97214.

The Rev. Dr. Mark K. Reid, Regional Minister, Christian Church (Disciples of Christ), 0245 SW Bancroft, Suite F, Portland, OR 97201.

The Rev. Donald Sevetson, Conference Minister, United Church of Christ, 0245 SW Bancroft, Suite E, Portland, OR 97201.

The Rev. Llano G. Thelen, Assistant to the Bishop, Lutheran Church in America, P.O. Box 248, Portland, OR 97201.

The Most Rev. Paul Waldschmidt, Auxiliary Bishop, Roman Catholic Church, 2838 E. Burnside St., Portland, OR 97214.

The Rt. Rev. Matthew Bigliardi, Episcopal Bishop, P.O. Box 467, Lake Oswego, OR 97034.

The Rev. Galen Miller, District Executive, Oregon/Washington District, Church of the Brethren, 12 N. Chelan, Wenatchee, WA 98801.

The Rt. Rev. Rusty Kimsey, Episcopal Bishop of Eastern Oregon, P.O. Box 620, The Dalles, OR 97058.

Elder A. Alex Kahtava, Metropole President, Portland Metropole Center, 4837 NE Couch St., Portland OR 97213.●

FORTIETH ANNIVERSARY OF THE ATTACK ON PEARL HARBOR

HON. DON. H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. CLAUSEN. Mr. Speaker, today is the 40th anniversary of the Japanese surprise attack on Pearl Harbor. As a former naval aviator and veteran of World War II, I will never forget that morning at 7:30 a.m. on December 7, 1941, which President Roosevelt referred to as "a day that will live in infamy."

I believe that this day should be a day of remembrance for the 2,400 citizens of the United States who were killed in action on that fateful morning. This was an attack which touched off a war effort in the Pacific that dramatically changed the balance of power in East Asia and the Pacific for decades to follow.

I believe that this day should be remembered and associated with a surprise attack which destroyed the backbone of the U.S. Pacific Fleet anchored at Pearl Harbor—it took 44 months of battles at sea, in the air and on scores of Pacific islands—at a cost of over 97,000 American lives to end the war in the Pacific. This is a high price to pay for unpreparedness. This must be a lesson to all of America that peace goes well beyond the absence of war—it goes straight to the issue of

eternal vigilance and a national commitment to peace through strength.

Mr. Speaker, Let us all remember that what has made this Nation great is the moral strength and character of our people and our willingness to pull together in times of stress and pressure—to overcome adversity no matter what the odds are. This is the lesson which makes me proud to be an American.

Thank you.●

FTC RULE ON USED CAR INSPECTION BY DEALERS

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. LEE. Mr. Speaker, on September 11, 1980, I introduced House Concurrent Resolution 178 which would disapprove the Federal Trade Commission's rule relating to the sale of used motor vehicles. Since that time there has been little discussion of the merits of this issue outside of the Congress, but there has been a good deal of discussion by various segments of the media regarding past campaign support by the Nation's automobile dealers to Members of Congress who have voiced support for my resolution. For this reason I feel that it is appropriate for me to address the substance of this issue in more detail and to explain why I am supporting the disapproval of this resolution under procedures established by law in 1980.

It should be noted at the outset that both the House and Senate Committees on Commerce, as well as numerous individual Members of Congress, have expressed concern over several of the proposals that the Commission had planned to issue over the past several years. The basis of this concern was that the Commission had ignored the letter of the law and the clear congressional intent in this matter. It seemed as if the Commission was determined to issue the rule that it wanted to issue despite repeated warnings from Congress. Finally, in the 96th Congress, the House and the Senate were forced to address the matter in formal legislation; and in the Federal Trade Commission Improvements Act of 1979, emphatically told the Commission that existing law prohibited it from issuing a rule which required an inspection of a used motor vehicle prior to its sale. It is rare that Congress is forced to repeat its warnings to a regulatory Commission.

On August 14, 1981, the Commission issued its final rule in this matter. A failure to comply with any of the provisions of this regulation subjects a small business dealer to fines of up to $10,000 per violation. The rule contains three major provisions:

First, the rule prohibits any dealer from affirmatively misrepresenting the mechanical condition of a used motor vehicle; that is, to represent that any component or system of a used car is in good order when the dealer knows that it is not in good order;

Second, the rule requires dealers to make available to the consumer clear and concise information regarding any warranty on the vehicle and to conspicuously disclose to the consumer that the car is being sold without any warranty coverage when such is the case; and

Third, the rule requires dealers to inform the consumer of specific defects in the car if he has reason to conclude that there is a condition in the vehicle which could be caused by 1 of 52 listed defects.

The first two provisions of this rule are not objectionable and in my opinion should be included in any used-car rule issued by the Commission. As a matter of fact, these two provisions would resolve the two major problems in the used car area which have been identified by the Commission through its many hearings on this matter. This was confirmed by Federal Trade Commissioner Patricia Bailey when she testified on this matter before the House Subcommittee on Commerce, Tourism, and Transportation on December 2, 1981. In that hearing she stated:

> The record shows that the two major problems most frequently complained about and which are apparently the most widespread in the industry are a dealer's oral misrepresentations about a car's mechanical condition at the time of sale and lack of information about warranty coverage or misrepresentation about the dealer's responsibility to repair a car.

The first two provisions in the regulation alluded to above specifically address these problem areas and would solve the "two major problems most frequently complained about and which are apparently the most widespread in the industry."

Despite this, the Commission included another provision in their regulation which gives me a great deal of concern and which was unnecessary to resolve the "two major problems" in the used car area. This provision is the defect notification provision. I am opposed to this provision for a number of reasons, any one of which is grounds for a congressional disapproval.

First, the defect notification provisions are so ambiguous and poorly drafted that experienced attorneys cannot agree exactly what obligations the dealer is required to comply with. We must remember that the regulation is not directed at large multinational corporations with huge legal staffs. This regulation deals with the individual small business automobile dealer who in most cases has no legal education or experience in law.

Second, consequently, I am absolutely convinced that the dealers would be forced to conduct an inspection of their used cars to identify specific defects in order to protect themselves from penalties of up to $10,000 per vehicle. This is the same concern expressed by dealers at both the House and Senate hearings on this matter. Congress has specifically prohibited the Commission from either directly or indirectly requiring inspections of used vehicles prior to sale.

Third, there were estimates given by dealers before both the House and Senate Committees that such inspections would cost approximately $150 per vehicle, thereby increasing the price of used cars for both consumers and dealers at a time when neither can afford such increases.

Fourth, the rule regulates only one half of the used car market and leaves the other one half of the market totally unregulated. The regulation applies only to dealers and they account for only 50 percent of the used cars sold in the United States annually. Therefore, in reality, the Commission has created an artificial competitive disadvantage to the dealer at the worse possible time and again discriminated against the business sector.

As everyone is fully aware, the automobile industry in this Nation is in the midst of a deep and severe depression. Domestic sales for 1980 were the lowest since 1963, while domestic production was the lowest since 1961. To date in 1981, sales levels are equally as low and there are some indications that they may slip even lower. As far as the small business dealer is concerned, the attrition rate is staggering. Over 2,600 franchised new car dealers have closed their doors in the past 24 months, and over 125,000 dealer employees have lost their jobs. In addition, there are hundreds of small business dealers that are, in effect, hanging on by their fingernails. Many of these dealers are staying in business because of their used car sales, and would be forced to close their doors if these sales started to falter. It is apparent that the Commission's action in this matter demonstrates a total insensitivity to the economy in today's real world and to the plight of the retail automobile dealer by including a provision which by the Commission's own findings is not even necessary to solve "the two major problems" in the used car industry.

I would like to note one additional point of extreme and critical importance in this whole matter. There is a good deal of misunderstanding about what happens to the Commission's authority to regulate in the area of used car sales should the Congress veto this badly drafted and poorly conceived regulation. The truth of the matter is that the Commission's authority is to-

tally unaffected. Under the law the Commission could issue a rule the very next day without having to conduct any further proceedings. I would assume that the Commission is not going to throw out the baby with the bath and will in fact very soon issue another rule. Should this rule include only the prohibition on misstatement of fact by dealers regarding the mechanical condition of the vehicle and a full warranty disclosure provision which are already written and are included in the present rule, I would give it my full support. I feel certain that my many colleagues in the House who have joined me in support of the resolution of disapproval would also lend their full support.

This, of course, should have been the Commission's rule in the first place. If it had been, we could have avoided all of the unnecessary time and effort spent on this matter by the Congress. A rule of this type would solve what the Commission describes as "the two major problems most frequently complained about and which are apparently the most widespread in the industry," while avoiding severe economic burdens to the individual small business dealer who is today literally struggling for survival.

It is time the FTC and other Federal agencies comply with legislative intent and policy. To do otherwise will only insure legislative vetoes from the peoples representations.●

F. D. R.'s WATERGATE: PEARL HARBOR—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. McDONALD. Mr. Speaker, elsewhere in the RECORD on this date, Mr. Speaker, I have placed for the benefit chiefly of historians, the real story of Pearl Harbor by Percy L. Greaves, Jr. This is yet another exposure of the ultimate disaster that is with us today as a result, not so much of the military attack on Pearl Harbor, but as a result of what provoked the Japanese into that attack. I share with my colleagues today, Part I of "FDR's Watergate": Pearl Harbor—Part I. The article follows:

[From the Reason, February 1979]

F. D. R.'s WATERGATE: PEARL HARBOR

(By Percy L. Greaves, Jr.)

Watergate is now a synonym for political pollution. It symbolizes the corruption inherent in all distended political power. Nixon and his henchmen have been exposed. History will record their infamy. Franklin D. Roosevelt, his New Deal, and his war cabal escaped such exposure. Unfortunately, there are still folks who consider these warmongering corrupters of the free society to be heroes who rescued us from a depression as well as from Hitler's national socialism. As a result, we are still treading further down the national socialist path toward the complete destruction of the economic freedom on which American greatness was built.

Political intervention and corruption certainly predated the New Deal. It was the New Dealers, however, who rewrote the Constitution so as to permit Washington to print unlimited quantities of paper money and issue endless regulations of our daily lives. F.D.R. was not one to admit failure. As each domestic New Deal intervention failed to produce the desired results, he would divert public attention with an announcement of some daring new intervention. With as many unemployed in 1939 as when he took office, he tried a new tack—intervention in international affairs. Like Hitler, F.D.R. decided to divert attention from his domestic failures by blaming some "foreign devils."

The complicities, duplicities and mendacities that took us into World War II are far more complex than those of Watergate. There are some similarities, however. In both cases the President surrounded himself with bright young men who became blind followers of the "great man" as well as some who were infused with a self-righteous lust for improving the world by imposing their ideas on those who did not agree with them. In their view, their leader had all the right answers and the opposition had to be squelched by any means available.

The 1945-46 Hearings before the Joint Committee on the Investigation of the Pearl Harbor Attack, with all its exhibits, ran to 45 volumes. There was much duplication and irrelevant pettifoggery, while officialdom was successful in supressing much that was highly relevant. Files could not be released. Key witnesses got sick and others were kept from appearing. For 30 years now, significant tidbits of pertinent data have emerged in private memoirs and foreign government releases. A full documented story would run to many volumes. Attempts to suppress the full truth would take many more.

It should be noted, however, that the wartime "coverup" was actually legitimate. The U.S. government could not let the Japanese know it was reading their codes. Actually, the Pacific war was largely won with the help of the decoded Japanese messages—their top admiral was thus shot down and U.S. attacks were concentrated on their revealed stray ships and weak spots. With V-J Day, all ligitimate need for any further coverup vanished. Nevertheless, the administration remained adamant in its coverup efforts. With the majority of Congress and the press on its side, the administration was for more successful than Mr. Nixon and his loyal cohorts. There was then no TV to expose to the general public the details and evasions that became evident to the few spectators able to jam the Senate Caucus Room each day.

A short article cannot tell the whole story. It can only present a brief summary of what is now known. That should be sufficient to revise the common misconceptions of this calamity.

RUSSIA AGAINST JAPAN

Like other historical events, the Pearl Harbor story proceeds out of prior events. In this case, we must start with two little considered facts. The first is the long existing rivalry of Japan and Russia for economic dominance, if not total political control, of Manchuria and large areas of China. Russia desired warm water ports in areas capable of helping with her development of Siberia. Japan neded a source of raw materials, a market for her cheap mass-produced goods, and a larger land area for her growing population.

The second is that after 1917 this rivalry became a contest between a basically communist country and a relatively capitalist country. Japan, aping the United States, was being westernized and felt she had a sort of "Monroe Doctrine" over noncommunist Asia. In wars with China (1894-95) and Russia (1904-5), Japan won economic concessions in Manchuria and northern China. She had brought relative prosperity to those areas, while the bulk of China remained plagued with marauding war generals whose plundering activities made industrial development impossible and agricultural production rather risky.

Ever since the Boxer Rebellion (1899-1900), the Western powers had generally recognized that no existing Chinese government was capable of protecting foreign interests in China. The Western powers thus informally protected the lives and property of each other's citizens. Japan considered herself a member of this group. In this atmosphere, the "Commies" stirred up animosities against the capitalist-leaning Japanese. This inevitably led to the Manchurian incident of 1931. Japan sent troops to protect her interests. She fully expected the Western powers to be sympathetic to her cause. Undoubtedly, some Japanese Army hotheads went beyond acceptable standards in their attempts to quell the anti-Japanese and anticapitalistic feelings that the "Commies" had aroused.

STIMSON'S ROLE

At that time the U.S. Secretary of State was Henry L. Stimson, a man with a long and checkered career. He started out as a trustbusting district attorney under Teddy Roosevelt. Later, as Secretary of War under President Taft, he participated in an Army imbroglio. Then, under President Coolidge, he stirred up trouble in Nicaragua before being appointed Commissioner General of the Philippine Islands. At that time, he wrote a relative: "I am Governor General and an Oriental Potentate. All I have to do is express a wish and it is taken as the law of the Medes and Persians."

He considered himself a sort of god-father of the Filipinos. Feeling that they needed protection from Japan, he opposed their freedom from the United States. In 1929 he accepted President Hoover's appointment as Secretary of State, as a means to protect the Philippines and all of Asia from the nation he hated—Japan. When the Manchurian incident development, he asked President Hoover to threaten Japan. The Secretary of War advised that this might mean war. President Hoover felt and stated that this country would not go to war over the Far East.

Secretary Stimson then turned his attention to the League of Nations, to which the U.S. did not belong. He persuaded the League to appoint the Lytton commission to investigate the incident. He then placed one of his lackeys, Frank R. McCoy, on this Commission to dominate it. The Commission found Japan at fault in Manchuria and Stimson persuaded the League to adopt the report. Whereupon Japan, dismayed, walked out of the League. Thus, Mr. Stimson played a key role in opening the breach between Japan and the Western nations.

After the 1932 election of Franklin D. Roosevelt, there was considerable bitterness

between the outgoing and incoming Presidents. Nevertheless, Stimson went to Hyde Park to sell Roosevelt his anti-Japanese policies. On March 4, 1933, Mr. Stimson ostensively retired to private life. He kept his Washington estate, however, visiting it frequently for inimate chats with the anti-Japanese clique he had placed in the State Department. He kept on very friendly terms with the new Secretary of State, Cordell Hull, and had occasional lunches with the President. As late as May 1940, he lunched with F.D.R. to check on his anti-Japanese sympathies.

F. D. R.'S DUPLICITY

About this time, F.D.R. decided that this country and the world could not get along without his continuing leadership. He decided to break the two-term tradition. To win, he sought a unified country. He asked the 1936 Republican Presidential and Vice-Presidential candidates to join his Cabinet. Mr. Landon refused, but Mr. Knox accepted and became F.D.R.'s Secretary of Navy.

While looking for a prominent Republican to replace his antiwar Secretary of War, Mr. Roosevelt read in the New York Times of June 19, 1940, an account of a radio speech given by Mr. Stimson entitled "America's interest in the British Fleet." That afternoon he phoned Mr. Stimson and invited him to join his Cabinet as Secretary of War. Before accepting, Stimson made sure that F.D.R. was in sympathy with his prowar policies. F.D.R. assured him he was. Shortly after Stimson's confirmation, an embargo was put on shipments of aviation gas to Japan. From then on, the United States rushed pell-mell into war, although for some months the voting public was told otherwise.

During the 1940 election campaign Mr. Roosevelt posed as the apostle of peace. Typical of his campaign speeches were such words as these on October 23, 1940: To Republicans and Democrats, to every man, woman and child in the nation, I say this: Your President and your Secretary of State are following the road to peace.

We are arming ourselves not for any foreign war.

We are arming ourselves not for any purpose of conquest or intervention in foreign disputes. I repeat again that I stand on the Platform of our Party:

We will not participate in foreign wars and we will not send our army, naval or air forces to fight in foreign lands outside of the Americas except in case of attack. . . .

It is for peace that I have labored; and it is for peace that I shall labor all the days of my life.

A week later he phrased it: I give you one more assurance. I have said before, but I shall say it AGAIN and AGAIN and AGAIN. Your boys are not going to be sent into any foreign wars.

In closing his campaign, the Saturday before election, he told the electorate: "Your President says this country is not going to war."

Meanwhile, behind closed doors, the British were being assured that help would come after the elections. The Government then operated on a "cash and carry" neutrality basis. The French had fallen and the British were running out of money. Without British orders, millions of Americans would lose their jobs. So in his first press conference after the election, F.D.R. proposed what was later known as Lend Lease. While Congress was debating and passing this legislation, British officers were secretly meeting in Washington with top U.S. military personnel to coordinate war plans. Secret unconstitutional agreements were reached which were later approved and put into effect.

ON OUR WAY

On May 27, 1941, F.D.R. proclaimed an unlimited national emergency. On June 22, Germany invaded Russia and shortly thereafter Lend Lease aid was extended to the U.S.'s newly-acquired "peace-loving" Communist allies. On July 7, the United States occupied Iceland.

After the fall of France, chaos broke out in French Indochina. Worried about her rice supply, Japan requested permission of the Vichy French to occupy that area. On July 21, the powerless French acquiesced. This inflamed Messrs. Hull, Stimson and Roosevelt. On July 25, the United States froze all Japanese assets in the United States and the following day the British followed suit.

That same day, July 26, F.D.R. initiated a new policy for the Far East. He nationalized the Philippine armed forces, and placed General MacArthur in charge of the Far East forces. Up until that time, it had been thought that a war in the Far East meant the loss of the Philippines. With the new four-engine B-17 bombers, however, Washington officials felt the U.S. could not only defend the Philippines against attack, but that it could also initiate a pincer movement against Japan if the Russians would permit American use of Vladivostock or Kamchatka airfields. It was thought that U.S. planes flying across Japan could knock her out in short order. This plan was assigned first call on all available B-17's. As new ones became available they were rushed to the Philippines along with those previously assigned to the Hawaiian Islands.

Alarmed about events, F.D.R. asked Churchill to meet him off Argentia, Newfoundland. The British Prime Minister brought with him an ultimatum which he asked F.D.R. to send Japan. While this was the major subject of the conversations, a "coverup" of such collusion was considered necessary. Upon F.D.R.'s return, the American public was given pictures of Messrs. Churchill and Roosevelt attending church on a battleship and was told the main business was the drafting of the "Atlantic Charter" and the Four Freedoms.

CONGRESS OPPOSED WAR

Official Australian papers now tell us: In private conference, however, Roosevelt indicated to Churchill that because he was uncertain that he could carry Congress with him in a declaration of war, and because more time was needed to strengthen America's forces, he must seek to delay a break with Japan. He nevertheless agreed to issue a warning, also on the lines of a Churchill draft, that any further Japanese encroachment in the south-west Pacific would produce a situation in which the United States would be compelled to take countermeasures, even though these might lead to war. Though Churchill had hoped for more, he was well pleased.

Upon his return to Washington, Mr. Roosevelt summoned the Japanese Ambassador and then sent this secret message to Churchill: On August 17, I sent for the Japanese Ambassador and the Secretary of State and I received him. I made to him a statement covering the position of this government with respect to the taking by Japan of further steps in the direction of military domination by force along the lines of the proposed statement such as you and I had discussed. The statement I made to him was no less vigorous than and was substantially similar to the statement we had discussed.

Meanwhile in both Japan and the United States there was an increasing debate between their respective "peace parties" and "war parties." The peace group was in power in Japan and they made every effort to come to amicable terms with the United States, which refused all their overtures. Their Prime Minister offered to meet with President Roosevelt. Messrs. Stimson and Hull were violently opposed to such a meeting. They were afraid Mr. Roosevelt might weaken and come to terms with Japan. So this attempt for an amicable settlement was squashed. This failure led to the fall of the Japanese Cabinet and the tide turned with their War Minister becoming Prime Minister.

In Washington, the economic squeeze was being tightened on Japan. F.D.R. was receiving regular visits from a Naval intelligence officer with the latest estimates of Japan's supplies of vital materials. This officer, reading the Japanese equivalent of the CONGRESSIONAL RECORD, knew from the subsidies paid how much oil and other vital raw materials Japan had in storage. (After the war this officer checked and found that his estimate of Japan's oil was off by only about two percent.) From these data, he could advise F.D.R. how well his strangulation policy was working. He could also estimate how soon and in what direction Japan would have to move for her survival. In the fall of 1941, F.D.R. thus knew that Japan would soon have to strike out for the oil of the Dutch East Indies.

WASHINGTON READS JAPANESE SECRETS

With Japan considered the "enemy," U.S. cryptographers concentrated their efforts on breaking the top Japanese diplomatic code. In August 1940, they succeeded. From that time on, U.S. officials read all messages between Tokyo and Japanese diplomats all over the world. Early in 1941, over the objections of the Navy Department, this capacity was given to the British. Secretary Hull didn't find this out until some time later and was much provoked to learn that the British had been reading all the details of U.S. negotiations with the Japanese. It should be noted, however, that the British gave the U.S. Government access to some German codes in exchange.

The U.S. had been reading a lesser Japanese code, their Consular Code, for quite some time. On September 24, Tokyo requested the Japanese Consul in Honolulu to start reporting on the location of American warships in Pearl Harbor. This message was picked up in Hawaii and mailed to Washington, but was not decoded and read until October 9. Other messages in this series, known as the "bomb plot" messages, were similarly delayed. The November 29 message, read in Washington on December 5, said: We have been receiving reports from you on ship movements, but in future will you also report even when there are no movements.

One sent on December 2 was not read until after the attack. It read: In view of the present situation, the presence in port of warships, airplane carriers and cruisers is of the utmost importance. Hereafter, to the utmost of your ability, let me know day by day. Wire me in each case whether or not there are any observation balloons over Pearl Harbor or whether there are any indications that they will be sent up. Also

advice (sic) me whether or not the warships are provided with anti-mine nets.

None of this information was ever sent to the Hawaiian commanders, nor were their intelligence men asked to decode these messages. U.S. cryptographers in Hawaii were then actively trying to break the Japanese Navy code. Every day dozens of important messages were read in Washington, but little, if any, pertinent information was passed on to the Hawaiian commanders. There were some who felt this dereliction was purposeful.●

EPA'S CONSTRUCTION GRANTS PROGRAM

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. GREEN. Mr. Speaker, I would like to bring to the attention of my colleagues an article which appeared in the Wall Street Journal on November 23 concerning the Environmental Protection Agency's construction grants program. As a member of the Subcommittee on HUD/Independent Agencies, I have been very concerned about this program, the funding for which has not been allocated under either an appropriations bill or a continuing resolution. We have been told by the administration that it expects to request a fiscal year 1982 appropriation as soon as the authorizing legislation for the program is completed. I understand that a House and Senate conference is being held on this bill, and hope that, once an agreement has been reached in the authorizing legislation, we can move quickly to approve a supplemental appropriation, as continued construction of treatment sites is contingent on funding being made available by the Federal Government:

[From the Wall Street Journal, Nov. 23, 1981]

POLITICAL FIGHT IS THREATENING SEWER GRANTS

(By Andy Pasztor)

WASHINGTON.—Congress has clogged the government's multibillion-dollar aid program for sewer projects, jeopardizing thousands of projects around the country.

The Senate and the House are at odds over the proper federal role in the program, how much it will cost through the end of the decade and the kind of projects that should be financed. Meanwhile, the Reagan administration refused to include any money in the budget for the politically popular construction grants until both houses adopt a compromise bill acceptable to the White House.

The dispute threatens to disrupt sewer projects that are being planned or are already under construction. Some communities could be left with ditches and abandoned, half-finished treatment plants when money runs out—or even if financing is delayed or sharply reduced. And, if the congressional impasse lasts much longer, many people believe the entire program may be killed.

Utah Governor Scott Matheson, who chairs a committee on water policy for the National Governors' Association, claims the program's demise "would mean a living nightmare for untold numbers" of communities. "Essential waste-water projects would have to be postponed or dismantled," he says. "And there could be some serious fiscal consequences" for cities and states that previously sold bonds to help finance their share of project costs. "We're looking at disaster levels" if Congress doesn't reauthorize the program by the beginning of next year, the governor contends.

"Voters around the country are just beginning to understand" that local property taxes and sewer charges "will have to go up dramatically if and when federal support is cut back," says Larry Silverman, executive director of the American Clean Water Association, a lobbying group that supports the concept of the grants programs. "The political impact will be tremendous," he predicts.

From large urban centers to rural hamlets, worried officials are issuing similar warnings. Eugene Wright, superintendent of the sewer system run by Chattanooga, Tenn., spends much of his time these days worrying about completion of a $78 million treatment-plant expansion project that could become a victim of the federal cutbacks.

So far, the city and the U.S. Environmental Protection Agency have committed a total of $63 million to finish the work. But "Without 1982 appropriations from Congress, we'll have to make the tough decision to halt construction," says Mr. Wright. If the extra capacity isn't available, the city may have to prevent future sewer hookups and postpone its industrial-development efforts.

In Norfolk, Va., the sewer district is counting on federal help to finish a three-year, $30 million project to replace old, inefficient treatment plants that don't comply with clean-water laws. Officials contend the work may have to be stopped as early as January if money from Washington is held up. "We probably can't afford to borrow the money on our own," says James Borberg, who runs the sewer district. "There could be severe disruptions" of the region's long-range plans for cleaning up rivers and streams, he argues.

Nationwide, more than two dozen communities are under court orders to clean up sewer plant discharge; they include Detroit, New York and other financially strapped metropolitan areas that tend to be most heavily dependent on continued federal help.

Because of the congressional dispute, more than 40 states have run out of money in continue financing sewer projects in 1982. Texas, for example, says it needs $213 million to finish eight major projects under construction.

Unless Congress acts quickly, many state, federal and industry officials are convinced that the Reagan administration will seize the opportunity to ease its worsening budget problems by simply eliminating the program.

"If the White House has any excuse to chop it off, the President may decide to take advantage of it," says a Senate staff member. Utah Gov. Matheson claims he already is "seeing some evidence of foot dragging" by the administration.

House and Senate conferees plan to continue discussion this week to try to resolve their differences, but a wide gap remains. The Senate, for instance, went along with President Reagan's request to change drastically the current aid formula so more money can be funneled to densely populated areas in the Northeast and Midwest. Senate conferees also want to reduce to 55 percent from 75 percent the government's share of construction costs by the mid-1980s.

The House, on the other hand, voted overwhelmingly to resist such cuts and to continue financial assistance to Sun Belt states that want to build sewer capacity in anticipation of population and industrial growth.

Both bills meet the administration's $2.4 billion spending cap for fiscal 1982, but the House plan envisions spending about $25 billion more during the next 10 years than the target set by the Senate and the White House. When the same two committees went into the last conference committee on sewer grants in 1976, it took them more than a year to compromise.

Shreveport, La., for example, will have a new sewer plant ready to operate next summer. But unless the federal government provides tens of millions of additional dollars to patch up the city's leaking, outmoded sewer lines, the plant won't be able to handle all of the anticipated flow during heavy rains. "If Congress cuts off help at this point, the plant they encouraged us to build can't accomplish its goal of cleaning up the environment," complains a city engineer.

Congressional inaction can so completely "disrupt the program that state and local matching funds would dry up for lack of confidence in future federal participation," according to Clinton Whitney, executive director of the California Water Resources Control Board.●

DISTRICT OF COLUMBIA SEX ACT

SPEECH OF

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 1, 1981

● Mr. SILJANDER. Mr. Speaker, I am opposed to the District of Columbia Sex Act and will vote against it when it comes to the floor for a vote. It is time to call a halt to the use of Washington, D.C., as a "sandbox" for social experimentation. Our city is a window to the Nation and should be a healthy example of American life. It would be a national embarrassment to have the laws of Washington legitimize sexual practices that run counter to the long standing national consensus on these issues.

Furthermore, the Constitution is quite clear on this matter. That document gives Congress the authority to monitor and approve or disapprove laws passed by the District of Columbia City Council. A responsibility comes with that authority. We have a responsibility to see that legislation is passed that sets the proper moral tone for our Nation's Capital, a tone that reflects the moral foundation on which our country was built. This bill is a clear violation of that foundation.

Today,we have an opportunity to improve this city. I intend to do so by

voting against the District of Columbia Act.●

CHURCHES STEP INTO WELFARE GAP

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. HOYER. Mr. Speaker, these times of economic uncertainty have proved difficult for us all. But those who have come to rely on Federal support to carry on their activities have encountered the severest of hardships. Social service agencies at the local, State, and Federal levels are unduly pressed by the recent budget cuts and, in some cases, very necessary programs have suffered. Yet our citizens continue to need these often vital services.

Luckily there are always those who are ready to step in to fill the breach. Our country has a tradition of voluntarism. Nowhere is this more in evidence than in our religious community, where we have seen the benevolence of church groups who have taken an active role in aiding unfortunate people all over the world. Now, because of economic situations, these groups are bringing their helping hands closer to home.

My district is fortunate in having the talents of concerned and caring people in the community. A recent articles in the Washington Post singles out a few of them.

The Reverend J. Marshall Dunn of the University Christian Church; the Reverend Jack Clifford of the First Baptist Church in Hyattsville; Bill McIntire, a general contractor in Maryland and head of American Togetherness; Carolyn Billingsly, head of the housing task force of the church group; and Sue Boysen, head of the People Bank task force for the church groups.

Mr. Speaker, I would like to thank these true humanitarians, who instill hope in so many lives. Their contributions of time, energy, and love are given unselfishly, and their rewards are few. They are due a thank you for their usefulness to the community.

The following article from the Washington Post is but a glimpse of the work of these devoted people.

CHURCHES STEP INTO WELFARE GAP

(By Tom Vesey)

The Rev. J. Marshall Dunn thinks the president's budget stinks, and in July he mounted the pulpit of the University Christian Church (Disciples of Christ) in Hyattsville to tell his congregation just that. "I preached a sermon where I said you can't cut that much out of the budget without really hurting some people—whether you agree with the president or not."

The Rev. Jack Clifford, of the First Baptist Church in Hyattsville, isn't happy with the federal budget either, and he will speak out in November. "I plan to preach a sermon on the need in our county. I guess I'd draw a connection between the Christian message and basic human need."

Both pastors, as members of a group formed by 12 Hyattsville area churches, plan to act on their discontent and concern by aiding those who have lost welfare money and by helping the county's Social Services workers handle the increased demand for counseling. "We really do need to respond to the challenge to do more. And we can do more," Dunn said.

"Each church has responsibility for something it can do on its own," he said, "and three task forces were set up—one on housing, one on the development of a people bank, and the third, headed by myself, was to meet with the Pastoral Counseling Service of Greater Washington, D.C., to help clergy supplement some of the counseling of the Social Services Department."

The efforts of Dunn's church group come at a time when volunteer groups in the Maryland suburbs are stretched to the limit of their resources. Lois Jones, co-chairwoman of Prince George's Help-By-Phone, described a "rising tide of anger" among people who need help but are unable to find it.

Help-By-Phone, which supplies emergency shelter, food, clothing and transportation, assisted some 40,000 persons last year. Jones said it is impossible to measure the increased demand because the phones are already ringing constantly, but she said those who ask for help now are more desperate.

"It used to be that once every three or four months we'd get a very angry call," she said. "We're finding that this is much more frequent and [the calls are] much nastier than they were before. There is a rising tide of frustration and people are raging at anyone who says 'No.'"

By Nov. 1, almost 4,000 people in Prince George's and Montgomery counties will have lost some, if not all, of the welfare benefits they once received. The cuts were delayed one month when it was discovered that those being cut from welfare programs had not received the warning required by law.

Mary Costable of Montgomery County's Volunteer Bureau said more volunteers are needed but not enough are coming forward. "We certainly have an increased demand," she said. "I foresee us using a lot more volunteers and depending on them more than in the past, and using volunteers where they haven't been used before."

Peggy Nelson, a former director of the Gaithersburg Help-Fish, a church-funded organization similar to Help-By-Phone, said volunteers cannot fill the gap left by welfare cuts. "Because of the economic situation, more and more people are going to work, so there are fewer volunteers," she said.

One person trying to round up volunteers is Bethesda general contractor Bill. L. McIntire. This week, he was selling pumpkins on Seven Locks Road to raise money to incorporate a new charity he calls American Togetherness. McIntire hopes the fledgling organization can begin offering needy persons food, transportation and housing before Christmas. He said he has already enlisted the support of about 20 of his business customers.

"Almost all the volunteers will come from the people we help," he said. If the organization helps a single mother, he said, "she could repay us in any way she could, but if she could vounteer for the cause, it would more than pay for the service."

Phil Newsom, supervisor of Prince George's Social Service's Emergency Shelter unit, is excited by the potential of Dunn's group to help poor families find housing quickly.

"It's taking the family a lot longer to get themselves stabilized, get themselves into an adequate, stable living arrangement. There's a greater need for an extended shelter so they can check out the different types of housing situations and get themselves squared away. By using the churches in conjunction, it gives a long time."

The Social Services Department already has the help of a few churches, but most people seeking emergency shelter are placed in motels. An average of 22 persons a month were given emergency shelter in motels last year, and a total of 26 persons were housed in churches. Carolyn Billingsly, who heads the housing task force for Dunn's group, said churches in the Hyattsville area are now being surveyed to see if more shelter space can be found.

The People Bank task force, headed by Sue Boysen, plans to distribute questionnaires in churches to develop a list of volunteers' names. Social Services workers would be able to draw on such a list, she said. The Social Services Department is inundated with paperwork, Boysen said, and "in that case, there is probably something that the churches can do."

Clifford said the People Bank is an important effort to establish a "core of socially conscious people." He said he will distribute questionnaires after his sermon on need later this year. "Otherwise, people lose the spark," he said. "If you let them leave without something concrete, they lose their enthusiasm."

Boysen said she hopes Dunn will ask for volunteers after a similar sermon—"a sermon that will make people wipe the tears from their eyes and get in the mood to do something."

Not everyone agrees with Clifford and Dunn. Clifford said he expects to hear some objections. "I think some of our people would question that there is a lot of need in the county," he said. "As a pastor, I would run into some opposition. But I think there will be enough support."

Dunn said he faced some opposition after his sermon in July. "I do know some people were very angry with me and felt that I was being critical of the president, and not giving him a chance," he said. "I had one elder give a prayer, in that same service, that thanked God for a courageous leader like President Reagan. He basically took me to task right then and there. I just rolled my eyes back. It really didn't bother me. I thought it was kind of humorous."

But Dunn believes these needy people can still be helped. "I think the president is wrong, but I don't think that's any excuse for the churches to sit back and watch this fail," he said. "We have a responsibility to give it a shot. I really believe good things are going to happen. There are only 60 volunteers in the P.G. Social Services Department right now. Surely we could add to that."●

THE REAL INFAMY OF PEARL HARBOR

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. McDONALD. Mr. Speaker, on December 18, 1974, the Southern Libertarian Review issued a special issue of revisionist history on the matter of Pearl Harbor by Percy Greaves. In other parts of the CONGRESSIONAL RECORD on this, the 40th anniversary of Pearl Harbor, I identified for my colleagues and historians, the fact that Mr. Greaves was the chief of the minority staff in the joint congressional investigation of Pearl Harbor. Mr. Greaves has pointed out that revisionist historians are, "* * * those historians seeking to reveal truths the political powers prefer to keep hidden." It has always been my personal held belief that the American people should know the truth where pains and money have been expended to withhold that truth. This article by Mr. Greaves is in the serious matter of who really benefited from Pearl Harbor. We are still paying the penalty today from that which has been withheld from the American people. The article follows:

[From the Southern Liberation Review, Dec. 18, 1974]

THE REAL INFAMY OF PEARL HARBOR

(By Percy Greaves)

For half a century before December 7, 1941, the struggle for supremacy in the far east was between Russia and Japan. After the Bolshevik revolution of 1917, the forces of Soviet communism, seeking new lands to conquer, sought to oust the Western oriented Japanese from their foothold on the Asian mainland. Communist-inspired incident followed communist-inspired incident until some high placed communist friends were able to precipitate our entry into World War II on the side of the Soviet Union.

What follows is a brief peep at what preceded the Pearl Harbor attack. By early 1939, it became evident that Roosevelt's New Deal had not solved the economic depression. There were as many unemployed as six years earlier. It was the European war that ended the business doldrums. Under our cash-and-carry law, the gold shipments of France and England were used to put the unemployed back to work. As Roosevelt told his cabinet, such orders were needed if the Democrats were to be re-elected in 1940.

Then, France fell and England's gold stock ran out, so after the 1940 elections, Roosevelt proposed what was later known as Lend-lease, the first big international giveaway program. It was financed by inflating the quantity of money and raising the cost of living for all Americans. Despite campaign promises to the contrary, we were heading for war. Our navy felt it must protect the Lend-Lease goods in transit. We trailed German submarines, reporting them to the British. We occupied Iceland. But Hitler refused to retaliate.

On June 22, 1941, Germany invaded the Soviet Union. Two days later, Roosevelt, refusing to apply the neutrality act, promised Lend-Lease aid to the Soviet Union. A short while later, our State Department broke off its conversations with the Japanese and then froze all their assets in the United States. American banks were thus prevented from letting their Japanese depositors withdraw their funds.

In August, Winston Churchill met Roosevelt off Newfoundland. The world was told they met to write the Atlantic Charter and proclaim the Four Freedoms. Actually, Churchill's purpose was to persuade Roosevelt to send Japan an ultimatum. On his return to Washington, Roosevelt summoned the Japanese ambassador and then cabled Churchill, "the statement I made to him was no less vigorous than, and was substantially similar to, the statement we discussed."

Conversations with the Japanese were renewed. Premier Konoye asked Roosevelt to meet him. Americans and Japanese desiring peace were hopeful. However, Roosevelt and his advisors were not anxious to come to amicable terms. With the permission of France's Vichy government, Japan was moving into French Indo-China. Our State Department wanted to threaten Japan again. However, Joseph Grew, our ambassador to Japan, had warned Roosevelt that such threats would lead to war. Then, Cordell Hull, our Secretary of State, asked our military leaders if they were prepared to back up further State Department threats.

NOT READY

On November 3, fifteen top army and navy officials discussed the situation at a long meeting. They were decidedly not ready for war. So, on November 5, George Marshall, Chief of Staff, and Harold Stark, Chief of Naval Operations, wrote a Joint Memorandum for the President. They told Roosevelt: "The current plans for war against Japan in the Far East are to conduct defensive war, in co-operation with the British and Dutch, for the defense of the Philippines and the British and Dutch East Indies. The Philippines are now being reinforced * * *. By about the middle of December, 1941, United States air and submarine strength in the Philippines will have become a positive threat to any Japanese operation south of Formosa. The U.S. Army air forces in the Philippines will have reached projected strength by February or March, 1942 * * * War between the United States and Japan should be avoided while building up defensive forces in the Far East."

The memorandum ended by recommending, "that no ultimatum be delivered to Japan."

In a move for time, a 90-day "Modus Vivendi" was drafted for submission to Japan. This would have permitted Japan to import her 90-day needs of strategic materiel, including oil, but not to add to her stocks in storage. Our "allies" the Dutch, Australians and British, approved the "Modus Vivendi" proposal. Our "War Cabinet" also approved it and we were all set to offer it to the Japanese ambassadors in Washington. Then the communists went to work.

On November 25 the Political Advisor to China's Generalissimo Chiang Kai-shek sent a message to an administrative assistant to President Roosevelt, requesting that he "urgently advise the President of the Generalissimo's very strong reaction. I have never seen him really agitated before * * * any Modus Vivendi * * * would be disastrous to Chinese belief in America."

The sender of this message was Owen Lattimore, later found by the Senate Judiciary Committee to have been "a conscious articulate instrument of the Soviet Conspiracy." The recipient of the message was Lauchlin Currie, who had persuaded Roosevelt to recommend Lattimore to Chiang and who, according to later sworn testimony was also a collaborator with "the Soviet intelligence apparatus."

After Britain had approved the "Modus Vivendi," Churchill cabled Roosevelt, asking if it was not "a very thin diet" for Chiang Kai-shek. This indicated an extraordinary effort by Lattimore to sabotage the "Modus Vivendi," which, Marshall later testified, might have prevented Pearl Harbor.

Harry Dexter White, chief foreign policy advisor to Treasury Secretary Morgenthau, was another communist collaborator urging that we send Japan an unacceptable ultimatum. Late on the afternoon of November 24, he met with Morgenthau and Russia's Mr. Gromyko. On November 25, he sent a fellow promoter of Communist interests "an urgent telegram" summoning him to help prevent "a sell-out of China."

Early the next morning, Mr. White received Chiang's brother-in-law, T. V. Soong, who had one of the "hysterical messages" from Chungking. Mr. White immediately reported to his superior, Mr. Morgenthau, who reached the White House before Roosevelt had finished his breakfast. The President agreed to receive the Chinese ambassador and T.V. Soong. The "Modus Vivendi" was then dropped. The Japanese were handed an ultimatum that all those reading the decoded Japanese messages knew must mean war.

Secretary of War Stimson's diary entry for November 27, 1941, reads: "The first thing in the morning I called up Hull to find out what the finale had been with the Japanese. . . He told me now he had broken the whole matter off. As he put it, 'I have washed my hands of it and it is now in the hands of you and Knox—the Army and the Navy.'"

A few days later, Hull told the British ambassador: "It would have been better if, when Churchill received Chiang Kai-shek's loud protests. . ., instead of passing the protest on to us without objection on his part, thereby qualifying and virtually killing what we knew were the individual views of the British Government toward these negotiations, he had sent a strong cable to Chiang Kai-shek telling him to brace up and fight."

So our military authorities, who knew we were not yet ready for the war Roosevelt sought, were overruled and high-placed communist collaborators helped to precipitate the Pearl Harbor attack, bringing the United States into the war on the side of the Soviet Union. Let this be a warning that communist protagonists are always pushing policies which are harmful to the peace and prosperity of our country.●

TRIBUTE TO JOEL LEFKOWITZ

HON. WILLIAM CARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. CARNEY. Mr. Speaker, December 31, 1981, will mark the end of the term of a very distinguished public

servant in my congressional district. Joel Lefkowitz has served as town supervisor for the town of Brookhaven since 1979. Before that he was a two-term councilman on the Brookhaven Town Board. He has always served with highest degree of honesty, fairness and ability.

In his service to the people of Brookhaven, Joel Lefkowitz has run an effective and responsible town government. Since his arrival in the Brookhaven area in 1965, Joel has continually lent his talents to many civic, educational and legal organizations. The law and public service have been the themes of Joel's career. His contribution to each has been invaluable.

Mr. Speaker, I am proud of Joel Lefkowitz and the job he has done for Brookhaven. I wish him continued success in his future endeavors, and I wish him and his family continued health and happiness for the years to come.●

MARTHA L. HARRIS—A DETROIT AND HIGHLAND PARK FAVORITE DAUGHTER

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. CONYERS. Mr. Speaker, On Sunday, December 13, 1981, a remarkable woman will be honored in the city of Detroit, Mich. She is not internationally known, nor is she quite nationally known, but she is a significant individual in the cities of Detroit and Highland Park.

Martha L. Harris has contributed significantly to these cities through her civic activities and expressions of love for those who have entered her life. She was first recognized as an outstanding honor student at the acclaimed Cass Technical High School in Detroit. Before, and immediately following her marriage, she was one of Detroit's top models and beauty queens, winning several beauty titles. In the early years of her marriage she extended her love for children outside her home, and became an instructor at a residential preschool nursery center.

Circumstances, for a time, resulted in Martha having to provide for her three daughters without the assistance of a husband, even though she had no practical work experience. Being the incredible woman that she is, she kept her daugthers and began to gain those skills necessary to be gainfully employed.

Martha attended school during the day, the evenings, and at any time she could find in between, until she acquired a degree in social work. The degree enabled her to secure the position of real estate expeditor for the city of Highland Park, Mich. While in this position, she established a community reputation for honestly, loyalty, high moral integrity, and dependability. She has continued her interest in real estate, and has obtained a degree in the field. Beyond her real estate and social welfare interests, Martha focused on public relations and community concerns, which led her to become one of Detroit's most recognized public relations persons; publicizing the arrival of top music artists in the city.

Martha extended her concern for the cities of Detroit and Highland Park into the field of politics, as she contributed significantly to the campaigns of a number of successful politicians. Her insights and knowledge about the needs of the people of Detroit and Highland Park have improved the quality of public service provided to them. Her presence as a symbol of caring may well be her greatest contribution.

Notwithstanding the many things she has done, if you were to ask her to indicate things of which she is most proud, her answer would be her three daughters. Ava LaTanya, Karla, and Margo, have matured in the image of their mother. Much like their mother, they have all received recognition from the city of Highland Park for their scholastic achievements. Ava, an outstanding student, is currently working on her M.B.A./J.D. degree from Rutgers University, Karla, after completing requirements for two degrees from the University of Michigan, has joined my Washington staff, and Margo is presently a freshman at the University of Michigan majoring in chemical engineering. Margo and Karla have both won several beauty contests—winning beauty contests seems to be a family tradition.

So why is she being honored by her friends in Detroit and Highland Park? It is so unfortunate that we usually wait until sad times to recognize our peers and friends, but this is often the case. Martha Harris was recently stricken with cancer. Her husband, the internationally known musician/conductor, Teddy Harris, Jr., is giving a musical tribute in her honor, the proceeds from which will go toward Martha's medical expenses.

I am sure most of the citizens of Detroit and Highland Park will attend this important event to give recognition to one of their favorite daughters.●

COMMENDING SENATOR ARLEN SPECTER ON THE INTRODUCTION OF THE MINING RECLAMATION RESERVES ACT OF 1981

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, I would like to take a moment to commend a distinguished Member of the Senate who, on Friday, December 4, introduced a bill that will clarify existing Internal Revenue Code provisions and IRS rulings concerning surface mining reclamation reserves.

Senator ARLEN SPECTER of Pennsylvania last Friday introduced S. 1911, which is a measure similar to H.R. 4815, which I introduced in the House on October 22. Both bills address the confusion that presently exists as to when an accrual-basis taxpayer is entitled to take current tax deductions for estimated future reclamation expenses incurred when complying with the surface mining reclamation requirements of Federal and State law. Though there is one difference between our two bills concerning the eligibility of previous years' accrual accounting methods, I nonetheless would like to direct the attention of my colleagues to the general provisions of the bills and the important problem of the surface mining industry they resolve.

Mr. Speaker, I am proud that Senator SPECTER and I will be working together on this issue. Certainly, with his efforts and those of our colleagues, our bill can be enacted and the Nation's surface mining industry benefited. I thank Senator SPECTER and, lastly, only add that I look forward to a close working relationship on this, as well as other, measures before the Congress.●

A TRIBUTE TO JOHN T. KEHOE

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. MATSUI. Mr. Speaker, for the past 6 years the Sacramento Metropolitan Chamber of Commerce has been guided by one of the most able and effective directors in its history, Mr. John T. Kehoe. The community and citizens of Sacramento, as well as the chamber itself, has benefited greatly from John Kehoe's talented and energetic leadership.

This outstanding administrator, whose distinguished career has included service in the Governor's cabinet when President Ronald Reagan was chief executive of the State of Califor-

nia, will be leaving the Sacramento Chamber soon to pursue a challenging opportunity in the private sector as vice president in charge of economic planning for the Cook Co. of Sacramento.

I am sure that all Members of this House, and particularly our California delegation, will join me in extending best wishes to John Kehoe and in saluting his outstanding career in city, State and Federal Government, as well as his work for the Sacramento Metropolitan Chamber of Commerce.

John Kehoe's career has included 18 years of public service, beginning in Hayward, Calif., where he worked as an assistant city manager. He later served as administrative assistant to a distinguished Member of the House, Hon. George Miller, followed by 3 years as director of governmental affairs for the California State Univerity and College System.

In 1969, Gov. Ronald Reagan asked John Kehoe to join his administration as education consultant. One year later, Mr. Kehoe was appointed as the Governor's legislative secretary, and in 1972 he became a member of the Governor's cabinet as director of consumer affairs. During his 2 years in that position, the department received national acclaim for programs implemented under his leadership.

A description of John Kehoe's community interests, activities and awards would fill many pages. One of his more recent achievements was election by the people of Sacramento to the five-member board of one of California's major publicly owned electrical utilities, the Sacramento Metropolitan Utility District.

As a Representative of Sacramento in the Congress of the United States, it is my great pleasure and honor to officially recognize John T. Kehoe's temendous contributions to the Sacramento area, to the entire State of California, and to this Nation, and to express our hope that he finds his new position stimulating and rewarding.●

SMALL IS ESSENTIAL: THE REVITALIZATION OF AMERICA'S SMALL BUSINESSES IS WELL UNDERWAY

HON. JOHN LEBOUTILLIER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, small business is big business. While the Fortune 500 corporations provide the major impetus in terms of development and major production, America's vast array of small businesses and services comprise the economic backbone of America. The centrality of small business within the American economy can be best demonstrated by some hard facts:

Small businesses comprise 97 percent of all of the Nation's firms;

Small businesses comprise 43 percent of the gross national product (GNP);

Small businesses generate 64 percent of the total dollar value from wholesaling;

Small businesses comprise 73 percent of retail sales;

Small business receives 57 percent of the annual service sales dollar share;

Small businesses comprise 76 percent of the construction dollar volume;

Small business provides employment for 58 percent of the American work force.

David Birch of the Massachussetts Institute of Technology found that small business' contributions to the American economy go beyond the above statistics. Birch found that companies with less than 21 employees created 66 percent of all new jobs after requisite job losses in particular industries between 1969 and 1976. Even more telling is the finding that firms with fewer than 500 employees accounted for 87 percent of the new jobs created in this period. In short, small firms are the prime job generators.

The decade of the 1970's was a period when bad Government policy toward small business came to fruition. Fortunately, according to Kenneth Chilton and David Hatfield of Washington University in St. Louis, Federal policy has been moving toward greater assistance to, and less hampering of, America's small businesses. I welcome this development, as this administration and Congress have, in less than 1 year, taken even more affirmative steps to lessen the negative Federal impact on small business in America.

Chilton and Hatfield are the authors of a recently published report entitled, "Big Government and Small Business: The Changing Relationship." This work, published under the auspices of the Center for the Study of American Business at Washington University, is a concise and well-documented look at how Federal policy vis-a-vis small business had been previously inhibitory, and presently becoming ameliorative.

> The policies of the Federal Government toward small business in the 1970's,
> Chilton and Hatfield write,
> alternated between not-so-benign neglect and ill-advised direct intervention.

In spite of this unfavorable climate, the vigor and import of small business grew. How a positive change in Federal Government-small business relations came about, say the authors, was through capable and reliable communication from the affected industries to Congress. With the onset of the Reagan administration and a Congress that is fundamentally supportive of the administration's economic policies, an acceleration of efforts to get off of the small businessman's back increased. In the last year, marked improvements in the operating climate for small business are seen by all.

The lessons of the 1970's, like history in general, ought to be learned so that they will not be repeated.

Chilton and Hatfield found three major problematic areas of Federal policy that militated against small business. These policies were: negative Federal regulation, tax policy, and ineffective assistance progams.

In terms of regulation, unparalleled growth in Federal regulation of various aspects of small business occurred most heavily during the 1970's. One hundred and thirty major new laws that negatively impacted on small businesses were enacted by successive Congresses during the 1970's. The regulatory phenomenon became so pervasive that Dr. Murray Weidenbaum, now President Reagan's Chairman of the Council of Economic Advisers, called the development "the second managerial revolution".

Study after study of countless industries revealed a lessened ability to innovate, expand, and create jobs due to the direct constraints resulting from Federal regulations. My own study of small business, and my own communication with scores of small businessmen in the Sixth Congressional District of New York duplicate these findings. While many of the intentions—cleaner environments, safer products, expanded minority opportunities, et cetera—were laudible, many of the direct side effects felt by small businesses were harmful. "Small businesses," the authors note, "became an unintentional victim of the regulatory overdose".

The second factor that worked against small business in the 1970's were the tax laws. Primarily, the authors found, taxes were regressive with respect to firm size. For instance, in 1979, firms with assets of less than $5 million had an effective tax rate of 41 percent on the average, while firms with assets of over $1 million paid at an average 29 percent rate.

Furthermore, payroll taxes designed to shore up the social security system are not neutral with respect to firm size. In short, Federal tax policy has consistently favored more capital-intensive business than labor-intensive ones. A healthy balance has been struck in the newly enacted Economic Recovery Tax Act of 1981. Recurring imbalances must be prevented.

The third feature of negative Federal policy toward small business was due to "ineffective intervention." I concur with the author's position that even in cases where the Federal Government sought to address the problems peculiar to small businesses, such as Small Business Administration aid programs, results were "negligible, if not negative." A recent review of more

than 14,000 SBA loans has yielded up some shocking results: more than 40 percent of the direct loans end in defaults, and only 18 cents on each dollar loaned is collected on defaults. More than $57 million was lost in aid funds from 1970 to 1978, and this figure may reach $900 million if 1979 and 1980 repayable loans go in a similar direction.

In addition, reviews of the section 8(a) procurement program, better known as the minority business assistance program, have not been good. Participants themselves are the most openly disappointed.

As the 1970's ended, a marked reversal of Federal policy toward big business began to occur. Washington finally woke up to the powerful fact that small business is the best job creation program—but only when left alone to get the job done.

During this painful decade, incorporations increased. Small businesses stuck it out, and continued to press for regulatory relief and tax reform. Within less than a year, they have significantly achieved both.

A massive assault on regulation was launched within minutes of President Reagan's inauguration. To express the administration's strong commitment to this goal, the President appointed no less than the Vice President himself to head his Task Force on Regulatory Relief. Already, more than 100 useless and noxious regulations are under attack.

Several tax reforms embodied in the President's Economic Recovery Tax Act of 1981 are of particular interest to small business:

Reduction of the top tax rate on investment income from 70 percent to 50 percent;

Increased estate tax exemptions from $175,625 up to $600,000 over a 6-year period;

Simplification and liberalization of depreciation methods, the accelerated cost recovery program (ACRP);

Increase from $150,000 to $250,000 the exemption to the accumulated earnings tax.

These features are also coupled with an across-the-board tax cut.

We are entering a decade of bright hopes for small business. We in Congress must continue to dismantle the seemingly endless maze of Federal regulations that have hindered profitable small business in America. We must continue to enact equitable and functional tax legislation that aims to lower inflation, maintain reasonable revenue, and allow for economic opportunity.

Small business is the core of America; I pledge to continue efforts to help it sustain not only itself, but all of us as well.●

THE DANGERS OF A WEAK DEFENSE

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. CARMAN. Mr. Speaker, the editorial which follows by Ben Wattenberg shows the dangers of even having to wonder if our defenses are fully sufficient.

WEAK DEFENSE HURTS ECONOMY

(By Ben Wattenberg)

"What happens, or might happen, if America becomes 'No. 2' is bad economic news even if the budget were balanced in the process. If the history of the planet tells us one simple thing, it is that nations with power use that power to advance their interests, including their economic interests. We Americans surely did just that when we were 'No. 1.' Is there reason to believe that the Soviets would behave otherwise?

"What would the economic world look like if the Soviets became the unquestioned paramount military power? Forget about direct superpower warfare. There are more efficient ways to transmute military power into economic gain.

"Of course, no one can predict or project the specifics of such a world, but play around with a few random speculations.

"A Soviet Empire running short on oil makes the Saudis an offer they can't refuse. 'Sell us oil,' the Soviets say. 'We need it very badly. And please, Prince, sell it to us at $10 a barrel because we're going to sign a friendship treaty with you.'

"I can think of many reasons for the Saudis under such circumstances to quietly start shipping the oil. I can't think of a single good reason for them not to. They certainly won't be able to come to a weak United States and say, "Help us, Uncle Sam, we're getting mugged." More likely, they'd raise the price of oil to the United States and our allies to make up the difference.

Or consider what might happen to business in Europe. The most skittish commodity known to man is capital. When threatened, it flees. As the nervous nations next to the all-powerful Soviet bear saw American weakness grow, their money would leave the continent in a rush.

"The slow, or speedy, collapse of European economies would be a logical result. While much of that capital might first flee to the United States, the ensuing depression in Europe would ultimately echo here in America. It is an interdependent world.

"And what would we do if the Soviets 'suggested' that we ought to give many billions more in aid to the less developed world? What would we do if the Soviets 'suggested' that we ought to sell them more grain cheaper, or that we should be more forthcoming with patented high technology, or that we should see to it that our banks loan them more money at low rates?

"Of course, we could resist those entreaties. We could resist the pressures to accommodate the Soviets that would surely come in from all over the world. We could—but we probably wouldn't. History tells the tale of weaker nations designing elaborate minuets to save face while accommodating stronger nations.

"Now, my question is this: If you were an investor on Wall Street, would you have more confidence in your invested dollar in a world where the United States was running a budget deficit or a power deficit?"●

FEDERAL ARTS FUNDING

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. RICHMOND. Mr. Speaker, the current issue of American Arts magazine contains an excellent article explaining the congressional budget process as it relates to the arts and humanities. Written by the distinguished gentleman from Illinois, PAUL SIMON, the article describes in detail the funding history of the National Endowment for the Arts and projections for the future of Federal arts support. Mr. SIMON, who is a member of the Congressional Arts Caucus Executive Board, is the highly regarded chairman of the Subcommittee on Postsecondary Education.

[From the American Arts, November 1981]

ISSUES OF CULTURAL POLICY

(By Paul Simon)

Emmanuel Kant spent eleven years assembling his Critique of Pure Reason and Frederick Hegel took eight years putting together his Philosophy of Right. Yet the United States Congress took only a few weeks to compile its own philosophical statement—the 1982 budget.

House committees slashed as much as one-third from their programs in a few days, and substitute legislation to revise the entire federal budget was completed overnight. Adding machines at the Congressional Budget Office could not work fast enough to figure and refigure subcommittee, committee, and substitute versions of the budget. There was little time to question the impact of what we were doing, and less time to ask why we were doing it. Some of us wanted those questions answered before we moved, but we were swept aside by the budget process.

Behind that confusing and complex budget process is a philosophy—a philosophy that this year is actually clearer and more radical than any in decades.

THE ARTS

The funding history of the Arts Endowment shows significant program increases, from $2.5 million in fiscal 1966 to $175 million in fiscal 1981. Congress was therefore surprised when the President requested a fifty percent reduction in Endowment funding for the coming fiscal year, since the NEA has grown through both Republican and Democratic administrations over the last fifteen years.

In 1980, the Arts Endowment was reauthorized for five years at levels ranging from $175 million for fiscal 1981 to $306 million for fiscal 1985. In the past, the actual appropriations for the Endowment have been seventy-five and ninety percent of the authorized amount. With the approval of the Arts Endowment's multiyear reauthorization in 1980 and with strong support of the Appropriations Committee's Subcommittee on Interior, headed by Representative Sidney Yates, it appeared that the federal role in the arts and the structure of the

Endowment was assured for the coming years. The President's request to cut the Endowment's budget by half presented a powerful challenge to the direction that had been set by Congress.

Responding to the Administration's budget, the Democrats' First Budget Resolution reduced funds in the category which includes the NEA, Category 500. Actual restructuring of programs under this category was left to the Education and Labor Committee, and although funding for the Endowment was in jeopardy, no specific cuts were required. Category 500 is so large that budgets for social programs can be made to fit under established budget ceilings without making specific and detailed cuts in all programs in that category.

My subcommittee eventually recommended a twenty percent cut in the Arts Endowment's budget in order to meet spending limits—a figure which was overturned by a subsequent coalition-sponsored bill that earmarked a combined total of $223 million for both the National Endowment for the Arts and the National Endowment for the Humanities. This figure represented a thirty percent reduction in these agencies' budgets from current funding levels. The Senate budget bill, meanwhile, set a figure of $119.3 million for the Arts Endowment, representing a twenty-five percent cut. The House and Senate conference on the issue was resolved by taking the higher Senate figure. Because the majority of House conferees on this portion of the reconciliation bill had not voted for the coalition-sponsored substitute bill recommending an even lower level of Endowment funding, we were happy to acquiesce to the Senate's higher figures of $119.3 million.

This year's budget process was far from smooth, but it has been further complicated by the parallel Appropriations Committee consideration of the NEA's budget. Appropriations for the Arts Endowment were considered by the Appropriations Committee before the budget reconciliation bill became law, and the Appropriations Committee went forward based on the multi-year reauthorization for the Endowment approved under President Carter, sending the House a figure of $157.5 million for the coming fiscal year. That figure is well above the $119.3 million in the reconciliation bill, but it was approved before the $119.3 million became the legal authorization level. The Senate Appropriations Committee figure for the arts has not been finalized as of this writing, but when it is, the House and Senate versions will have to be reconciled. Because appropriations cannot exceed the authorization level, a figure no greater than $119.3 million will have to be approved. This conflict in budget amounts focuses attention on the arts, as has both the appointment by the President of a Task Force on the Arts and Humanities, and the NEA's response to the likelihood of a reduced budget.

THE FUTURE OF FEDERAL ARTS FUNDING

The Arts Endowment now faces a budget cutback of twenty-five percent (or more) from its current funding level for the fiscal year that began on October 1, 1981. That percentage is even more significant when inflation is figured into the current program costs. How and where cuts will be made will be decided by the Endowment itself, not by Congress or the White House.

The priorities of the National Endowment for the Arts were made clear both by the National Council on the Arts in its March, 1981, meeting and in the Endowment's response to Congress on where reductions will be made. The Council directed that under budget constraints, the Endowment should concentrate on promoting professionalism and excellence, on organizations producing arts whose primary focus is the arts themselves, and on individual artists. The Arts Endowment, in its revised fiscal year 1982 budget, told Congress that the Council's direction will mean " . . . direct organizational support . . . providing considerably less support for service organizations, for touring and other outreach efforts . . ."

As of this writing, we do not know precisely what cuts will be made in the NEA's programs, although we do have alternative budgets which the Endowment has prepared based on various budget assumptions. From these alternative budgets, it is clear that some specific programs will be reduced in order to preserve others. Programs where reductions are focused include: Artists-in-Education, film documentation of dance, summer programs in Expansion Arts, City-Arts, services to the field in Media Arts, grants for museum purchases of works by living American artists, special opera-musical theatre projects, professional theatre touring, and across-the-board cuts in grants to state arts councils.

Another indication of the future of federal support for the arts can be found in the report presented by the White House Task Force on the Arts and Humanities following its final meeting in September—a report which included several recommendations on the future of federal involvement in the arts. Those recommendations echoed comments that had been made earlier by Task Force cochairs Charlton Heston, Dr. Hannah Gray, and Daniel Terra, as well as four general conclusions and tentative recommendations that were suggested at the August meeting:

1. There is a valuable federal role in the arts and humanities, and the basic structure of the Endowments is sound. Task Force member Henry Geldzahler reports that "the Endowments look better and better as we look into them more."

2. Endowment funding should be matched by private sources. The success of the Challenge Grants Program in attracting private support is evident. Business contributions to the arts in 1967 were $22 million, while in 1979 contributions totalled $436 million. Frank Saunders, Staff Vice President for Philip Morris, notes, "What is important here is that the presence, the activities, and the enthusiasm of the NEA were critical stimuli for this quantum leap in corporate support."

3. Private sector support should be increased. The budgets of both Endowments for the coming year have been reduced, and it is recommended that the shortfalls be made up by corporate, foundation, and individual giving.

4. Revisions in the tax code, recently signed into law, should offer encouragement for private giving by allowing more individuals to deduct charitable contributions on their tax forms. The very same bill, however, may discourage corporate support for the arts and humanities by lowering the tax rate for businesses, thereby lessening the need for businesses to find tax write-offs. Further revisions in the tax code should be explored.

A note about this last item: in the new political environment in Washington, which encourages business in general and business in support of the arts in particular, it is fitting that contributions should be encouraged through the tax structure. This approach may be in accordance with the philosophy of the new Administration, but may not be healthy for the general arts community. Well-known performing companies, establishes artists, and major institutions should be able to continue to attract support. Lesser-known companies, community theaters, and artists beginning their careers will have little or no chance to compete for corporate funding. It is unlikely that business philanthropy will invest the unknown or be able to bring together individuals to review applications in a manner similar to the Arts Endowment's panel system. There is also the potential problem of corporate patronage directing creative productions; conglomerate oil is not necessarily a modern-day de'Medici.

THE BUDGET AS PHILOSOPHY

This year's budget process has shown several things. It has shown that Congress listened when the public asked for cutbacks in government spending. But where the reductions should be made and by how much became a matter of conflict between most Democrats on one side and a coalition of Republicans and conservative Democrats on the other. The budget that was finally approved is a reflection of where this Administration thinks cutbacks should be made. While the Defense Department's budget grew, training for the unemployed was virtually abolished. Fewer children will qualify for free or cut-rate school lunches, but we will be able to pay for a number of new options in stategic weapons. Taxes will be cut, and so will our system of social services to the poor. The National Endowment for the Arts will have a budget of no more than $119.3 million in fiscal year 1982, approximately $38 million less than this year. Military bands, by comparison, will receive over $50 million.

A massive rewriting of the federal budget is clearly not a good way of deciding in only a matter of weeks who is the most needy and what federal programs the most necessary. How can we decide in such a short time, within budget constraints drawn from who knows where, what is most important? How do we rank the handicapped, for example, against hungry children, unemployed teenagers, medical students needing help with tuition, or even the U.S. military? But such a ranking was done this spring and summer through the forced reduction in spending required by the White House budget. In the end, "people programs" were the losers.

Whatever our differing political philosophies, I believe our goal is the same one: a healthy America. But I believe a healthy nation means not only a healthy economy and military, but also a healthy spirit—a spirit expressed through the arts. The National Endowment for the Arts is still standing, though it took a blow from the Reagan Administration's hatchet. With renewed public support, it will continue to stand and once again grow.●

LETTING NUCLEAR DANGER SPREAD

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. BINGHAM. Mr. Speaker, the step-by-step weakening of the U.S. effort to prevent the spread of nuclear weapons technology is the subject of a very disturbing article by Jessica Tuchman Matthews in the Washington Post for December 1. I commend the article to my colleagues and other readers of the CONGRESSIONAL RECORD:

LETTING NUCLEAR DANGER SPREAD

(By Jessica Tuchman Matthews)

The Nuclear regulatory commission's resounding vote of no-confidence this week in the international system of safeguards on which trade in nuclear technology is premised is but the latest in a series of events and policy shifts that has all but wiped out American non-proliferation policy.

As one who once had a hand in helping to formulate that policy during part of the Carter administration, I have watched with awe the rapidity with which the dismantling has taken place.

The erosion began last spring in a close vote by the Senate Foreign Relations Committee approving an administration request to permit a large new assistance program for Pakistan by waiving the law that prohibits assistance to a country trying to make nuclear weapons. The vote attracted little attention at the time, yet it was a significant milestone: in the first test of its own sanctions against nuclear proliferation, the United States was choosing to ignore them.

By the time the waiver reached the Senate floor a few weeks ago, there was no remaining doubt that Pakistan is aggressively pursuing every possible technical route to building a bomb. It may be ready to stage a nuclear explosion in one year.

Nevertheless, the full Senate chose not to vote on the wisdom of the waiver. Sen. John Glenn (D-Ohio), trying to redraw the line he had helped write into law a few years ago, offered an amendment requiring termination of American aid if Pakistan went all the way and actually detonated a nuclear bomb. But the message that was conveyed that evening to Pakistan, and who knows how many other interested governments, was not that the amendment had passed—which it had, just—but rather that nearly half the Senate—45 members—had voted against it, in the name of preserving "flexibility" for the president. The flexibility in this case is the flexibility to do nothing—as this country did when India exploded its bomb in 1974.

Meanwhile Israel had bombed Iraq's research reactor. The International Atomic Energy Agency's response was not to investigate why Iraq, despite having no commercial nuclear facilities, was stockpiling hundreds of tons of uranium ore. Nor did it or any other group consider intelligence findings that Iraq was indeed pursuing a nuclear capability, despite having renounced the right to do so by signing the Non-Proliferation Treaty. Instead the IAEA called on its members to offer Iraq "emergency assistance" to rebuild the destroyed reactor.

France, Iraq's original supplier, responded. Discussions between France and Iraq have been under way since last summer. American officials are apparently not privy to the terms being negotiated, especially whether the new reactor will be as inexplicably large for its asserted "research" purpose as the old one was, or whether this time France will insist that the reactor not be fueled with highly enriched, weapons-usable uranium.

France's recent agreement with South Africa does not offer much ground for optimism. The United States has been trying for years to get South Africa to accept safeguards on its nuclear facilities. Its leverage was the supply of fuel rods for south Africa's first power reactors scheduled for completion next year. But American law requires that South Africa first accept safeguards. Suddenly, in mid-November, it was announced that the reactor would be loaded on schedule with fuel rods made in France, and without safeguards. The action took American officials completely by surprise, cutting the ground out from under the U.S. government's position.

A few years ago, the nuclear supplier nations agreed to an informal moratorium on the transfer of reprocessing and enrichment plants—facilities that produce material that is directly usable in bombs. This year, for the first time since that agreement, a non-nuclear weapons state—Mexico—has invited bids for the construction of power reactors and let it be known that it wants "advanced technology"—enrichment and reprocessing—to be part of the deal. The suppliers' responses will be a major test of how much, or how little, is left of the will to slow nuclear proliferation. The outlook is clouded by the administration's recently announced willingness to transfer classified enrichment technology to Australia, making it all the harder to say no to others.

Several other thresholds have been quietly crossed. In extending an agreement that allows U.S.-supplied fuel to be reprocessed in Japan's pilot reprocessing plant, the administration, without prior congressional consultation, dropped two key provisions of earlier versions. One of these dealt with whether reprocessing plants, because they provide direct access to weapons-usable materials, can ever be effectively safeguarded. The other retained U.S. control over Japan's use of the separated plutonium.

U.S. negotiators, unable to find acceptable conditions for ending nuclear cooperation with India, are reportedly considering major concessions. The United States wants international safeguards to continue to be applied to the used fuel (containing more than a ton of plutonium) it has supplied to India over 18 years. India has refused, and is reportedly considering a unilateral renunciation of the agreement and its attendant safeguards. To avoid that damaging precedent U.S. negotiators may allow India to reprocess the U.S.-supplied fuel.

The Reagan administration let it be known from the outset that it planned a dramatic "shift in emphasis" from the Carter non-proliferation policy. It would emphasize American leverage as a "reliable nuclear supplier" rathern than trying to restrict access to sensitive nuclear technologies. But leverage is only leverage if one is prepared to use it. The administration's easy acceptance of Pakistan's nuclear bomb program and many subsequent decisions signaled clearly that it was more interested in encouraging nuclear trade. The message was picked up not only by potential proliferators but also by other suppliers—France, especially—that had reluctantly gone along with earlier U.S. insistence on a tough non-proliferation policy. Congress, overwhelmed with other concerns, failed to respond. The result has been a frighteningly swift unraveling of the containment net that had been slowly stitched together in the seven years since India's nuclear explosion shocked the world. No one knows where it will end or what it will now take to stop the process.●

A TRIBUTE TO THE FRUITRIDGE SENIOR BABE RUTH ALL-STAR TEAM

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. MATSUI. Mr. Speaker, it is my great pleasure to extend official recognition to the outstanding team members and coaches of the Fruitridge Senior Babe Ruth All-Star Team, which this past summer represented the city and county of Sacramento, the State of California, and the Pacific Southwest Region (California, Nevada, Utah, Hawaii, and Arizona) at the Senior Babe Ruth World Series in Lawrenceburg, Tenn.

This fine group of 16- to 18-year-olds placed third in the world championship. Each player on this superb team exhibited the finest qualities of sportsmanship, both on and off the field, according to their coaches.

We in Sacramento County are extremely proud of their achievement. It is my honor to recognize each player and coach here in the pages of the CONGRESSIONAL RECORD.

The members of the team were Russ Charles, Bob Crump, Hank DeMello, John Berringer, Dan Sullivan, Greg Garnett, Todd Trafton, Ken Longman, Henry Gatewood, Russ Morena, Jon Leake, Greg Murphy, Greg Stimson, Alex McKisson, Ken Clawson, and Warren Cain.

They were coached by Bill Walker, Dan Sullivan, and Steve Hammer.

We are extremely proud of the record of this fine team and extend our congratulations and best wishes to each player and coach.●

A SALUTE TO DAYTON MAYOR JIM McGEE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. STOKES. Mr. Speaker, I would like to take this opportunity, to join with the many Daytonians, representatives of the business community and citizens throughout the State of Ohio in saluting my friend, Mayor Jim McGee. For over 13 years, he has rendered outstanding and unselfish service and leadership to the city of

Dayton, both as a city commissioner and mayor.

On December 10, 1981, there will be a testimonial in Dayton honoring Jim McGee for that leadership. On behalf of the residents of the 21st Congressional District of Ohio, I salute Mayor Jim McGee on that occasion.

Mr. Speaker, I thought it would be appropriate at this time to share with many of my colleagues from outside the State of Ohio the noteworthy achievements of Jim McGee. Members of the Ohio congressional delegation are quite familiar with his accomplishments during his 11-year tenure as the mayor of Dayton.

Mr. Speaker, I feel a special kinship to Jim McGee in his position as the first black mayor of Dayton. In 1967, my brother Carl Stokes, was elected the first black mayor of Cleveland and of a major American city. In 1970, Jim McGee joined that small group of black Americans heading up the leadership of our cities.

Mr. Speaker, Daytonians from every walk of life will attest to the dignity and leadership Jim McGee has brought to the city of Dayton for all the people. For example, he is credited with taking the city's involvement in the sister cities international project and elevating it to new heights. Currently, Dayton has strong sister city ties in the arts and world relations with Oiso, Japan; Osberg, Germany; and Monrovia, Liberia.

In addition to being the catalyst and liaison between Dayton and other great cities of the world, Jim McGee can be credited, and rightfully so, with addressing the major concerns of minorities, the elderly, and the handicapped in the city of Dayton. He has encouraged innovative city government programs to be more responsive to the needs of these groups.

Mr. Speaker, the problems of minorities, overseeing Federal projections, balancing residential and business interests have made unusual demands for the time and leadership of Jim McGee. But in every instance, Jim McGee has risen to the challenge and displayed the strong, steady leadership the city needed in its critical periods.

This tenacity and diligence in getting the job done and done right is the hallmark of the character and dedication to public service of Jim McGee. His career has been one of public service.

Mayor McGee started his career in public service in 1967 as one of the five Dayton City Commissioners. He served in that capacity with distinction until 1970 when he was appointed to fill the position of mayor. Since 1973, Jim McGee has been reelected to four terms as the mayor.

Mr. Speaker, in addition to his many duties as mayor, Jim McGee maintains a general law practice in the city. He is also an active and highly regarded member of the National League of Cities Advisory Board and the U.S Conference of Mayors.

Mr. Speaker, from everything that I have said about Mayor Jim McGee, I am sure that my colleagues now know that he is a rising star in Dayton and the State of Ohio. As his years in public service have grown, Jim McGee has increased his commitment to the over 200,000 residents in the city of Dayton.

In conclusion, I take this opportunity to join with the many Daytonians and people of good will throughout the State of Ohio in saluting Mayor Jim McGee for the unfaltering leadership he has provided to all the people in that great Ohio city.●

40TH ANNIVERSARY TRIBUTE TO THE CIVIL AIR PATROL

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. MATTOX. Mr. Speaker, 40 years ago this month—just days before America entered World War II—a group of aviation enthusiasts agreed to donate their light aircraft and their services to national defense through an organization they called the Civil Air Patrol. That organization played a vital if largely unheralded role in winning the war, and its members have continued to contribute gallantly to the Nation ever since.

At first, the CAP had its problems with a skeptical War Department, which had doubts that such a group had the experience or discipline to handle a critical mission. The organization got its first chance when German submarines began sinking American ships, sometimes within sight of onlookers at the beach, and it became clear that the United States lacked the military resources to control the losses.

The CAP was pressed into service. Over an 18-month period in 1942–43, it flew almost 87,000 missions patrolling the coastlines. Its sightings directly resulted in the sinking of two enemy subs and the damaging of 55 others, with an untold saving of American lives and surface vessels. Before they were withdrawn in 1944, the patrollers had lost 90 volunteer aircraft. Twenty-six CAP members died and seven were injured in the effort.

With 75,000 members in 1,000 U.S. communities, the Civil Air Patrol became a valuable training ground of pilots in 1942. It began testing teenagers for entry into the Army Air Corps, giving them flight training in aircraft on loan from the military. By the end of 1944, the CAP had actually developed a surplus of recruits.

Success brought more missions from the War Department. The CAP patrolled border crossings looking for enemy saboteurs and safeguarding communication lines. It searched for missing military planes, finding as many as seven in 1 week. It moved 3½ million pounds of mail and cargo for the Air Corps. It towed targets for anti-aircraft machine gunners. In all these war-related missions, CAP members logged half a million hours of flying time, receiving in return only operating expenses and subsistence pay. In addition to the monetary sacrifice, many lost their aircraft in these efforts, and 41 lost their lives.

In 1948, 2 years after Congress incorporated the CAP as a benevolent nonprofit organization, it became an official auxiliary of the Air Force. Its best-known activity since the war, flying search and rescue missions, has saved the lives of several hundred downed pilots and passengers. Hundreds of thousands of boys and girls ages 13 to 18 have participated in the cadet program. The CAP's current force of 59,000 senior and cadet members operates the most comprehensive emergency communication network in the United States.

I was deeply impressed by the courage and professionalism of the Civil Air Patrol members last year, when five members of a Mesquite family were killed in a private aircraft crash in a remote area of New Mexico. As soon as the plane was reported missing, CAP units from Texas, New Mexico, Oklahoma, and Colorado went into action, searching over hundreds of square miles of rugged, mountainous terrain. More than 600 people and 176 airplanes spent almost 700 hours of search time in the slim hope of locating the small aircraft in the snow-covered forest. Only after they had saturated the area and determined that the wreckage could not be seen from the air did they suspend the search. A special training exercise, which the CAP conducted as soon as enough snow had melted, later located the wreckage on a mountainside at about 10,000 feet altitude.

The patrollers' tireless, selfless efforts under those circumstances, out of compassion for people that few if any of them had ever met, were in keeping with the finest American traditions. The sacrifices made by Maj. Art Schwalm and observer Randy Sanchez were particularly dramatic: their search plane crashed in the mountains, seriously injuring both men and partially paralyzing Sanchez.

"Greater love hath no man than this, that a man lay down his life for his friends," the Bible tells us for 40 years, CAP members like Randy Sanchez and Art Schwalm have risked life and limb for their friends, the Ameri-

can people. I salute them on this anniversary.●

REAGANOMICS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. AuCOIN. Mr. Speaker, in its issue of November 30, Business Week magazine published an article about President Reagan's economic recovery program.

Since Congress will soon be reconsidering a continuing resolution and debating additional budget cuts sought by the administration, I urge my colleagues to read this article. I insert the entire text in the RECORD.

The article follows:

[From Business Week, Nov. 30, 1981]

REAGANOMICS RACES THE CLOCK

Although the Reagan Administration moved swiftly to silence Office of Management & Budget Director David A. Stockman after he publicly undercut President Reagan's contention that he could cut taxes, raise defense spending, and balance the budget in the foreseeable future, the damage done by Stockman's revelations in The Atlantic Monthly may be irreparable. Stockman's sin was to admit openly what many in the business community and on Capitol Hill had already come to realize; that the short-term effect of Reaganomics is to produce enormous budget deficits and that the Administration has no viable plan to deal with them.

President Reagan is not prepared to make a U-turn in economic policy right now, and there will be little pressure on him to do so. With the economy in a deep slide—November housing starts hit a 15-year low (page 46)— no one will be asking for spending cuts or tax increases soon. But the size of future budget deficits make almost inevitable major policy initiatives in the budget for fiscal 1983 that will go to Congress two months from now. These could include:

A draconian fiscal 1983 budget that will make sharp slashes in a wide range of nondefense spending, including programs of vital interest to business.

A possible cap for safety-net programs other than Social Security.

Tacit acceptance of smaller increases in defense spending than originally proposed by the Administration.

New attempts to raise revenues by closing loopholes, particularly those that benefit business and wealthy individuals; one possible candidate for extinction is the leasing provision of the tax act.

A reassessment of Reagan's policy has long been unavoidable. But the recession, with its devastating impact on the budget deficit, is forcing the Administration's hand. Even before the economy's slide became obvious, Stockman's budget watchers at the Office of Management and Budget were looking at steadily mounting deficits. By August, before the course the economy would take this fall was known, the OMB realized that the 1982 deficit could not be held to the Administration's projection of $42.5 billion. With the recession now draining receipts and driving up expenditures, the OMB expects this year's deficit to be at least $80 billion and perhaps $100 billion. Without further budget cuts, the deficit grows in future years, reaching $145 billion in fiscal 1984.

Even the measures now under consideration at the White House will not close a budget gap of this magnitude. As Stockman was quoted as saying in the Atlantic article, even after 20 social programs had been killed and 25 more cut in half, "huge bites . . . would have to be taken out of Social Security. I mean really fierce blood-and-guts stuff. . . . And it still didn't add up to $40 billion." Concedes one dispirited senior Reagan aide: "Maybe what we'll have to do is live with those big deficits."

OBSTACLES

That will not be easy. The Administration is counting on a robust recovery starting in the middle of next year—well before the midterm congressional elections—to save it from economic and political disaster. Reagan still believes in his program and thinks that the combination of scheduled installments of the tax cuts, rising defense spending, and lower interest rates and inflation will produce a dramatic turn-around by next summer. "Reagan has great faith in his program and thinks it's going to work," says Senator Paul Laxalt (R.-Nev.). "Whenever anyone tries to get him to waiver, he comes down hard."

But Reagan's faith will not make the financial markets believe, and their skepticism casts a cloud over the recovery. Although interest rates are currently plunging, the specter of deficits and a potential clash between an expansive fiscal policy and monetary restraint continues to haunt the financial community. Investors' expectations that large deficits mean high inflation rates is one reason why long-term interest rates have dropped much less than the short end of the market.

The major risk to the Administration, pointed out by Stockman in his unsuccessful bid for a policy change in early November is that growing private credit demand will collide with the Treasury's vast borrowing needs and the Fed's continued tight rein on the money supply early in the recovery.

The problem could come even earlier than that. The Fed currently is trying to get money growth up into its target range but, as is often the case during recessions, this is proving difficult to do. Many Fed watchers believe that the central bank will not let rates plunge very much further, both because it wants to keep short-term rates a point or two above the rate of inflation and because a continued decline would begin to put serious downward pressure on the dollar in international money markets. Although sticky interest rates could prolong the recession or abort the recovery, the Fed feels it has little room to become more accommodative until the pressure caused by large deficits abates.

The Administration hopes to make the best of those deficits by using them as a spur to goad Congress to act on further spending cuts next year. The magnitude of the cuts that will be proposed is now becoming clear. The Commerce Department, which lost one-third of its budget this year, faces the elimination or sharp reduction of its trade development programs. "If we get into trying to cut the trade or economic areas, it will backfire on the taxpayers," says Commerce Secretary Malcolm Baldrige. Even so staunch a Reaganite as Environmental Protection Administrator Anne M. Gorsuch was shocked when OMB more than doubled her proposed cut in the EPA research budget to 44 percent.

ASSIGNING BLAME

But cuts of this size will be hard for Congress to swallow in the middle of a recession and with an election only months away. "They are clearly pursuing an anti-Congress strategy," says a Senate GOP aide.

The price Congress will exact for any major new budget cuts will be measures to raise substantial new revenues beginning in 1983. Reagan remains opposed to any change in the basic 1981 personal tax cuts or to the adoption of a broad-based consumption tax—he is reluctant to accept any tax increases. But if the President clings tenaciously to his belief that the supply-side program can still work without changes. Congress may seize the economic policy initiative and take his program apart piece by piece.●

PEARL HARBOR DAY

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. PORTER. Mr. Speaker, 40 years ago today the Japanese launched a devastating aerial strike over Pearl Harbor on the island of Oahu, in the territory of Hawaii: 2,403 Americans, most of them sailors on the battleships, were left dead or dying; 1,778 more had been wounded. Our Pacific Fleet, regarded for two decades as the essential element to American success in a Pacific war, had been dealt a mortal blow. It was, at that time, the worst disaster in military annals of the United States.

The Japanese seriously miscalculated the extent to which the attack on Pearl Harbor would serve to unite the American people, who, following the declaration of war on Japan the following day, were determined to fight, and eventually, to win. Suddenly our country was seized with the grave realization that our geographic isolation could no longer be relied upon as the guarantee of our security. Faced with an intolerable threat and the potential loss of life as we knew it, our Nation felt compelled to defend itself and the rest of the democratic world.

These events of 40 years ago and those 12 million who served us then should be looked back upon as a reminder and as an inspiration. Those brave men who served us throughout World War II did so believing that our country was, above all, well worth fighting for. Our gratitude goes to all who realized the value of being citizens of this bountiful and free land and who fought to preserve it. It is our privilege to be the recipients of this sacred heritage and our duty to continue as its faithful guardian.●

THE U.S. SPACE CHALLENGE: CAN IT BE MET?

HON. KEN KRAMER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. KRAMER. Mr. Speaker, today is the 40th anniversary of the bombing of Pearl Harbor, "a date which will live in infamy" as President Roosevelt so aptly put it. Our losses were tremendous: more than 2,400 dead, 18 ships either sunk or badly damaged, 188 planes demolished and another 159 damaged. This tragedy was particularly painful because if we had not been so woefully unprepared, we may have averted it. Storm warnings were there, yet they were either ignored, wrongfully interpreted or negligently handled. As a matter of fact, even at the last minute, when the soldier manning the island's radar post reported sighting the incoming Japanese planes, his observation was dimissed as "nothing to worry about."

Indeed, throughout our history, our most serious losses have been sustained because we were unprepared. We are thankful that the only loss was to our pride and property when American hostages were seized in Iran. Nevertheless, the sacking of our embassy was a very recent example of lack of unpreparedness. From all reports, the State Department was duly forewarned about the danger to our diplomats in that country, yet we did nothing to tighten up security.

For reasons that I fail to fathom, we seem to dislike thinking of unpleasant things and to believe that, if we ignore them they will go away. This is thinking that needs to be changed. We are presently living in a world fraught with danger, and we must be thoroughly prepared to meet this danger in order to protect our lives and the lives of our children. Because, to be unprepared at this time could result in much higher losses than we have ever suffered before—even the destruction of our people and our society.

That is why today I am proposing legislation which is critical to the defense of our homeland, a subject which has been neglected for much too long.

My bill would do several things. First, it would change the name of the U.S. Air Force to the U.S. Aerospace Force and would give the Aerospace Force two new missions—homeland defense and space control. Second, it would instruct the Secretary of the new Aerospace Force to study the feasibility and desirability of establishing a separate space command within this service. In my opinion, these missions are critical to American survival in a dangerous and unpredictable strategic era.

Let me expand on the reasoning behind the bill.

First, our current military space program is badly fragmented. There are at least 13 separate organizations in the Air Force alone that are now involved in space planning and activity functions, in addition to 12 more focal points for military space planning elsewhere in the other services and in both DOD and non-DOD agencies. As a result, our military space programs are fragmented, duplicative and without a strong advocate.

The bill I am proposing would not only help consolidate Air Force space programs, but would also provide this service with an organizational transition from an air-dominant perspective to an "aerospace" orientation.

Second, the Soviet military space program, which is moving ahead rapidly, poses a considerable risk for the United States. According to the recent Department of Defense publication, Soviet Military Power, the Soviets have a "vigorous and constantly expanding military space program." During the last decade, they have launched four to five times as many spacecraft as the United States, 70 percent of which serve in a purely military role.

Particularly disturbing is an article in the November 30 issue of Aviation Week & Space Technology, which indicates the Soviets for the first time have military weapons based in space. The magazine says that Cosmos 1,267, which has been docked to the Salyut 6 Space Station since June 19, "is equipped with clusters of interceptor vehicles that could destroy U.S. spacecraft." Thus, the Soviets now possess antisatellite and possibly antimissile capabilities permanently based in space. In addition, they have at least one and possibly two more operational antisatellite systems when we will not have any antisatellite capability before 1985–86.

Moreover, the Soviets have also spent considerable resources in recent years developing a super booster capable of launching heavy payloads, such as laser weapons, into orbit and are on the verge of launching a 12-man space station that could be used to support both defensive and offensive weapons in space.

All this comes at a time when our strategic and tactical forces have become increasingly dependent on space for surveillance, early warning, and communications. In fact, we have become so space dependent—while at the same time having no way to protect these valuable assets—that we are openly inviting the Soviets to "Pearl Harbor" us in space. Such an attack would cripple us far beyond what the Japanese naval attack did 40 years ago, in a much simpler technological era.

Third, I believe that our military strategy should once again emphasize the need for homeland defense, and the best way to do this is through space. Despite the fact that most Americans believe that our military would be prepared to defend the American homeland against a Soviet missile or bomber attack, the blunt truth is that for the last decade and a half we have consciously dismantled our defensive capabilities. Instead, we have pursued a purely offensive strategy—aptly dubbed MAD (mutal assured destruction). As a result, U.S. missile and air defenses, not to mention civil defenses, are virtually nonexistent.

It is imperative that we abandon the strategy of putting all our eggs in an offensive weapons basket and again concentrate a significant amount of our resources on defense. Among the possible defensive technologies that we should be looking at in this regard are space-based lasers, ground lasers with orbital reflector mirrors, on-orbit homing interceptors, long-range ABM's launched from U.S. territory, et cetera.

Meanwhile, the United States must also be prepared to defend its homeland and its citizens from "Qadhafi-type" regimes and terrorist organizations that could acquire technologically advanced weapons to use against us.

For all these reasons, I believe it is essential that the current U.S. Air Force evolve into an "Aerospace Force."

Pearl Harbor 1941 was one of the most tragic days in our history. We must make sure that we will not have another Pearl Harbor, a Pearl Harbor that potentially can be a hundred times, a thousand times more disastrous than the first one. The one way to do this is to be prepared. The airplane made air the high ground of 20th century warfare. In any future confrontation, space will be the high ground. The purpose of my bill is to make sure that we hold this high ground to avoid a Pearl Harbor in space and to be able to defend the American people against attack.●

NUCLEAR NONPROLIFERATION

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. BOLAND. Mr. Speaker, nuclear nonproliferation is one of the most difficult and significant problems facing the Nation today. One voice of reason in the intense national debate over this issue is that of George F. Kennan, former U.S. Ambassador to the Soviet Union. On November 16, 1981, Ambassador Kennan gave an address at Dartmouth College in which be expressed his views on the nuclear

arms race. I believe that his sound remarks are worthy of the Members' attention. I would like to include the remarks in the RECORD at this point, as they appeared in the Boston Globe of Sunday, November 29, 1981, along with columnist Tom Wicker's reactions to the address, which appeared in the New York Times on Wednesday, December 2, 1981.

The material follows:

BEYOND THE SHADOW OF THE ATOM

(By George F. Kennan)

(George F. Kennan, former U.S. Ambassador to the Soviet Union and to Yugoslavia, delivered the following address on Nov. 16—two days before President Reagan's proposal that the Soviet Union join the United Stated in a mutual reduction of theater nuclear weapons in Europe—on the occasion of his receiving the Grenville Clark Prize in Hanover, N.H.)

Nearly a quarter of a century ago, as many of you will recall, Grenville Clark and Louis Sohn put forward in a monumental work entitled "World Peace through World Law," their ideas for a program of universal disarmament and for a system of world law to replace the chaotic and dangerous institution of unlimited national sovereignty upon which international life was then and is now based.

To many of us, these ideas looked, at the time (1958), impractical, if not naive. Today, two decades later, and in the light of what has occurred in the interval, the logic of them is more compelling. It is still too early, I fear, for their realization on a universal basis; but efforts to achieve the limitation of sovereignty in favor of a system of international law on a regional basis are another thing; and when men begin to come seriously to grips with this possibility, it is to the carefully thought out and profoundly humane ideas of Grenville Clark and Louis Sohn that they will have to turn for inspiration and guidance.

However, my purpose is not to deal with the historical significance of this vision of the future, in its entirety, but rather to recall one passage of it which has obvious relevance to this present moment. This is a passage which occurred in the final sections of Grenville Clark's preface to the substantive parts of the book; and it concerned nuclear weaponry. After describing the appalling dimensions of the nuclear weapons race, even as it then existed, he went on to express his belief that if the various governments did not find ways to put a stop to this insanity, the awareness of the indescribable dangers it presented would some day, as he put it, "penetrate the general masses of the people in all nations" with the result that these masses would begin to put increasing, and indeed finally irresistible, pressure on their governments to abandon the policies that were creating this danger and to replace them with more hopeful and constructive ones. And the dominant motivation for this great reaction of public opinion would be, as he saw it, (and here, I am quoting his words) ". . . not fear, in the ordinary sense, but rather a growing exasperation over the rigidity and traditionalism which prevent the formulation of adequate plans to remove so obvious a man-made risk."

A PROPHECY BEING FULFILLED

How prophetic these words were, as a description of what we are witnessing today. The recent growth and gathering strength of the antinuclear-war movement here and in Europe is to my mind the most striking phenomenon of this beginning decade. It is all the more impressive because it is so extensively spontaneous. It has already achieved dimensions which will make it impossible for the respective governments to ignore it. It will continue to grow until something is done to meet it.

Like any other great spontaneous popular movement, this one has, and must continue to have, its ragged edges, and even its dangers. It will attract the freaks and the extremists. Many of the wrong people will attach themselves to it. It will wander off in many mistaken directions. It already shows need of leadership and of organization.

But it is idle to try to stamp it, as our government seems to be trying to do, as a Communist-inspired movement. Of course, Communists try to get into the act. Of course, they exploit the movement wherever they can. These are the political tactics. But actually, I see no signs that the Communist input into this great public reaction has been of any serious significance.

Nor is it useful to portray the entire European wing of this movement as the expression of some sort of vague and naively unrealistic sentiment. There is some of that, certainly; but where there is, it is largely a reaction to the negative and hopeless quality of our own Cold War policies, which seem to envisage nothing other than an indefinitely increasing political tension and nuclear danger. It is not surprising that many Europeans should see no salvation for themselves in this sterile perspective and should cast about for something that would have in it some positive element—some ray of hope.

Nor does this neutralist sentiment necessarily represent any timorous desire to accept Soviet authority as a way of avoiding the normal responsibilities of national defense. The cliche of "better Red than dead" is a facile and clever phrase: but actually, no one in Europe is faced with such a choice, or is likely to be. We will not be aided in our effort to understand Europe's problems by distortions of this nature. Our government will have to recognize that there are a great many people who would accept the need for adequate national defense but who would emphatically deny that the nuclear weapon, and particularly the first use of that weapon, is anything with which a country could conceivably defend itself.

No—this movement against nuclear armaments and nuclear war may be ragged and confused and disorganized; but at the heart of it lie some very fundamental, reasonable and powerful motivations: among them a growing appreciation by many people for the true horrors of a nuclear war; a determination not to see their children deprived of life, and their civilization destroyed, by a holocaust of this nature; and finally, as Grenville Clark said, a very real exasperation with their governments for the rigidity and traditionalism that causes those governments to ignore the fundamental distinction between conventional weapons and the weapons of mass destruction and prevents them from finding, or even seriously seeking, ways of escape from the fearful trap into which the nuclear ones are leading us.

Such considerations are not the reflections of Communist propaganda. They are not the products of some sort of timorous neutralism. They are the expression of a deep instinctive insistence, if you don't mind, on sheer survival—on survival as individuals, as parents, and as members of a civilization.

Our government will ignore this simple fact at its peril. This movement is too powerful, too elementary, and too deeply embedded in the human instinct for self-preservation, to be brushed aside. Sooner or later, and the sooner the better, all the governments on both sides of the East-West division will find themselves compelled to undertake the search for positive alternatives to the insoluble dilemma which any suicidal weaponry presents, and can only present.

Do such alternatives exist?

Of course they do. One does not have to go far to look for them. A start could be made with deep cuts in the long-range strategic arsenals. There could be a complete denuclearization of Central and Northern Europe. One could accept a complete ban on nuclear testing. At the very least, one could accept a temporary freeze on the further build-up of these fantastic arsenals. None of this would undermine anyone's security.

These alternatives, obviously, are not ones that we in the West could expect to realize all by ourselves. I am not suggesting any unilateral disarmament. Plainly, two—and eventually even more than two—will have to play at this game.

A FUNDAMENTAL CHANGE IN U.S. OUTLOOK

What is involved for us in the effort to turn these things around is a fundamental and extensive change in our prevailing outlooks on a number of points, and an extensive restructuring of our entire defense posture.

What would this change consist of?

We would have to begin by accepting the validity of two very fundamental appreciations. The first is that there is no issue at stake in our political relations with the Soviet Union—no hope, no fear, nothing to which we aspire, nothing we would like to avoid—which could conceivably be worth a nuclear war, which could conceivably justify the resort to nuclear weaponry. And the second is that there is no way in which nuclear weapons could conceivably be employed in combat that would not involve the possibility—and indeed the prohibitively high probability—of escalation into a general nuclear disaster.

If we can once get these two truths into our heads, then the next thing we shall have to do is to abandon the option of the first use of nuclear weapons in any military encounter. This flows with iron logic from the two propositions I have just enunciated. The insistence on this option of first use has corrupted and vitiated our entire policy on nuclear matters ever since such weapons were first developed. I am persuaded that we shall never be able to exert a constructive leadership in matters of nuclear arms reduction or in the problem of nuclear proliferation until this pernicious and indefensible position is abandoned.

And once it has been abandoned, there will presumably have to be a far-reaching restructuring of our armed forces. The private citizen is of course not fully informed in such matters; and I make no pretense of being so informed. But from all that has become publicly known, one can only suppose that nearly all aspects of the training and equipment of those armed forces, not to mention the strategy and tactics underlying their operation, have been affected by the assumption that we might have to fight—indeed, would probably have to fight—with nuclear weapons, and that we might well be the ones to inaugurate their use. A great deal of this would presumably have to be turned around—not all of it, but much of it, nevertheless. We might, so long as others retained such weapons, have to retain them

ourselves for purposes of deterrence and reassurance to our people. But we could no longer rely on them for any positive purpose even in the case of reverses on the conventional battlefield; and our forces would have to be trained and equipped accordingly.

There is something else, too, that will have to be altered, in my opinion, if we are to move things around and take a more constructive posture; and that is the view of the Soviet Union and its peoples to which our governmental establishment and a large part of our journalistic establishment have seemed recently to be committed.

On this point, I would particularly like not to be misunderstood. I do not have, and have never had, sympathy for the ideology of the Soviet leadership. I recognize that this is a regime with which it is not possible for us to have a fully satisfactory relationship. I know that there are areas of interaction where no collaboration between us is possible, just as there are other areas where one can collaborate. There are a number of Soviet habits and practices which I deeply deplore, and which I feel we should resist firmly when they impinge on our interests. I recognize, furthermore, that the Soviet leadership does not always act in its own best interests—that it is capable of making mistakes, just as we are, and that Afghanistan is one of those mistakes, and one which it will come to regret, regardless of anything we may do to punish it.

Finally, I recognize that there has recently been a drastic and very serious deterioration of Soviet-American relations—a deterioration to which both sides have made their unhappy contributions. And this, too, is something which it will not be easy to correct: for it has led to new commitments and attitudes of embitterment on both sides. The almost exclusive militarization of thinking and discourse about Soviet-American relations that now commands the behavior and the utterances of statesmen and propagandists on both sides of the line—a militarization which, it sometimes seems to me, could not be different if we knew for a fact that we were unquestionably to be at war within a matter of months: this in itself is a dangerous state of affairs, which it is not going to be easy to correct. So I don't think I underestimate the gravity of the problem.

But, all this being said, I must go on and say that I find the view of the Soviet Union that prevails today in our governmental and journalistic establishments so extreme, so subjective, so far removed from what any sober scrutiny of external reality would reveal, that it is not only ineffective but dangerous as a guide to political action. This endless series of distortions and oversimplifications; this systematic dehumanization of the leadership of another great country; this routine exaggeration of Moscow's military capabilities and of the supposed iniquity of its intentions; this daily misrepresentation of the nature and the attitudes of another great people—and a long-suffering people at that, sorely tried by the vicissitudes of this past century; this ignoring of their pride, their hopes—yes, even of their illusions (for they have their illusions, just as we have ours; and illusions, too, deserve respect); this reckless application of the double standard to the judgment of Soviet conduct and our own; this failure to recognize the communality of many of their problems and ours as we both move inexorably into the modern technological age; and this corresponding tendency to view all aspects of the relationship in terms of a supposed total and irreconcilable conflict of concerns and aims: these, believe me, are not the marks of the maturity and realism one expects of the diplomacy of a great power; they are the marks of an intellectual primitivism and naivete unpardonable in a great government—yes, even naivete, because there is a naivete of cynicism and suspicion just as there is a naivete of innocence.

Time is not waiting for us. The fragile nuclear balance that has prevailed in recent years is being undermined, not so much by the steady buildup of the nuclear arsenals on both sides (for they already represent nothing more meaningful than absurd accumulations of overkill), but rather by technological advances that threaten to break down the verifiability of the respective capabilities and to stimulate the fears, the temptations, and the compulsions, of a "first strike" mentality.

But it is important for another reason, too, that we get on with these changes. For beyond all this, beyond the shadow of the atom and its horrors, there lie other problems—tremendous problems—that demand our attention. There are the great environmental complications now beginning to close in on us: the question of what we are doing to the world oceans with our pollution, the problem of the greenhouse effect, the acid rains, the question of what is happening to the topsoil and the ecology and the water supplies of this and other countries. And there are the profound spiritual problems that spring from the complexity and artificiality of the modern urban-industrial society—problems that confront both the Russians and ourselves, and to which neither of us has as yet responded very well. One sees on every hand the signs of our common failure. One sees it in the cynicism and apathy and drunkenness of so much of the Soviet population. One sees it in the crime and drug abuse and general decay and degradation of our city centers. To some extent—not entirely but extensively—these failures have their origins in experiences common to both of us.

And they, too, will not wait. Unless we both do better in dealing with them than we have done to date, even the banishment of the nuclear danger will not help us very much. Can we not cast off our preoccupation with sheer destruction—a preoccupation that is costing us our prosperity and preempting the resources that should go to the progress of our respective societies—is it really impossible for us to cast off this sickness of blind military rivalry and to address ourselves at long last, in all humility and in all seriousness, to setting our societies to rights?

For this entire preoccupation with nuclear war—a preoccupation which appears to hold most of our government in its grip—is a form of illness. It is morbid in the extreme. There is no hope in it—only horror. It can be understood only as some form of subconscious despair on the part of its devotees—a readiness to commit suicide for fear of death—a state of mind explicable only by some inability to face the normal hazard and vicissitudes of the human predicament—a lack of faith, where countless generations of our ancestors found it possible to have it.

I decline to believe that this is the condition of the majority of our people. Surely there is among us, at least among the majority of us, a sufficient health of the spirit—a sufficient affirmation of life, of its joys and excitements together with its hazards and uncertainties, to permit us to slough off this morbid preoccupation, to see it and discard it as the sickness it is, to turn our attention to the real challenges and possibilities that loom beyond it, and in this way to restore to ourselves a sense of confidence and belief in what we have inherited and what we can be.

A Voice of Rationality

(By Tom Wicker)

As theater missile negotiations begin in Europe, neither the Soviet Union nor the United States has categorically rejected the proposals of the other, and both say they seek substantial reductions.

The Reagan Administration, moreover, has muted its talk of regaining nuclear superiority, and is proposing major cuts in strategic weapons. Negotiations on that subject will resume in January.

Does all this suggest that the monement may be ripening for a break in the ominously spiraling nuclear arms competition? Given its momentum on both sides, that may be unlikely; but several factors suggest at last the possibility:

The Soviet Union's economic troubles and its mounting problems in Poland and Afghanistan.

The effect in Moscow of the Reagan Administration's tough talk and its beginning military buildup.

The European anti-nuclear movement, threatening the cohesion of NATO and offering Moscow fertile field for propaganda.

Soviet achievement of nuclear parity—or superiority, in the American view—in the European theater.

Even more important may be the frightening growth of nuclear arsenals on both sides, giving no comfort to either. This buildup is widely recognized as ultimately suicidal—not for any nation or political system but for mankind.

The use of these doomsday weapons would be so cataclysmic, Churchill warned, that "the living would envy the dead." Yet history argues that so many weapons poised against one another cannot forever be held immune to accident, misunderstanding, demented policy or a gradual escalation of violence that no one intended.

So, George Kennan said recently, in a speech that received too little attention, "Sooner or later, all the governments on both sides of the East-West division will find themselves compelled to undertake the search for positive alternatives to the insoluble dilemma which any suicidal weaponry presents, and can only present."

Mr. Kennan pointed out that, contrary to some despairing views, the superpowers do have practical choices other than the extremes of a continuing arms race involving both, or unilateral disarmament by either. Speaking at Dartmouth College after receiving the Grenville Clark Award, he outlined several such alternatives—none of which, he argued, "would undermine anyone's security."

Deep mutual cuts in long-range strategic arsenals, which Mr. Reagan proposed in general terms on Nov. 18; Mr. Kennan has suggested a 50 percent reduction in Soviet and American nuclear arsenals, leaving each in relatively the same position against the other.

The denuclearization of Central and Northern Europe.

A complete ban on nuclear testing; a Soviet-American draft treaty has been negotiated but not ratified.

A temporary freeze on the further build-up of nuclear arsenals.

But before the nation could take any such steps in order to reduce the likelihood of nuclear war, Mr. Kennan warned, a "fundamental and extensive" change of views would be required, as well as a substantial rebuilding of the American defense posture.

First, he said, the idea would have to be accepted that "there is no issue at stake in our political relations with the Soviet Union—no hope, no fear, nothing to which we aspire, nothing we would like to avoid—which could conceivably be worth a nuclear war" that could only destroy both countries and modern civilization. Not *any* war, but no *nuclear* war—a far different proposition from the silly "better Red than dead" slogan.

Second, a recognition that "there is no way in which nuclear weapons could conceivably be employed in combat that would not involve the possibility—and indeed the prohibitively high probability—of escalation into a general nuclear disaster." This has just been supported by a report from the respected—and not dovish—Institute for Strategic Studies in London that the use of nuclear weapons, once begun, could not be "controlled."

But flowing, as Mr. Kennan said, "with iron logic" from these propositions would be a decision "to abandon the option of the first use of nuclear weapons in any military encounter"—a decision the West has never been willing to make, owing to Soviet superiority in conventional armaments.

Nevertheless, insistence on this "pernicious and indefensible position," in Mr. Kennan's view, "has corrupted and vitiated our entire policy on nuclear matters." And its abandonment would force the United States and the West into greater reliance on conventional forces and weapons.

The distinguished former diplomat, one of the most experienced authorities on the Soviet Union, argued eloquently for a more nature and realistic American view of that great country. But even in the present "militarization of thinking and discourse about Soviet-American relations," George Kennan's repeated pleas for nuclear sanity sound more and more like the most decent and rational instincts of mankind.●

LEGISLATION TO IMPROVE ROYALTY COLLECTION PROCESS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. MARKEY. Mr. Speaker, I am introducing legislation today to improve the royalty collection process through which the United States collects the money owed it for oil and gas and other minerals produced on Federal lands. Over this past year, I have been actively involved in studying the collection process which is managed by the U.S. Geological Survey. The system is in unbelievable disarray. In joint public hearings with my colleague, Mr. SANTINI, it has been reported in sworn authoritative testimony that the USGS has, for at least two decades, failed to collect all of the royalties to which the Federal Government, the States, and many Indian tribes are entitled. Further, there is very little indication we can expect any immediate improvement. Many of the States and Indian tribes indicated they could do a better job of collecting royalties themselves.

Next to the IRS, no other Federal agency collects the amount of money the USGS is responsible for collecting. By 1990, it is estimated conservatively that U.S. royalties will be $23 billion annually. Losses are generally estimated at 10 percent. The General Accounting Office, the Inspector General's Office, and others have been issuing a stream of reports detailing the shortcomings of this collection process for over 20 years. Without rehashing all of these shortcomings and commenting on the many recommendations that have come before our subcommittees, it has become apparent that several problems are salient.

First, the system clearly lacks the basic means to establish in all cases who owes money to the Government, how much they owe, or whether or not they have paid what they owe.

Second, poor management practices within the Geological Survey have made it difficult to develop and enforce rules necessary to insure the security and integrity of the oil production system itself, or to insure the gathering of the data necessary for accurate establishment of royalties owed.

Third, efforts to reform the royalty system do not appear to be giving adequate priority to some of the most critical elements necessary for an immediate improvement of collection and verification capabilities.

The legislation I am introducing with Mr. SANTINI today is a necessary step toward correcting these problems. It will require the same sound management practices within the Government that we demand of our business community.

First, this legislation will incorporate within USGS standard financial and accounting safeguards of personal liability, bonding, and independent CPA audits. These requirements are met by many of the States which testified before our subcommittees, and it is time that the Federal Government starts to meet them as well.

Second, those States which have the capability will be given the authority, subject to Federal audit guidelines, to collect these royalties which are due, and then to remit to the U.S. Treasury the 50 percent—10 percent in the case of Alaska—due to the Federal Government. Several States have indicated that they could, and would like to, do a better job than USGS in collecting royalties. I strongly believe the States should be given the opportunity to manage these programs, since they have a major impact on State revenues.

Third, it will grant USGS the authority to designate a principal lessee for each lease, whose responsibility it will be to report and make royalty payments on its particular lease. This will eliminate the antitrust problems USGS stated prevented such useful simplification of its system.

Fourth, it will give Indians or their designated agents full access to USGS records relative to production or sales from their respective leases. Such access has been difficult for them to obtain in the past, even though they are the actual owners of the land being leased in these cases.

Fifth, it will grant the Department of the Interior explicit authority to track oil and gas produced from Federal properties to refineries in order to insure accurate reporting and payment of royalties by producers. Once again, we heard testimony that this was already required, and very effective, in some of the States with respect to their own oil and gas leases.

Finally, it will establish reasonable civil penalties for compliance violations without forcing USGS to shut-in a lease to insure compliance by the lessee.

Mr. Speaker, we cannot tolerate poor management practices in the Federal Government. It fosters abuse and fraud. In today's environment we should not, and indeed we cannot afford to, eliminate basic social programs while we fail to collect moneys rightly owed the public whose interest we represent. I invite my colleagues to join with us in this war of fiscal mismanagement by cosponsoring this legislation:

H.R. 5121

A bill to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I.—FEDERAL ROYALTIES COLLECTION

SECTION 101. This title may be cited as the "Federal Royalties and Rents Collection Act of 1981".

SEC. 102. As used in this title, the term—

(1) "Secretary" means the Secretary of the Interior.

(2) "Department" means the Department of the Interior.

(3) "Independent certified public accountant" means any independent public accountant certified or licensed by the regulatory authority of a State.

(4) "Mineral owned in whole or in part by the United States" includes any mineral resource held in trust for an Indian or Indian tribe.

SEC. 103. (a) The Secretary shall establish a comprehensive system of accounts applicable to—

(1) all mineral interests owned in whole or in part by the United States the sale, lease,

or other disposal of which is under the Secretary's jurisdiction, and

(2) all revenues, including fees and deposits, owed to or collected by the Secretary from, or in conjunction with, the sale, lease, or other disposal of such mineral interests.

Upon promulgation of such system of accounts, the Secretary shall submit a report to Congress detailing the scope, purpose, and composition of the system as well as the collection process to which the system will apply.

(b) Before conversion to the system of accounts promulgated under subsection (a), the Secretary shall submit to the Congress a report containing a statement of the outstanding account balances due and payable to the United States from the sale, lease, or other disposition of mineral interests owned in whole or in part by the United States. The Secretary shall reduce all such outstanding account balances to zero before converting the system of accounts established under subsection (a) and for such purposes, the Secretary shall maintain for an appropriate period complete records detailing well test results, LACT meter provings, well production, run tickets, tank guagings, sales, and other relevant data. Nothing in this subsection shall be construed to authorize the Secretary to forgive, or delay payment of, any amount owed to the United States.

SEC. 104. (a) Commencing with the fiscal year 1982, the Secretary shall enter into annual contracts or other appropriate annual arrangements with independent certified public accountants to undertake annual audits of all accounts of the Department relating to the sale, lease, or other disposal of any mineral owned in whole or in part by the United States the sale, lease, or other disposal of which is under the Secretary's jurisdiction. Selection of such independent certified public accountant shall be by competitive bidding. The audits carried out under this section shall be in accordance with generally accepted auditing standards. The audit for each fiscal year shall be completed, and published by the Secretary, not later than 6 months after the end of that fiscal year. To avoid conflict of interest no auditor may audit accounts of firms for which the auditor works.

(b) All books, accounts, financial records, reports, files, and other papers or things and property of the Secretary or used by the Secretary which are necessary to facilitate the audits required under this section shall be made available to the persons conducting the audits, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such persons.

(c) Nothing in this title shall be construed to affect the authority or responsibility of an Inspector General or of the Comptroller General of the United States.

(d)(1) No independent certified public accountant who has carried out an audit of any accounts under this section and no member of the same firm, association, partnership, or corporation of which such accountant is a member may enter into any contract, employment, or other financial arrangement with any person who is engaged in the purchase, lease, or other acquisition of any mineral owned by the United States during the period of such audit and for a period of one year after the completion of such audit.

(2) The Secretary shall commence a civil action to assess and recover a civil penalty of not less than $25,000 and not more than $100,000 against any certified public accountant or firm, association, partnership, or corporation which violates the prohibition contained in paragraph (1).

SEC. 105. (a) Each individual (including any agent or employee of the United States and any independent contractor) authorized to collect, receive, account for, or otherwise handle any moneys payable to or received by the Department which are derived from the sale, lease, or other disposal of any mineral owned in whole or in part by the United States shall be—

(1) liable to the United States for any losses proximately caused by the intentional, reckless, or negligent action or inaction of such individual with respect to such moneys; and

(2) required under rules promulgated by the Secretary to maintain a bond commensurate with the amount of money for which such individual could be liable to the United States, except that the amount of such bond shall not exceed $25,000.

The Secretary shall promulgate regulations under paragraph (2) not later than 6 months after the date of the enactment of this title.

TITLE II.—STATE COLLECTION OF FEDERAL ROYALTIES

SEC. 201. Section 35 of the Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 191) is amended to read as follows:

"SEC. 35. (a) The Secretary of the Interior or such officer or agency of the Department of the Interior as he may designate, shall provide for due and diligent collection of all moneys due and owing from sales, bonuses, royalties, rentals, fines, interest charges, and penalties accruing to public lands under the provisions of this Act, and for deposit of all such moneys into the Treasury of the United States, except where there is in full effect a State program for management of Federal leases, as authorized under subsection (b) hereof. As soon as practicable after March 31 and September 30 of each year, fifty per centum of all moneys so collected by the Department of the Interior shall be paid to the State within the boundaries of which the leased lands or deposits are or were located, except that Alaska shall be paid ninety per centum of the moneys so received from public lands within the boundaries of Alaska. The Secretary of the Interior shall report, as soon as practicable after March 31 and September 30 of each year, a detailed analysis of the sources of the moneys deposited into the Treasury which were derived from activities relating to public lands within each such State.

"(b) Upon request by a State, acting through such officer or agency thereof as is authorized by that State to manage the public lands of that State, including supervision of mineral production thereon, the Secretary of the Interior shall relinquish to such officer or agency the duty and responsibility of administering in any respect all or any portion of the contracts and leases entered into or issued by the Secretary respecting public lands within that State and collecting all moneys due the United States under the provisions of this Act and related Department of the Interior regulations with respect to those contracts. Such State officer or agency may thereafter exercise any power or authority relating thereto held by the Secretary of the Interior, subject to the following requirements:

"(1) As soon as practicable after March 31 and September 30 of each year, such State officer or agency shall pay into the Treasury of the United States all moneys collected pursuant to this Act as shall remain after—

"(A) provision for reimbursement to the State of all necessary expenses, including overhead reasonably allocable and all taxes lawfully paid or withheld; and

"(B) deduction of fifty per centum the amount collected, except that Alaska may deduct ninety per centum of the amount collected.

"(2) Any such State officer or agency administering contracts or leases under this section shall maintain all records and accounts pertaining to the administration of such contracts or leases as are specified by regulations to be issued by the Secretary of the Interior, and shall allow reasonable access to any such books, records, or accounts to the Secretary of the Interior, the Secretary of the Treasury, and the Comptroller General of the United States, or to such officer or agency as may be designated by any of the foregoing.

"(c) Should the Secretary of the Interior make a determination that a State is not exercising due diligence in fulfillment of its responsibilities under this section to collect the appropriate royalties and administer contracts and leases as required by law and regulations, he shall notify that State in writing. If corrective action is not taken within 60 days the Secretary shall notify the State that its authority under subsection (b) is terminated with respect to all or any portion of the contracts and leases within that State, and the Secretary shall resume his responsibilities within that State with respect to the administration of contracts and leases and the collection of moneys under this Act and related regulations.".

TITLE III.—MISCELLANEOUS AMENDMENTS TO THE MINERAL LANDS LEASING ACT OF 1920

SEC. 301. Section 17 of the Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 226) is amended by inserting at the end thereof the following:

"(k)(1) The Secretary of the Interior is authorized to promulgate regulations applicable to lessees of oil or gas leases under this Act to require—

"(A) recordkeeping practices that accurately identify the quantities and prices of oil or gas removed or sold from land subject to a lease;

"(B) use of any reasonable means necessary to assure that the removal, sale, and transportation of such oil or gas is accurately accounted for to the Secretary; and

"(C) submission of reports to the Secretary at such times as the Secretary deems appropriate setting out—

"(i) the quantities of oil or gas identified under subparagraph (A); and

"(ii) the disposition and price of oil or gas identified under subparagraph (A).

"(2) The Secretary of the Interior may monitor the removal or shipment of any gas or oil from land subject to a lease under this Act in order to carry out paragraph (1) of this subsection.".

SEC. 302. Section 17 of the Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 226) is amended by inserting at the end thereof the following:

"(l)(1) The Secretary of the Interior is authorized to designate a principal lessee (or his designee), with respect to any lease of land containing oil or gas issued under this Act, who shall be responsible to make all

royalty and lease payments to the Secretary under such lease.

"(2) Compliance with subsection (a) shall not be a violation of any provision of the Federal antitrust laws.".

SEC. 303. Section 17 of the Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 226) is amended by inserting at the end thereof the following;

"(m)(1) At the request of the Secretary of the Interior, the Attorney General or a United States attorney shall institute a civil action in the district court of the United States for the district in which the affected operation is located for a temporary restraining order, injunction, or other appropriate remedy to enforce any provision of this Act respecting any oil or gas lease, any regulation or order issued under this Act respecting any oil or gas lease, or any term of a lease issued pursuant to this Act respecting oil or gas.

"(2) If any person fails to comply with any provision of this Act respecting any oil or gas lease, or any term of a lease issued pursuant to this Act respecting oil or gas, or any regulation or order issued under this Act respecting any oil or gas lease, after notice of such failure and expiration of any reasonable period allowed for corrective action, such person shall be liable for a civil penalty of not more than $10,000 for each day of the continuance of such failure. The Secretary may assess, collect, and compromise any such penalty. No penalty shall be assessed until the person charged with a violation has been given an opportunity for a hearing.

"(3) Any person who knowingly and willfully (A) violates any provision of this Act respecting any oil or gas lease, any term of a lease issued pursuant to this Act respecting oil or gas, or any regulation or order issued under the authority of this Act respecting any oil or gas lease, (B) makes any false statement, representation, or certification in any application, record, report, or other document filed or required to be maintained under this Act respecting any oil or gas lease, (C) falsifies, tampers with, or renders inaccurate any monitoring device or method of record required to be maintained under this Act respecting any oil or gas lease, or (D) reveals any data or information required to be kept confidential by this Act respecting any oil or gas lease shall, upon conviction, be punished by a fine of not more than $100,000, or by imprisonment for not more than ten years, or both. Each day that a violation under clause (A) continues, or each day that any monitoring device or data recorder remains inoperative or inaccurate because of any activity described in clause (C), shall constitute a separate violation.

"(4) Whenever a corporation or other entity is subject to prosecution under paragraph (3), any officer or agent of such corporation or entity who knowingly and willfully authorized, ordered, or carried out the proscribed activity shall be subject to the same fines or imprisonment, or both, as provided for under paragraph (3).

"(5) The remedies and penalties prescribed in this subsection shall be concurrent and cumulative and the exercise of one shall not preclude the exercise of the others. The remedies and penalties prescribed in this subsection shall be in addition to any other remedies and penalties afforded by any other law or regulation.".

TITLE IV.—INDIAN ACCESS TO CERTAIN RECORDS

SEC. 401. Section 4 of the Act of May 11, 1938 (52 Stat. 348; 25 U.S.C. 396d) is amended by inserting "(a)" before "All" and by inserting at the end thereof the following new subsection:

"(b) The Secretary of the Interior is authorized and directed to promulgate regulations to make available, upon request, to lessees of restricted Indian lands, tribal or allotted, for mining purposes, including oil and gas, any records of the Department of the Interior respecting the production, removal, or sale of minerals from any such restricted Indian lands to the lessees of such lands.".●

TENTH DISTRICT DISTINGUISHED SERVICE AWARD RECIPIENTS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. WOLF. Mr. Speaker, as the Representative from the 10th Congressional District of Virginia and a former employee in the Department of the Interior, I would like to bring to your attention the evidence of dedication, integrity, and professionalism of our Federal employees.

Yesterday, 13 of my constituents were honored by receiving the highest award which is presented by the Department of the Interior, the Distinguished Service Award, for their exceptional achievements and major contributions to the Federal Government. The award recipients are: Paul B. Barton, Jr., Peter F. Bermel, Doyle G. Frederick, Robert J. Dingman, Rolla E. Chandler, Donald D. Anderson, George D. Lea, Donald W. Humphrey, Gerald Meyer, David B. Stewart, Norman F. Sohl, and Frederick J. Doyle.

PAUL B. BARTON, JR., GEOLOGICAL SURVEY

Dr. Barton's distinguished career has been marked by an extraordinary union of chemical imaginativeness and geological rigor, enabling him to make fundamental contributions to the understanding of the physical, chemical, and geological environment in which metallic ore deposits form. He has demonstrated an exceptional ability to apply chemical principles to geological facts so as to learn more about geological processes. As a result he has greatly advanced the knowledge of the difficult and complex subject of the origin of hydrothermal ore deposits. Because of his international recognition as an authority in the fields of hydrothermal ore deposits, of experimental geochemistry of sulfide systems, and of thermodynamic calculations for the stability of mineral associations, Dr. Barton was chosen to serve as one of the principal investigators of a Japanese-Canadian-United States team to study the volvanogenic Kuroko deposits of the Hokuroko district of Japan. As deputy for scientific programs in the Office of Mineral Resources he has applied the results of his research to critical national problems that affect the exploration of our mineral and energy resources.

PETER F. BERMEL GEOLOGICAL SURVEY

As a cartographer and administrator at survey, Mr. Bermel has provided exceptional managerial and technical leadership that has effectively complemented his extensive knowledge of, and experience in, virtually all phases of topographic mapping throughout the world. As chief of the branch of international activities with responsibility for development of topographic mapping programs in countries with as varied terrain as Brazil, Liberia, and Saudi Arabia, he developed major assistance to these countries in the establishment and evolution of their own effective mapping programs. His knowledge of existing financial, human, and technological resources coupled with an acute appreciation of the operational problems associated with developing a dynamic new computer technology has enabled him to take primary responsibility for developing an Office of Management and Budget circular which establishes the Department of the Interior as the lead agency for all Federal digital cartographic activity and for drafting legislation to establish a public enterprise fund for the digital cartography program.

DOYLE G. FREDERICK, GEOLOGICAL SURVEY

Doyle G. Frederick has effectively utilized his broad range of skills as an innovator, an organizer, and an astute manager in the achievement of a series of signal development in both Federal civilian and military mapping programs and as a principal director of one of the most highly esteemed Earth-sciences organizations. He has been instrumental in bringing the Geological Survey into the world of computer-based, digitized cartographic information and mapmaking. He led the development of achievement of compatability for noncartographic bases by digitizing the bases. He was a principal architect of the National Cartographic Information Center which assures the continued role of the Geological Survey and the Department of the Interior as the foci of domestic cartographic information.

ROBERT J. DINGMAN, GEOLOGICAL SURVEY

Mr. Dingman has contributed to the growth of hydrologic programs in the United States. He is assistant chief hydrologist for Scientific Publications and Data Management and initiated a reorganization of the divisionwide reports processing and reviewing function which has appreciably improved the water related technology transfer capabilities of the Geological Survey. He pioneered the development and use of computer applications to assimilate and analyze ground water data. His energy and innovation revitalized cooperative programs which, in New

York, grew to such proportion, technical depth, and variety that in 1978 the district numbered fourth in the country in total cooperative funding agreements. As a regional hydrologist he continued to emphasize the importance of cooperative programs, he directed the efforts of subordinate managers toward improved relations with the more than 138 State and Federal cooperating agencies in the southeastern region. Mr. Dingman also initiated one of the most extensive regional aquifer system analysis programs in the Nation. His entire career has enhanced the stature of the Geological Survey throughout the water-science world.

ROLLA E. CHANDLER, LAND MANAGEMENT

During his career of 30 years, Mr. Chandler is a recognized authority on lands and realty issues in the Bureau of Land Management. His ability to conceive, develop, and execute new and more efficient procedures for accomplishing the Bureau's objectives has become his trademark. His leadership has been crucial to policy and program development in the areas of sign trespass and minerals trespass abatement, early land use planning, withdrawal review, and environmental review. Mr. Chandler had a prominent role in determining policy direction resulting from the passage of the Classification and Multiple Use Act of 1964, the establishment of the Public Land Law Review Commission, and the Public Land Sale Act. He implemented this new direction by making organizational changes and combining functions to create a new organizational structure that became the Bureau's Division of Technical Services.

DONALD D. ANDERSON, BUREAU OF RECLAMATION

Mr. Anderson's sound judgment, technical abilities, and leadership have contributed significantly to a broad range of administrative management activities. Programs which have flourished under his positive influence and direction include budgeting; program coordination; financial administration; personnel management; automatic data processing; and safety and health. Under his leadership the budgetary process became an increasingly vital management instrument; the Bureau's personnel programs and processes have contributed significantly to substantive functions; the Bureau developed a sophisticated and superbly documented automated payroll and personnel information system; and safety and health consideration were recognized as the responsibility of every manager. High ranking officials have consistently sought and greatly valued his counsel on a wide range of issues including budgeting, programing, finance, and other management issues.

GEORGE D. LEA, BUREAU OF LAND MANAGEMENT

Mr. Lea's innovative leadership in the field of natural resource management, effective and efficient guiding of the Bureau of Land Management through periods of major change have highlighted his 29 years of service. He played a major role in the passage of the Federal Land Policy Management Act; effectively spearheaded the Organic Act Steering Committee which interpreted and implemented the act, thereby setting BLM's general direction in the 1970's and early 1980's; was deeply involved in the passage of the Public Rangelands Improvement Act and BLM's subsequent new rangeland strategy. He superbly guided the development and establishment of the Bureau's initial guidelines for wilderness review of public lands and supported the designation of the Upper Missouri River as a component of the National Wild and Scenic Rivers System. His superior coordination abilities allowed public land conveyances to Alaskan Natives at an accelerated level. Mr. Lea has served his country with great distinction in the area of international natural resource management.

JOHN G. TKACH, BUREAU OF LAND MANAGEMENT

Mr. Tkach has been a competent and resourceful leader and has been called upon to lead the development of major program initiatives within the Heritage Conservation and Recreation Service. He has made substantial contributions to the preservation and protection of the Nation's natural and recreational resources; such as, an active participation in the establishment of the land and water conservation fund, the development of the first nationwide outdoor recreation plan, establishment of the Wild and Scenic Rivers and National Trails Systems, establishment of the policy and direction of numerous study areas to determine the national significance and Federal role in their protection, and staff director for the Lewis and Clark Trail Commission. Through his efforts, a new priority criteria system was created to allocate $360 million annually for the LWCF, new partnerships for the protection of land have been encouraged among all levels of Government and the private sector, and recreation use of excess or surplus Federal real property has been promoted.

DONALD W. HUMPHREY, NATIONAL PARK SERVICE

Mr. Humphrey, a senior planner of the National Park Service, has had a pronounced influence on the philosophy and application of the general management plan and new area study programs in the National Park Service. He has brought about an understanding of the proper role of each of the programs and has advocated rigid application of each on the basis of objectivity, need, and cost effectiveness. In 1975, Mr. Humphrey provided the necessary planning and design expertise to assist the Saudi Arabian Government in the development of the first national park in the Arab world. He undertook a $2.5 million program that provided policy and planning guidance to: articulate administration and service priorities and goals; assure attention to significant trends and conditions affecting planning; and assure that proposals are well conceived, cost effective, and reflect servicewide budgetary goals and constraints. Through Mr. Humphrey's untiring efforts and determination, the National Park Service has gained recognition from Members of Congress, conservation organizations, other agencies, and individuals as a leading Federal organization in the field of planning, the process whereby the National Park Service provides a rational basis for determining the best futures of the nationally significant areas that have been set aside as units of the National Park System.

GERALD MEYER, GEOLOGICAL SURVEY

Mr. Meyer is a recognized leader in the field of ground water hydrology and a nationally and internationally renowned hydrologist who has tremendous influence on the development of ground water resources throughout the national and in the international arena. He helped design a long-range program for water resources investigations and water management requirements for Nigeria. He established the concept of a water resources directorate to serve as the executive agency for all water resources programs in this developing African Nation. Application of his original research on permeability distribution in crystalline metamorphic rocks in the Piedmont region of central Maryland which brought about increased well yields with significant benefits to the area's economy. His studies of the geologic controls governing the chemistry of ground water in major drainage basins became the basic reference for water quality management and pollution abatement in West Virginia. He provided outstanding leadership in the direction and development of nationwide ground water programs and expert technical assistance to other Federal and State agencies. His achievement as chairman of the Presidential water policy group on ground water is further testimony of this qualities of leadership and management abilities.

DAVID B. STEWART, GEOLOGICAL SURVEY

Dr. Stewart has distinguished himself as a research scientist and scientific administrator as well as a leader in developing a scientifically sound Federal policy and program for nuclear waste disposal. His field investigations of igneous rocks confronted his with major unsolved problems regarding the genesis and physical properties of the feldspar minerals which make up a major part of the Earth's crust. His major breakthrough in demonstrating

how the optical and cell size variations in the feldspars are a consequence of the atomica arrangement of aluminum and silicon atoms. He applied his work to the study of the genesis of lunar feldspars brought back by the Apollo missions. Dr. Stewart and several colleagues pointed out significant deficiencies in the Federal research program for nuclear waste disposal. He was instrumental in steering the interagency review group to articulate a policy for the President that was both scientifically sound and potentially workable.

NORMAN F. SOHL, GEOLOGICAL SURVEY

Dr. Sohl has combined his great skill as a field geologist with his impressive understanding of fossil and living mollusks to draw accurate conclusions about Earth history. His work has provided a thorough understanding of the paleontology of fossil mollusks and has established fundamental age relationships and correlation of Mesozoic deposits. In his early work, he pioneered the modern use of fossil gastropods in stratigraphy. Later, he became a leading authority on the paleontology and paleoecology of the extinct fossil bivalve group, the rudistids, whose remains form the hydrocarbon reservoir rock in many areas of the United States. He produced the most widely recognized study of how rudistid deposits form and change through time. As chairman of the Bureau's Geologic Names Committee, he has been responsible for assuring quality and consistency in Survey stratigraphic studies.

FREDERICK J. DOYLE, GEOLOGICAL SURVEY

Dr. Doyle has contributed to the science of photogrammetry and cartography and as an educator he specialized in the development of analytical photogrammetry, and many of his students are now found in senior positions in cartographic organizations around the world. Dr. Doyle has been recognized as an international authority on lunar, planetary, and terrestrial mapping from space vehicles. As chairman of the Apollo orbital science photographic team they developed camera systems for Apollo missions 13 and 17, and he was the principal investigator for a lunar control network covering over 20 percent of the Moon's surface. He is currently involved in the development of advance systems for mapping the Earth from space. Also, he headed the photogrammetry working group on the Office of Management and Budget, Federal Mapping Task Force, which produced a landmark study on the organization of mapping in the Federal Government, and he was the leader of the teams which developed the orthophoto program and the digital cartographic data base in the Geological Survey.●

THE TERRORIST LAWYERS, PART I THE NATIONAL LAWYERS GUILD AND THE WEATHER UNDERGROUND

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 7, 1981

● Mr. McDONALD. Mr. Speaker, the murders of two police officers and a security guard during the $1.6 million armed robbery of a Brink's armored truck in Nyack, N.Y., has served to bring to public attention the existence of an elaborate terrorist underground in the United States.

But the Nyack tragedy also has served to highlight the role of revolutionary lawyers from the National Lawyers Guild who, in close association with Cuba and other Soviet satellites, play a key role in providing logistical and propaganda support to terrorists and revolutionaries. This support is not limited to mere legal representation, but includes hiding and supporting terrorist fugitives. The support provided by NLG activists, according to declassified FBI documents, has included direct participation in terrorist acts including jailbreaks and smuggling weapons for jailbreak attempts.

These same NLG activists, many with very close ties to Cuba and involved with terrorist support work, have played leading roles in the attacks on our Federal, State, and local intelligence, counterintelligence and law enforcement agencies over the past decade. Both as an organization, individually and through related groups dominated by NLG activists including the National Emergency Civil Liberties Committee (NECLC), the Center for National Security Studies (CNSS), projects of the American Civil Liberties Union (ACLU), and private investigative firms, the NLG has used the Privacy and Freedom of Information Acts and lawsuits to gain law enforcement intelligence files for their terrorist clients. For example, at the time of her escape from a New Jersey prison, Black Liberation Army leader Joanne D. Chesimard, alias Assata Shakur, had some 1,500 pages of FBI files on the Black Liberation Army in her cell.

Some NLG members have been identified as members of the Marxist-Leninist terrorist Weather Underground Organization (WUO). These and other NLG members—for example, New York NLG activist Michael Krinsky, Washington, D.C., NLG leader William Schaap, and Los Angeles NLG activist Karen Jo Koonan—maintain intimate liaison with officials of the Cuban Government and its espionage service, the Direccion General de Inteligencia (DGI).

Other NLG members have been identified as maintaining contact with representatives of the Soviet Union including KGB officers, while still others have links to the governments and intelligence services of other Communist regimes such as the German Democratic Republic (East Germany), Vietnam, and Angola.

Still other NLG activities are involved with foreign terrorist groups, particularly the Palestine Liberation Organization (Detroit NLG leader Abdeen Jabara), Iranian terrorist groups (Nancy Hormachea and Alan Womack of Houston; Leonard Weinglass and Dick Eiden of Los Angeles), and with the West German terrorist network (Bill Schaap, Ellen Ray, William Kunstler, Stew Albert, Margaret Ratner, and others).

Among the revolutionary, violence-oriented and terrorist U.S. groups supported by the NLG have been the Black Liberation Army (BLA), Black Panther Party (BPP), American Indian Movement (AIM), Puerto Rican Socialist Party (PSP), George Jackson Brigade (GJB), Symbionese Liberation Army (SLA), Weather Underground Organization (WUO), and the Armed Forces of National Liberation (FALN).

In its international work, both organizationally and as the main U.S. affiliate of the Soviet-controlled International Association of Democratic Lawyers (IADL), the NLG has supported the Palestine Liberation Organization (PLO), the West German Red Army Fraction/June 2d Movement, the Irish Republican Army (IRA), Organization of People's Fedayee Guerrillas (OIPFG) and Organization of Mujahedin of the People of Iran (OMPI), African National Congress (ANC) of South Africa, the New People's Army of the Philippines; the Sandinista National Liberation Front (FSLN) of Nicaragua and similar Castroite and pro-Soviet terrorist forces in El Salvador and Guatemala.

The NLG's official organizational support to international terrorist groups will be discussed in a separate report. Today we will examine examples of the National Lawyers Guild's involvement with the terrorist Weather Underground Organization (WUO), an involvement which from public evidence, may extend to control of some aspects of WUO policy.

The extra-legal support provided by members of the National Lawyers Guild to terrorists ranges from serving as communications links between underground fugitives, to provision of still-classified or restricted law enforcement intelligence files concerning ongoing investigations to members of the very terrorist group under investigation, to aiding terrorist groups in the analysis of intelligence documents to discover the identities of

sources and active participation in jailbreak attempts.

In order to put these activities into the correct context, it will be necessary to briefly review the origins and development of the National Lawyers Guild.

ORIGINS OF THE NLG

The National Lawyers Guild was formed in 1936 with the assistance of the International Labor Defense (ILD), the U.S. section of the International Class War Prisoner's Aid Society, which was an agency of the Comintern. Known in English as the International Red Aid, sections of this Comintern organization were set up in various countries in order to "render material and moral aid to the imprisoned victims of capitalism." The ILD was formed in 1925, and before it was dissolved by Stalin during World War II as a gesture to the U.S.S.R.'s capitalist allies, the ILD helped to form both the National Lawyers Guild and the International Juridicial Association.

MLG MISSION

Currently claiming a membership of 6,000 lawyers, law students, legal workers, and prison inmate "jailhouse lawyers," the NLG's purpose, to manipulate the law and legal system in order to bring about revolutionary change, was expressed in a program committee policy statement at the 1971 Denver convention. It said, "The NLG's struggled to defeat the ruling class in this country and to defeat its hold on large parts of the world" is "not a struggle separate" from the full range of revolutionary and left issues in the United States. The statement said:

The program committee recognizes that fundamental social change means not only change of an economic system and the transfer of political power, but also the revolutionizing and liberating of relationships between people.

More important, the 1971 program statement, which has never been repudiated, set forth the NLG's role as providing leadership to the U.S. revolutionary movement, not merely to serve as a source of legal representation for radical clients. In the NLG's own words:

There is no disagreement among us that we are a body of radicals and revolutionaries. We are not simply servants of the movement. We are radicals and revolutionaries who now propose to carry the struggle for social change into our lives and our profession.

NLG leadership is especially visible when examining its actions as the key group supporting and in some cases controlling the actions of terrorist groups in America.

NLG AND IADL

The NLG remains the principal U.S. affiliate of the Soviet-controlled International Association of Democratic Lawyers (IADL). The IADL is the successor to the Comintern's agency for providing legal aid and propaganda support to Communists facing legal action, the International Class War Prisoner's Aid Society or International Red Aid. Prior to its dissolution, the American section of the International Red Aid, the International Labor Defense (ILD), helped set up the National Lawyers Guild.

Formed in 1946, the IADL was characterized by the House Committee on Un-American Activities as an "international Communist front for attorneys' controlled by the Communist Party of the Soviet Union (CPSU). The NLG participated in the IADL's founding conference and has increased its IADL activities.

Like other international Soviet-controlled fronts, the IADL and its Western Hemisphere regional affiliate, the American Association of Jurists (AAJ), provide logistical support to Soviet and Cuban-backed terrorist groups.

In a CIA report, "Soviet Propaganda Operations," prepared at the request of the House Intelligence Committee and published by that committee in 1978, the IADL was characterized as "one of the most useful Communist front organizations at the service of the Soviet Communist Party." The report noted that at its 1975 conference in Algiers:

The real and ideological interests of the IADL were covered by the agenda * * * which considered law to be a function in the struggle against imperialism, colonialism, neocolonialism, racism, and apartheid. Under the banner of antiimperialism, the IADL's thrust * * * was to do battle with the large international companies as a way to gain adherents and backing in the developing world.

NLG ORGANIZES IADL AND AAJ SUPPORT FOR TERRORISM

For some 20 years, the Soviet Union, the Communist Party, U.S.A., Cuba, and U.S. Castroite revolutionaries have supported terrorism and violence as a tactic in the campaign to force the United States to abandon the Commonwealth of Puerto Rico, the keystone to U.S. southern defense. During the 1970's, the so-called independence campaign escalated, accompanied by the formation of terrorist groups including the Armed Commandos of Liberation (CAL), the Armed Revolutionary Independence Movement (MIRA), the Armed Forces of National Liberation (FALN), and several groups that have worked in cooperation with the FALN but are based in Puerto Rico, the Machete-Wielders or Boricua Popular Army (EPB), Armed Forces of Popular Resistance (FARP), and Organization of Volunteers for the Puerto Rican Revolution (OVRP).

In 1973, FBI director Clarence Kelley reported that 135 Puerto Rican revolutionaries had already received training in Cuba.

An example of NLG work in coordinating support from the international Soviet-controlled fronts for the Puerto Rican revolutionaries and terrorists, was provided in an account of the AAJ convention in Havana by NLG vice-president John Quigley in "Guild Notes," (December 1977, vol. VI, No. 6, p. 5):

Self-determination for Puerto Rico and an end to U.S. control of the Panama Canal were featured topics at the Conference of the American Association of Jurists (AAJ), held in Havana, Cuba, October 24-29. The National Lawyers guild was represented at the conference, pursuant to an August decision of the NLG National Executive Committee to join the Association.

The AAJ, founded in 1975 at an inter-American lawyers' meeting in Panama, is committed to "the complete economic independence and sovereignty of the State over its wealth and natural resources," as well as to "action against imperialism, fascism, colonialism, and against racial discrimination, and discrimination against women, aborigines, and other national minorities."

The Havana Conference, attended by over 100 Western Hemisphere lawyers, was devoted to the reading of papers in working commissions, leading to adoption of resolution (sic) at plenary sessions. Guild representatives Michael Withey and John Quigley each presented a paper. Withey on Puerto Rico's right to offshore oil, and Quigley on rights to ocean-bed minerals.

Quigley named the other U.S. participants in the AAJ's Havana conference as including Jim Larson, also an NLG representative, who in 1974 was among those responsible for selecting a San Francisco Bay area NLG member for a 3-week NLG delegation to Cuba. Others participating included Ann Fagan Ginger, whose Communist Party, U.S.A. affiliation was revealed in documents published by the Church committee; Ned Smokler; Louis Katz; Ernest Goodman of Detroit, an NLG veteran taking leadership roles in CPUSA fronts and causes for more than 35 years and who helped set up the NLG's Southeast Asia military law project which attempted to undermine discipline of the U.S. Armed Forces in Japan and the Philippines; another NLG "Old Left" veteran, Allan Brotsky; former one-term U.S. Congressman Charles Porter of Oregon, an officer of one of the CPUSA's most active fronts targeted against the U.S. counterintelligence and internal security agencies, the National Committee Against Repressive Legislation (NCARL); and Joseph P. "J. P." Morray, who spent the period October 1960 to July 1962 in Cuba. According to Morray, he spent that time working under the Castro regime as a visiting professor of political science at the University of Havana and gathering material for a book in praise of the establishment of Communism, "The Second Revolution in Cuba."

The NLG representatives in Havana ratified the AAJ's "Declaration of Havana" which set forth what NLG

vice-president Quigley termed "a resolution on the duties of anti-imperialist lawyers in the Americas." The AAJ declaration asserted:

We declare that we cannot ignore our duty which commits us to militant action side by side with our people in support of the legal formulations that will materialize their legitimate aspirations; that we cannot resign ourselves to being mere legal scholars nor simple spectators in the face of the rise of the peoples' struggle against the powers of oppression.

The revolutionary lawyers group went on to give its full support to revolutionary terrorist national liberation movements—including those in Puerto Rico and on the U.S. mainland, stating:

We propose to call upon all the States to give moral, material and all other forms of assistance to the movements for national liberation * * *; [and] the condemnation of the use of mercenaries to inhibit armed struggle for national liberation.

Stating its main purpose was not courtroom and related legal work, but to mobilize public opinion, the AAJ put its full support behind the Castroite and pro-Moscow revolutionary parties seeking control of Puerto Rico, asserted that the United States had made Puerto Rico "a military base of aggression against the peoples of America," and condemned prosecution of Puerto Rican terrorists as a "repressive policy against the Puerto Rican national liberation movement."

Cuban control of the IADL's Western Hemisphere regional affiliate was made clear by the fact that the AAJ decided to move its headquarters to Havana from Panama, and from the elections of Fernando Alvaraz Tabio, a justice of the Cuban Supreme Court, as AAJ president; former Havana resident J. P. Morray of Corvallis, Oreg., as vice president; and Miguel Duque de Estrada, president of the National Union of Jurists of Cuba, as secretary general.

The NLG members during the Havana meetings reorganized the U.S. AAJ branch. As NLG Vice President Quigley reported, a U.S. executive board was established composed of CPUSA-veteran Ann Fagan Ginger, president; J. P. Morray ex officio as vice president; and representing at-large members Ernest Goodman and Michael Krinsky, of Rabinowitz, Boudin, and Standard, Cuba's paid agents.

A second example of support from the Soviet-controlled international lawyers fronts for U.S. terrorists is the resolution of the IADL backing the claims to prisoner-of-war status by 11 members of the Puerto Rican FALN who were convicted in 1980 of murder, armed robbery, and attempting to overthrow the Government of the United States through force and violence. They are serving prison terms of from 55 to 90 years—and life in the case of Marie Torres, convicted of murder in New York.

The 35-member U.S. delegation to the IADL's 11th Congress, held in Valetta, Malta, November 13–17, 1980, included NLG President Mary Alice Theiler and NLG past president (1970–71) Doris Brin Walker, an identified Communist Party activist and IADL vice president. Among those reading papers to the IADL commissions was Michael E. Deutsch, a leading activist in the NLG's Chicago chapter who is a member of the Weather Underground Organization's Prairie Fire Organizing Committee (PFOC). Deutsch and Peter J. Schmiedel, his law partner in the People's Law Office, served as legal advisers to the 10 FALN terrorists tried and convicted in Chicago in 1980.

New York City NLG members Susan Bitensky and Vickie Erenstein, members of the NLG delegation to the IADL, reported ("Guild Notes," January-February 1981, vol. X, No. 1):

The General Assembly of the Eleventh Congress officially went on record to express solidarity with various peoples' struggles * * * and voiced its support for the people of Puerto Rico in their struggle for self-determination and independence.

Specifically, the IADL supported the terrorists' claims for POW status under new U.N. additions to the Geneva protocols which provide for POW status to members of national liberation movements.

THE NLG AND CUBA

The intimate collaboration between the National Lawyers Guild and Cuba which has been increasing during the past decade is reflected not only in the NLG's work in support of U.S. and foreign terrorist organizations, but also in the NLG's leadership role in attacking the U.S. intelligence agencies.

For example, Cuba's premier NLG agents, Rabinowitz, Boudin, and Standard, have served for decades as the counsel to a major CPUSA political and legal action front, the National Emergency Civil Liberties Committee (NECLC), which raises money for key litigation and distributes propaganda.

Both Victor Rabinowitz and Leonard Boudin have been identified as members of the Communist Party, U.S.A. Rabinowitz was identified in Senate testimony in the early 1960's; but Boudin's CPUSA affiliation remained a secret until December 1980, when it was revealed in a defense memorandum based on declassified summaries of secret FBI files on the Weather Underground's contacts with agents of hostile foreign powers.

NECLC's primary target has been the U.S. Armed Forces and the American intelligence, internal security, and law enforcement agencies. NECLC has raised funds for major legal actions against the FBI, CIA, and local law enforcement agencies, a primary purpose of which has been to obtain intelligence files using the Freedom of Information Act and the discovery process in litigation.

The major purpose of lawsuits conducted by the NLG lawyers and funded in part by the NECLC including suits by the Institute for Policy Studies, a Marxist think-tank with documented ties to hostile foreign intelligence agencies; by the Socialist Workers Party, a Trotskyist Communist revolutionary group active in the support of terrorism; and by the NLG itself clearly to obtain intelligence files, determine the sources of intelligence information, and undertake damage control measures.

The NLG has been intimately involved with Philip Agee's efforts to disclose the identities of CIA officers operating under diplomatic cover in foreign countries. The CIA charged that Agee's Counter-Spy magazine was responsible for the murder of the CIA's Athens station chief, Richard Welch, in December 1975. In addition to naming alleged CIA agents and setting them up as potential targets for assassination, Counter-Spy and its spinoff, the Covert Action Information Bulletin, have attacked alleged police and FBI informants and private individuals who oppose Soviet and Cuban expansionism.

The NECLC's Washington office for many years was the law offices of the late NLG veterans Joseph Forer and David Rein, who also served as the local office of Rabinowitz, Boudin, and Standard. It is noted that Forer was cocounsel for the Communist Party with John J. Abt, a founding NLG activist who also serves on the CPUSA Political Committee and once headed a Soviet spy ring in Washington. David Rein also was an identified CPUSA member, as was his wife, Selma, who while not a lawyer was highly active as an unofficial organizer for the NLG's Washington, D.C. chapter. Forer and his junior partner, Alan Dranitzke, worked with Philip Agee's Counter-Spy magazine, with Dranitzke serving as Counter-Spy's official counsel.

NLG attorney William Schaap and legal worker Ellen Ray were cofounders with Philip Agee of Counter-Spy's successor, the Covert Action Information Bulletin at a 1978 Communist youth festival in Havana. In the late 1960's, Schaap worked with NLG and NECLC antimilitary projects in New York. Schaap was one of several NLG activists associated with the most militant segments of Students for a Democratic Society (SDS) including some who became members of the terrorist WUO, who helped plan, 8 months in advance, riots in Chicago at the Democratic National Convention.

Working as a member of a law firm headed by two NLG and CPUSA activists, David and Jonathan Lubell,

Schaap earned a reputation as a friend and adviser of the SDS leadership, particularly of Mark Rudd. The firm became a center for support activity for the New York Black Panther 21, charged with bombing conspiracy, and for the SDS Weathermen. Between 1970 and the fall of 1972, Schaap represented witnesses subpenaed before grand juries investigating the WUO bombing of the U.S. Capitol, unsuccessfully defended WUO-affiliated radicals convicted of bank bombing conspiracy, and participating in planning meetings for riots at the 1972 Republican National Convention.

After Schaap and Ray returned from the NLG's Southeast military law office project in Okinawa, they became active with the Center for Constitutional Rights (CCR), a tax-exempt litigation group of NLG lawyers and legal workers taking leadership roles in supporting U.S. and foreign terrorists. NLG members associated with the CCR, including Schaap, William Kunstler, and Peter Weiss, and members of the Weather Underground Organization's overt support arms, have held meetings in the United States with associates and members of West German terrorist groups, including a lawyer charged and convicted in West Germany for running a communications network between jailed terrorist leaders and their comrades at large. After moving to Washington, Schaap and Ray became active in the Washington, D.C., NLG chapter with Schaap serving as president in 1980-81.

One of them, Kurt Groenewold, attended the NLG national convention in San Francisco in 1979; another, Petra Rogge, traveled to the United States in 1978 to help coordinate the defense of terrorist fugitive Kristina Berster, who illegally entered the United States from Canada after spending 9 months in a terrorist training camp in South Yemen (Aden). Berster's defense committee was controlled by WUO members and supporters, including members of WUO collectives in Vermont.

It is noted in passing the CIA-defector Philip Agee, known to have made repeated trips to Havana and Moscow while preparing his anti-CIA exposes, and who was deported from England because of his continued meetings with Cuban intelligence officials, lives in a house in Hamburg, West Germany, owned by Groenewold.

NLG AND THE WEATHER UNDERGROUND

The NLG's ties to the Weather Underground Organization (WUO) date to the early 1960's, when Students for a Democratic Society militants began working with NLG lawyers also active with the NECLC and CCR. As SDS demonstrations increased in militancy and violence, legal defense work by the NLG and its mass defense office became invaluable to the SDS organizers. NLG national organizers Ken Cloke and Bernardine Dohrn participated in planning sessions. Along with NLG staffers such as Dana Biberman, now a leading WUO member, and Alicia Kaplow. Dohrn, herself a law school graduate, and Cloke recruited radicalized law students, many of them former SDS members, into the NLG. And a number of these NLG law students, including Eleanor Stein Raskin, joined the terrorist underground as fugitives.

When those Weathermen who faced criminal charges disappeared in the early spring of 1970, NLG lawyers played key roles in maintaining communications among the terrorists. Let us consider some specific examples.

On February 16, 1970, WUO terrorists planted a bomb at a small police station in San Francisco's Golden Gate Park. The bomb killed one police officer and wounded others. The press reported two suspects were seen running from the scene: a tall, long-haired blond male in his early twenties, and a stocky middle-aged male. The murder remains unsolved.

According to a defector from the Weather Underground then living in the WUO's bay area collectives, only two Weathermen then active in the area at that time fit the description. Among the leaders of the Weathermen then present in the San Francisco Bay area were Lincoln Bergman; Arlene Eisen Bergman, who is still active with the WUO's Prairie Fire Organizing Committee (PFOC) and John Brown Book Club (JBBC); Julie Nichamin, who while visiting Havana early in 1969 became the initial organizer of the Venceremos Brigades; Karen Latimer and Scott Braley, both former leaders of the Michigan State University SDS; Jeff Jones and Clayton Van Lydegraf.

Clayton Van Lydegraf, now 66 years old, was a leader of the Communist Party's illegal underground apparatus in the Pacific Northwest during the early 1950's. When subpenaed by a congressional committee, he took the fifth amendment rather than deny he had ever served in the Philippines with the Communist Huk terrorists and whether he had boasted that he had strangled anyone while serving with the Huks. In the 1960's, Van Lydegraf attached himself to the most extreme SDS militants as an adviser.

Starting in 1974, Van Lydegraf served as a highly visible leader of the PFOC, organized the publication of WUO documents like "Prairie Fire" and "Osawatomie," and was reportedly named by Timothy Leary after his return to the United States in 1974 as the individual who transported him to Seattle after his jailbreak to meet with Bernardine Dohrn and others. According to veteran investigative reporter Ed Montgomery (San Francisco Examiner, August 18, 1974), Leary "identified a San Francisco attorney, active in the National Lawyers Guild, as the man who, in league with members of the Weatherman organization, engineered his escape from San Luis Obispo Prison the night of September 12, 1970." The Information Digest, an authoritative newsletter on U.S. political and social movements edited and published by John Rees, who has been publishing the best nongovernmental information on terrorist and violence-oriented groups in the United States since 1968, reported that sources within the NLG viewed the Montgomery article as referring to San Francisco NLG attorney Michael Kennedy and Clayton Van Lydegraf.

Van Lydegraf became the leader of the WUO's Revolutionary Committee which opposed the NLG-proposed inversion plan of surfacing fugitives. He was arrested in November 1977 on charges of conspiring with four other WUO fugitives to assassinate a California State senator. Convicted, but awarded minimal sentences by a Los Angeles municipal court judge, Van Lydegraf and his codefendants are all now free on parole or probation.

The San Francisco Weathermen scattered after the February 1970 murder of the San Francisco police officer; but they kept in touch via another NLG attorney. WUO fugitives and others not sought for known criminal actions shuttled between Weatherman collectives in Oregon, Washington, and California. The NLG lawyer provided them with lists of public telephone booths in the San Francisco area, and day of the week and time they were to call if they needed to make contact with other fugitives. The NLG lawyer also provided some of the Weathermen with money and accommodations.

The murder of the police officer remains unsolved and unprosecuted. Therefore it would be inappropriate for this Congressman to name the NLG lawyer involved, or to speculate as to the WUO members involved in the bombing. However, the lawyer was also active with the NLG's Prison Law Association which carried out litigation for prisoners and also worked to organize prisoners into a revolutionary vanguard movement. The SDS Weathermen had an identical, interrelated program stemming from their work on defense committees for Black Panther Party members in Oakland, Los Angeles, New York and other cities.

Steven Bingham, was indicted with six San Quentin prison inmates by the State of California which charged that on August 21, 1971, Bingham furnished a 9-millimeter automatic pistol and clips containing ammunition to George Jackson, a prison leader of the Black Panther Party and supporter of the Eldridge Cleaver faction's terrorist Black Liberation Army (BLA). In the

jailbreak attempt that followed, Jackson shot a guard to death; two other guards and two inmates suspected of being informants were murdered by Jackson's accomplices. Jackson was shot to death by guards during his escape attempt. Steve Bingham remains a fugitive from justice.

A declassified FBI report prepared by the FBI's Chicago Field Office, "Foreign Influence—Weather Underground Organization," dated August 20, 1976, documented that a number of NLG members, including legal workers—movement organizers—active in proterrorist defense committees, had been involved in concealing and aiding terrorist WUO fugitives, and functioned so closely with the WUO that they themselves may be considered as underground functionaries from time to time.

There is ample evidence that the NLG continues to exert influence and control over the Weather Underground Organization and the WUO's overt branches. Among the most prominent NLG members so involved is Leonard Boudin.

NLG CONTROL OF WEATHER UNDERGROUND

Leonard Boudin, a paid agent of the Castro government since 1960, and his partner, Victor Rabinowitz, have been identified as members of the Communist Party, U.S.A. Rabinowitz was identified in Senate testimony in the early 1960's; but Boudin's CPUSA affiliation remained a secret until December 1980, when it was revealed in a defense memorandum based on classified FBI files concerning the Weather Underground's contacts with agents of hostile foreign powers.

In addition to working for the Cuban Government, Leonard Boudin is the father of Weather Underground Organization (WUO) leader Kathy Boudin. Starting in the early 1960's, Kathy Boudin attended receptions and functions with her parents at the Cuban Mission to the United Nations in New York. In 1965, she studied for a year in the Soviet Union, was paid 75 rubles a month by the Soviet Government, and, according to her résumé, taught school on a Soviet collective farm, a privilege rarely given one who is not a Soviet citizen. Boudin's stay in the Soviet Union was not part of any student exchange program. During this period, it has been reported that the CIA intercepted correspondence between Boudin and her father in which he made arrangements for her to participate in one of the Communist world youth festivals.

Following the March 1970 explosion of a New York townhouse which killed three Weathermen who were constructing an antipersonnel bomb, Kathy Boudin disappeared. It has been reported that she and Cathy Platt Wilkerson were provided with false identification documents by the Cuban U.N. Mission with which they fled the United States for Czechoslovakia.

The declassified FBI report on foreign contacts of the Weather Undergound Organization produced by the FBI's Chicago Field Office reported that:

> On February 10, 1976, a source in a position to possess such information advised that Leonard Boudin * * * had indicated to a friend that Kathie was presently in Cuba.

In 1975, following distribution of filmed interviews with Kathy Boudin and four other fugitive WUO terrorists by Emile de Antonio, Leonard Boudin represented de Antonio and his associates in their successful fight to quash subpenas from a Federal grand jury investigating WUO terrorism.

An article by Peter Biskind in David Dellinger's now defunct magazine Seven Days (Feb. 28, 1977) noted that the production of the Emile de Antonio film, "Underground," interviewing WUO leaders Kathy Boudin, Bernardine Dohrn, Jeff Jones, Bill Ayers, and Cathy Wilkerson was part of a strategy for surfacing the fugitives.

In discussing the split in the WUO between the California-based Revolutionary Committee led by Clayton van Lydegraf and Bernardine Dohrn, and the Central Committee led by Bill Ayers and Jeff Jones, Biskind wrote:

> A year and a half ago, (mid-1975) there was a meeting of about a dozen left lawyers to discuss legal strategy for the surfacing. * * * The meeting of the lawyers was convened by Leonard Boudin, father of underground member Kathy Boudin. According to some of those present, the plan for "inversion" came from the lawyers themselves, not from the Central Committee.

In other words, Leonard Boudin and the other NLG lawyers who are well known as members and intimate associates of the NLG were able to set policy and strategy for the terroris organization. Even more significant is the fact that the NLG lawyers, many of whom have appeared in court representing surfaced WUO fugitives, had the power to enforce a policy clearly highly unpopular with the terrorist organization.

Dana H. Biberman, born February 24, 1951, is a veteran of the Columbia University SDS chapter. Biberman's sister, Nancy, was also a veteran of the Columbia University SDS. In 1968, Dana Biberman joined the NLG national office staff where she remained for some 4 years, organizing mass defense of demonstrators and support work for the Panther 21, and doing NLG organizational work. In 1968, NLG members William Schaap, Jonathan Lubell, Bernardine Dohrn, Alicia Kaplow, and Biberman were among those who participated in meetings held in the NLG national office to plan riots at the Democratic National Convention in Chicago, 8 months later.

During 1974 and 1975, she played an active role in the formation of the WUO's overt arm, the Prairie Fire Organizing Committee (PFOC). The FBI report states that in March 1975, Biberman traveled to Cuba as a member of the Venceremos Brigade (VB) eighth contingent. Internal PFOC documents circulated in 1976, summing up the group's accomplishments during the previous year noted that two PFOC members had been sent to Cuba with the Venceremos Brigade.

Biberman has been an active member of the New York PFOC chapter, and its successor, the May 19th Communist Organization. The May 19th Communist Organization (M-19 CO) can be characterized as the Weather Underground Organization's own incipient Communist party. With Judith Clark and Eve Rosahn, Biberman was a member of the Committee for the Suit against Government Misconduct, a PFOC-controlled group set up to publicize a damage suit by 10 WUO associates against the United States, FBI, and present and former Government officials.

A week after the October 20, 1981, robbery of $1.6 million from a Brink's armored truck in Nyack, N.Y., the killing of two police officers and a guard, and the arrests after a chase of WUO leaders Kathy Boudin, Judy Clark, and David Gilbert; Black Liberation Army (BLA) activist Samuel Brown; and a day later in Brooklyn a shootout in which Republic of New Africa (RNA) member Sam Smith (alias Mtayari Shabaka Sundiata) was killed and Nathaniel Burns (alias Sekou Odinga) was captured, Biberman's roommate, Eve Rosahn, was arrested and charged with having rented, using false identification papers, the van used by the Nyack terrorist team formed by members of the Weather Underground Organization (WUO), the Black Liberation Army (BLA), and Republic of New Africa (RNA).

Kenneth Cloke, born May 18, 1941, was an active member of SDS in the mid-1960's. According to the FBI report, "Cloke has directly been involved with the WUO since its submergence into the underground." It is noted that the section of the FBI report on Cloke's WUO activities notes that Cloke had been seen in contact with Bernardine Dohrn in the summer of 1971, when a number of WUO fugitives were living in an apartment in Venice, Calif. The report also contains two pages of additional material on Cloke's work with the WUO which has been deleted as too secret to be released.

In 1967, while CPUSA veteran Victor Rabinowitz served as the NLG national president, Ken Cloke was hired as NLG national executive secretary at the same time Bernardine Dohrn was hired as national student organizer.

According to a pamphlet entitled "A Historical Sketch of the National Lawyers Guild in American Politics, 1936–68," by Doron Weinberg and Marty Fassler, distributed at the NLG's 33d convention in 1973, Cloke and Dohrn "began the conversion of the Guild to a political association of the bar with the projection of a more activist, movement-oriented image."

A staff study on the National Lawyers Guild published by the House Committee on Internal Security in its hearing, "Revolutionary Activities Directed Toward the Administration of Penal or Correctional Systems," part 3, provided a chronicle of Cloke's extensive Communist ties. In 1962, he was member of the National Advisory Board of the U.S. Festival Committee, and was a member of the U.S. delegation to the Eighth World Youth Festival in Helsinki, Finland. The world youth festivals are joint operations of the two major international Soviet-controlled youth and student fronts, the Budapest-based World Federation of Democratic Youth (WFDY) and the Prague-based International Union of Students (IUS). Selection of the U.S. delegates is in the hands of the CPUSA.

Also in 1967, Cloke joined the National Council of the NECLC, controlled by veterans CPUSA activists and lawyers including Victor Rabinowitz and Leonard Boudin. Cloke and many other NLG activists with ties to the Weather Underground Organization, Black Liberation Army, and Cuba, remain on the NECLC Exective Committee and National Council.

Dennis D. Cunningham, an NLG activist who has held office not only in the Chicago chapter, but has been a regional vice president, has been active with the Chicago chapter of the WUO's Prairie Fire Organizing Committee since early 1975. He participated in the PFOC-initiated National Hard Times Conference in chicago in January 1976 during which plans were made for demonstrations to protest the Bicentennial celebrations in Philadelphia.

Senate and FBI documents note that Cunningham's estranged wife, Mona Helen Mellis Cunningham, is a WUO functionary and deletes for security reasons the details of her WUO involvements and foreign travel. Cunningham's brother, Robert Maris Cunningham III, is named in a Senate Internal Security Subcommittee report, "The Weather Underground," published in 1975, as a WUO member.

Cunningham is a member of the People's Law Office, a Chicago group of NLG lawyers and legal workers, most of whom are members of the Weather Underground's PFOC, or WUOP/PFOC fronts such as the New Movement in Solidarity with Puerto Rican Independence (NMSPRI), through which the WUO provides support to its terrorist comrades in the FALN and the FALN's overt political arm, the Movimiento de Liberacion Nacional (MLN).

Among the past and current members of the People's Law Office are attorneys Michael E. Deutsch, an active PFOC member; G. Flint Taylor and Jonathan C. Moore, lawyers for violence-oriented radical plaintiffs suing the Chicago Police Department for having monitored their activities; Jeffrey H. Haas, also an active PFOC member; and legal workers Courtney Esposito, indicted as a coconspirator by a Chicago grand jury in October 1969 following the "Days of Rage" riots; and Mara Siegel.

Michael E. Deutsch, born May 9, 1945, is an active member of the Chicago PFOC chapter. The FBI's report on Weather Underground foreign contacts noted that NLG activists Dennis Cunningham and Jeff Haas hosted at least four meetings in their apartments to organize logistical support to WUO fugitives during the period January 7–10, 1971.

The FBI's material on Deutsch's foreign activities is deleted on national security grounds. Deutsch traveled to Cuba as part of the first official NLG delegation in the summer of 1972. According to "Guild Notes" (vol. 1, No. 3, September–October 1972), the NLG delegation also included Karen Jo Koonan of Los Angeles, closely associated with the WUO leadership; and Margaret Burnham, the stepdaughter of the late CPUSA Political Committee member Hyman Lumer. Currently a municipal court judge in Boston, Burnham is also an official of the National Alliance Against Racist and Political Repression (NAARPR), a CPUSE front directed at the prisoner-organizing and civil rights movements.

Also in the NLG delegation was Bobby Nelson of Austin, Tex.; Dan Pachoda, a New York NLG member active with the Black Panther 21 bomb conspiracy defense; Martin Stolar, a New York NLG member who has represented a number of WUO and BPP-related activists, including Rita Jensen, Kathy Boudin's longtime roommate; and Michael Deutsch.

According to the FBI report, Deutsch "has represented such apprehended or surrendered QUO members as William Willet, Leonard Handlesman, and Daniel Howard Cohen."

Michael Withey, a Seattle NLG activist, represented captured members of the terrorist George Jackson Brigade (GJB) which undertook a career of revolutionary bank robberies. In 1975, following a jailbreak, Withey was subpenaed. He also was able to quash the subpenas on the ground that attorney-client privilege protected him from questions about a jailbreak by his client. Withey became an NLG hero, and was moved out of Seattle to work for the NLG's Puerto Rico legal project, a support operation for Castroite revolutionary groups and terrorists.

Jeffrey H. Haas, born September 18, 1942, has served as an NLG regional vice president and is highly active in the NLG Chicago chapter. The FBI reports that during the period of January 7–10, 1971, at least four meetings were held at the residences of Dennis Cunningham and Jeff Haas for the purpose of discussing what help could be given to the WUO. Additional FBI material on his WUO activities and his foreign travel and contacts is deleted for national security reasons.

Michael J. Kennedy, born March 23, 1937, is stated by the FBI report to have "directly assisted the WUO underground." Kennedy's wife, Eleanore, is stated to have "assisted Bernardine Dohrn, who is a fugitive." The Kennedy's additional WUO activities and their foreign travel and contacts have been deleted from the FBI report.

On August 18, 1974, San Francisco Examiner reported Ed Montgomery wrote that Timothy Leary had told Federal authorities that his escape from San Luis Obispo prison was engineered by an NLG San Francisco lawyer in conjunction with the WUO. As already noted, the Information Digest of August 23, 1974, reported that NLG sources were attacking Montgomery's report as aimed at Michael Kennedy and Clayton Van Lydegraf.

Karen Jo Koonan, of Los Angeles, an active NLG member, in 1966 was an active member of the CPUSA's youth club at the University of California at Los Angeles (UCLA). She was one of four Students for a Democratic Society (SDS) members invited to visit North Vietnam in November 1967. Koonan and her companions, Steve Halliwell, and future WUO leaders Jeff Jones and Cathy Wilkerson, stayed for 10 days in Cambodia where, according to the SDS publication, "New Left Notes," they held "many long conversations with a number of Vietnamese officials and Cambodians," but were unable to complete their journey to Hanoi because of U.S. air raids.

More recently, Cuban intelligence officials visiting Los Angeles illegally have been observed with Koonan and other NLG leaders.

Bernardine Dohrn was hired by the NLG as national student organizer in 1967. While still an NLG representative, she traveled to Budapest, Hungary in September 1968, to meet with representatives of North Vietnam and the Vietcong terrorists. In July 1969, Dohrn and other SDS Weatherman leaders traveled to Cuba for more meetings with the Vietnamese Communists. "New Left Notes" of August 29, 1969, provided an eight-page spe-

cial supplement describing what took place and stating that the Vietcong wanted the Weathermen to organize violent protests against U.S. support of South Vietnam.

Gustin Reichbach, active in the New York NLG chapter, while a student NLG member at Columbia University, coauthored "The Bust Book," a pamphlet sponsored by SDS and, initially, by the NLG, on demonstration tactics. His collaborators in "The Bust Book" were Kathy Boudin; Columbia Law School student, Eleanor Stein Raskin, who after 11 years as a WUO fugitive, was arrested with Jeff Jones in October 1981, in New York City after police found evidence as to their hiding place in Kathy Boudin's apartment while investigating a robbery and murder in Nyack, N.Y.; and Brian Glick, a leader of the PFOC San Francisco chapter.

Martin Stolar, a leading New York NLG activist, has represented many Black Liberation Army and EUO defendants. On May 12, 1975, explosives, knives, and lock picks were discovered in legal envelopes in the possession of BLA terrorists Herman Bell, Albert Washington, and Anthony Bottom. The three were being sentenced for the ambush murders of New York City police officers Waverly Jones and Joseph Piagentini in May 1971.

According to the New York Times, the three had been in contact "with no one except their lawyers and court and correction officials." The supporters of the BLA and their lawyers present in the courtroom were subpenaed by a grand jury. They included Judith Clark, Bart Lubow, another NLG legal worker, and NLG lawyers Elliott Wilk and Martin Stolar. The subpenas were dropped on grounds of attorney-client privilege. This was the fourth escape attempt by the three BLA terrorists.

Jonathan C. Moore, of the People's Law Office, an active NLG member, represents activists suing the Chicago Police Department. In February 1979, a Federal judge ordered current intelligence files turned over to Moore, with the proviso they not be copied.

However, copies of the Chicago Police intelligence unit's case files on the FALN terrorists were found in an FALN hideout in Milwaukee in April 1980. When the story broke in the Chicago newspapers in August 1980, Moore was attending the NLG convention in Boston where his People's Law Office and comrades Dennis Cunningham and Mara Siegel with Puerto Rica Nationalist Party terrorist Oscar Collazo, who had been part of the group that attempted to kill Members of Congress in 1954, gave an NLG convention workshop entitled "Freedom Fighters and the Armed Clandestine Movement for the Independence of Puerto Rico."

The police intelligence documents found in the FALN's Milwaukee hideout included a detailed listing of potential FALN targets in the Chicago area which were being given special police protection and a listing of dates and anniversaries most likely to commemorated by the FALM with acts of terrorism. Also among the police intelligence files which had found their way from Moore's custory in the People's Law Office to the fugitive terrorists were profiles of known FALN support groups and of known FALN fugitives William Morales and Oscar Lopez-Rivera, naming known associates. No wonder law enforcement had little success in apprehending the FALN terrorists.

Martin Garbus, cocounsel for WUO leaders Kathy Boudin and David Gilbert, charged with the October 20, 1981, robbery of $1.6 million from a Brink's armored truck and three murders. In 1977, the NLG sent Garbus to South Africa to observe the trial of Breyton Breytenbach, a white South African who confessed to being a member of and on a mission for a terrorist support network operated from France by the late Henri Curiel. A founder of the Egyptian Communist Party in the 1940's, and a first cousin of George Blake, one of the KGB's top spies in the British intelligence service who successfully escaped from an English prison in 1964, Curiel's network, Solidarite, was financed through a Soviet-controlled Paris bank used to launder funds for the "Euro-Communist" parties, Communist-supported causes and, through Curiel, terrorist groups. British and French publications citing French intelligence sources reported Curiel was believed to be in constant contact with the KGB.

William Kunstler is cocounsel for Kathy Boudin and David Gilbert with NLG activist Martin Garbus.

Kunstler told Moneysworth magazine in September 1975:

> The thing I'm most interested in is keeping people on the street who will forever alter the character of this society: the revolutionaries. Whether its the American Indian Movement, or the Black Liberation Army, or H. Rap Brown—a person or an organization—I'm really interested only in spending my talents, and any assets I have, to keep the revolutionaries functioning.

On July 5, 1975, The Nation published an article by Kunstler seeking to develop U.S. support for leaders of the West German terrorist Red Army Fraction—Baader-Meinhof gang—on trial in Stuttgart for six bombings which killed four U.S. soldiers, the killing of a policy officer during a bank robbery, theft, burglary, and possession of explosives. Kunstler argued that "repression of the pariahs of the movement almost inevitably leads to the repression of all."

Kunstler's close associate is NLG attorney Margaret Ratner who is also on the staff of the Center for Constitutional Rights (CCR), a tax-exempt litigation group formed by leading NLG members. In 1975, the CCR attempted to send an NLG team to aid in the defense of leaders of the terrorist Red Army Fraction—Baader-Meinhof gang—on trial in West Germany. The team included Peter Weiss, president of the board of the internationally active proterrorist thinktank, the Institute for Policy Studies; former Attorney General Ramsey Clark, now active in the IADL; William Schaap and Marge Ratner. In 1977, an NLG observer team of Bill Schaap and Ellen Ray attended terrorist trials in West Germany.

During 1977 and 1978, Ratner served on the staff of the Grand Jury Project, a proterrorist effort cosponsored by the NLG and supporters of the Weather Underground Organization. From 1979 to present, Ratner has been a member of the Grand Jury Project board of directors. Her clients have included West German terrorist Kristina Berster, caught illegally entering the United States after undergoing a 9-month terrorist training course in Aden; and Dylcia Pagan and Susan Tipograph, the common law wife and lawyer respectively, of convicted FALN bomber William Morales, who were subpenaed after his escape.

Working with Kunstler and Ratner has been Stewart Albert and Judy Clavir. Albert, born December 4, 1939, and his wife, Canadian-born Judith Clavir, also known as Judith Hemblen and Judy Gumbo, are characterized in the FBI report on WUO foreign contacts as—

> WUO members who failed to submerge into the "underground" in early 1970 [and] WUO support persons who have functioned so closely with the WUO that they themselves may be considered as "underground" functionaries.

A staff study, "Terrorism," published by the House Committee on Internal Security in 1974 reported that Albert and Clavir were leaders of the coalition of Weathermen and alternative culture street-fighting militants known in the early 1970's as Weatheryip. The study provided the following information on Albert and Clavir:

> Stewart E. Albert has been associated with militant demonstrations since 1966 when he was arrested with Mario Savio, leader of the Berkeley Free Speech Movement, Jerry Rubin and others on the University of California at Berkeley campus, convicted of creating a public nuisance, and sentenced to 60 days in jail. * * * In 1968, Albert was one of the organizers of the demonstrations during the Democratic National Convention in Chicago. [*Living the Revolution: The Yippies in Chicago*, by David Lewis Stein, The BobbsMerrill Co., Inc., Indianapolis and New York, 1969, pp. 11 and 12]. A former staff member of the National Mobilization Committee, Albert was an unindicted co-conspirator in the Chicago 8 conspiracy trial. * * * In HCUA hearings in 1968, Albert was described as "one of the most active, if not the most vicious, of the rock throwers." ["Subversive Involvement

in Disruption of 1968 Democratic Party National Convention, Part I," p. 2403.]

Canadian journalist David Lewis Stein, who lived with the YIP leaders during the planning of the 1968 Chicago demonstrations, characterized Albert as a 'Berkeley radical, acid head, Marxist-Leninist and impressive street fighter.' * * *

Albert has had a long and close relationship with Eldridge Cleaver. In his introduction to Jerry Rubin's book, "Do It!", Cleaver writes that this association dates back to December 1966, before Cleaver joined the Black Panther Party, a time when "the black movement and the white movement were not speaking to each other." In his introduction, Cleaver noted that at the time he was writing the introduction, Albert and "his rib [Judy] Gumbo" were guests in Cleaver's Algiers apartment. * * * Albert was a founder of the International Liberation School which taught courses in "armed self-defense," first aid for riot injuries and other skills. * * *

In the YIP newsletter, Dope Sheet, in October 1970, Albert wrote of his meeting with Timothy Leary in Algiers whose jailbreak had been engineered by Bernardine Dohrn and other members of the Weather Underground. Albert reported he had gone to Algiers 'to get political advice from Eldridge Cleaver' and meet with Leary in the Black Panther Party's International Section headquarters. The same issue of Dope Sheet contained Weatherman communiques and a letter from Timothy Leary.

Albert's own views of revolution were expressed in statements he wrote with Eldridge Cleaver and Jerry Rubin, "We will not dissent from the Amerikan government. We will overthrow it." [Do It!, p. 198] and in a series of suggestions for actions on Election Day, 1968, which Albert wrote with Jerry Rubin, "Force the National Guard to protect every polling place in the country. Join the rifle club of your choice. * * * Release a Black Panther in the Justice Department. * * * [Do It!, p. 199].

In May, 1971, Stew Albert and Judy Gumbo (Clavir) held a press conference on the Capitol steps to announce they were suspects in the Weatherman bombing and denounce government "harassment." * * * That month the two received subpoenas to appear before a New York City grand jury in connection with a Manhattan bank bombing plot involving the "Crazies."

The FBI's report notes that while in Algiers, Albert met with WUO leader Brian Flanagan, a thug celebrated among the Weatherman for having broken the back and paralyzed Chicago District Attorney Richard Elrod during the October 1969 "Days of Rage" Weatherman riots.

The FBI report also revealed that on May 1, 1974, Albert and Gumbo were seen with Clayton Van Lydegraf near their home in Kingston, N.Y. It also notes that on September 9, 1975, Stew Albert, Judy Hemblen, and NLG legal Worker Ellen Ray, were observed in New York City accompanied by West German revolutionary lawyer Kurt Groenewold. Groenewold was convicted of running an illegal communications network for the Baader-Meinhof leaders. The contact between NLG activists and West German terrorists has continued.

In March 1980, Stew Albert and NLG activist Melinda Rorick, a WUO/PFOC member who had been a member of the Mayday Collective that helped organize riots to "shut down the government" in 1971, were interviewed on Pacifica radio station KPFK in Berkeley, Calif. The two described their new enterprise, an NLG-related private investigating firm with which Eldrige Cleaver's former NLG lawyer, Beverly Axelrod, and Judy Clavir also were associated.

Albert and Rorick boasted that their "movement" private investigating firm, called ACE Investigators, could trace suspicious individuals, that it possessed surveillance equipment, and that the firm was being used to obtain FBI files by making multiple requests under the Freedom of Information Act because information in the documents usually was deleted differently for each request. They explained this meant that sometimes sources were left in, or could be determined by collating the various documents.

NLG AND WUO/PFOC SUPPORT RALLY FOR SYMBIONESE LIBERATION ARMY

Organizational support by the NLG for revolutionary terrorists was demonstrated on September 27, 1975, by the NLG's cosponsorship of a rally called by the PFOC in support of the Symbionese Liberation Army (SLA), following the arrests of William and Emily Harris, Patricia Hearst, and Wendy Yoshimura.

NYACK CASE INVOLVEMENTS

It must be emphasized that former WUO members have emphasized that there is no operational distinction between the underground WUO and its overt arms, between the WUO fugitive core and the Prairie Fire Organizing Committee, May 19th Communist Organization, John Brown Book Club, New Movement in Solidarity with Puerto Rican Independence, Material Aid Committee for ZAPU/PF, and other WUO/PFOC fronts.

They stated that above-ground (PFOC) members could participate in an act of terrorist armed struggle by locating targets, carrying out intelligence gathering, providing logistical support, or by actually being part of the group that carries out the attack.

On October 20, as Brink's guards were opening their truck after making a cash pickup at a bank on a shopping mall at Nyack, N.Y., gunmen burst out of a van parked nearby and began firing shotguns and automatic pistols. One guard was killed instantly; the others were wounded. Canvas sacks containing $1.6 million were stolen. The hit team abandoned the van on another parking lot and split up into three escape vehicles. A yellow car chased by Nyack police went out of control and crashed. Police arrested Judith A. Clark, a leader of the WUO's PFOC and its New York affiliate, the May 19th Communist Organization; WUO fugitive David Gilbert; and BLA associate Samuel Brown.

A rental truck was stopped by a police roadblock. Gunmen, later identified as members of the Black Liberation Army and Republic of New Africa, burst out of the rear of the truck and shot two Nyack police officers to death. The gunmen commandeered private vehicles at gunpoint and escaped. Kathy Boudin, who had been riding in the cab of the truck, was arrested.

The Nyack Brink's robbery demonstrated the accuracy of the information provided by former WUO members regarding the participation of overt WUO supporters in terrorism. Furthermore, it demonstrated that the members of the overt WUO groups can also be WUO fugitives using false identification. For example, WUO fugitive Kathy Boudin was reportedly active with the May 19th Communist Organization and its various fronts under the alias Lynn Adams.

Judith A. Clark, with Dana Biberman, Eve Rosahn and others, is a plaintiff in a lawsuit against the United States, FBI, and present and former officials claiming damages for surveillance. The total flexibility between the WUO underground and its overt arms is demonstrated by Clark's record. Clark was an original member of the WUO who had gone underground in December 1969. A year later she was arrested in New York; convicted of "felonious mob action," she was sentenced to 180 days plus 3 years probation. As soon as she was released on probation, Clark resumed her WUO/PFOC leadership role.

In May 1975, Clark was among the group of NLG lawyers, legal workers, and supporters subpenaed by a grand jury investigating how weapons and explosives concealed in legal-sized manila envelopes got into the possession of three convicted BLA terrorists who were in court for sentencing after they were convicted of the May 1971 ambush murders of New York City Police Officers Waverly Jones and Joseph Piagentini.

In testimony before the Senate Internal Security Subcommittee in 1976, citing internal PFOC documents, William Kinter noted Clark was a paralegal employed as an editor of the National Lawyers Guild's prison newsletter, the Midnight Special.

Only weeks before her arrest in Nyack, Judy Clark was in a Chicago Federal courtroom while PFOC members and others from the Alliance to End Repression which is suing the Chicago Police Department demanded that the court permanently bar the police from monitoring any of their noncriminal activities.

Earlier in 1981, Judy Clark traveled to Beirut, Lebanon, where she visited with Bassam Sharaf, a top leader of

the terrorist Popular Front for the Liberation of Palestine (PFLP).

Susan Victoria Tipograph is the NLG attorney representing Eve Rosahn, a PFOC/May 19th Communist Organization activist arrested and charged with having rented with false identification papers the van used by the Nyack terrorists. Tipograph also represented Republic of New Africa (RNA) leader Cynthia Boston (alias Sister Fulani Sunni-Ali), who had been sought in relation to the Nyack crimes.

Tipograph is the lawyer for the Committee for the Suit Against Government Misconduct, which is a PFOC/M-19 CO front generating anti-FBI and antipolice publicity through a suit for damages by 10 WUO associates who include Judy Clark and Dana Biberman. Rosahn, Biberman's roommate, has been active in the committee.

In September 1981, Tipograph, assisted by other NLG lawyers including Liz Fink of the Center for Constitutional Rights and Grand Jury Project, represented Eve Rosahn and five other PFOC/M-19 CO activists charged with assault in a violent demonstration at Kennedy International Airport. The WUO supporters, demonstrating under the name of yet another of their fronts, the John Brown, Anti-Klan Committee (JBAKC), fought police and airport personnel during what they mistakenly thought was the departure of a South African rugby team, the Springboks. In the melee, a police officer was blinded by chemical MACE and a guard received a severe gash in the leg from a broken bottle.

Tipograph was the lawyer for convicted FALN bombmaker William Morales. In May 1979, Tipograph visited her client in the Bellevue Hospital prison ward where Morales was completing rehabilitative surgery for wounds suffered when his bomb exploded prematurely in August 1978. After her visit, Morales obtained a bolt cutter, cut through a window grillwork, dropped to the ground and escaped.

Tipograph was subpenaed by a Federal grand jury in the eastern district of New York that was investigating the escape. Represented by Margaret Ratner, Tipograph was able to quash her subpena on the grounds it would violate attorney-client privilege. However, recently a grand jury has reopened its investigation of Morales' escape.

On January 20, 1981, Susan Tipograph, Judy Clark, and Eve Rosahn marched in a demonstration called by the John Brown Anti-Klan Committee outside the U.S Department of Justice in Washington, D.C., protesting the inauguration of President Reagan. Photographs taken of that event show that also present was a person identified subsequently by police officers as Marilyn Jean Buck, a member of the Black Liberation Army sought in connection with the Nyack killings who had escaped from the Federal women's prison at Alderson, W. Va., in 1977. Buck, 34, was sentenced to a 10-year prison term in 1973 for illegally supplying weapons to the BLA, and is suspected of having been the driver of the vehicle used in the jailbreak of Joanne Chesimard.

Mr. Speaker, these examples demonstrate conclusively that individual and leading members of the National Lawyers Guild are deeply involved with the terrorist Weather Underground Organization and its overt arms, and that this support is not limited to the proper legal function of representation, but involves criminal and unethical actions.

The second part of my discussion will show that these individual actions reflect the will and intention of the National Lawyers Guild as an organizational entity; and I will demonstrate this from NLG documents, publications, and from NLG national convention resolutions and activities.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, December 8, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 9

9:00 a.m.

*Energy and Natural Resources

Business meeting on pending calendar business.

3110 Dirksen Building

Foreign Relations

African Affairs Subcommittee and Near Eastern and South Asian Affairs Subcommittee

To hold joint hearings on the Libyan challenge to world peace and security.

4221 Dirksen Building

9:30 a.m.

Commerce, Science, and Transportation

Science, Technology, and Space Subcommittee

To hold hearings on NASA's operations of the space shuttle program.

235 Russell Building

Finance

Health Subcommittee

To hold joint oversight hearings with the Special Committee on Aging on Department of Health and Human Services' efforts to control certain fraud, abuse, and waste activities.

2221 Dirksen Building

Governmental Affairs

To hold hearings on the nomination of Ronald P. Wertheim, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia.

5110 Dirksen Building

Select on Indian Affairs

To hold hearings on S. 1890, authorizing the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin to recover certain indirect costs.

357 Russell Building

Special on Aging

To hold joint oversight hearings with the Committee on Finance's Subcommittee on Health on Department of Health and Human Services' efforts to control certain fraud, abuse, and waste activities.

2221 Dirksen Building

9:45 a.m.

Governmental Affairs

Governmental Efficiency and the District of Columbia Subcommittee

To hold hearings on S. 1845, clarifying certain provisions of the Home Rule Act relating to District of Columbia authority to fund capital projects through borrowing on the municipal bond market.

5110 Dirksen Building

10:00 a.m.

Agriculture, Nutrition, and Forestry

To hold hearings on the nominations of Ralph Ball, of Kansas, and W. Proctor Scarboro, of North Carolina, each to be a Member of the Federal Farm Credit Board, Farm Credit Administration.

324 Russell Building

Governmental Affairs

Business meeting, to mark up S. 864, requiring each Federal agency to submit an annual report to the President on the adequacy of its internal accounting and administrative control systems, S. 1131, requiring the Federal Government to pay interest on overdue payments to contractors, S. 1422, authorizing the Administrator of General Services to donate surplus Federal property to any State for the construction and modernization of criminal justice facilities, and H.R. 4431, providing for the designation of the E. Michael Roll Post Office, Forestville, Maryland.

3302 Dirksen Building

Judiciary
To hold hearings on S. 1030, revising certain provisions of the Gun Control Act (Public Law 90-618) relating to the licensing of manufacturers, dealers, and importers of firearms and ammunition, and prohibited activities concerning firearms.
2228 Dirksen Building

Select on Indian Affairs
To hold oversight hearings on the implementation of Indian elderly programs.
357 Russell Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

11:00 a.m.
Labor and Human Resources
To hold hearings on the nomination of Lilla B. C. Tower, of Texas, to be Director of the Institute for Museum Services.
4232 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on Federal Government policy as it relates to the defense industrial base.
6226 Dirksen Building

3:00 p.m.
Conferees
On S. 1211, authorizing funds for fiscal year 1982 for the control of toxic substances.
EF-100, Capitol

DECEMBER 10

9:00 a.m.
Energy and Natural Resources
To hold hearings on S. 1867, to increase the acreage limitations and abolish the residency requirements of the Federal reclamation laws.
3110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, on pending calendar business
235 Russell Building

Environment and Public Works
To resume oversight hearings on the Endangered Species Act (Public Law 96-159).
4200 Dirksen Building

*Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 613, amending the Federal Criminal Code to revise the scope of, and penalties under, the Hobbs Act, prohibiting interference with commerce by threat or violence.
2228 Dirksen Building

Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

Select on Intelligence
Budget Subcommittee
To hold closed hearings on intelligence matters.
S-407, Capitol

10:00 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agricultural Policy Subcommittee
To hold hearings on U.S. agricultural trade policies, focusing on the status of trade with the European economic community.
324 Russell Building

Budget
Federal Credit Subcommittee
To hold hearings to review Federal credit activities.
6202 Dirksen Building

Finance
To review safe harbor leasing provisions of the Economic Recovery Tax Act (Public Law 97-34).
2221 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold oversight hearings on activities of the Department of Energy.
3302 Dirksen Building

10:30 a.m.
Judiciary
Juvenile Justice Subcommittee
To resume hearings on S. 1688, making it a Federal offense when a convicted criminal commits a series of crimes involving firearms, S. 1689, providing that a convicted criminal sentenced to life imprisonment under State habitual criminal statutes be incarcerated in a Federal penitentiary and S. 1690, providing prisoners with a marketable job skill and basic literacy.
6226 Dirksen Building

2:00 p.m.
Governmental Affairs
Federal Expenditures, Research, and Rules Subcommittee
To hold hearings on an Office of Federal Procurement Policy proposal establishing a uniform procurement system.
3302 Dirksen Building

DECEMBER 11

9:00 a.m.
Energy and Natural Resources
To continue hearings on S. 1867, to increase the acreage limitations and abolish the residency requirements of the Federal reclamation laws.
3110 Dirksen Building

9:30 a.m.
Finance
Energy and Agricultural Taxation Subcommittee, and Taxation and Debt Management Subcommittee
To hold joint hearings on S. 1449, eliminating certain aspects of the renewable energy tax credit offset rules for the development of State and local conservation and renewable energy programs.
2221 Dirksen Building

10:00 a.m.
Environmental and Public Works
Business meeting, to resume markup of proposed amendments to the Clean Air Act (Public Law 95-95).
1202 Dirksen Building

Judiciary
To resume hearings on S. 1030, revising certain provisions of the Gun Control Act (Public Law 90-618) relating to the licensing of manufacturers, dealers, and importers of firearms and ammunition, and prohibited activities concerning firearms.
2228 Dirksen Building

10:15 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 696, providing that certain State or Federal organizations operating as libraries which serve the public be treated as tax-exempt public charities, S. 1883, conforming the net operating loss carryback and carryforward rules for the Federal National Mortgage Association to that available for other financial institutions, and S. 1757, clarifying the tax-exempt status of certain amateur sports organizations.
2221 Dirksen Building

1:30 p.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings to examine nonimmigrant business visas, and the adjustment of status.
2228 Dirksen Building

DECEMBER 14

9:00 a.m.
Commerce, Science, and Transportation
To resume joint hearings with the House Committee on Energy and Commerce on the proposed purchase of Marathon Oil Co. by Mobil Corp.
2123 Rayburn Building

9:30 a.m.
Judiciary
Constitution Subcommittee
Business meeting, to mark up S. 1730, revising certain provisions of the Freedom of Information Act by providing protectable interest in national security information, law enforcement investigations, business confidentiality, and personal property.
5110 Dirksen Building

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation, and Government Processes Subcommittee
To hold hearings on management of certain Federal assets, focusing on the sale of surplus property for revenue raising.
3302 Dirksen Building

DECEMBER 15

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

11:00 a.m.
Labor and Human Resources
Business meeting, to mark up S. 234, encouraging the establishment of home health care programs and providing expanded coverage of home health services under the medicare and medicaid programs.
4232 Dirksen Building

DECEMBER 16

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

*Veterans Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.
412 Russell Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agriculture Policy Subcommittee
To resume hearings on U.S. agriculture trade policies, focusing on the status of trade with the European enomomic community.
324 Russell Building

10:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on training and testing programs for air traffic controllers.
235 Russell Building

Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

DECEMBER 17

10:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on the impact of immigration numbers and the interrelation of immigration policy and population policy.
5110 Dirksen Building

JANUARY 11, 1982

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings on unemployment problems in the automobile industry, focusing on the need for job opportunities and training assistance programs.
4232 Dirksen Building

JANUARY 12, 1982

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To continue hearings on unemployment problems in the automobile industry, focusing on the need for job opportunities and training assistance programs.
4232 Dirksen Building

JANUARY 13, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 14, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 20, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 26, 1982

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, amending the Employee Retirement Income Security Act (ERISA) by simplifying both reporting and disclosure requirements, and the process for employers to provide retirement income to employees, and providing incentives for employers to provide pension benefits to employees.
4232 Dirksen Building

JANUARY 27, 1982

10 a.m.
Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold hearings on problems of drug abuse in the American school system.
4232 Dirksen Building

JANUARY 28, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 1785, increasing the penalties for violations of the Taft-Hartley Act, requiring immediate removal of certain individuals convicted of crimes relating to his official position, broadening the definition of the types of positions an individual is barred from upon conviction, increasing the time of disbarment from 5 to 10 years, escrowing a convicted official's salary for the duration of his appeal, and clarifying the jurisdiction of the Department of Labor relating to detecting and investigating criminal violations relating to ERISA.
4232 Dirksen Building

FEBRUARY 4, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1716, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

FEBRUARY 10, 1982

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 1748, exempting certain employers from withdrawal and plan termination insurance provisions of title IV of the Employee Retirement Income Security Act (ERISA).
4232 Dirksen Building

FEBRUARY 11, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

FEBRUARY 18, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

FEBRUARY 23, 1982

11:00 a.m.
Veterans' Affairs
To hold hearings on legislative recommendations of the Disabled American Veterans.
Room to be announced

FEBRUARY 25, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building
